SEED
CATALOG

BUSINESS INSTRUCTIONS

What We Do and What You Should Do

ORDER NOW—in January or February if possible before the spring rush begins. March and April are our busy months and our full force works day and night at high speed. Now to help both you and us we will allow a ten per cent discount on all orders of \$1.00 or more in one order (except collections, which are net), that are received up to March the first. Every order filled during January and February helps us just that much and we are passing this on to you.

EARLY ORDERING.—It will be helpful to our customers, as well as ourselves, to have orders placed early. Our policy is to make prompt shipments, but this is impossible as the busy season reaches its height. If your order is received late we may be sold out, as in case of shortage of crops, with no more stock obtainable. Send your order early; we will do the rest.

HOW TO SEND MONEY—Remittances can be sent safely by Post Office Money Order, Bank Draft, Express Money Order, Check or by Registered Letter. We accept stamps for small amounts. Be sure you register your letters if they contain cash. Money orders are the most economical and practical means of remitting.

OUR TERMS ARE STRICTLY CASH WITH THE ORDER

We do not send C. O. D., as the cost of collecting return charges is quite an unnecessary item of expense and the prices being given, we can conceive of no necessity to warrant goods being so sent.

NAME AND ADDRESS SHOULD ALWAYS BE GIVEN

Frequently we receive unsigned letters. Sometimes they contain money and orders. Sometimes, too, letters are received in which the name of the town is left out and the postmark is blurred. We cannot fill orders unless we know the name and address of the buyer. The easiest way for you is to use our order sheet, filling in the blanks.

MARKET-GARDENERS are requested to send us a list of the vegetable seeds they intend purchasing. We shall be glad to submit low prices on them. Market-gardeners who purchase seed in large quantities are entitled to a reduction in accordance with the quantity bought. Write us fully and we shall be very glad to reply and give prices.

Our Guarantee On Nursery Stock

All goods are guaranteed to reach you in good condition; mistakes, if made, will be promptly rectified. Accept shipment, examine and count on receipt and notify us at once should there be any errors, and the carrier as well, of any damaged stock. This guarantee not good unless ^{above} requirements are complied with. We do not guarantee continued growth. Remember, a ~~seed~~ shrub or plant is a living organism, as much as a cow, horse or man. It breathes, feeds, and is liable to attacks of disease and insects. At prices we sell, it is impossible for us to guarantee growth or to be responsible for stock after delivery to our customers in good condition.

GUARANTEE

Seeds of the best quality are apt to fail through improper treatment by sowing the seed too deep or too shallow, in too wet or too dry soil. They differ greatly as to the temperature required for germination. Some will germinate rapidly at a certain temperature, while others, if sown under the same conditions, are apt to decay, and for all these reasons it is impractical to guarantee seeds. I give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter, of any seeds, bulbs or plants sent out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

J. J. BUTZER.

DO YOU WANT THIS CATALOG?

Be sure and send us an order for seeds if you want this catalog next year. If you do not send us an order your name is taken from our mailing list, believing you have changed your address, or you may have come to the store, where you can get a catalog at the counter. We prefer to have you on our list as an annual customer; then you will always get our catalog as soon as it comes from the press. When you change your address notify us if you want this catalog.

NOVELTIES AND SPECIALTIES FOR 1935 AND PRECEDING YEARS

The following list of Flower Seeds is carefully selected to meet the demand of those who desire the finest. It contains many of the very new introductions as well as some of the latest and finest developments of the older strains of flowers.

AGERATUM

Blue Cap. 6 in. The flowers are much larger than those of Little Blue Star and of a deeper and richer color. It also surpasses Blue Ball in dwarfness and compactness of habit and the regular form of its inflorescence. The foliage is small and the plants have the appearance of miniature domes, so that it is quite ideal for edgings to flower borders. Pkt. 15c.

Little Silver Star. Is distinguished for its compact, close habit. The even, round, cushion-shaped plants which are only 4 to 5 inches high, measure from 8 to 10 inches across. When flowering they are so thickly covered with silver grey star-like flowers that the small light green leaves are practically hidden. The seedlings come as true as can be expected from Ageratum. Pkt. 15c.

ASTER WILT RESISTANT GOLDEN SHEAF (Bodger) (Grower's Description)

We take pleasure in introducing Golden Sheaf, the deepest yellow aster yet offered, and the only one that is wilt resistant. The flowers are fully double, with an attractive crest-like center, of good substance and fine depth of petal. It has all the characteristics of the Aurora type of aster so popular now with florists. The flowers last well when cut, and are excellent shippers. Pkt. 25c.

ASTER WILT RESISTANT BLUE FLAME (Bodger)

(Grower's Description)

In line with the trend of the times, we present Blue Flame, one of our contributions to the code for better flowers. The color is bright navy blue, distinct from any other dark blue or purple aster now offered, of the Giant Branching Creo class, with large Creo type flowers, fully double, on branching plants, suitable for cutting or garden use. The strain is very robust and wilt resistant. Pkt. 25c.

ASTER PAEONY-FLOWERED PURPLE ROBE (Howard-Bodger)

(Grower's Description)

Each season sees additions to this superb florist type of aster. Last year we introduced Rosebud and Silvery Rose, and now we are following these with Purple Robe, the first purple in the Paeony-flowered type. The flowers are large, well formed, fully double, of a very deep shade of purple blue. We recommend Purple Robe as a new cut flower for florists. Pkt. 25c.

ASTER GIANT MAMMOTH PAEONY FLOWERED ROSEBUD

The color of this aster is that rare, clear deep rose which reminds one of a newly opened rosebud, still fresh with dew. The flowers are large, well formed and fully double, borne on the long stout stems characteristic of the Paeony Flowered type. Whether in the garden or in bouquets, Rosebud is a lovely addition to this large flowered strain of Asters. Pkt. 15c.

ASTER WILT RESISTANT GIANT SALMON QUEEN (Bodger) (Grower's Description)

Few people realize that there is an aster of the fascinating shade of salmon found in Salmon Queen. It is a clear, pure salmon pink, blending to a rich gold salmon at the center. The flowers, large and well formed, are of the feathery Comet type, on long stemmed early flowering upright plants. A lovely aster that should be in every garden. And remember, it is wilt resistant. Pkt. 25c.

ASTER GIANT MAMMOTH PAEONY FLOWERED SILVER ROSE

Delicate lavender pink, full petaled, large, and fully double, with just a suggestion of silvery white at the tips, this is an aster which is unique in this class. Excellent for cut flower use, the plants are fine for bedding use as well. Pkt. 15c.

NOVELTIES AND SPECIALTIES FOR 1935 AND PRECEDING YEARS

GIANT CALIFORNIA SUNSHINE ASTER

The Most Beautiful Aster in the World

Plants of this new race grow three feet high and bear blossoms on long, stiff stems, admirable for cutting. The individual blooms are enormous, four to six inches in diameter.

The color in thes new asters is startlingly beautiful. A dual tone effect is obtained through the contrasting tints of the disc-like center and the outer or guard petals. In color they vary in shades of Enchantress-pink, apple blossom, deep rose, blue, and lavender, but the disc, sometimes light yellow, sometimes blue, adds considerably to the colorful effect of the blooms. In mixture only. Pkt. 20c.

ASTER SUPER GIANT LOS ANGELES

Aster Los Angeles is the first variety of this giant race, and how beautifully it upholds the romantic traditions of its namesake, the glamorous city of sunshine and flowers. The color is a serenely pure shell pink, in flowers which are full petaled, deep, and unusually large, yet artistically graceful in the feathery effect of the interlacing petals. Loosely arranged in tall pewter vase the long stemmed flowers lend a feeling of quiet dignity to any decorative arrangement. In the annual border or cut flower bed in the garden, they stand majestically above their fellow asters, and show up to best advantage when combined with a planting of the Blue Lace Flower, Didiscus. Pkt. 15c.

ASTER LILLIPUT FLOWERED

Comparing in size with the Lilliput Zinnias, these baby flowered asters fill a very definite place in the border or cutflower garden. The flowers are tiny and buttonlike in form, coming in profuse clusters on medium length stems, lending themselves very gracefully to flower arrangement or for a colorful border in the garden. The colors are bright and clear cut, some varieties having a deeper zone at the center.

Dark Blue. Pkt. 15c. White. Pkt. 15c.

Fiery Scarlet. Pkt. 15c. Finest Mixed. Pkt. 15c.

Rose. Pkt. 15c.

COSMOS KLONDYKE ORANGE FLARE

(Growers' Description)

Now at last we may grow the lovely orange colored cosmos and be assured of having flowers before frost. In most parts of the country this brilliant hued flower is practically unknown because of its late flowering habit. Realizing its beauty, however, we have bent our efforts towards producing an early flowering strain which may be enjoyed by all. We have accomplished this purpose with Orange Flare, a strain which is in full bloom less than five months from sowing. The color is the same vivid orange of the ordinary Klondyke, with attractive light green foliage. Pkt. 25c.

CALENDULA APRICOT QUEEN

Very much in the limelight at the present time, the valuable qualities of the Calendula are being exploited both for the market and in private gardens. Various breaks in color and form of flower have occurred, and what we here offer is a flat petalled variety of a bright apricot shade, deepening slightly towards the center. It is excellent for all the purposes to which a Calendula can be put. Pkt. 25c.

CALENDULA CHRYSANTHA OR SUNSHINE

Chrysantha is a new Calendula which is outstanding among all varieties known up to the present time. Many improvements have been made on Calendulas, but no other origination can begin to compare with this lovely new-comer from far-off Australia. The large flowers are an exquisite shade of clear buttercup yellow, with long loosely arranged petals, which droop to give the rounded appearance found in our favorite Chrysanthemums. Besides adding a bright golden splash of color to the garden, Chrysantha is a fine cutting variety, with long stiff stems, well adapted to combine with other flowers, such as blue delphinium, in bowls or vases. Pkt. 15c.

CALENDULA GOLDEN RADIO

The Calendula is becoming one of our most interesting plant families, with the wide variety of flower shapes and forms, plant types, and colors which are being developed each season. One of the most intriguing of the many forms is the type known as Radio, first appearing in the orange variety, and now Golden Radio has been developed as a companion form. The color is a bright golden yellow, in the characteristically quilled petals of the flower, which comes true to both type and color. Pkt. 10c.

CALENDULA BODGER'S PASTEL BEDDING MIXTURE

Designed especially for the home garden, this mixture contains a balanced combination of the lighter shades of Calendulas in the dwarfer growing types. Many new shades of apricot, salmon, cream, and white are included as well as the better known orange and lemon shades. There is also a novel assortment of flower types. Especially adapted for border use, the stems are long enough to use the flowers for cutting also. Pkt. 10c.

CLARKIA ELEGANS DOUBLE ENCHANTRESS (Growers' Description)

The ever increasing demand for the so-called "old-fashioned" type of flower has brought the Clarkias into their own as never before. Within the past four or five seasons there have evolved an unprecedented number of new colors in this old favorite. One of the finest of these varieties is Enchantress, light orange shading to pink, a delightful color which is sure to become a great favorite. The flowers are double and well placed on the long stems. Pkt. 15c.

*DELPHINIUM CLIVEDEN BEAUTY

Cliveden Beauty is the same beautiful light blue as the Belladonna Delphinium but is a highly improved strain. The flowers are larger and the plant a more robust grower, very even in height, making a striking show in the garden or when used for cutting. Pkt. 15c

ESCHSCHOLTZIA RAMONA (Frilled California Poppies)

Ramona type California Poppies are beautifully frilled and fluted, in the russet and pinkish shades, on neat growing plants which form a compact mass of flowers. They are very effective when used as a border or as a ground cover in the rose garden.

Ramona Hybrids, pkt. 10c

Those Marked * are Perennials

NOVELTIES AND SPECIALTIES FOR 1935 AND PRECEDING YEARS

DIANTHUS LACINIATUS SPLENDENS

*DIANTHUS LACINIATUS SPLENDENS (Grower's Description)

Free flowering and easily grown, the Dianthus family has for years furnished us with some of our most popular border subjects. One of the most recent additions to this family is the sterling novelty Laciniatus Splendens, a variety which, in our opinion, is the most striking Dianthus we have ever offered. The flowers are very large, over two inches across, in a brilliant shade of crimson, with a largely boldly contrasting glistening white eye. Pkt. 25c.

GODETIA SYBIL SHERWOOD

(Award of Merit, Royal Horticultural Society 1932)
(Grower's Description)

We consider this the most beautiful Godetia yet introduced. The color is a gorgeous shade of bright pink softened by an undefined edging of white. The plants are robust, about 20 inches high, strong stemmed, and so free flowering that the foliage is almost hidden from view. The flowers are ideal for cutting, with long stems and exceptional keeping qualities. We predict a bright future for Sybil Sherwood. Pkt. 15c.

GYPSOPHILA

*Pacifica, 4 ft. This variety is especially hardy as it withstood the severe frost of winter and extreme heat and dryness of summer. The seedlings form dense bushes and attain a height of 4 ft. the second year. The myriads of tiny pink blossoms appear on the slender spreading panicles. Flowers later than the Paniculata. Good for cutting. Pkt. 25c.

HOLLYHOCK

*Double Triumph. Grows 4-5 ft. high and is of branching habit, all the stems being studded by prettily waved and fringed flowers which appear in an entirely new range of colors and combinations of colors. Pkt. 15c.

HUNNEMANNIA SUNLITE

Sunlite is a double flowered poppy which is different. Its extra band of petals is produced on the outside, rather than the inside of the tulip shaped flowers, giving the impression of being open, even after the cuplike blossoms have closed for the night. The flowers are a bright canary yellow, and the foliage of the two-foot bush is a light gray-green. They like a sunny position in a well-drained border and flower freely in late summer. Pkt. 15c.

LARKSPUR GIANT IMPERIAL BLUE BELL

Blue Bell is a fine medium blue larkspur, deeper than sky blue, yet much lighter than lilac, a color up to this time lacking in the giant imperial type. The type is decidedly upright, with long basal branched flowering spikes, well adapted for cutting. Pkt. 15c.

LARKSPUR GIANT IMPERIAL LOS ANGELES IMPROVED

This is the same color as that popular stock flowered variety, Los Angeles, but in the vastly improved giant imperial type. It is the best of this type on the market. For greenhouse use, or where a tall, compact growing strain is wanted in the garden, this variety is preferable. The spikes are long and without side branches, making it an excellent kind for cutting. The color is a brilliant rose on salmon. Pkt. 15c.

LARKSPUR STOCK FLOWERED ROSAMOND

Rosamond is a pure rose color, a shade which has been entirely lacking in larkspurs up to this time. All other rose varieties have faded badly, but this one has that rare quality of holding the pure rose color until out of flower. It is very uniform in height, and comes into flower two weeks earlier than other stock flowered varieties. Pkt. 15c.

LEPTOSYNE—Yellow Daisy

Stillmani. An easily grown, attractive annual, particularly valued because it blooms early and continuously for many weeks. Beautiful daisy-like flowers of a pure golden yellow carried on plants growing 20 in. tall. Pkt. 10c.

MARIGOLD, GUINEA GOLD

Unbounded enthusiasm! These two words express only conservatively the reaction of gardeners to this magnificent new Marigold which surpasses anything ever created in this class. The graceful pyramidal plants grow 2 to 2½ ft. tall and bear 30 to 40 semi-double Carnation-like blooms measuring 2 to 2½ in. across. The color of the flowers is the most intense pure orange-gold imaginable. Blooms continuously throughout the summer and fall. Splendid for the garden and for cutting. Pkt. 10c.

MARIGOLD DWARF FRENCH DOUBLE MONARCH STRAIN

Dwarf French Marigolds are among the finest border subjects for home gardens. Monarch strain has all the qualities which make up the ideal type, dwarf compact growth, very large, tight double flowers, in a wide color range which includes combinations of orange, bronze, yellow and mahogany. Most of the flowers instead of being a solid self color, have two or more shades combined in stripes or spotted effects, which adds to the interest of the variety. Pkt. 10c.

NOVELTIES AND SPECIALTIES FOR 1935 AND PRECEDING YEARS

MARIGOLD ROYAL SCOT

(Grower's Description)

Modern as the crack Scottish Railway train The Royal Scot from which it borrowed its name, this marigold is the most striking yet introduced. The large well-formed double flowers are produced in abundance on plants from 24 to 30 inches in height. The color is a charming combination of mahogany and gold in symmetrical stripes which radiate from the center of the flowers. We feel confident that Royal Scot will be welcomed by florists and home gardeners alike. Pkt. 15c.

MARIGOLD (Tagetes) SIGNATA PUMILA (Golden Gem)

This is the border marigold which has been receiving so much publicity in the garden magazines lately, and you cannot afford to be without a border of it in your garden if you would be up on the latest in garden favorites. Dwarf and compact in habit, the plant is covered with dozens of small single orange flowers throughout the summer. For long blooming period and brilliant coloring, Golden Gem has few equals as an edging plant. Pkt. 10c.

MARIGOLD (Tagetes Signata Pumila) LITTLE GIANT (Bodger)

(Grower's Description)

One of the leading horticulturists of the country is so fond of Tagetes Signata Pumila, and so disappointed with the results obtained from any strain available, that he has given us no peace until we succeeded in developing this neat, dwarf, really compact strain. We are proud to offer Little Giant as the highest development yet attained of this pretty little Marigold, with slender fernlike foliage and an abundance of dainty, single, golden orange flowers on plants which are only four to six inches high, with a spread of eight to ten inches. Pkt. 15c.

*POPPY NUDICAULE SANDFORD'S GIANT STRAIN

(Grower's Description)

Of late years there has been a great renewal of interest in Iceland Poppies. Consequently there have been many new strains developed and put on the market, and it has become necessary to choose the best one among all those offered. We have maintained extensive trials of all strains during the past two seasons, and from our findings recommend Sandford's Giants as the outstanding strain of the present day. The flowers are huge and well-formed, in a wide range of colors, borne on long stiff stems, which are fine for cutting. Pkt. 15c.

SALPIGLOSSIS PURPLE SELF (Bodger)

(Grower's Description)

This is undoubtedly the richest dark variety in the Salpiglossis group, a distinct new shade. The color is a rich deep velvety purple, free from all markings, holding well until out of bloom. The flowers are large and of good substance, a striking subject for combination with other flowers, particularly red or gold shades. Pkt. 15c.

*SCABIOSA CAUCASICA ISAAC HOUSE STRAIN—(Blue Bonnets)

This is a very greatly improved strain over the ordinary scabiosa caucasica. The flowers are surprisingly large, gracefully fringed and ruffled, in shades of blue ranging from very dark shades through the midblues to lavender. During the hot months of June and July, when most flowers look rather wilted from the heat, these hybrids are unaffected by the temperature and make a fine showing in the garden, or for cut flower use. Pkt. 25c.

SCHIZANTHUS SUNSET HYBRIDS (Bodger) (Grower's Description)

This carefully bred strain is the result of our years of endeavor to produce an arrestingly bright strain of this ever-popular flower. Sunset Hybrids is the accomplishment of this ideal, a well balanced blend consisting of bright red and carmine shades, each butterfly-like flower delicately marked with gold or white. The two-foot plants are covered with a mass of flowers, which are excellent for cutting. One of the most easily grown garden annuals, it is also fine for pot plant use. Pkt. 15c.

* STATICE DICKSONII (Grower's Description)

Dicksonii is undoubtedly the outstanding Statice introduction of recent years. It is quite unlike any other variety in commerce, and as far as we can discover, unknown to the trade of this country and Europe. The flowers are very large and open, borne in quantities on long-stemmed large sprays which have a delightfully lacy open effect. The plants are fully hardy, rather slow growing, with tough dark green, long narrow leaves making a neat clump from which rise the sprays of deep rose flowers. Plants will not flower the first year from seed, but they are well worth waiting for an extra season. Pkt. 25c.

THE GREATEST SENSATION IN FLOWERS

BURPEE'S DOUBLE HYBRIDS NASTURTIUMS

Giant Double Flowers of Gorgeous Colors

Burpee's Description
of these Wonderful
NASTURTIUMS

Giant Sweet-Scented Flowers

2 $\frac{3}{4}$ to 3 inches across

All the lovely, soft, and best brilliant colors, and, who knows, perhaps colors never before seen in Nasturtiums! As these new Double Nasturtiums are hybrids, there may be an occasional single or semi-double flower.

The large DOUBLE flowers, especially those of a soft primrose color, are exquisitely sweet scented. Colors range from a pearly lemon shade to brilliant scarlet. The orange and scarlet flowers grow to a size never before seen in these colors.

Burpee's Double Hybrids in gorgeous colors are produced on long stiff stems. They are excellent for cutting as well as for garden decoration.

The plants are semi-dwarf, throwing short runners from a well-rounded free flowering bush, with long wiry stems bearing the numerous flowers well above the foliage, which gives the effect of a solid mass of color.

Ever since the introduction of the Double Nasturtium Golden Gleam, gardeners everywhere have been eagerly awaiting more colors in Double Nasturtiums. NOW BURPEE HAS CREATED THEM.

Burpee's New Double Hybird Nasturtiums. Pkt. 20c

NASTURTIUM

Golden Gleam (Bodgeri. fl. pl.)

This new type is of semi-trailing habit and a new development in Nasturtiums. Plants form a vigorous large bush which throws out short runners averaging 18 inches. The sweet scented, large double flowers are of a golden yellow color and average two to three in. across; they are borne on erect stiff stems six inches in length and stand well above the foliage, an arrangement which adds immeasurably to the showy appearance of the plant; they are also splendid for cutting. The seed we offer is strictly originator's stock. Pkt. 10c

We try to give prompt service
and supply the very best seeds.

NOVELTIES AND SPECIALTIES FOR 1935 AND PRECEDING YEARS

URSINIA (Jewel of the Veldt)

Anethoides. An attractive annual, native of South Africa. It is easily grown from seed sown outdoors during the spring. The lovely, daisy-like flowers are borne on long wiry stems. They have rich orange-yellow ray-petals with a crown of deep purple spotted with jet-black. The plants bloom continuously from early summer until frost. Has graceful, lace-like, light green foliage; 10 in. Pkt. 15c.

VENIDIUM (Monarch of the Veldt)

Fastuosum. Large, brilliant orange flowers, 3 in. across, with a black-purple zone at the base of the ray-petals and a dark center with a gray-green, wool-like tuft. The plants grow 2 to 3 ft. tall and bloom from midsummer until frost. The foliage is a soft gray and forms a splendid background. Fine for garden display and for growing under glass. It is one of the most outstanding new flowers of recent introduction. Pkt. 15c.

VERBENA

Beauty of Oxford Hybrids. Many shades ranging from rose-pink to rose-red. Large blooms in elegant round trusses. Exceedingly showy. Pkt. 15c.

VERBENA HYBRIDA COMPACTA TYPE (Edging Verbenas)

These are distinct from all other types of Verbena, very compact, dwarf, and free flowering. The color range is very wide, in bright shades. They are excellent for the annual rock garden in a sunny position, for borders or edgings, or for window boxes or pots.

Mixed, **pkt. 10c**

VERBENA ROYAL BOUQUET MIXED

As the name suggests, this type is excellent for cutting. The plants are definitely upright in habit, several 10 to 12-inch stalks to a plant, each bearing full clusters of the large starry eyed flowers at the tip. They are fine for pot culture, as well as cutting. The colors comprise a full range of the brighter shades. Pkt. 10c.

ZINNIA FANTASY MIXED (Bodger) (Growers' Description)

New zinnias are always welcomed by home growers and florists alike. While the giant flowered varieties are still popular, the trend of late years has been toward the smaller flowered, more graceful strains. This new Fantasy Mixture meets this demand in all details: the rounded flowers are composed of a mass of shaggy ray-like petals which give a delicate and refined appearance to the medium sized double flowers, large enough to satisfy the desire for mass of color, yet small enough to lend themselves gracefully to flower arrangement. The color range includes the brightest shades of reds and orange, as well as the popular pastel pinks and cream. Pkt. 25c.

ZINNIA DESERT GOLD (Bodger) (Growers' Description)

Several years ago we introduced the fascinating new zinnia, Crown O' Gold, in mixture. The yellow and gold shades in this mixture were immediately proclaimed the most attractive and sought after as separate colors. We are very happy now to offer these shades as Desert Gold, a variety containing the light and deep hues of gold, each petal overlaid at the base with a deeper golden yellow, giving a charming bicolor combination. Those who appreciate the finest in zinnias will welcome Desert Gold. Pkt. 25c.

ZINNIA LILLIPUT TOM THUMB MIXTURE

Tom Thumb is without exception the very dwarfest zinnia known. The plants are rounded and compact, 4 to 6 inches high, literally covered with well formed flowers of the lilliput type. The color mixture includes red, orange, yellow, pink, rose and other pastel shades. It is a fine border plant, especially for the hot dry sections of the country, and is the best zinnia to use in pots or window boxes. Pkt. 10c.

VEGETABLE SPECIALTIES CARROTS

Tendersweet. The newest and best, sweet, tender and brittle. Rich orange-red color. In this new carrot, which is also known as Imperator, we have one of the finest varieties ever grown. An exceptionally heavy yielder, which is always sweet, tender, and brittle. The roots are 8 to 10 inches long, tapering from the shoulder to the rather blunt end. Color is rich orange-red. The roots are always uniform in shape and size, and the plants themselves are noticeable on account of the dark purplish green leaves. While a new variety, it is already in demand by market gardeners, as it has the shape, size and color to show to advantage, and the sweet and tender quality to further recommend it. Pkt. 10c; oz. 15c; 4 ozs. 50c.

Morse's Bunching. This variety has a rich red even color throughout, small red core, roots almost cylindrical, 8 inches long, smooth, and tops short and strong. It matures in 80 days and is sweet and tender. It excels for a fall and winter harvest. Pkt. 5c; oz. 25c; ¼ lb. 75c; lb. \$2.50.

PEAS

Laxton's Progress. 62 days. The earliest and by far the best of the large podded, large-fruited wrinkled peas. Of all the varieties producing peas of equal quality, this is the heaviest yielding. It bears long pods, averaging one more pea to the pod than Laxtonian. It is an improvement upon Laxtonian, which has hitherto been the finest of the dwarfs for table quality. Pkt. 10c; ½-lb. 15c; lb. 30c.

SWISS CHARD

Fordhook Giant. A very outstanding Swiss Chard growing to enormous size. The rich blue-green leaves are much crinkled or savoyed. When fully developed, the leaves measure 10 inches in width and 2½ feet in length. The texture of the leaves is thick and fleshy and their quality is highly appreciated cooked in the same way as spinach. The pearly white stems or stalks measure 2½ inches in width and give an excellent dish prepared like asparagus. Pkt. 10c; oz. 15c; 4 ozs. 40c.

Special Collections, Etc.

“ROSE CITY” SWEET PEA COLLECTION

This collection contains one package each of the following—all Giant Spencers

CREAM

What Joy—Primrose, shading to cream. A charming tone and so far the nearest approach to a true yellow.

PINK

Pinkie—Rich rose pink. This extra vigorous sort is universally accepted as the largest flowering and finest of its class.

LAVENDER

Austin Frederick Improved—A flower of immense size beautifully placed on very long stiff stems, with fours predominating. The color is a most pleasing shade of lavender, the standard being slightly blue in shade.

25 cents for above Collection, Postpaid**ORANGE**

Colorado—A shade of orange that will please on account of its richness and brilliance of large well placed blooms.

STRIPED

America—The ground color is ivory-white, distinctly striped with brilliant crimson-red. It is a charming variety which blooms very freely and carries its striking blooms in threes or fours on fine long stems. It makes an exquisite bunch.

SCARLET

Fire—The name suggests the glorious color of this magnificent Burpee introduction. It is a scintillating flaming red with a fire-like sheen of scarlet-cerise. Fire is sun-proof and vigorous. It often carries five well-displayed blooms to a spray.

GARDEN COLLECTION No. 1

The amateur gardener, not familiar with the different kinds, will find this collection a simple solution of the problem of selection. While the prices of collections are much lower than the regular list, we use only seeds of the highest quality, but being enabled to put them up during leisure time, the saving goes to the buyer. No changes will be made in the assortment. Orders can be filled immediately on receipt.

ORDER NOW—In January or February if possible before the spring rush begins. March and April are our busy months and our full force works day and night at high speed. Now to help both you and us we will allow a ten per cent discount on all orders of \$1.00 or more in one order (except collections, which are net), that are received up to March the first. Every order filled during January and February helps us just that much and we are passing this on to you.

THE ROSE IS THE “QUEEN OF FLOWERS”

LIST OF SELECT STRAINS OF

Notice in Reference to Varieties

Modern varieties of vegetables are in a great many cases selections and highly improved strains of older and inferior types. These improved strains are stable to a certain degree only, and considerable care is entailed, in the growing of high-grade seeds, to keep these types up to present standard and to improve on them.

We would point out, therefore, that under conditions of soil and season not altogether favorable, varieties may vary from the descriptions in these pages, especially as regards earliness or lateness of season, type and keeping quality.

The descriptions are intended to serve as a guide only, in the selection of sorts likely to prove most suitable for purposes required.

ASPARAGUS

No vegetable is more healthful or more palatable than the tender asparagus that appears on the table very early in the spring.

Every home garden should have a bed about ten by twenty feet, planting about one hundred roots. This would furnish enough tips from day to day to supply the family table.

Set the rows two feet apart instead of four as for field culture, and one foot apart in the row.

Drill the seed thinly in rows fifteen inches apart during March or April. Thin out to two inches apart in order to have strong plants.

Exercise great care in preparing a field because it will last many years.

Transplant during February, setting the roots two feet apart, in furrows six feet apart. Carefully spread out to avoid matting. The furrows should be ten or twelve inches deep and run North and South in order to get the sun on both sides of the rows. Cover the roots about three inches and as the plant grows throw the soil toward the plant. Each year when the berries are red, cut the plants close to the ground and burn, then spray the entire field with sulphur, in order to destroy any germs of mildew, red spider or rust that may be there. Keep a mulch over the row with a harrow, but cultivate more deeply between the rows. Use stable manure liberally and hill up a little higher each year. Irrigate freely during the growing period. Three pounds of seed is sufficient to plant an acre.

A year may be saved by buying the plants (one-year-old are greatly to be preferred) and setting them at least two feet apart in the row, and the rows not closer than four feet; see that the roots are well and evenly spread out in planting and that they are not exposed to the air longer than is absolutely necessary, as they deteriorate rapidly.

Palmetto—This is the favorite and earliest variety grown in the South. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 35c; lb. 75c

Pedigreed Washington—The tips are tight and firm and do not open out or begin to branch until well out of the ground, making the finest kind of green Asparagus both for home use and market. It is nearer to being rustproof than any other variety, and the large, luscious stalks will be greatly appreciated.

Pkt. 5c; $\frac{1}{2}$ oz. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.00

ARTICHOKE

Artichoke, Ger.; Aritchaut, Fr.; Alcachofa, Sp.

Large Green Globe—The well-known French vegetable; the undeveloped flower heads, when properly prepared, make a most delicious dish. Pkt. 10c; oz. 75c

	50	100	1000

2-year roots, by express	1.25	2.50	15.00

Asparagus Knife

The best knife for cutting Asparagus. Ea. 50c, postpd.

BEANS DWARF OR BUSH GREEN PODDED

Culture—No crop responds more readily to good soil and cultivation than beans. A light, rich, well-drained loam which was manured for the previous crop is desirable. If too rank manure is used it is apt to make the plant run too much to vine. Beans are extremely sensitive to both cold and wet, and it is useless to plant them before the ground has become dry and warm. The largest returns will result from planting in drills from two to three feet apart and leaving the plants two to six inches apart in the row. Up to the time of blossoming they should have frequent shallow cultivation, but any mutilation of the roots by cultivation after the plants come into bloom is likely to cause the blossoms to blast and so cut off the crop. The cultivation of beans should always be very shallow and it is useless to expect a crop from a field so poorly prepared.

Varieties should be selected so as to give a succession both of string and green shelled beans. The wax podded varieties will degenerate into a mixture of green wax podded plants unless there is constant attention given to the removing of any green podded plants which may appear in the seed crop, and the constant selection of plants of the highest type for stock seed. Hence it is especially important to use seed from reliable sources only.

BURPEE'S STRINGLESS GREEN POD

The Best Green Podded Bush Bean for the
Northwest, should be in every garden

This famous bean is absolutely unequalled! It combines unusual hardiness, extreme earliness, and wonderful productiveness with pods of handsome appearance and finest quality. Extra early plantings may be made to produce the earliest crop, and even with later plantings Burpee's "Stringless" is always the quickest to produce pods. By repeated plantings pods may be had in constant succession from Spring until cut off by heavy frosts in the Fall. Combined with the extra hardiness and early maturity, the pods are the finest in quality, of a rich green, very round and straight, five inches long, solidly meaty and broad—deeply saddle-backed, caused by the rounded swell of the fleshy sides. The pods are tender, brittle, and of finest flavor, always entirely stringless, even when fully matured. In a word, all planters now agree that Burpee's Stringless is absolutely unequalled! Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25, postpaid

EXTRA EARLY RED VALENTINE

Next to Burpee's Stringless, this is the most popular of all green-podded bush beans. In this improved strain the pods are very fleshy, round and saddle-backed, with only slight strings. Bushes grow uniformly about fifteen inches in height.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c, postpaid

EARLY STRINGLESS REFUGEE

An improved stringless strain. Very hardy and extremely productive. Pods round and straight, tender, brittle, absolutely stringless and of finest quality; medium early. Great improvement over Refugee or 1,000 to 1. Excellent home or market variety as a "snap." Unsurpassed for picking or canning. Second early.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c, postpaid

DWARF HORTICULTURAL

One of the best dwarf sorts for green shell beans for the home garden and market and can be used early as a green podded snap bean. The plants are very productive, compact and upright, with large leaves. The mature pods are about five to five and one-half inches in length, broad and thick curved, with splashes of bright red on yellowish ground. They become fit for use as green shelled beans early and in this condition the beans are very large, easily shelled and are about equal to the Lima in quality. Seed large, oval, plump, pale buff, splashed with deep red.

Large pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c, postpaid

BROAD OR FAVA BEANS

ENGLISH or BROAD WINDSOR, or FAVA BEANS—These beans are also known on the Pacific Coast as "Horse Beans." In Europe they are cultivated extensively for eating purposes. If shelled when young and cooked for about twenty-five minutes in boiling water with a pinch of baking soda added, they make a most delicious vegetable.

In the Willamette Valley these should be planted in the fall, November and December preferably, although they can also be planted in the early spring with good success, when the season is favorable. Seed can be planted in hills or in drills. When sown in drills, plant so that seeds are six to nine inches apart, covering three or four inches deep, and in rows thirty to thirty-six inches apart. If the tips of the plants of the Fava are cut off after the plant has flowered, the crop will set better, the pods will be larger and develop earlier, and also the attack of *Aphis* will be checked.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 25c; 5 lbs. \$1.00, postpaid

ADVICE Watch for the slightest indication of mildew. When it appears spray with Sulphur. This will not only arrest any further advance of mildew, but it will fertilize the soil and destroy any germs of Fungi that may be there.

CASTOR BEAN

Used for medicinal purposes and by some claimed to keep moles away.

Per pkt. 10c, postpaid

A special garden size for peas, beans and sweet peas will insure you large, luscious peas and beans, and abundant sweet pea blossoms for gorgeous coloring.

Price 25c

CHANGE OF ADDRESS

We shall appreciate notification by our customers of any change in address, as the edition of our catalog is limited, and we want it to reach its proper destination.

BURPEE'S
STRINGLESS

BEANS DWARF OR BUSH, YELLOW OR WAX PODDED

BUTTER BEANS

In the northern latitudes the term "butter beans" is often applied to beans producing wax pods, while in the south the term is usually applied to Limas.

BRITTLE WAX

Brittle Wax is most attractive, of superb quality, and conceded the "Best of All." The bushes are remarkably hardy and very prolific. The pods are handsome, round, extremely fleshy, and always stringless and tender. They measure about 7 inches in length and are slightly curved. Burpee's Brittle Wax has made a record everywhere with its superb quality, extreme earliness, and great productiveness.

Per pkt. 10c; $\frac{1}{2}$ lb. 20c; lb. 35c, postpaid

PENCIL POD BLACK WAX

One of the best round pod wax beans, both for home use and market. Bushy growth, about fifteen inches high, heavy foliage. Pods 6 to 7 inches long, round as a pencil, clear yellow, very brittle and stringless, rich mild flavor. An early sure cropper of the finest quality.

Per pkt. 10c $\frac{1}{2}$ lb. 15c; lb. 35c, postpaid

PROLIFIC BLACK WAX

The earliest wax variety. Pods clear, light yellow, round fleshy tender, stringless and remain in fit condition for some time. A heavy yielder that we can recommend.

Large pkt. 10c; $\frac{1}{2}$ lb. 20c; lb. 35c, postpaid

REFUGEE WAX

This is a favorite because of its hardy growth and enormous yield of tender, round stringless pods of excellent flavor. Plant from April until September.

Per pkt. 10c; $\frac{1}{2}$ lb. 20c; lb. 35c, postpaid

IMPROVED GOLDEN WAX

Pods rather flat, but of good quality; four inches in length, half an inch broad, of light golden yellow; quite brittle, with only slight strings when young. Plants stiffly erect, bearing a large crop of fine pods held well above the soil.

Per pkt. 10c; $\frac{1}{2}$ lb. 20c; lb. 25c; 5 lbs. \$1.00, postpaid

Bush Lima Beans

Culture—Select land that is especially warm, rich and well supplied with vegetable fibre or humus. Plant as soon as the soil has become warm in the spring. Make the rows 2 feet apart and give to each plant 6 inches space in the row. A top-dressing of poultry manure, ashes, or some good fertilizer or compost around the plants will be of much benefit in hastening maturity and increasing the yield.

Burpee's Bush Lima—Comes absolutely true from seed. The bushes grow eighteen to twenty inches high, stout growth and always erect, yet branching so vigorously that each plant develops into a magnificent circular bush from two to three feet in diameter. It is an immense yielder, the handsome large pods being well filled with very large beans, identical in size and luscious flavor with the well-known large Pole Beans.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c, postpaid

Burpee-Improved Bush Lima—This is the finest Bush Lima that has ever been introduced. The bush is sturdy in habit and twenty to twenty-four inches high, with large leaves. It bears its beans on long spikes in very prolific clusters well out from the plant. There are from four to seven pods in each cluster and often as many as eleven. Each pod contains three, four or five beans and there are more pods containing five than there are containing three beans, so that there is an improvement of from one to two beans in each pod, and this, taken with the great number of pods borne, makes the yield enormous. In quality this bean ranks with the very best and the beans are of large size. In earliness it comes between Henderson's and Burpee's Bush, and is about a week earlier than the latter variety. This bean is bound to be the greatest, most popular Bush Lima—a continuous bearer.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c, postpaid

Fordhook Bush Lima Bean—The only stiffly erect bush form of the popular "Potato" Lima! Both pods and beans are twice the size of Dreer's Bush Lima and more than half again as large as the Challenger Pole Lima. Is fully a third heavier cropper and therefore is bound to entirely displace the Kumerle (Dreer's or Thornburn's) Bush Limas. In season it is from four to six days earlier.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c, postpaid

Pole Lima Beans

Oregon Pole Lima—Grows to an average of about five feet, is a strong, thrifty vine and very prolific, bearing continuously until frost, the blossoms bursting from the top shoots in long panicles, while the pods can be seen in every stage of development, to the matured beans at the bottom of the vine. Pods are well filled, having three to five large beans of the finest quality. Gather any time after full maturity.

Oregon Pole Lima can be planted in any garden soil as early as April or late as July. Give the same care and culture as other Beans, and are ready to use when the pods are filled and first begin to ripen. It is not necessary that they should dry on the vines, except for seed. They are at their best when the full green pods begin to turn yellow.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c, postpaid

BEANS—Pole or Running

Culture—Pole Beans are even more sensitive to cold and wet as well as to droughts and hot winds than the dwarf varieties, but are of superior quality and productiveness. After settled warm weather set poles four to eight feet long and slanting slightly toward the north, in rows four feet apart and extending north and south, the poles being three feet apart in the row. Set in this way, the vines climb better and the pods are straighter and more easily seen. Around each stake plant five to eight beans two inches deep, and when well started thin to four plants. It is a natural habit of all vines to climb around a pole always in one direction, and they will not do well if an attempt is made to train them to run in the opposite direction. Another plan is to plant in rows thickly enough so that there will be one plant to eight or ten inches. Set posts five feet high firmly at each end of the rows and drive stakes made of 2x2 lumber at intervals of about sixteen feet along the rows. Stretch a wire, size No. 10 or 12, between the posts along each row, and fasten it to the tops of the stakes with wire staples; run a light wire or twine along the bottom about six inches from the ground, fastening likewise to the posts and stakes. Between these two horizontal wires stretch a wire or twine perpendicularly wherever there is a plant; the vines will run up these until they reach the top wire, when they will care for themselves. Another way is to omit the bottom wire and stick small stake two to six inches in the soil and fasten to top wire.

GREEN PODDED VARIETIES

Kentucky Wonder is the best Pole Bean for the West

Often sold as Asparagus Beans

Old Homestead, or "Kentucky Wonder"—See natural size of pod, engraved from a photograph. The pods seven to nine inches long, are so fleshy that they are greater in width than in breadth, being deeply creased or "saddle-backed". They are solidly meaty, stringless when young, and of finest quality. If pods are gathered as they mature, the vines will continue to bear to the end of the season.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c, postpaid

Burger's Green-Pod Stringless—This is earlier than Old Homestead and covers a longer season of productiveness. The pods, borne in clusters, average six to eight inches in length, are uniformly straight, of a rich dark green, and so meaty as to be really "saddle-backed." The pods are as entirely stringless as the popular Burpee's Stringless Green-Pod Bush Bean; they are equally tender and of similar sweet, mild flavor. The dry beans are of a pearly whiteness.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25, postpaid

Chinese Yard-Long (Pole Beans)—Brown seed, an attractive and curious variety. The pods often grow to be nearly a yard long. The whole pod and beans are crisp, tender and with a delicious asparagus flavor, rivaling almost any of the little podded beans when cooked.

Pkt. 10c

Horticultural, Cranberry or Wren's Egg—A popular old variety for either snapshots or dry shell beans, especially adapted for short seasons and cool locations.

Per pkt. 10c; lb. 30c, postpaid

Oregon Giant Greenpod (Dickenson's Yount)—The large fleshy pods 10 to 12 inches in length are free from all stringiness and are tender, crisp and delicious. The size, splendid quality and rich flavor make this one of the most desirable beans for home gardens and for canning.

Per pkt. 15c; lb. 40c

"Lazy Wife's"—The pods, of medium dark green color, are produced in great abundance, and measure from four and a half to six inches in length. They are broad and thick; fleshy and entirely stringless. The pods retain their rich, tender, and stringless qualities until nearly ripe, and at all stages are peculiarly luscious. Each pod contains from six to eight round, white beans, which make excellent winter shell beans. Per pkt. 10c; lb. 30c, postpaid

Scarlet Runner—In northern locations where the summers are cool and short, this takes the place of the Large Lima Beans. Plants are of strong quick growth, bearing large sprays of bright scarlet pea-like flowers. When fully ripened, the dry beans are of bright scarlet, heavily blotted with purple. Pkt. 10c; lb. 30c, postpaid

White Creaseback—A popular early green podded pole bean for snapshots; of rapid growth and very productive. Pods grow in clusters and are from five to six inches in length, perfectly round, being deeply creased or "saddle-backed." They are solidly fleshy, entirely stringless, and of fine quality. The dry seed is pure white and excellent for winter use.

Per pkt. 10c; lb. 30c, postpaid

White Dutch Case Knife—Bears large flat pods early in the season. Being white-seeded, it is excellent to grow dry shell beans for winter.

Per pkt. 10c; lb. 30c, postpaid

WAX POD POLE VARIETIES

Kentucky Wonder Wax Beans—In saying that this bean is even more prolific than its green podded namesake, we do not overstep the bounds of truth. It commences to bear when scarcely higher than the average bush variety. The seed is brown.

Price 10c per pkt; $\frac{1}{2}$ lb. 15c; 30c per lb., postpaid

Golden Cluster Wax—This variety of Pole Bean is noted for its great productiveness, and furnishes delicious yellow pods from about the middle of July until the vines are destroyed by frost.

Per pkt. 10c; lb. 30c, postpaid

YARD LONG

GARDEN BEETS

Culture—The best results are obtained on a deep rich sandy loam. If wanted very early, sow such sorts as Crosby's Egyptian or Detroit Dark Red in hotbeds and transplant, cutting off the outer leaves. For general crop, sow in freshly prepared soil as soon as the ground will permit, in rows eighteen inches apart covering about an inch deep and pressing the soil firmly over the seed. When the plants are well established thin out to four inches apart in the row. For winter use the turnip varieties may be sown in June, so as mature late in the season; the roots are stored in a cellar and covered with sand or sandy soil to prevent wilting; or they may be kept outdoors in pits such as are used for apples and potatoes. One or two ounces, or single packets of two or three sorts will give a good supply for a large family.

Detroit Dark Red—Receives nothing but praise everywhere—It is rather astounding how, despite the many new beets introduced from time to time, that the old Reliable Detroit gains in favor instead of waning.

The Detroit is one of the best of the dark red turnip beets for main crop. See illustration. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c, postpaid.

Bastain's Half-Long Blood—The roots are shaped like an olive, of large size and have dark red flesh which retains its tenderness until late in the season.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c, postpaid

Extra Early Egyptian—Grows extra quickly, producing flat smooth turnip roots averaging two inches in diameter. Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c, postpaid.

Crosby's Egyptian—Roots are smooth and round in form. They are of finer quality, combined with the same extra maturity. Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; per lb. 75c, postpaid.

TRY THIS

Plant the little round radishes in the same row at the same time with beets or carrots. The radishes will break the way for the beets and carrots and will be ready for pulling by the time they need the room.

DETROIT DARK RED—THE BEET FOR THE NORTHWEST

Early Wonder—This variety is a selection of Crosby Egyptian. We believe it to be one of the earliest and best turnip shaped beets grown. It is a little earlier than Crosby Egyptian and is so uniform in growth that the crop can be harvested practically at one time, yielding the land early and quickly for a second crop. This variety is ready for bunching 73 days after planting the seed.

Prices: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c, postpaid

Mangel Wurzels or Stock Beets

Danish Sludstrup—The Danish Government encourages the growing of root crops by offering certificates of merit to growers who select and produce sorts which are of distinctive value. Sludstrup is considered the best of all Mangels, having been awarded first-class certificate. In color it is reddish yellow and of a distinct type. It contains the largest per cent of nutrient found in any sort. It is very hardy, grows well above ground and is easily pulled.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 50c

Giant Half-Sugar—This magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of very much higher nutritive value, the roots for feeding purposes being really more valuable, pound for pound, than those of the very best strains of Sugar Beet, and the yield under equally favorable conditions is more than double. The roots grow partly out of the ground and because of this and their shape the crop can be harvested and stored at less expense than any other root crop. We are certain that every one who plants this variety and grows it with care will be much pleased. Every farmer should try it.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 50c, postpaid

Golden Tankard—A smooth yellow-fleshed mangel, the roots are of large diameter, tapering quickly at the bottom, which is quite broad, with only a small tap-root. It grows largely above the soil and is easily harvested. It yields an enormous bulk on good land, and can be grown closely in rows. This is decidedly the best of all these four mangels for stock feeding.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid

Mammoth Long Red—The largest of all the Mangels and the heaviest cropper. Skin is red; flesh white, zoned with red. This variety produces a larger amount of good feed than any other Beet, and is recommended as superior to all others.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid

Danish Sludstrup

Broccoli

Should be treated the same as cauliflower, which it resembles. In fact, it is practically a cauliflower, but grows larger and taller and is harder and easier to grow. It requires two months more time to mature, which it does best in cool weather. Plant and cultivate the same as cabbage or kale and give plenty of water.

St. Valentine—The finest of all Broccoli. Is a sure header of immense size and finest quality, and is ready for market in February. The large, solid, handsome white heads remain in good condition longer than other varieties.

Per pkt. 10c; oz. 80c

Large White French—A valuable variety with large, white heads, firm and of good flavor. Pkt. 5c; oz. 50c

BROCCOLI

Sprouting (True Calabrese)—This is distinctly different from the type of Broccoli which forms large white heads like Cauliflower. This type, long a favorite in Europe, has recently been introduced into this country from Italy. The plants are hardy and rapid growing, and produce a large central or main head in the center of the plant in about ninety to one hundred and twenty days. When this head is removed the plant sends out lateral shoots or "sprouts" on stems four to six inches long, much smaller in size than the main or central head. When this second crop is harvested the plant again sends out another crop of these miniature heads. Frequently as many as five or six cuttings can be obtained from one plant. The smaller heads produced by the plant after the main head is removed are fully as desirable as the main head. They are very tender and the stems (which are as tender as the heads) when served in the same way as Asparagus form a very tasty and nourishing dish.

Italian True Sprouting (True Calabrese)—Pkt. 10c; oz. 75c; $\frac{1}{4}$ lb. \$2.00.

Brussels Sprouts

The plants are very hardy and grow from 2 to 3 feet high, bearing a large mass of leaves at the top. The sides of the main stem are covered with three or four dozen small cabbage heads, which are broken off and cooked the same as cabbage. The sprouts mature in succession. Sow early so as to have well-grown plants by fall. Cultivate the same as for cabbage.

Burpee's Danish-Prize—A very fine strain. The plants are of strong robust growth. The stalks are large, thick and close-joined, so that the sprouts set thickly on the stalk. The sprouts develop for nearly the entire height of the stalk about the same time—consequently a very large crop can be gathered. Even the sprouts formed at the base of the stalk are tightly folded; they are quite as fine and solid as those higher up.

Per pkt. 10c; $\frac{1}{2}$ oz. 20c

Long Island Improved—The finest strain of "Sprouts" grown. We offer the choicest Long Island grown seed.

Per pkt. 10c; oz. 35c

Perfection—The plants grow about two feet in height and the stems are thickly set with the sprouts which grow one or two inches in diameter.

Per pkt. 5c; oz. 25c, postpaid

"LUCULLUS,"—
THE NEW
SWISS CHARD.

Swiss Chard or "Spinach Beets"

Lucullus—The plants grow to a height of two to two and one-half feet. The stalks are as thick and broad as those of rhubarb, being one and one-half inches broad, heavily ribbed and from ten to twelve inches long below the leaf. These stalks are delicious when cooked and served in the same manner as asparagus.

In the old type of Swiss Chard the leaf portion is smooth, broad and rounded at the upper end; in the new Lucullus the leaves are larger and sharply pointed at the top, while the texture is heavily crumpled or "savoyed", more crisply tender and of finer flavor. The leafy portion of the foliage is cooked and served in the same manner as spinach. The leaves and stalks served as separate vegetables afford two distinct dishes from the same plant at one time.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. \$1.00

Large-Ribbed White—This variety does not make edible roots like the regular garden beets, but is grown for the broad white leaf-stalks, which are bunched and cooked in the same manner as asparagus, and make a delicious summer vegetable. The young leaves may be gathered also and cooked like spinach.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c

Fordhook Giant

(NEW)

A very outstanding Swiss Chard growing to enormous size. The rich blue-green leaves are much crinkled or savoyed. When fully developed, the leaves measure 10 inches in width and $2\frac{1}{2}$ feet in length. The texture of the leaves is thick and fleshy and their quality is highly appreciated cooked in the same way as spinach. The pearly white stems or stalks measure $2\frac{1}{2}$ inches in width and give an excellent dish prepared like asparagus. Pkt. 10c; oz. 15c; 4 ozs. 40c

CABBAGE

Culture—The requisites for complete success are: First, good seed; in this crop the quality of the seed used is of the greatest importance; no satisfactory results can possibly be obtained when poor seed is planted. Second, rich, well prepared ground. A heavy, moist and rich loam is most suitable. Third, frequent and thorough cultivation. The ground should be highly manured and worked deep. Cabbage is grown all over the country and specific directions regarding the time and methods of planting applicable to all localities cannot be given. In general, north of the 40th parallel the early sorts should be sown very early in hotbeds, hardened off by gradually exposing them to the night air and transplanted as early as the ground is in good condition, setting eighteen to thirty-six inches apart, according to size and variety. South of the 40th parallel, sow about the middle of September, or later, according to latitude, transplanting into cold frames if necessary to keep through winter and setting in open ground as early as possible in the spring.

The late autumn and winter varieties may be sown from the middle to the last of spring and transplanted when four to six inches high. If the weather and soil is dry, the late sowing should be shaded and watered in order to hasten germination, but it is important that the plants should not be shaded or crowded in the seed bed, or they will run up weak and slender and will not endure transplanting well.

All Seasons—Heads large, round and very deep; can be planted for early or late crop; a splendid keeper; in season a late second early, coming in with Early Flat Dutch; a favorite with kraut manufacturers. Per pkt. 5c; oz. 25c, postpaid; $\frac{1}{4}$ lb. 75c; per lb. \$2.50

Baby Head—Of unusual merit. The beautiful little round heads are "solid as a rock" and weigh from three to six pounds, just a right size for family use.

Pkt. 10c; oz. 50c

EARLY JERSEY WAKEFIELD

Early Jersey Wakefield—The best first-early oblong-headed cabbage. The heads are uniformly hard and solid. They are pyramidal in form, generally pointed at the end, with but few outside leaves. The outer leaves are unusually thick and heavy, and it is thereby enabled to stand more cold weather without injury when carried through the winter.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.00, postpaid

Charleston Large Wakefield—About one week later than Early Jersey Wakefield, but the conical heads are fully one-half larger.

Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.50, postpaid

Extra Early Express—About ten days earlier than Early Wakefield; heads small, heart-shaped and very solid; having but few outer leaves plants can be set very close. Per pkt. 5c; oz. 30c; $\frac{1}{4}$ lb. \$1.00, postpaid

Early Winnigstadt—This suffers less from insects than any other early cabbage. The heads are of the same size as the Jersey Wakefield.

Per pkt. 5c; oz. 25c, postpaid

Early Flat Dutch—Earlier and heads somewhat smaller than Late Flat Dutch; a good short stemmed early.

Pkt. 5c; oz. 30c; $\frac{1}{4}$ lb. \$1.00

For Cabbage Worms Use SLUG SHOT

COPENHAGEN MARKET

Copenhagen Market—Very fine, nearly as early as Jersey Wakefield; stem short, heads large, round and solid, with few outer leaves of an upright growth. Our stock of this popular variety is very early, uniform and dependable.

Per pkt. 5c; oz. 25c, postpaid; $\frac{1}{4}$ lb. 75c; per lb. \$2.50

Golden Acre—An extra early selection of the Copenhagen type, and the earliest of the round headed cabbages, maturing with Jersey Wakefield. Plant small, dwarf and compact, with few outer leaves; heads of medium size, round as a ball, solid and very uniform.

Price: Per pkt. 10c; 1 oz. 35c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.00, postpaid.

Glory of Enkhuizen—Excellent medium early, short-stemmed variety, maturing ten days earlier than Danish Round Head. Heads large, round, very solid, with few outer leaves. One of the most satisfactory for kraut making.

Per pkt. 5c; oz. 30c; $\frac{1}{4}$ lb. 90c

SAVOY CABBAGE or CURLED LEAF

Characterized by dark green, heavily crimped, curled, or savoyed leaves. The flavor is far superior to other sorts, especially after being touched by frost. In demand as a Winter Cabbage.

Perfection Drumhead Savoy Wirsng—This is the hardest heading and best all-around Savoy. Plants are of strong growth, having only a moderate amount of outer foliage growing closely about the large solid round heads. Heads beautifully blanched and of the finest flavor.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.00

LATE or WINTER CABBAGE

BALLHEAD

RED CABBAGE

Red Cabbage may be used in ways similar to ordinary Cabbage, or may be prepared in various special ways. Its red color makes it particularly desirable for cole slaw.

DANISH STONEHEAD OR ROUND RED

Danish Stonehead or Round Red—This splendid novelty is a recent introduction. It produces round or ball shaped heads of great solidity and unusually dark purplish color, and this rich coloring extends to the center of the head, showing only a small portion of white when cutting across the veins and tissue. The plants are of strong, compact growth, producing heads uniform in size and shape, from 6 to 8 inches in diameter. It is the best keeper of any of the Red Cabbages. Most desirable for the housewife in slicing for slaws, salads, etc.

Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50, postpaid

Mammoth Rock Red—While late in maturing, this is the largest heading of all deep red varieties. In good soil the heads will average ten pounds. Per pkt. 5c; oz. 25c

CHINESE CABBAGE

"Peking" (genuine "Pe-Tsai")—This grand variety is similar to the Chokurei in general appearance, but is superior to it in every way. The plant is of the same size, but the head proper is much larger and compact. The interior blanches creamy-white, crisp and delicious, and of that desirable rich celery flavor. It produces successfully throughout the year and is considered one of the best late fall and winter Pe-Tsai. It is a good keeper and shipper and its attractive appearance and fine quality make it one of the best sellers. We can say without exaggeration that this is the finest Pe-Tsai in existence today. Whether for medium early, main crop or late use, it has no equal, and is so finely bred and so true to type that in a field of several acres every head appears alike.

Pkt. 10c; oz. 50c; 4 ozs. \$1.75; lb. \$6.00, postpaid

Chinese Cabbage—Wong Bok

Wong Bok produces a beautiful, crisp, blanched tall or long head, resembling a giant Cos Lettuce. As a salad it rivals the finest lettuce. Delicious sliced as cold-slaw. Boiled or steamed it makes delightful greens, more sprouts. Don't plant too early, grow it as a fall vegetable.

Plant like late cabbage, about 15 inches apart, in rows. Does its best in cool moist weather. Will last until freezing weather. Pkt. 5c; oz. 35c; 4 oz. \$1.00

Danish Ballhead—Our seed is absolutely unequalled! It is esteemed for winter use because of the great solidity and excellent keeping qualities of the heads. From repeated trials, as well as from the experience of many customers purchasing our original Danish-grown seed, we know that this selected strain surpasses in even growth and heading, as well as in uniform size and solidity of heads, any other stock of "so-called Hollander Cabbage." The magnificent heads are nearly round in form, very hard and solid; they keep in finest condition, when buried through the winter, coming out solid in spring. Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.00.

Danish Roundhead—Has given such splendid satisfaction to growers for winter market that we could fill pages with enthusiastic letters from pleased planters.

The heads average larger in size than those of the Ballhead, maturing about two weeks earlier, and are set on shorter stalks. They are extremely hard and solid, with interior leaves blanched to the purest whiteness; sweet flavor and crisp tender texture. Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.00.

Premium Flat Dutch—An improved strain of the old Large Late Flat Dutch type. Highly esteemed. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.00

CUTWORMS

Cutworm injury almost invariably occurs in the spring, plants usually being cut off at the surface or a little below the surface of the ground. This injury begins as soon as the first plants sprout and continues until late in June or early July when the worms have become full grown. Feeding takes place at night, the worms resting during the day beneath debris or in the soil. For best results in controlling this pest distribute Snarol over infested areas, taking care to sprinkle it around each hill.

"PEKING" "PE-TSAI"

CARROTS

Culture—While sandy loam made rich by manuring the previous year is the best soil for the carrot, any good land if thoroughly and deeply worked will produce satisfactory crops. When possible to do so, it is advisable to sow as early in the spring as the ground is fit to work, though good crops may, in this latitude, be grown from sowings as late as June 15, but success from such late planting is uncertain. For table use sow the smaller kinds as early as practicable in rows 16 to 18 inches apart. For field culture, prepare the ground thoroughly and sow in drills 18 to 24 inches apart, using from one and one-half to three pounds of seed to the acre. Cover one-half to one inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear use the cultivator or wheel hoe. Do not let the weeds get a start. Thin the smaller table sorts from six to eight to the foot, and the field varieties from four to six inches apart in the row. For winter use, gather and store like beets or turnips.

TRY THIS

Plant the little round radishes in the same row at the same time with beets or carrots. The radishes will break the way for the beets and carrots and will be ready for pulling by the time they need the room.

CORELESS CHANTENAY THE SWEETEST CARROT KNOWN

A gardener once said, "Give me a coreless Carrot and I will show you one of the sweetest, most delicious vegetables on earth." He was right. A Carrot without a core is a rare treat and nothing is more delicious. This variety is free of the stringy, coarse heart or core that is found in other Carrots. Owing to the fine texture of the red flesh, and its tender, delicate flavor it is called the Sweetest of All Carrots. It grows from six to seven inches in length and is of a beautiful orange red.

Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. \$1.00, postpaid

Chantenay—This splendid Carrot belongs to the half-long "stump" or blunt-rooted type, but differs from all others of this class by its greater girth, bulk and consequent yield. It averages 6 to 7 inches in length, is broad at the neck, narrowing gradually to the round, blunt base, therefore is easily harvested. The flesh, entirely free from core, is of rich orange-red and of the finest table quality, fine-grained, tender, juicy and delicately flavored.

Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. \$1.00, postpaid

Guérande, or Ox Heart—Tops small for the size of the roots which are comparatively short but often reach a diameter of five inches, terminating abruptly in a small tap root. Flesh bright orange, fine grained and sweet. This variety is especially desirable for soil so hard and stiff that longer rooted sorts would not thrive in it. When young the roots are excellent for table use and when mature are equally good for stock.

Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. \$1.00, postpaid

TENDER SWEET CARROT

(NEW) Sweet, Tender, and Brittle

In this new carrot, which is also known as Imperator, we have one of the finest varieties ever grown. An exceptionally heavy yielder which is always sweet, tender, and brittle. The roots are 8 to 10 inches long, tapering from the shoulder to the blunt end; of rich orange-red color. Always uniform in shape and size. The plants are noticeable on account of the dark purplish green leaves. Pkt. 10c; oz. 15c; 4 ozs. 50c

Morse's Bunching—Tops short; foliage rather coarsely cut and stems medium and strong. Roots at maturity are $1\frac{1}{4}$ by $1\frac{1}{2}$ by 8 inches in size, almost cylindrical with rounded shoulders, and are well stumped.

Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.50

MORSE'S BUNCHING

Butzer's Selected Half-long Danvers Carrot—A handsome half-long, cylindrical, stump-rooted Carrot of good size and of a rich, dark orange color; it grows to a large size, is smooth, and the flesh very close in texture, with very little core and a small tapering tap-root. It is a first-class Carrot for all soils; under good cultivation it has yielded 25 to 30 tons per acre, with the smallest length of root of any now grown, and is more easily harvested than the longer types. Our selected stock gives the best of satisfaction.

Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. \$1.00, postpaid

Improved Long Orange—This is a decided improvement obtained by years of careful selection of the best formed and deepest colored roots of old Long Orange. The most popular of the older sorts for farm use on deep and mellow soil. Roots distinctly larger at crown, shorter, thicker and smoother than those of Long Orange, but so uniform and true to type that the bulk of the crop will be greater. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. \$1.00, postpaid. Write for price on larger quantities.

Improved Nantes (Coreless)—A fine quality half-long carrot, almost cylindrical in shape, blunt end and very small tap root. Flesh fine grained, with very little core. The skin is a beautiful orange color and very smooth. Improved Nantes is one of the best table sorts that we list. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. \$1.00

Early French Forcing—This is a delicious little table carrot, tender and sweet-flavored, and very early. It is almost globe-shaped.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c

Early Horn—Short; the best for early market. In shallow ground a good variety to plant, even for main crop.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c

sings of liquid manure during the growing season will materially increase the crop. Sow in seed beds, and, when large enough, transplant in rows two feet apart and eighteen inches between the plants. Hill up between the rows, and keep the ground well cultivated. Summer and autumn are the best seasons to sow. The later varieties are very much the hardiest, and will often make good heads under circumstances which would cause the early varieties to "button." The early sorts mature in three to four months, the later ones five to eight months.

KING WHITE

King White—A remarkably sureheading early Cauliflower. It is of dwarf habit with short outside leaves and is similar in most respects to Early Snowball, and nearly as early. The heads when ready for market are of medium to large size. The curd is white, exceptionally deep and of finest quality. It will give excellent results either in the home garden or for market use and is superior to most seed sold at higher prices. Where extreme earliness is not the greatest consideration we recommend this strain. Pkt. 10c; $\frac{1}{4}$ oz. 75c; oz. \$2.50

Burpee's New "Dry-Weather" Cauliflower—Succeeds even where all others fail. Similar to Burpee's Best-Early, it produces equally large, solid, pure white heads, and is only about a week later. It is especially adapted for growing in dry locations where other varieties fail; make the soil quite rich and give thorough cultivation. It is superior to any other excepting only Burpee's Best-Early. By the use of this strain fine cauliflower can be grown in many dry districts where it has been impossible heretofore to raise this luscious vegetable.

Per pkt. 10c; $\frac{1}{4}$ oz. 75c; oz. \$2.50; $\frac{1}{4}$ lb. \$7.00

Carrots for Stock Feeding

Carrots for Stock Feeding—These can be grown easily in good, loose soil; keep well when stored for Winter use and form an extremely wholesome addition to the Winter rations of stock when fed in conjunction with corn and dry fodder. The rich coloring of the deep orange-colored sorts is esteemed also as imparting a richer coloring to milk and butter during Winter months.

They are grown most easily in land which has been under cultivation the preceding season, and which has been manured heavily and plowed during the previous Fall, though short, well-rotted manure will give excellent results, turned under in the Spring if the surface is finely prepared before sowing the seed. Seed should be sown early, thinly, in drills three feet apart using four pounds of seed to the acre. Give thorough cultivation throughout the season, working more deeply as growth advances.

Improved Short White Mastodon—The most productive and most easily harvested for stock feeding. The roots grow about eight inches in length, measuring three inches at shoulder and gradually tapering throughout their length. Smooth, white skin, free from small rootlets. Flesh solid, white, crisp, rich and nutritious. We have reports of this variety yielding 20 tons per acre.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c, postpaid

Large White Belgian—This Carrot grows a third or more of its length above the surface. Roots will average two inches in diameter at the shoulder and a foot or more in length. The diameter is even throughout the entire length, the roots tapering gradually at the base. They are easily pulled in harvesting, and do not have to be dug out, like most long-rooted sorts. Flesh and skin pure white, though the latter is occasionally tinged with green in upper portion growing above the soil.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c, postpaid

Large Yellow Belgian—This is similar in growth and form to the preceding, but flesh and skin of the portion growing below the soil are of a pale orange coloring. These two varieties have probably been grown more extensively than any others for stock feeding in the past, but are destined to be superseded to a great extent by the large, thick roots of the improved white variety offered above, and the thick, stump-rooted table sorts.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c, postpaid

CAULIFLOWER

Cultivation—The main thing in growing good Cauliflowers is to rush them on quickly, and never allow them to be checked in their growth; in dry weather they should be copiously watered, especially if just planted out. The soil should be deeply trenched and well-dressed with stable manure, and occasional dress-

Early Snowball—This is a popular extra early strain of dwarf compact growth. Under favorable circumstances, nearly every plant will make a fine solid head of good size. It is valuable for both early and late.

Per pkt. 5c; oz. \$2.00; $\frac{1}{4}$ lb. \$5.00

Extra Early Dwarf Erfurt (Extra Selected)—This is the choicest selected strain of the popular Erfurt type.

Per pkt. 10c; oz. \$2.50

Algiers—A very strong growing late variety, with large leaves of a bluish cast. In cool locations and rich soil it produces very large solid heads late in the fall.

Per pkt. 10c; oz. \$1.25; $\frac{1}{4}$ lb. \$4.00

CELERY

Culture—Sow the seed (which is slow to germinate) in shallow boxes indoors or in a finely prepared seed bed out of doors in straight rows, so that the small plants may be kept free from weeds. See to it that the seed is not covered too deep and that the bed is kept moist, almost wet, until the seed germinates, as plenty of moisture is essential to get a satisfactory growth. The seed will not germinate well if planted in a hot-bed or where subjected to a temperature above 60 Deg. Fr. When the plants are one or two inches high, thin out and transplant so that they may stand three inches apart each way. When they are four inches high, cut off the tops, which will cause the plants to grow stocky.

CELERY GOLDEN SELF-BLANCHING

The best of all early "self-blanching" varieties. First introduced in America in 1884, this is decidedly better in quality than the White Plume. It is ready for use nearly as early, blanches as easily, and is larger in size. It is of dwarf compact habit, with thick, solid, heavily ribbed stalks, which blanch easily to a clear waxy yellow. When grown in rich moist soil, the stalks are numerous, each plant being fully as thick through as the largest of the tall late sorts, and with a large solid heart of beautiful golden-yellow stalks and leaves. Per pkt. 5c; oz. 50c, postpaid

GIANT PASCAL

Preferred by many on account of its fine quality when properly blanched. Stalks short, broad, very thick, crisp and tender, blanching to a yellowish-white color. Pkt. 5c; oz. 35c; $\frac{1}{4}$ lb. \$1.00.

WHITE PLUME

This is the earliest and most easily blanched, but does not keep well taken from the trenches. The plants grow rapidly and blanch easily during the summer months. Later in the Fall the central stalks and leaves are of pure snowy whiteness, even without earthing up, but stalks should be gathered together and earthed up as in other varieties, so as to produce close attractive bunches.

Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$2.50, postpaid

CHIVES—Schnittlauch

Chives are perfectly hardy perennial plants of the onion type, and are grown exclusively for their small leaves, which are produced freely very early in the Spring, for giving a mild onion flavor to various dishes. They are used especially in flavoring the small German sausages. When planted in small clumps in any common garden soil, they will grow rapidly and in time increase so as to render division necessary. The tops appear early in the Spring, and can be shorn off close to the ground as needed. If not allowed to flower, they will produce much longer.

Per bunch, postpaid, 15c

CORN SALAD (Feldsalat)

CELERIAC or TURNIP-ROOTED CELERY

Culture—Sow the seed at the same season and give the same treatment as common celery. Transplant the young plants to moist rich soil, in rows two feet apart and six inches apart in the row. Give thorough culture. As the roots are the edible portion of this vegetable, it is not necessary to earth up or "handle" it. After the roots have attained a diameter of two inches or over, they are fit for use. To keep through winter pack in damp earth or sand and put in the cellar or leave out of doors, covering with earth and straw like beets or carrots.

Large Smooth Prague

—An improved form of turnip-rooted celery producing large and smooth roots, which are almost round and with very few side roots. Plants vigorous, with large, deep green foliage
Pkt. 5c; oz. 20c; 2 oz. 35c;
 $\frac{1}{4}$ lb. 60c; lb. \$1.75,
postpaid.

CHICORY

Large-Rooted or Coffee—Per
pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 45c; per
lb. \$1.60.

FRENCH ENDIVE

or Witloof Chicory. French Endive is used principally as a winter salad. Sow the seed in the open ground not later than June. Lift the roots in the fall. When wanted for forcing trim to an even length of 6 inches. Pack upright in a box in rows and a two-inch layer of soil at the bottom. Loosely cover with 6 inches of sand or light earth. After watering thoroughly, place the box near the heater of the cellar and keep moderately moist until the sprouts push through.

Pkt. 10c; oz. 25c; 4 ozs. 80c,
postpaid.

CHERVIL

Curled Chervil — Beautifully curled and crisp. Per pkt. 10c;
oz. 25c; $\frac{1}{4}$ lb. 75c.

CRESS

Fine Curled Peppergrass—Quick growing, finely cut and feathery, like a good parsley; growth dwarf and compact; ornamental, crisp and pungent; very refreshing.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.50, postpaid

Water Cress—Highly esteemed as a salad during the Spring and Fall, also used as a garnish for meats during the Winter. Seed may be started readily in pans or boxes of very moist earth, and the young plants transplanted to shallow water.

Per pkt. 10c; oz. 45c; $\frac{1}{4}$ lb. \$1.50

CORN SALAD (Feldsalat)

Vetticost, or Lamb's Lettuce—A delicious salad. The best variety cultivated. The proper time for sowing is in the Fall, but sown early in Spring, in rows nine to twelve inches apart, it is fit for use in from six to eight weeks. Cover with hay or straw to protect through the Winter. One ounce of seed to 15 square feet.

Per pkt. 5c; oz. 15c, postpaid

CORN--Sweet or Table Varieties

“GOLDEN BANTAM”

Earliest and Best of All Extreme-Earlies—Most Surpassingly Delicious in Flavor—Most Famous Corn Grown

Golden Bantam—Is becoming each year more firmly fixed in popular favor, because of its extremely early character, vigorous growth and surpassing delicious flavor.

Although the dry grain is entirely free from any flinty glaze, it is exceptionally hard and firm, hence can be planted earlier than any other true sweet corn. The stalks are dwarf and sturdy in habit, growing to a height of four feet; they bear two and three good ears, which are set well above the ground. The ears, five to seven inches in length, have eight rows of broad yellow grains, extending to the extreme rounded tip.

Per pkt. 10c; lb. 30c; 5 lbs. \$1.25, postpaid

GOLDEN CREAM

This sweet corn is of California origin and the result of crossing the Golden Bantam on the Country Gentleman. The Golden Cream resembles the Country Gentleman in appearance, having the same irregular rows and has also the deep-pointed kernel and the slender cob of that variety, otherwise it is entirely distinct, being of dwarf habit in growth, having an ear about the length of the Golden Bantam, and differs from the Country Gentleman in time of maturity, being very early.

Per pkt. 10c; lb. 30c, postpaid

PORTLAND MARKET

An Oregon introduction, a very early, large eared sweet corn and very productive. Its large well-filled ears together with its plump, sweet grains of purest white, make it a most profitable home or market variety. Very popular with our market gardeners.

Per pkt. 10c; lb. 30c, postpaid

FIELD CORN

GENUINE EUREKA ENSILAGE CORN

STOWELL'S EVERGREEN

Stowell's Evergreen—This has long been the leading main-crop variety for home use, market and canning. Our stock is carefully selected, and can be depended upon to produce fine large ears of superior quality. The grains of good size, are long and slender—entirely free from glaze or flintiness.

Per pkt. 10c; lb. 30c, postpaid

POP CORN

Black Beauty—We believe this is not only the earliest maturing variety in cultivation but it is ready for popping earlier than any other sort. It pops very large and exceptionally white. The kernels are black but this color is not noticeable after popping, when this sort is the largest and most tender of all. The ears are about six inches long, twelve rowed. The kernels are smooth, shallow and are nearly square.

Per pkt. 10c

GENUINE EUREKA ENSILAGE CORN

Outstanding as the Heaviest Producer of Silage Material—It Pays to Plant the Best.

Many varieties of seed corn have been offered as Eureka but we have found many times that corn supplied is only the common Southern White Dent or some other white variety which will produce a very much smaller yield. Genuine Eureka is a smooth white dent corn with short kernels, while most other corns offered as Eureka are a long kernel type. Eureka almost invariably will germinate nearly 100% and is of such a vigorous growth that severe changes of weather conditions do not affect the yield seriously after the corn has become rooted.

We do not claim that Eureka will mature in the Northwest.

Per lb. 25c; 5 lbs. \$1.00, postpaid; 10 lbs. and over at 10c lb., f. o. b. Portland. Order early as last year we could not supply the demand.

HERE'S WHERE THE TALL CORN GROWS!

(Oregon Journal, October 23rd, 1934)

The tall corn of Iowa has nothing on the corn grown at the county farm.

O. A. Johnson, superintendent of the farm, reported to the county commissioners Monday that 324 tons of ensilage corn of an average height of 15 feet was produced on 18 acres at the farm this year. This was 18 tons to the acre. At \$3 a ton the total value was \$972.

Johnson reported the two silos at the farm will hold 200 tons. The rest of the corn was fed green to the dairy stock.

Johnson submitted a photograph showing a man riding a horse in the corn field. The corn reached far over the man's head.

MINNESOTA No. 13
PRIDE OF THE NORTH
OREGON GROWN YELLOW DENT
Write for Price

CUCUMBER

The Cucumber requires well-enriched soil, and should not be planted until settled warm weather, in this latitude, seldom before the middle of May. Plant the early, small kinds in hills $3\frac{1}{2}$ to 4 feet apart, the larger varieties 5 to 6 feet. Make the hills broad, use 15 to 20 seeds to the hill, dropping them well apart. Cover with not over an inch of earth, and firm this well with the hoe. If the young plants are attacked by the striped bugs or other insects, dust frequently with air-slacked lime, soot or ashes mixed with road dust, taking care that too much is not used at one time. When all danger from bugs is past, thin to three plants to the hill. Give frequent shallow cultivation as long as vines will permit.

Arlington White Spine—The cucumbers are very regular in outline, uniform in size, averaging seven to eight inches in length, straight and of a rich, dark-green color. Flesh white, crisp, and solid, with comparatively few seeds. Vines are of vigorous growth and very productive.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25, postpaid

Davis Perfect—Fruits very deep green in color, rather long, averaging ten inches or more in length, white spined, quite slender, symmetrical, tapering slightly at both ends. Flesh is crisp, tender and of good quality. The seed cavity is small. The vines are very vigorous growing and quite productive. Recommended as one of the best sorts for shipping as it retains its attractive dark color for a long time after picking.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.00

Extra Early Green Prolific, or Boston Pickling—This is a very prolific variety, largely planted for pickles. The fruits average four to five inches in length when large enough for slicing, and are of excellent quality; but it is chiefly for producing medium-sized pickles that this variety is so highly esteemed. If the fruits are gathered as soon as large enough, the vines will continue bearing through a long season.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.00

Fordhook Famous—The longest White Spine, the finest flavored of all. This is the handsomest and best of all long green cucumbers; always straight and well formed, they never turn yellow, and critical buyers are willing to pay an extra price on market for these unequalled fruits.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.40, postpaid

Fordhook Pickling—This is the best and most prolific variety for producing pickles of medium size, both for home use and market, or to grow for the pickle factories.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c; per lb. \$2.00, postpaid

Fordhook White Spine—The fruits are nearly cylindrical in form, slightly pointed at the ends, perfectly smooth, of deep rich coloring, marked with distinct white lines at the blossom end. They are of extremely handsome and attractive appearance. Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c; per lb. \$2.00, postpaid.

Long Green (The old stand-by)

London Long Green—This is an old-time popular garden favorite. Under favorable conditions produces dark-green fruits from ten to twelve inches in length. Skin a deep rich green; flesh solid, crisp and of excellent quality.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.50, postpaid

Japanese Climbing—A useful variety for growing on a trellis or wire. The cucumbers are long, of a dark green color, white flesh, crisp, and of a good flavor.

Per pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 50c

Lemon Cucumber—This dainty little cucumber resembles a lemon both in form and color, having a distinctive flavor superior to and not found in any other cucumber. The Lemon Cucumber is so prolific that a single vine will be ample for the needs of the average family. It is also said that the Lemon Cucumber can be eaten without fear of harmful results that some experience from eating cucumbers.

Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.00

West India Gherkin—A very prolific small-fruited variety, used exclusively for pickling. It is not properly a cucumber, and of no value for slicing. The fruits are two to three inches in length, thick, rounded form, closely covered with spines. Vines rather slender, with small foliage, but of strong growth.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c, postpaid

Serpent or Snake Cucumber—The fruits are from 2 to 4 feet in length and grow in fantastic curves and shapes. Per pkt. 10c.

NOVELTY CUCUMBER "CHINA-LONG"

thickness well until they run off into a round stem and blossom much the best of all, and the variety anyone should plant.

MAKE YOUR GARDEN WORK

Many people think that seeds cannot be planted any other time than in April and May. This is far from true. The wide-awake gardener begins sowing as early in the spring as possible, and sows succession crops throughout the summer and until late in the fall.

A most remarkable and handsome new long green cucumber from China. The most fleshy and finest flavor of the long green type. The vines make a tremendous growth. They are unusually vigorous, bearing an enormous crop. The foliage is rich dark green and is quite resistant to diseases and insect attacks.

China-Long makes perfectly straight fruit. They average about 20 inches. They are thickest in the middle of fruit, where they average 2 to 3 inches in diameter. The attractive fruit tapers gently towards the ends, holding their end. We recommend this novelty cucumber as

Per pkt. 10c, postpaid

DILL

An aromatic annual having a warm pungent taste, the seed of which is used for seasoning. Although possessing medicinal properties it is chiefly used for making Dill pickles. Plant grows two to three feet high, of branching nature, with leaves cut into thread-like segments. Very easily grown. Sow in spring after soil has become warm. Per pkt. 5c; oz. 10c; 4 oz. 25c

EGG PLANT

Every garden should have a few Egg Plant plants. These are easily grown and bear a good crop with little attention. Egg Plants, sliced and fried, are delicious and would be much more popular if better known.

Black Beauty—Very early, the fruit being ready for market two weeks before any other variety. Color very fine, being a purplish black. A good variety for a main crop for market. Per pkt. 10c; $\frac{1}{2}$ oz. 40c; per oz. 70c; 2 ozs. \$1.15; $\frac{1}{4}$ lb. \$2.00; per lb. \$7.00.

ENDIVE

Endive is one of the best and most wholesome salads for fall and winter use. Sow in shallow drills in April for early use or for late use in June or July. When 2 or 3 inches high, transplant into good ground or thin out to 1 foot apart. When nearly full grown, and before they are fit for the table, they must be bleached. This is done by gathering the leaves together and tying with yarn or bass to exclude the light and air from the inner leaves, which must be done when quite dry, or they will rot.

Green Curled—Leaves finely cut or lacinated.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25

White Curled—Does not need blanching, the midribs being naturally of a pale golden-yellow, and the finely cut and curled leaves almost white.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.50

Batavian—Large heads of broad, thick leaves, which can be blanched as a salad or make excellent cooked greens. Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.50

GARLIC

The Garlic is the most pungent of all the onion family. It is much used in the south of Europe. The root or bulb is composed of many small bulbs called "cloves," which are planted in the spring 6 to 8 inches apart, and in August the bulbs are ready to gather. Bulbs, lb. 25c, postpaid. Write for price in quantity.

HORSERADISH

Sets planted in May, small end down, with the top one inch below the surface, in rich, well-cultivated soil, will form radish of large size in one season's growth. Of the common variety, we offer small roots, 8 for 20c; 25c per dozen, or 90c per 100, postpaid. By express or freight, per 100, 75c. Write for price in quantity.

KALE or BORECOLE

This is extensively grown, especially in the South during the fall, winter and spring. The leaves are used principally for greens. A favorite way is to cook them with bacon. The leaves are also used for garnishing.

Where climate permits seed may be sown any time from August to October, broadcast or preferably in drills eighteen inches apart so that the plants when small may be cultivated. The quality is improved rather than injured by frosts if not too heavy. Farther north sow in April or May in rich light soil in rows two to three feet apart and where plants of the largest size are desired thin to two feet apart in row. It is better not to cut or handle the plants while frozen, but if this is unavoidable, thaw them out in cold water. The young shoots which start up in the spring from the old stumps are very tender and make excellent greens.

Tall Green Curled Scotch Kale—The plant of this variety grows to three or four feet high, bearing long plume-like, light green leaves which are deeply cut, also finely curled at edges. Very ornamental and so hardy that a moderately heavy frost improves rather than injures its quality.

Per pkt. 5c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; lb. \$1.25

Dwarf German or German Greens (Dwarf Curled Scotch)—Leaves are curly, bright green, very tender and delicate in flavor.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$1.75, postpaid

MARROW CABBAGE

(*Chou moellier*)

WHITE STEMMED MARROW CABBAGE

Marrow Cabbage is a valuable dairy and poultry food, very similar to Thousand Headed Kale, but even more prolific. The plants average four to six feet in height, with stalks five to six inches in diameter and weight fourteen to twenty pounds. The stalks are edible and relished by cows. The lower leaves are broken off and fed as they mature.

The plant is not so hardy as Thousand Headed Kale, but is most valuable for green feed in fall and early winter. The culture is the same as for Kale and Cabbage. One pound of seed will produce plants for one acre. Pkt. 5c; oz. 15c; lb. \$1.50, postage extra

Every one with Poultry should have a patch of Kale or Marrow Cabbage

THOUSAND-HEADED KALE

Is a variety of cabbage that produces enormously. The plant attains a height of 3 to 4 feet; the stem is covered with leaves. Animals, especially sheep, eat it greedily. It grows well on any land and is very hardy. As we predicted it is now more popular than the widely used Dwarf Essex Rape.

The seed may be either drilled or broadcasted. Drilled is the better. If drilled, plant rows 26 to 30 inches apart as plants should be thinned out so as to stand 16 to 18 inches apart in the rows. In drilling use $\frac{3}{4}$ to one pound of seed to the acre; in broadcasting, $1\frac{1}{2}$ lbs.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 15c; lb. 40c, postpaid.

A Prize for Poultry Keepers

CHICKEN LETTUCE

48 days.

Here is a genuine lettuce which will yield as much or more chicken or rabbit feed as any "greens" plant. When cut it starts at once to grow again. The leaves can be pulled off stem like a kale. It sends up a stout stalk three or four feet high, loaded with leaves.

Pkt. 5c; oz. 15c;
 $\frac{1}{4}$ lb. 40c; lb. \$1.25.

KOHL RABI

The edible part is the turnip-shaped bulb formed above ground. It is tender and excellent when used before fully grown, combining somewhat the flavors of cabbage and turnip.

Seed should be sown in light, rich soil as early in spring as possible in rows one and one-half feet apart and when well established thin to six inches apart in the row. Plantings at intervals of ten days will give a succession until hot weather, when they fail to grow well. Plantings may be made the latter part of July for fall use.

Early White Vienna—This variety is extremely early, with distinctly small tops. The bulbs are of medium size, very light green or nearly white, and are of best quality for the table if used when about two inches in diameter.

Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$3.00

Early Purple Vienna—Same as above except in color, which is purple.

Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c

LEEK

This belongs to the onion family and is a good fall and winter substitute for green onions. The leaves are flat, and the stems are very large, cylindrical and bulbous. Sow early in spring in drills twelve to fifteen inches apart, covering one-half inch deep.

Broad London, or Large American Flag—This is a strong-growing variety, producing large, thick stems of sweet flavor when properly blanched.

Per pkt. 5c; oz. 10c

THOUSAND-HEADED KALE

Cos or "Celery" Lettuce —Salad Romaine

the leaves should be drawn together and tied, in order to blanch the inner ones.

EARLY WHITE SELF-FOLDING

This excellent variety, also called Trianon, forms a large light green plant with a well-folded head of very good quality. The midribs are white and very prominent. The inner leaves are nearly white, slightly tinged with green, and are decidedly firm and sweet. This is considered the most reliable of the Cos or celery lettuces for the home garden or market gardeners' use in this country.

Per pkt. 5c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; lb. \$1.50

ECLIPSE, OR EXPRESS

Eclipse, or Express, is a dwarf extra early sort, growing about six inches in height, with the leaves very closely folded together.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.50

LETTUCE

For early outdoor culture in the latitude of Portland and Southward the seed may be planted in the fall, protecting the young plants from severe freezing either with frames or coarse litter, which may be removed as soon as danger of severe freezing is over.

Lettuce in ground out of doors will stand some freezing, but is killed by prolonged frost or frequent freezing and thawing. North of Portland an early crop may be secured by starting under glass from January to March and hardening off well before setting in ground, which should be done as soon as weather will permit.

Culture—Lettuce, to be at its best, should be grown rapidly, hence, the soil should be made as rich and friable as possible by liberal manuring and thorough preparation. For winter, sow under glass from November to February and thin out as necessary to prevent crowding. Keep a moderate heat and give all the light and air possible. For general crop, sow outdoors as early in the spring as the ground can be worked, in drills eighteen inches apart and thin the young plants to four inches apart in the row. As the plants begin to crowd, thin them out and use as required. In this way a much longer succession of cuttings may be had from the same ground.

CABBAGE OR HEADING VARIETIES

New York or Los Angeles—This is the variety that is planted so extensively in all parts of California and other states where lettuce is grown for Eastern shipment. The plant is very large but compact and tight heading; outer leaves attractive deep green, broad, frilled at edges. The inner leaves form a large head, white, very sweet and tender when in condition for use.

Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 65c; lb. \$2.00

No. 12 NEW YORK LETTUCE or EXTRA EARLY MOUNTAIN ICEBERG

A comparatively new strain of New York lettuce, developed by Pieters-Wheeler Seed Growers of California. This lettuce is about a week earlier than the regular New York strain. It produces larger heads, which are more rounded and less cone shaped. No 12 produces a very uniform crop. A crop that does not tip burn, blight nor shine as readily, and because it is not as susceptible to hot weather it does not bolt to seed as quickly. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 80c; lb. \$2.50

CREAMY HEART

The introducer says: "A selection we have made from California Cream Butter. It is similar to that sort, but is earlier and without any brown spots or brown edge, and is of most excellent, tender quality. It is very desirable for early spring planting, where a butter head is demanded both for market and home garden. We believe it has a place in the list of lettuce, in that, for early planting it is superior to Black Seeded Tennisball and similar varieties."

Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 65c

BIG BOSTON

This is a fine forcing variety for cold frames during the winter months, as it produces heads of very large size in a cooler temperature than most forcing strains. Large heads are beautifully blanched and of superior quality. It heads well in the open ground during cool weather of spring and fall; is very popular. Our seed is an extra selected strain.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25

MIXED LETTUCE

This mixture contains Head, Loosehead, Curled, Brown, in fact almost all styles and shapes. Try a package.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25

California Cream Butter, or Royal Summer Cabbage

—A very reliable heading sort, with glossy deep green leaves, the outer ones slightly spotted or splashed with brown. The inner leaves form a large very solid head, rich light yellow in color, very thick, tender and buttery.

Pkt. 5c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; lb. \$1.25

Hanson—Grows to large size, and is uniformly sure heading. Heads very solid and beautifully blanched; crisp, mild and tender. One of the finest varieties to grow for market during the summer months. Our stock is unselected.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.25, postpaid

Iceberg—The unusual solidity of the heads is insured by the large, white main ribs of the leaves, each of which, curving strongly into the center, acts like a truss, making it impossible for the leaves to open outward and expose the center, which is constantly thoroughly blanched. It matters not whether grown to head in the early spring or the hottest days of summer, the leaves are always crisp and tender.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25, postpaid

MAY KING

The heads are very attractive, outer leaves being yellowish-green, tinged with brown, while inside it is richest golden yellow. It is somewhat similar in appearance to Boston Market, but matures earlier and is lighter green in color, with less of the brownish tint.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.25

Wayahead—A very fine, very early strain of famous May Kink Butterhead, which it surpasses in every respect. 75 days to mature.

Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.00, postpaid

LOOSEHEAD CUTTING

PRIZEHEAD—Surpassingly tender, delightfully crisp, deliciously sweet. "The Quality Loose Leaf Lettuce."

In Prizehead our aims have materialized—it is perfection—seems to be no room for improvement. It has every essential of a highly desirable leaf lettuce and is unquestionably one of the best and most reliable varieties for all year around cultivation. Equally popular with amateur and professional growers.

Its immense size and tenderness make it indeed a Prizehead. It is quite early and is slow to shoot to seed. The plants form a loose cluster of leaves, the inner part of which is well blanched, though there is no heart; the leaves are much blistered and crumpled, are of light brown color, varying to bright green, and are of exquisite quality, tender and crisp in texture and sweet in flavor. An excellent variety for home use, more largely grown in this country than any other. We sell very large quantities of this variety. Pkt. 5c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; lb. \$1.35, postpaid.

BLACK SEEDED SIMPSON

One of the best varieties for early sowing out of doors where a large, thin, exceedingly tender leaf is desired and for those markets which demand a large, loose clustering sort, light yellowish green. Leaves large, thin, slightly ruffled and blistered, even the large outer ones being quite tender. Uniformly attractive, of excellent quality and continues a long time in condition for use.

Pkt. 5c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; lb. \$1.25, postpaid

EARLY CURLED SIMPSON'S

An early, erect growing, clustering variety. Leaves light green, slightly frilled and much blistered, sweet, tender and well-flavored. The sort is especially adapted for sowing thickly and cutting when the plants are very young.

Pkt. 5c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; lb. \$1.25, postpaid

GRAND RAPIDS

This does not form heads, but makes large compact bunches of light leaves with fringed edges. Its delicious quality and handsome appearance make it most popular in winter markets. It is useful also for outdoor planting during spring and fall. Our stock is extra fine.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25, postpaid

MUSKMELON or CANTALOUE

Culture—Plant the seed in hills six feet apart each way, dropping ten to twelve seeds in a hill. After the plants begin to crowd and the striped beetles are pretty well gone, thin to four of the most vigorous plants in a hill. Give frequent but shallow cultivation, until the plants make runners so long that this is impracticable. Rich earth for the young plants is far better than manure, but if the latter must be used, see that it is well rotted and thoroughly mixed with the soil.

If the plants grow very rank, more and finer fruit will be secured by allowing the main branch to continue growing, but pinch off the end of each side branch after it has one fruit set. The quality of melons of all varieties is largely dependent upon conditions of growth and ripening. Unhealthy vines or unfavorable weather produces fruit of comparatively poor flavor.

YELLOW FLESHED VARIETIES

Burrell's Gem—One of the most popular market melons. Melons are oblong, not deeply ribbed, well netted and about 4½ to 6 inches long. Flesh very deep, with an exceedingly small seed cavity. Flesh deep salmon and of excellent flavor.

Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25, postpaid

Emerald Gem—Small to medium size; skin deep green, generally smooth; flesh thick, rich salmon, not surpassed in richness and flavor. But few varieties are so nearly certain to produce uniformly good melons.

Pkt. 5c; oz. 20c; ¼ lb. 60c

Edwards' New Perfecto—Nearly round and densely covered with a hard gray netting; flesh very thick and of a beautiful salmon color, shading into green as it nears the rind.

Pkt. 5c; oz. 20c; ¼ lb. 45c; lb. \$1.25, postpaid

Fordhook—The most perfect cantaloupe. It is about the same size as Improved Jenny Lind, very thick flesh, of orange yellow, very small seed cavity, comparatively few seeds, flesh very solid and of very high flavor, flesh staying solid and firm after melon has become quite yellow.

Pkt. 5c; oz. 20c; ¼ lb. 50c; lb. \$1.50, postpaid

Hale's Best—The earliest maturing of all large melons. Even in a season remarkable for its coolness the fruits matured to luscious sweetness in 68 days after planting. The melons are oval but inclined to produce some fruits of somewhat elongated shape. The popularity of Hale's Best is due not only to its earliness but particularly to the sweet tasty flavor of its beautiful salmon flesh.

Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25

Honey Dew—An old French variety, requiring 150 days to mature and having a delicious flavor when thoroughly ripened. It has a smooth thin rind, a delicate yellow, and flesh blending from white near the rind to green. In short season localities should be started in a hot-bed. Pkt. 5c; oz. 25c; ¼ lb. 75c; lb. \$2

BANANA MUSKMELON

A long yellow-fleshed melon. A very interesting and at the same time a splendid melon. The melon is from 20 to 28 inches long and almost solid. The meat is of a rich salmon color, and has a flavor which is truly delicious. Don't pick the melons until they are thoroughly ripe, as they are then at their best. Plant some Banana Melons for home use and county fair exhibits. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25

BURRELL GEM

Hearts of Gold or Hoodoo (Orange)—A medium sized very uniform melon of fine grained flesh and sweetest flavor.

Per pkt. 5c; oz. 15c; ¼ lb. 55c; lb. \$2.00, postpaid

Osage, or Miller's Cream—The fruits are larger than those of the Emerald Gem; nearly round in form, but having the same distinct dark green skin, with lighter bands between the ribs, and thick, firm, orange flesh of fine quality. Per pkt. 5c; oz. 15c; ¼ lb. 40c; per lb. \$1.25, postpaid.

Paul Rose (Petoskey)—An oblong melon of the Osage type, but smaller. The fruits are deep green, slightly ribbed and fairly netted; flesh very thick, deep salmon color and of highest quality; seed cavity small, triangular shaped.

Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25, postpaid

GREEN FLESHED VARIETIES

Extra Early Hackensack—This is a selection of the popular Hackensack, ripening fully ten days earlier. Melons of good size, heavily-ribbed and netted; thick light green flesh of fine flavor.

Per pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.50, postpaid

Netted Gem, or "Rockyford"—The melons are even and regular in size and form, nearly round, or slightly oval. They are always finely netted, and the skin is of a light golden hue when fully ripened. The flesh is light green in color, melting and luscious in flavor, and ripens close to the skin, so that there is but a very thin rind in a well-grown fruit.

Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00, postpaid

Early Jenny Lind—This is a leading market variety by reason of its extremely early ripening and prolific bearing qualities. The melons are of small size, quite flattened in form, heavily ribbed and netted.

Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00, postpaid

MIXED MUSK MELON

Many of our customers prefer one mixture of seed that will produce early, medium, late green flesh and orange flesh varieties, thus producing a continuous table supply throughout the season from one small plot. This is composed of our best select strains and put together in a properly balanced mixture, that will give ripe, luscious fruit throughout the season. Price: Pkg. 10c; oz. 15c; ¼ lb. 30c; lb. 90c, postpaid.

A Seedsman is a man that publishes a catalog that costs a fortune. In it he tells about all he knows and mails it free, expecting an order in return.

WATER MELONS

Culture—In order to get good Water Melons, it is essential that the plants get a good start, and to this end it is important to prepare hills about eight feet apart by thoroughly working into the soil an abundance of well-rotted manure—hen manure, sheep guano, guano, or other forms rich in nitrogen, being most desirable. Over this highly-manured soil put an inch or more of fresh earth and plant the seed on this, covering it about an inch in depth. It is important that the seed should not be planted before the ground becomes warm and dry, as the young plants are very sensitive to cold and wet. When the plants have formed the first pair of rough leaves, they should be thinned, so as to leave two or three of the strongest and best to each hill. Frequent watering of the plants with liquid manure will hasten the growth, thus diminishing the danger from insect pests.

Cole's Early—The Northern States' favorite. As an early melon it is the standard of high quality; in sugary delicious crispness, flavor and melting tenderness, it is the top-notcher. It is oblong shaped, about 20 inches long, 12 inches through; skin mottled green, thin brittle rind, therefore not a good shipper. The flesh is rich and deliciously sweet.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. \$1.00

Cuban Queen—The melons are of large size and oblong in form. Skin beautifully striped in dark and light green. Rind quite thin, but tough enough for shipping. Flesh bright red, firm and of luscious quality.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. 85c

Fordhook Early—An extra early variety of fine quality and fair size; form round to oblong; skin dark green mottled with a darker shade; flesh bright red; seeds white.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25, postpaid

Hungarian Honey—Small round; rich red flesh.

Per oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25, postpaid

Halbert Honey—A variety somewhat similar to Kleckley Sweets—of much darker color.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.00

CITRON

Citron—The fruits are medium sized, uniformly round and are used exclusively for preserves or pickles. The color is dark green, distinctly striped and marbled with light green. The flesh is white and solid but is not at all suitable for eating raw. Seed red. The fruits mature late in the fall and in this condition can be kept for a long time.

Per pkt. 5c; oz. 15c; 2 oz. 20c; $\frac{1}{4}$ lb. 30c; lb. \$1.00

Home-grown melons fresh from the vine and wholly ripe. There is a treat for you.

MUSTARD

Mustard is not only used as a condiment, but the green leaves are used as a salad or cut and boiled like spinach. Sow as early in the spring as the ground will permit, in drills about eighteen inches apart, covering one-half inch deep. For succession, sow every few weeks until Autumn. Water freely.

Chinese—The leaves are twice the size of the ordinary white mustard, and the flavor is sweet and pungent.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 35c; lb. \$1.00, postpaid

White English—Leaves comparatively smooth and deeply cut; color medium dark green. The plant is upright in growth, inclined to branch as it approaches early maturity and soon bolts to seed.

Per pkt. 5c; 2 oz. 10c; $\frac{1}{4}$ lb. 15c; lb. 35c, postpaid

Kleckley's Sweets, or Monte Cristo—Medium to large in size, medium early and exceedingly sweet; oblong in form, slightly tapering towards the stem end; rind very dark green; flesh very bright, rich red and ripens nearly to the rind; too tender for a shipping melon; seeds white to light brown.

Per pkt. 5c; oz. 15c; 2 oz. 20c; $\frac{1}{4}$ lb. 30c; lb. \$1.00

Klondike—Rind dark green, thin. Flesh distinctive shade of red, brittle and sweet. Fruits oblong. A good shipper because it does not wilt.

Per pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; 1 lb. \$1.75, postpaid

Sweetheart—Over, light green mottled. Flesh bright red, very firm, yet tender. A fine shipper.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c

Tom Watson—Rind thin, dark green flesh, deep red, crisp, sugary. Fruits long, cylindrical. Stands handling and long shipment.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 25c; 1 lb. 75c, postpaid

Black Seeded Ice Cream—Fruits almost round, rind thin, medium green. Flesh pink, sweet. Matures early. A fine keeper.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.00 postpaid

MIXED WATER MELON

This mixture contains some of the big and some of the little fellows, some with white seed and some of black or brown seed.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; lb. \$1.00

CASABAS

The Casaba is now at full zenith of popularity. Previously it was grown as a late melon to mature after the cantaloupe season. As a late melon its popularity was confined to a limited section near the Coast of Southern California. But it is now demonstrated that it can be grown in all semi-arid sections side by side with the early cantaloupes and water melons.

Golden Beauty—One of the best casabas. It is a variety grown extensively for shipment, from Southern California. The fruits are nearly globular, bright yellow with golden tint, with wrinkled skin, six to eight inches in diameter. The flesh is white, very thick, juicy and sweet.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.50

Hybrid Casaba—This excellent Casaba grows to a large size. Flesh nearly three inches thick and of excellent flavor. Per pkt. 5c; oz. 20c; lb. \$2.00, postpaid

Santa Claus—The name is appropriate to this melon. You can send nothing more delicious to your Eastern friends for a Christmas present.

Per pkt. 5c; oz. 20c; lb. \$2.50, postpaid

Winter Pineapple—This is the first of the Casabas introduced into America, and is the parent of a number of hybrids all of which excel it in excellence of flavor, but none equal it in keeping qualities.

Per pkt. 5c; oz. 25c; lb. \$2.50, postpaid

Yellow Seeded—The seed is used extensively for spicing, pickling and other culinary and medicinal purposes. Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 15c; lb. 35c, postpaid

Fordhook Fancy (Ostrich Plume)—Plants are of vigorous growth, and have beautiful dark green leaves which curve outward like fine ostrich plumes. It stands well, even during the hot summer months.

Per pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 45c; lb. \$1.25, postpaid

Southern Giant Curled—Leaves light green, frilled and much crimped at edge. Highly esteemed in the South for its vigorous growth and good quality.

Per pkt. 5c; oz. 10c; 2 ozs. 15c; $\frac{1}{4}$ lb. 20c; lb. 65c

MUSHROOM

Pure Culture Mushroom Spawn—By a newly discovered process of selection and grafting, the spawn is scientifically propagated, so that large, vigorous and finely flavored mushrooms are reproduced. Earlier, more productive and a marked improvement on wild spawn.

Mushrooms are easily grown in the cellar or in dark rooms where a temperature of from 50 to 65 degrees can be maintained. In making the bed, use fresh, clean, stable manure, without much straw. Before placing it in the bed, the manure-pile should be turned over a few times. The bed should have at least 10 inches of solid manure. Put this in, in two layers, and tramp each one down well. Test the heat of the manure with the thermometer and when the temperature is on the decline and between 90 and 100 degrees, insert pieces of Spawn, each about the size of an egg, 10 inches apart, and 2 inches deep. After ten days, spread on a layer of fresh, well-manured loam. If the temperature is right, Mushrooms should come up freely weeks after spawning.

Cultural directions, to be of any value, would be too lengthy to give here, but we will forward full directions for the planting and culture of spawn with each order.

No. 7 BROWN (Bohemian)—A good producer of heavy mushrooms.

No. 8 CREAM WHITE—A mammoth strain.

No. 9 WHITE (Alaska)—Popular market variety.

Pure Culture Mushroom Spawn with culture directions. Brick (about $1\frac{1}{4}$ lbs.), 35c; 5 bricks \$1.50; 10 bricks \$2.75, postpaid. Write for price in larger quantity.

Bottle Spawn—Of excellent quality but very perishable. Must be kept in cold storage until wanted for planting. Orders shipped from the storage plant at St. Paul as we do not carry this in stock. Qt. \$1.25, 12 qts. \$12. (If wanted by parcel post, add 15c per qt.)

OKRA or GUMBO

Okra, or Gumbo—Cultivated for its young seed pods which are used in soups, or stewed and served like asparagus. It is highly esteemed in the South. Plant in hills about four feet apart, putting six to eight seeds in a hill, and after the plants are well started cut out all but two. The dwarf sorts can be planted much closer in hills, two to three feet apart, or in drills two feet apart, thinning the plants to about one foot apart in the row. Gather the pods when quite green and about an inch and one-half long.

Perkin's Mammoth Long Pod—The plant is dwarf growing even in size, and productive, maturing pods earlier than most sorts. The pods are long, slender, deep green and remain tender much longer than most sorts.

Dwarf White—The longest podded variety; the plants are two feet high and very productive. Produce pods long, greenish white, very thick and fleshy.

Per pkt. 5c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 35c; lb. \$1.00

Per pkt. 5c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 35c; lb. \$1.00

BOTTOM ONION SETS

Small onions grown from seed that has been sown too thickly to attain a large size. The small onions (about $\frac{1}{2}$ inch in diameter) thus obtained are planted out and are ready in a short time to pull as green onions for the table or bunched for the market. If left to stand they make ripe onions of the best quality, and come to maturity some six weeks earlier than a crop grown directly from the seed.

Per lb. 20c, postpaid

POTATO ONION

Valuable for bunching or an early crop. The smallest sets make fine bulbs of good size, while the larger ones produce a cluster of small to medium size bulbs. Light brown skin, mild white flesh. It is the earliest, most vigorous in growth and easiest to cultivate of all onions from sets. For the family garden, whether pulled green or as dry bulbs, they are most excellent.

Per lb. 25c, postpaid

POTATO ONION SETS

SHALLOTS

Valuable for bunching or for an early crop. The smallest sets make fine bulbs of good size, while the larger ones produce a cluster of small to medium size bulbs. Light brown skin, mild, white flesh.

Lb. 25c, postpaid

For large quantities, write for prices, stating quantity wanted.

EGYPTIAN or PERENNIAL TREE ONION

When once set out, without having the slightest Winter protection, these come up year after year. The bottoms divide, making several irregular shaped onions that are sweet and tender. The young sets grow on top of the stalks, and can be planted in the Fall. We cannot supply these sets after March 1st.

Per lb. 25c, postpaid

ONIONS

Cultivation—Give the onions the first hoeing just skimming the ground between the rows as soon as they can be seen in the row. Hoe again in a few days, this time close up to the plants, after which weeding must be begun. This operation requires to be carefully and thoroughly done. The weeder must work on his knees astride the row, stirring the earth around the plants, in order to destroy any weeds that have just started. At this weeding or the next, according to the size of the plants, the rows should be thinned, leaving from eight to twelve plants to the foot. In ten days or two weeks they will require another hoeing and weeding similar to the last and two weeks later give them still another hoeing, and if necessary another weeding. If the work has been thoroughly done at the proper time, the crop will not require further care until ready to gather.

Gathering—As soon as the tops die and fall, the bulb should be gathered into windrows. If the weather is fine they will need no attention while curing, but if it is not they will need to be stirred by simply moving them slightly along the row. Cut off the tops when perfectly dry, about half an inch from the bulb and then after a few days of bright weather the onions will be fit to store for winter.

OREGON YELLOW DANVERS

The Old Reliable

The reputation of this great onion goes forward unchallenged year after year as the most reliable yellow onion grown. There is no onion whose character and worth can be more accurately measured by the confidence it has instilled in the onion seed buying than the Oregon Yellow Danvers. It has no enemies as it is conceded to be the best for the Northwest. It stands paramount on its great keeping quality and is more extensively grown than any other onion in the northwest. With such pronounced merits as earliness, productiveness, excellent table quality, fine keeper, enormous yielder, it could hardly be other than popular. Order early.

Our seed is grown especially for us by the best onion seed growers in Oregon. No onion grower can afford to plant anything inferior when such seed can be obtained.

Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c

Brown Australian (Flat)—A very desirable onion of medium size, with amber brown skin and solid white flesh. It is early, a heavy yielder and a long keeper; keeps well in warm climates.

Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.50

Crystal White Wax—This is a pure white flat onion, very popular in the South, especially in Texas. Also does well in the North. Very sweet. Teneriffe seed.

Pkt. 5c; oz. 30c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50

RED WEATHERSFIELD

This is a standard variety planted all over America. It is of large size, very productive, and an excellent keeper. The color is deep purplish-red, and the flesh is white. Prices: Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 50c, postpaid.

SWEET SPANISH

We recommend this new variety of onion very highly, and believe that it will be more than pleasing to those who plant it. It is a globe-shaped onion of bright yellow color, and mild in flavor, and grows a little larger than the Prizetaker. Prices: Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c, postpaid.

SOUTHPORT WHITE GLOBE

This is a most desirable medium early, or main crop variety. This variety yields abundantly, producing medium to large, handsome and fine-shaped clear white bulbs. The flesh is firm, fine-grained, quite mild in flavor, and is very attractive. The bulbs are globe-shaped, keep well, and are desirable for shipping. This is a good variety for home garden or market. You can pull green onions 65 days after planting the seed, and it matures in 140 days.

Prices: Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c, postpaid

WHITE PORTUGAL, OR SILVERSKIN

The best known and most largely used white onion. Is flat on the bottom and thick toward the top; very hard and firm. An excellent keeper. Is largely used for white onion sets as well as for bulbs for the best market trade and also for pickles.

Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c

GRANDPA'S CONGLOMERATION ONION SEED MIXTURE

Turn back in thought to the days of your youth, when Grandpa and Grandma planted the vegetable garden. There was always a large corner in which a mixture of different kinds of onion seeds was planted on the theory that if one sort did not do well the other sort would, and in that way it happened always that there never was a shortage of onions. If the good housewife wished a mild white for salads, it was always found therein; if she wished a more pungent one, that was taken. If she wished a brown or yellow or red, or no matter what color, there they were, and with this in view we have arranged "Grandpa's Conglomeration Onion Mixture"; It contains all colors, shapes and sizes. A package of seed is sufficient to grow one or two bushels, an ounce from three to five bushels, and a pound is safe for 60 to 100 bushels or more.

Price: Big pkt. 10c; oz. 15c

PARSLEY

Parsley succeeds the best on rich, mellow soil. The seed is even slower than parsnip in germinating and should be sown as early as possible in the Spring, in drills one to two feet apart and when the plants are well up thin to one foot in the row. When the plants are about three inches high cut off the leaves; the plant will then start a new growth of leaves.

Plain, or Single—Plain leaves, excellent flavor.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid

Extra Curled Dwarf, or Emerald—The moss-like leaves, of a handsome bright green color, are finely curled. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 70c, postpaid

Turnip-Rooted, or Hamburg—The edible portion is the fleshy root, which resembles a small parsnip, and is esteemed for flavoring soups, stews, etc.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 60c, postpaid

PARSNIPS

Parsnips are usually grown on deep, rich, sandy soil, but will make good roots on any soil which is deep, mellow and moderately rich. Fresh manure is apt to

make the roots a little coarse and ill shaped. As the seed is sometimes slow to germinate, it should be sown as early as possible in drills two and one-half feet apart, cover one-half inch deep and press the soil firmly over the seed. Give frequent cultivation and thin the plants to three or four to the foot.

GUERNSEY

Guernsey—(Improved Half-Long)—The roots do not grow so long as the Hollow Crown, but are of greater diameter and more easily gathered. The roots are very smooth; the flesh is fine grained and of most excellent quality. Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 60c, postpaid.

LONG SMOOTH, or HOLLOW CROWN

Long Smooth, or Hollow Crown—A great cropper, tender, sugary, and considered the best for general cultivation. Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 60c, postpaid.

PEAS

Sow as early as possible a few of some early variety in warm, quick soil, prepared the fall before, planting in double rows six to eight inches apart and two and one-half to four feet between the double rows. The general crop can be delayed until later, but we have met with better success from sowing all the varieties comparatively early, depending for succession upon selecting sorts that follow each other in maturity.

The peas will give quicker returns if covered only one inch deep and where earliness is most important they may be treated in that way. Larger pods and more of them will be produced if the seed be planted in trenches three to six inches deep and covered with only one or two inches of soil. When the plants are five or six inches high fill the trench level with the surface. This will secure deep rooting, prevent mildew and prolong the bearing season. If the peas be covered to the full depth at first, or if water be allowed to stand in the trenches they will not germinate or grow well.

The wrinkled varieties are more sensitive to cold wet weather than the smooth seeded sorts but are of superior quality. All varieties growing more than one and one-half feet do better if staked up or brushed when four to six inches high. This support is usually given by sharpened branches of trees set between the double rows. The crop should be gathered as fast as it is fit for use. If even a few pods begin to ripen, not only will new pods cease to form, but those partly advanced will stop growing. Your own grown peas are by far the sweetest.

THE BIG FOUR

BLUE BANTAM

Bears abundantly long, handsome pods fully as large and equally as early as Gradus, while the vines require no staking! Is unequaled for combination of extreme earliness, superb quality, and unusual productiveness. The dwarf vigorous vines average fifteen inches in height and carry really enormous crops of large, deep bluish-green pods. The handsome pointed pods, generally borne singly, measure four to four and one-half inches long and are tightly packed with eight to ten extra large, deep bluish-green peas. These peas are not only large in size, but of most luscious flavor. The pods are ready to pick as early as American Wonder, while double the size; in fact, they average fully as large as Gradus! If sown thinly, say four inches between the seeds in the row, they will astound even experienced gardeners.

Per pkt. 10c; lb. 30c; 5 lbs. \$1.25, postpaid

GRADUS

This extra early, wrinkled pea bears pods of large size, and combines quality with earliness. It is very hardy; can be planted fully as early as the smooth peas; growth, vigorous and healthy; vines $2\frac{1}{2}$ feet in height; very prolific. The quality and flavor are delicious, and the peas remain tender and sweet for a long time. These peas are planted by market gardeners around the vicinity of Portland more than any other kind.

Per pkt. 10c; lb. 30c; 5 lbs. \$1.25, postpaid

LITTLE MARVEL

We are sure that as soon as our customers become acquainted with Little Marvel they will drop both Little Gem and Nott's Excelsior, popular as these two varieties are today. The vines, of dwarf even growth, average fifteen inches in height and are heavily set with fine pods, frequently borne in pairs. The pods average two and one-half inches in length, are square at the bottom and well filled with six to seven quite large, deep green peas. The peas are ready for the table fully as early as American Wonder or Nott's Excelsior, while the pods are larger and the vines produce a much heavier crop. All who desire a fine early crop of the choicest wrinkled peas will be delighted with Little Marvel.

Per pkt. 10c; lb. 30c; 5 lbs. \$1.25, postpaid

BUTZER'S IMPROVED ALDERMAN

Alderman Peas—The finest of the Telephones. The greatest mid-season pea on the earth. This variety offers wonderful opportunity to the individual who is honestly imbued with the desire to plant, not only a highly meritorious variety but one of great remunerative propensities.

Alderman stands unique as the greatest and unrivaled mid-season, marrowfat wrinkled pea on earth. Very uniform in shape and always of the largest size, produced in profusion and so well filled that Alderman is perhaps the largest yielder of all peas.

The vines are of strong growth, attaining a height of 4 to 5 feet, foliage and pods are of a dark green color, often measuring 6 inches in length and are densely filled with large peas of unsurpassable flavor. Of all tall main crop peas Alderman is the finest and most desirable for the home garden and for the market.

Per pkt. 10c; lb. 30c; 5 lbs. \$1.25, postpaid

One pound each of the above Big Four peas, \$1.00, postpaid.

Alaska—Also called "Earliest of All"! The vines grow from 20 to 30 inches in height, bearing well-filled medium-sized pods. Matures practically the entire crop at one time. Most popular first-early pea for canning.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25

Bliss Everbearing—The vines are stout, of medium height, about two and one-half to three feet, bearing at the top six to ten good sized pods, about two and one-half to three inches long. If these pods are picked as they mature and the season and soil are favorable, the plant will throw out branches bearing pods which will mature in succession, thus prolonging the season. The peas are large and wrinkled, tender, of superior flavor and preferred by many to any other sort.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 2 lbs. 50c; 5 lbs. \$1.25, postpaid.

BLUE BANTAM

Hundred Fold—Similar to Laxtonian and Blue Bantam, with darker vines and pods, has become very popular with the market gardeners. It is an ideal pea for those who wish large pods, and we consider it one of the best. Vines grow from 18 inches to 2 feet.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25, postpaid

Laxtonian—A new, early, dwarf, robust, large podded pea of superior excellence; often referred to as "Dwarf Gradus," and is said to surpass "Gradus" in yield and quality, with the added advantage of dwarfer growth, averaging 16 inches. The large pods are well filled, holding 8 to 10 peas. "Laxtonian" is so highly recommended that you should give it a trial.

Per pkt. 10c; lb. 30c; 5 lbs. \$1.25, postpaid

GARDEN PEAS (Continued)

Laxton's Progress—The earliest and by far the best of the large-podded, large-fruited wrinkled peas. Of all the varieties producing peas of equal quality, this is the heaviest yielding. It bears long pods, averaging one more pea to the pod than Blue Bantam, Hundred-fold, Pioneer and Laxtonian. It is an improvement upon Laxtonian, which has hitherto been the finest of the dwarfs for table quality.

Pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25

"Dwarf Telephone"—The vines, though growing only about eighteen inches in height, are very stout, and generally bear a good crop of large, well-filled pods. The pods average five inches in length, containing seven to nine large peas of a light green color, which are tender and sweet.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25, postpaid

Improved Strategem—Vines of strong growth, with large foliage, but only eighteen inches in height, and do not need any support. Pods of large size, well-filled with large dark green peas of rich, sweet flavor. One of the very finest.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25, postpaid

Champion of England—A standard, very productive, main crop variety, universally admitted to be one of the richest and best flavored of the late peas. The vines are tall, about four to five feet high. The pods are large, about three inches long. The seed is light green and wrinkled. We consider this variety one of the best of its season, either for the home garden or for market gardening use. Pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25, postpaid.

Dwarf Alderman—Perhaps the best all-round pea of this type, vines strong and vigorous, leaves and pods rich dark green. A very heavy yielder of the finest quality peas. Try them this year.

Pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c, postpaid

Telephone—A tall-growing, late sort, three and a half to four feet in height, having pods of a very large size, containing six to seven peas of delicious flavor. Continues in bearing for quite a long time.

Per pkt. 10c; lb. 25c; 5 lbs. \$1.00, postpaid

Thomas Laxton—Extra Early and Fine Quality—Thomas Laxton Peas are very similar to Gradus in every way except the shape of the pods, the ends of which are square, and the pods and vines are a darker green. It is nearly or quite as early as Gradus, and the large wrinkled, dark green peas are sweet, tender, delicious, and unexcelled in quality by any of the late varieties. The vines grow about three feet high.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25, postpaid

World's Record—World's Record is an English variety which has proved to be perfectly adapted to the Northwest. Our seed has been grown in this locality for several seasons, and is thoroughly acclimated. The vines are semi-dwarf, growing about three feet high, and the yield, size and quality of the peas is wonderful considering its extreme earliness. The pods are large, dark green, of the Gradus type, and are filled with eight or ten large wrinkled peas, sweet and of fine flavor.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25, postpaid

EDIBLE PODDED PEAS or SUGAR PEAS

This class of peas is not generally known in this country, but is much used abroad. The sweet, brittle and succulent pods have none of the tough inner lining found in ordinary varieties of garden peas; they are used in the same way as snap or string beans, and are excellent also for pickles.

MAMMOTH MELTING SUGAR

This is one of the best-known of all edible-podded peas. The vines grow luxuriantly and reach a height of 6 to 7 feet. The pods are borne in great profusion all over the vine and they should be gathered when the seeds are just beginning to form. They are broken in pieces the same as string beans and make a delicious and palatable dish.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 25c, postpaid

GIANT LUSCIOUS EDIBLE POD

The pods, which are five to six inches long, are very fleshy, curved or scimitar shaped and of light green color. When young the pods are very tender and free from strings and when cooked are of superior quality and delicious flavor. The vines average about four feet high and are vigorous and productive.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c

DWARF GRAY SUGAR

Grows 18 inches high and produces a heavy crop of small flat pods, 3 inches long. The pods are gathered, broken and cooked like string beans when the peas begin to develop in the pod.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c

SWISS PEAS

A flat or 3-cornered variety of excellent quality for soup. Insects do not trouble this variety.

Per pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 30c; 5 lbs. \$1.25, postpaid

PEANUT CULTURE

As the Peanut is a tender, warmth-loving plant the seed should not be planted until the soil has become warm and the Maple trees are out in full leaf. They succeed best in light, easily worked soil but can be grown in heavy, well-drained ground if kept well cultivated. When planting remove the shells, planting the kernels one in a place fifteen to twenty inches apart in the row. The cultivation is the same as for Bush Beans and the soil should be frequently hoed or cultivated to promote strong, rapid growth until the plants commence to flower. The flowers appear at the base of the stalk and when they appear loose earth should be hilled up around the stalks so that the nuts may bury themselves in the soil. When the foliage is touched by frost, lift or pull up the plants with the nuts attached and hang up to dry in a cool, airy room or shed.

PEANUTS

Jumbo (See illustration)—The plants produce a large quantity of nuts, adapted for culture in our northern climate, especially in light or sandy soils.

Pkt. (10 pods) 10c; $\frac{1}{2}$ lb. 30c; lb. 55c; 2 lbs. \$1.00

Spanish—This is an excellent forage plant for light land in hot, dry seasons. The tops are cut and cured for hay just before frost. The plants also set a large crop of the small nuts, which make an excellent fattening food for hogs.

Oz. pkt. 10c; $\frac{1}{2}$ lb. 20c; lb. 30c; 2 lbs. 55c; 5 lbs. \$1.25

PEPPER

Peppers are used very extensively as a condiment. In Mexico the hot varieties are eaten raw as we would eat radishes, but the greatest use is for seasoning other dishes. The large, thick-fleshed, sweet varieties are eaten more extensively farther north and are served in various ways, green or ripe, with vinegar and salt, like tomato salad, or made into mangoes, by cutting one side, removing seeds and filling with chow chow pickles.

The culture of peppers is the same as for egg plant and the plants need quite as much heat to perfect them. Guano, hen dung, or any other bird manure hoed into the surface soil when the plants are about six inches high, will wonderfully increase the product and also improve the quality of the fruit.

Chinese Giant—This standard variety is larger than "Ruby King." It is very prolific for so large a pepper. The productiveness may be increased by pinching off the first or "King blossoms." The fruit grows 4 to 5 inches broad on top and of equal length, and quite uniform in size; the flesh is unusually thick, mild flavor and makes a very fine salad sliced and served like tomatoes. The color is green turning to glossy scarlet when ripe.

Per pkt. 5c; ½ oz. 40c; oz. 75c; ¼ lb. \$2.00

Bell or Bull Nose—Do not confuse this with the Chinese Giant. It is similar in shape but scarcely more than half as large. It is much more prolific and a very desirable variety for the home garden.

Per pkt. 5c; oz. 60c; ¼ lb. \$1.75; lb. \$6.00, postpaid

California Wonder—This new variety resembles Chinese Giant in shape, but has much thicker flesh. The fruit will average 4 inches in diameter at the top, tapering slightly. It matures its fruit somewhat earlier than Chinese Giant and is very prolific. Color glossy dark green, turning to crimson.

Per pkt. 5c; ½ oz. 40c; oz. 75c; ¼ lb. \$2.00

Neapolitan—Very early and productive; large and sweet; fruit of upright growth, 4 to 4½ inches long by 2 inches in diameter.

Per pkt. 5c; oz. 30c; ¼ lb. 85c

Pimiento—**Perfection**—This is a sweet Pepper—one which you will enjoy eating in salad, either fresh or canned. Gardeners are planting Pimiento largely. Quite large, top shaped, very thick flesh and wonderful mild flavor.

Per pkt. 5c; oz. 60c, postpaid

OTHER PEPPER SORTS

Cayenne—Long red; very hot.

Tabasco—Hottest of all.

Per pkt. 5c; ½ oz. 35c; oz. 60c; lb. \$1.75

Red Chili—Good hot pickling.

Per pkt. 5c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.60

MIXED PEPPERS

Mixed Peppers—A great many varieties mixed. Space will not permit to name them all.

Per pkt. 5c; oz. 40c; ¼ lb. \$1.00, postpaid

PEPPER PLANTS—See page 38

PUMPKINS

Pumpkins are not so particular in regard to soils as melons or cucumbers, but in other respects are cultivated the same, though on a larger scale. They are generally raised between hills of corn, but may be planted with success in fields by themselves. The pumpkin more properly belongs to the farm than the garden, especially as it really mixes with and injures the quality of the finer squash.

SMALL SUGAR, or NEW ENGLAND PIE

This variety is small but of most excellent quality for pies. The fruits are deep orange, 8 to 10 inches in diameter, round or somewhat flattened and slightly ribbed. The flesh is rich deep yellow, fine grained and very sweet.

Per pkt. 5c; oz. 15c; ¼ lb. 20c; lb. \$1.00, postpaid

CONNECTICUT FIELD, or "BIG TOM"

Vines of strong, vigorous growth and wonderfully prolific. Fruits will average fifteen to twenty inches in diameter; round or slight oval in form. Smooth, hard, reddish-orange skin, slightly ribbed, with rich orange-yellow flesh. Frequently grown among corn to make a crop of pumpkins for feeding to dairy stock.

Per pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 75c, postpaid

"KING OF THE MAMMOTHS"

This is the very best genuine strain of the true Mammoth Pumpkin. Fruits grow to enormous size, sometimes reaching two feet or more in diameter, and from one hundred to two hundred pounds in weight. Salmon-orange skin, very thick, bright yellow flesh, which is fine-grained, tender and of excellent quality for pies. To raise the largest fruits, vines should be allowed ample space in which to grow—only one plant should be allowed to grow in a hill, and only the best fruit left on the vine.

Per pkt. 5c; oz. 15c; ¼ lb. 35c; lb. \$1.00, postpaid

WINTER LUXURY

The best flavored pie pumpkin grown; enormously productive; excellent keeper; medium size; color, golden-russet, finely netted; flesh, deep golden, sweet, tender and very thick; none better.

Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00

LARGE CHEESE

Large, round, flattened fruits, with creamy-buff skin; averages two feet in diameter. An excellent keeper; it has thick flesh of extra fine quality.

Per pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 75c, postpaid

JAPANESE

Similar in size and form to the well-known Cushaw, but the skin is a deep green, with dark stripes, turning to a rich golden-yellow. Fruits mature early, the large neck is solidly meaty, and seeds are marked with curious indentations, resembling the characters of the Chinese alphabet. Flesh deep yellow, of fine quality.

Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00, postpaid

GOLDEN OBLONG

Very hardy and productive, pumpkins fifteen to twenty inches in length and eight to ten inches in diameter. Skin of a rich golden orange, thin but tough, making it almost as good a keeper for winter as the hard-shelled squashes. Flesh is a light golden-yellow, of very rich, fine quality.

Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00, postpaid

KENTUCKY FIELD

Fruit flattened, the diameter being two or three times more than the length. Skin mottled light green and yellow, changing to rich cream color as it matures; flesh tender and of excellent quality.

Per pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 75c, postpaid

WHITE CUSHAW

A popular crooked-neck variety with a hard creamy-white shell. Fruits two feet in length, with long, solidly-meat neck; seeds are all located in the lower bulb-like end. Thick flesh of fine quality.

Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00, postpaid

PUMPKIN SEED MIXED—All varieties mixed; very popular. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 60c, postpaid

RADISHES

For forcing, sow in hotbeds or under glass in rich, sandy soil, made perfectly level. Scatter evenly over the surface from sixty to one hundred and fifty seeds to the square foot and cover with one-half inch of soil sifted on, and attend carefully to the watering and airing. If the bed is a good one, the whole crop can be marketed in twenty-one to forty days after planting. For open ground culture, sow on rich, sandy soil as soon as it is fit to work in the spring, in drills twelve inches apart and thin out the plants, if necessary, to prevent crowding. A good dressing of nitrate of soda will greatly stimulate growth and insure tender, brittle roots. Successional sowings from one week to ten days apart will keep up a supply. After the hot weather of summer begins, it is better to sow the summer and winter varieties, as they do not become tough and stringy nor pithy so quickly as the early sorts. Radishes are subject to root maggots, which make them useless for culinary purposes. We know of no certain remedy for this pest. We have found that the best preventive measures are to avoid the use of rank manure, and not to sow on ground where radishes, turnips or cabbages were grown the year previous. We have been very careful to secure the very best seed possible, and there is none sold under other names which is better than that of the varieties we offer.

SAXA, THE EARLIEST RADISH ON EARTH

Saxa is a scarlet globe radish developed to the highest point as to earliness, uniform shape and high eating quality. Perfectly globe shaped with bright deep red skin and white solid flesh very mild in flavor. The tops are short. Pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 75c.

Crimson Giant—A fine, bright-red radish, growing quickly to a large size. It is especially fine for bunching for early market from plantings in the open ground, being ready to market in from twenty-five to thirty days from time the seed is planted.

This radish is a deep globe in form; two inches in depth; one and one-half inches in diameter, with thin, tender skin of a deep crimson. The flesh is purest white, crisp, and of mild flavor. The roots are entirely free from the hollow center or pithy fibre of overgrown, small, extra early sorts, even when twice as large!

Per pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 75c, postpaid

Sparkler (Scarlet Turnip White Tip) The Best for the West—Most attractive small round roots with bright scarlet top, a clear white base, and small, slender taproot. The juicy flesh is pure white in color and of agreeably snappy flavor. Scarlet Turnip White Tip is most popular and choice market. Our strain of this variety is extra fine.

Per pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 75c

FRENCH BREAKFAST

French Breakfast—Is a beautiful radish of true oblong or olive shape. The color of the skin is bright carmine, shading to clear white in the lower portion. The flesh is white, firm and crisp; juicy, mildly pungent, and tender. It is well adapted for forcing in the greenhouse and hotbed. One of the leading early varieties for market use or home growing. Pkt. 5c; oz. 10c; 4 ozs. 25c; 1/2 lb. 40c; lb. 80c, postpaid.

RAFFIA FOR TYING—Raffia is the straw-colored inner skin of a palm found in Madagascar. It is very strong and tough but soft and flexible, which makes it the very best material for tying vegetables, plants, vines, etc. It is better than twine, as it does not cut the plants and is much stronger. It is also used for making baskets. Raffia comes in hanks from 1 to 5 lbs. We offer the best grade. Price per pound, 40c, not postpaid.

White "Icicle"—The finest and longest of the very early pure white varieties. Planted in spring and the radishes are ready for use in twenty to twenty-five days. Their long, slender form and pure paper-white skin are most attractive when bunched for market. This radish is not only crisp and tender when young, but retains these qualities until the roots attain large size, so that it will remain in fine condition longer than any other first-early variety. It is excellently adapted for forcing purposes or successive sowing in the open ground, and gives a continuous supply of tender, crisp radishes throughout the season.

Per pkt. 5c; oz. 10c; 1/4 lb. 30c; lb. \$1.00, postpaid

Early Long Scarlet Short Top

The long, slender, handsomely-colored roots are most attractive in appearance. They are ready in about twenty-five days; crisp, brittle and of choicest quality. They reach a length of five to six inches, growing half out of the ground. Per pkt. 5c; oz. 10c; 1/4 lb. 25c; per lb. 75c, postpaid.

Long Black Spanish—Black skin, white flesh. Per pkt. 5c; oz. 10c; 1/4 lb. 30c; per lb. \$1.00, postpaid.

Round Black Spanish—The favorite winter Rettig of the United States.

Per pkt. 5c; oz. 10c; 1/4 lb. 30c; lb. \$1.00

White Strasburg—A fine solid summer radish of large size. Per pkt. 5c; oz. 10c, postpaid

California Mammoth White Winter—Long; of large size. Per pkt. 5c; oz. 10c; 1/4 lb. 30c; lb. \$1, postpaid

Round Scarlet China—Extra fine round roots for winter.

Per pkt. 5c; oz. 15c; 1/4 lb. 40c; lb. \$1.50, postpaid

Chinese Rose, or Scarlet China—Excellent; good keeper.

Per pkt. 5c; oz. 10c; 1/4 lb. 30c; lb. 90c, postpaid

New White Chinese—Best for autumn; of immense size. Pkt. 5c; oz. 15c; 1/4 lb. 40c; lb. \$1.25, postpaid

MIXED RADISH SEED

All kinds, colors and styles. A great variety; they will become ready for the table early, medium and late. You always have some that are just right, sweet and juicy. This mixture is for a small garden, where space is limited, and one sowing does for the whole season.

Pkt. 5c; oz. 10c; 1/4 lb. 20c; lb. 50c, postpaid

TRY THIS

Plant the little round radishes in the same row at the same time with beets or carrots. The radishes will break the way for the beets and carrots and will be ready for pulling by the time they need the room.

JAPANESE RADISHES

Radish—Nerima-Long

Nerima Long (Mikado)—“Nerima” is the name of the province of production, near Tokyo, Japan. This is a most valuable one, large and long (as long as three feet), and the end of it is round in form, snowy white and bright color and very fine test with sweet flavor. Nerima can be used in all styles of cooking and pickle; hardy and good keeper. We have had long experience of production of Nerima successfully and we are earnestly presenting this to all good farmers and garden lovers.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c, postpaid

Our Mail-Order Trade, growing steadily from year to year, is one result of your confidence in us and our confidence in you. No business can be truly successful unless the transactions are mutually profitable. Each season we strive to render better service.

RHUBARB or PIE PLANT

Culture—Rhubarb succeeds best in deep, somewhat retentive soil, and the richer this is and the deeper it is stirred the better. Sow in drills an inch deep, and thin out the plants to six inches apart. In the fall transplant into very highly-manured and deeply-stirred soil, setting them four to six feet apart each way, and give a dressing of coarse manure every spring. The stalks should not be plucked until the second year, and the plant never allowed to exhaust itself by running to seed. Per pkt. 5c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; lb. \$1.50. Rhubarb roots, by express, not prepaid, 10c each; \$1.00 per doz.; by mail, prepaid, 15c each; \$1.50 per doz.

Salsify or Vegetable Oyster

Culture—It succeeds best in a light, well-enriched soil which should be stirred to a good depth. Coarse and fresh manure should be avoided, as it will surely cause the roots to grow uneven and illshaped. Sow early and quite deep, giving the general culture recommended for parsnips. The roots are perfectly hardy, and may remain out all winter, but should be dug early in spring, as they deteriorate rapidly after growth commences. Store a quantity for winter use in a pit or in a cellar packed in damp earth or sand.

Sandwich Island Mammoth—This grows uniformly to an extra large size, averaging fully double the size and weight of the roots of the old variety. The roots, notwithstanding their extra large size, are of very superior quality and delicate in flavor.

Per pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.75, postpaid

SPINACH

Should be planted in very rich ground, the richer the better. Sow in drills 12 to 18 inches apart, and begin thinning out plants when the leaves are an inch wide. All should be cut before hot weather, or they will be tough and stringy. For early spring use sow early in autumn and protect plants with light covering of leaves or straw, or plant as soon as land can be worked in the spring. Under favorable conditions, leaves may be large enough for eating in eight weeks.

Victoria—The foliage is heavy, the broad, dark-green leaves being of the true Savoy appearance, and of the finest quality. It remains in prime condition from two to three weeks after nearly all other varieties have run to seed. Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; per lb. 50c, postpaid.

Thick Leaved Improved—Medium early rapid growing variety, forming large, thick, slightly crumpled deep green leaves of good quality.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid

Long Standing Prickly—This variety is an improved strain of the long standing type of spinach that matures a little later than the round seeded sorts. It is usually planted in the Fall, but is also well adapted for Spring use. Sometimes called Prickly Winter.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid

Long-Standing—Leaves large, thick, fleshy and crumpled. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid

New Zealand—A distinct type of spinach which makes large, bushy plants, often 3 feet in diameter. Only the young leaves and tips of the branches are used and the more they are picked, the faster the plant seems to grow.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 25c; lb. 75c

SWISS CHARD—See Page 13

SQUASH

The Squash is one of the most nutritious and valuable of all garden vegetables. The summer varieties come to the table early in the season, while the winter sorts can be had in perfection from August until the summer varieties are again in condition. Few farmers appreciate the value of winter squash as food for stock. We think an acre of squash, costing no more to cultivate and much less to secure, will give usually as much food available for feeding stock as an acre of corn, and we strongly urge our readers to try a "patch" for this purpose.

Culture—Squash plants are very tender and sensitive to cold, and planting must be delayed until warm weather. The general methods of culture are the same as those given for cucumbers and melons, but squash is less particular as to soil. The summer varieties should be planted four to six feet apart each way, and the winter sorts eight or ten. Three plants are sufficient for a hill. In gathering the winter sorts care should be taken not to bruise or break the stem from the squash as the slightest injury will increase the liability to decay.

TABLE QUEEN, "Des Moines"

Called Danish Squash on Portland Market

A trailing variety, producing acorn-shaped fruit with a thin, distinctly ribbed, dark green shell; 6 inches long by 4½ inches in diameter. Flesh light yellow and bakes well; quite early.

Per pkt. 5c; oz. 20c; ¼ lb. 50c; lb. \$1.50

MAMMOTH WHITE BUSH SCALLOP

The fruit is a beautiful, clear waxy-white, instead of the yellowish-white so often seen in the old Early White Bush Scallop, and is superior to that variety in size and beauty. The handsomest of the scalloped squashes. Per pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; lb. 80c, postpaid.

GIANT CROOKNECK

This strain is equally as early as the common small-fruited variety, while the squashes grow to a much larger size, measuring from eighteen inches to two feet in length. Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00, postpaid.

GIANT SUMMER STRAIGHTNECK (New)

A straight selection from Mammoth Yellow Crook-neck, which is in demand as it packs so well for shipping. Fruits heavily warted. Eighteen to 20 inches long when matured. Deep orange color; thick, meaty neck. Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00

BURPEE'S BUSH FORDHOOK SQUASH

In this new true bush type the plants can be grown much more closely together. The fruits are rather shorter and thicker than those of the running type; they are also thicker-fleshed, and have a smaller seed cavity. They are unsurpassed for baking, frying, or making pies, while stored in a dry place they will keep in good condition until the following June.

Per pkt. 10c; oz. 15c; ¼ lb. 40c; lb. \$1.50, postpaid

BURPEE'S FORDHOOK SQUASH

This is the most desirable running variety for either summer or winter use. The vines are of strong, vigorous growth and wonderfully productive. Fruits oblong in form, eight to ten inches in length, slightly rigid, smooth, thin, yellowish skin, flesh very thick and of a light straw-yellow. Either for baking like sweet potatoes or making pies during the winter, the quality is unsurpassed.

Per pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.50, postpaid

BANANA

The squash grows from one to two feet in length. The skin varies from a bright yellow to a dark olive green. Flesh firm and solid, of beautiful orange-yellow and excellent quality. It keeps from one season until another. When quite young it is excellent to cook as a marrow.

Per pkt. 5c; oz. 20c; ¼ lb. 50c; lb. \$1.50, postpaid

"THE DELICIOUS"

The squashes weighing from five to ten pounds, vary both in color and form, but are uniformly delicious in flavor and splendid winter keepers. The dark-orange flesh is very thick and fine grained.

Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00, postpaid

DELICATA

A small-fruited variety, suitable for both summer and winter use; oblong, slightly ribbed, with orange-yellow skin, striped with dark-green. Flesh thick and solid. Cooks dry, and is of rich flavor.

Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00, postpaid

BOSTON MARROW

A large fruited, hard-shelled sort, for winter use, having bright orange skin and deep orange flesh. Vines of strong running growth, very productive; fruits thickish-oval.

Per pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00, postpaid

COCOZELLE BUSH

This is also known as Italian Vegetable Marrow. The oblong fruits measure 12 to 16 inches in length. The skin is deep green, marbled with yellow and dark green stripes. A very productive variety. Per pkt. 10c; oz. 25c; 4 ozs. 50c; ½ lb. 80c; lb. \$1.35, postpaid.

COCOZELLE VINING

Same price as above.

ZUCHINI

Similar in all respects to Bush Cocozelles except the fruits are mottled dark and light green, giving them a greenish-gray appearance. Per pkt. 10c; oz. 25c; 4 oz. 50c; ½ lb. 80c; lb. \$1.25, postpaid.

VEGETABLE MARROW

This is a most important vegetable in the English market, but little known in this country. The fruit is generally eaten when less than half grown, as the flesh is then very tender and marrowy.

Per pkt. 10c; oz. 20c; ¼ lb. 50c; lb. \$1.75, postpaid

TRUE HUBBARD

This is the well-known winter squash, now grown so largely throughout the country. Vines of strong running growth; fruits large, olive-shaped, with dark-green skin and very rich flesh. An excellent keeper and of splendid quality. Our strain is extra fine (see the illustration, from photograph, above).

Per pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25, postpaid

RED, or GOLDEN HUBBARD

The heavily warted skin is of rich orange-yellow, turning to deep salmon-red when ripened. It is equally as productive and fine in quality as the original Hubbard Squash.

Per pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25, postpaid

MAMMOTH WHALE

These squashes grow from 2½ to 3 feet in length. The skin is dark olive-green; the flesh firm and solid; a beautiful orange-yellow of excellent quality.

Per pkt. 5c; oz. 10c; ¼ lb. 35c; lb. \$1.25, postpaid

MARBLEHEAD

Similar to Hubbard, but much earlier. It is warted somewhat and the rind is slate green.

Per pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25, postpaid

MIXED SQUASH SEED

All sorts, shapes and colors. Very popular.

Per pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 75c, postpaid

TOMATOES

Culture—Tomatoes do best on light, warm, not over rich soil, and success depends upon securing a rapid, vigorous and unchecked growth during the early part of the season. Sow in hotbeds from six to eight weeks before they can be set out of doors, which is when danger from frost is past; when the plants have four leaves transplant into shallow boxes or cold frames, setting them four or five inches apart; give plenty of air, and endeavor to secure a vigorous but steady and healthy growth, so that at the time of setting in the open ground they will be strong and stocky. Even a slight check while the plants are small will materially diminish their productiveness. Set out of doors as soon as danger from frost is over, but before doing so harden off the plants by gradually exposing them to the night air, and by the withdrawal of water until the wood becomes hard and the leaves thick and of a dark-green color. Transplant carefully and cultivate well as long as the vines will permit.

To insure best results in respect to early ripening, as well as the amount and perfection of fruit, it is advisable to train up and trim the vines, especially if the patch is rather small. When the plants have been properly started and are six to ten inches high, they will begin to throw out branches. Select one of the largest and most vigorous of these and pinch off all others except this one and the main stem. Care must be exercised not to pinch off the fruiting branches, which, as they appear, can be distinguished by the buds that are formed very early. In a short time these two remaining branches will become equally vigorous, and as ordinary varieties will grow four to six feet high during the season, they should be securely tied at intervals of about ten inches to a long stake, preferably two inches square which has been securely set in near the root of the vine. Fruit will set to almost any height desired if all side branches are kept trimmed off.

By such a method of training and trimming the fruits are kept clear from the ground, and with free access to sunlight they ripen much earlier; the vitality, otherwise exhausted in superfluous branches and leaves, is utilized in forming fruits of largest size, greatest perfection of shape and best quality.

CHALK'S EARLY JEWEL

CHALK'S EARLY JEWEL

The largest, smoothest and finest-flavored extra early bright red tomato! Within a week to ten days as early as Spark's Earliana, it is even a heavier cropper, with tomatoes of larger size and sweeter flavor—produced continuously throughout the season. Of compact growth, the plants are fairly loaded with fruit. The tomatoes are uniformly of good size—seventy-five will fill five-eighths bushel basket. The large, handsome fruits are very solid and deep through, being almost round, or ball-shaped. Color brightest scarlet, ripening right up to the stem without any cracks or green core. The thick flesh is very solid, with comparatively few seeds, and of fine, sweet flavor; skin thin, but sufficiently strong to make it a good shipper. Per pkt. 5c; $\frac{1}{2}$ oz. 25c; oz. 40c; $\frac{1}{4}$ lb. \$1.00; per lb. \$3.50, postpaid.

BONNY BEST

An early, scarlet-fruited variety which has proven a success all over the country. It is from ten days to two weeks earlier than Chalk's Early Jewel, which it otherwise resembles. It is smooth, very even in size, very solid, and also very prolific. It is one of the best house-garden, canning and shipping tomatoes in existence.

Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50, postpaid

BEEFSTEAK or PONDEROSA

In addition to its ponderous size it is also very solid, there being but few seeds. In color it is a beautiful crimson throughout. Although so large it is quite early.

Per pkt. 5c; oz. 50c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00, postpaid

JOHN BAER

One of our earliest and most profitable varieties. Fruit globe shaped, bright scarlet in color, good size; solid, coreless and with few seeds. Vigorous and prolific. Per pkt. 5c; oz. 35c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50, postpaid.

"BURBANK" TOMATO

Earliest, smoothest, most productive and best early tomato, bright crimson, thick, smooth and firm with few seeds. Unusually heavy and of the finest quality. Keeps well; a good shipper; a prolific, continuous bearer, has the unusual feature of being easily peeled, the skin slipping readily from the flesh. Resistant to wilt and other diseases.

Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.75, postpaid

DWARF CHAMPION

This is sometimes sold as the "Tree Tomato." It is a second early or main crop, purplish pink variety, especially desirable where garden space is limited. The vines are about two feet high, vigorous, upright and compact. The fruits are medium sized, exceptionally smooth and of very good quality. Our stock is a very superior strain with more even, smoother fruit than the original. Per pkt. 5c; oz. 50c; 2 oz. 85c; $\frac{1}{4}$ lb. \$1.40, lb. \$5.00, postpaid.

SPARKS EARLIANA

The plants are compact in growth with short, close-jointed branches, setting fruits very freely in the center. An entire plant may be covered with an ordinary bushel corn basket—yet so freely are the fruits set that each plant will produce a five-eighths bushel basket of tomatoes during the season of about four weeks, which covers the bearing period of the early plants.

The tomatoes are quite uniform in size and of smooth regular form, averaging three inches in diameter and from two to two and a half inches in depth; they are fleshy, solid and excellent for shipping purposes. Choice seed of this strain is extra selected and far superior to the stock usually sold. Per pkt. 5c; $\frac{1}{2}$ oz. 25c; oz. 40c; 2 oz. 70c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50, postpaid.

Tomatoes

MARGLOBE WILT-RESISTANT TOMATO

MARGLOBE WILT-RESISTANT

Probably no tomato has created such intense interest since the introduction of our Wood's Famous Brimmer. It was bred primarily to produce a red wilt-resistant tomato of the Globe type and exceeded all expectations. It is not only wilt-resistant, but is resistant to "nail-head rust" as well; is a splendid bearer, the fruits averaging one-half pound, firm, thick and mildly acid. Ripens perfectly, does not crack easily and is of very superior quality. The fruits are of good size, smooth, solid, deep from stem to blossom, and are borne in clusters of 5 to 7 fruits. Marglobe has proved its ability to withstand long periods of wet and unfavorable weather conditions. Per pkt. 10c; oz. 40c; 2 ozs. 75c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.

STONE

The best main crop variety for all purposes and largely used for canning. Vine tall and prolific. Fruit smooth, large and uniform. Color bright scarlet.

Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.25, postpaid

TOMATO PLANTS—See Page 38

SMALL FRUITED TOMATOES

The fruit of these are largely used for making fancy pickles, preserves, etc. The plants are extremely productive.

YELLOW PLUM

The fruits average two inches in length and one inch in diameter, of a bright lemon-yellow; are solid, fleshy, and of excellent flavor.

Per pkt. 5c; oz. 50c

YELLOW PEAR

Similar to the Yellow Plum, but the fruits have a slim neck or distinct pear shape.

Per pkt. 10c; oz. 50c

Small Fruited Tomatoes Mixed, 10c per package.

TOBACCO SEEDS

Culture—A very clean piece of land is best for the tobacco plant beds, hence it is customary to burn a piece of land in the woods for plant beds. This destroys grass, weeds and insects, adds fertility through the action of the wood ashes, and leaves the ground in good order. The seeds are sown about February and protected by plant-bed cloth to keep off tobacco flies. When large enough and weather is settled (about June), set the plants out in highly manured or fertilized soil in $3\frac{1}{2}$ -foot rows, 3 feet between the plants. Constant care must be given, cultivating, suckering, worming, etc.

CONNECTICUT SEED LEAF

An old, well-known variety.

Per pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.25, postpaid

GOLDEN QUEEN

The Finest of the Large Yellow Tomatoes

The superior flavor of the yellow varieties is bringing them into favor as table fruit, and those who think of a yellow Tomato as the rough fruit of the old yellow sorts will be surprised at this smooth, beautiful fruit which though large, is as smooth and well-shaped as the best of the red varieties, and of a fine and distinct flavor.

Per pkt. 5c; oz. 50c, $\frac{1}{4}$ lb. \$1.75, lb. \$5.00, postpaid

IMPROVED TROPHY

Vigorous grower, producing heavy crops of deep red fruit; fine for all purposes. It is rather late. Per pkt. 5c; oz. 25c; 2 ozs. 40c; $\frac{1}{4}$ lb. 75c; lb. \$2.50, postpaid.

PRITCHARD (Scarlet Topper)

120 days. The fruit is solid, yield heavy and the color a brilliant red. It is a resistant second early of great merit. Pkt. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c; $\frac{1}{4}$ lb. \$1.50

MIXED TOMATO SEED

This is unusually popular. We have sold thousands of packages of this mixture and find that our customers get a great deal of pleasure in growing these as it contains all sorts and colors, large and small. Try a package for 10c.

RED PEAR-SHAPED

This is a leading favorite for preserves and also to make "tomato figs." The fruit is bright red, of true pear shape, and of rich distinct flavor. The larger plum-shaped red tomato, often sold under the same name, is not nearly equal to the true variety.

Per pkt. 10c; oz. 50c

STRAWBERRY, or HUSK TOMATO

Plants of low-spreading growth and immensely productive. The small yellow fruits are each enclosed in a husk. Of very sweet flavor, highly esteemed for preserving or making pies. They are also excellent to eat raw as fruit.

Per pkt. 10c; oz. 50c

HAVANA

Grown from seed imported from Vuelta de Ahajo. Per pkt. 10c; oz. 40c, postpaid

IMPROVED WHITE BURLEY

This strain is much superior to the regular White Burley. Per pkt. 10c; oz. 40c; $\frac{1}{4}$ lb. \$1.10; lb. \$4.00, postpaid.

FOR TOBACCO WORMS apply either arsenate of lead or paris green with one of the dust guns. They apply the insecticides perfectly and the cost is small when it is remembered that they will last for years.

TURNIP

PURPLE TOP WHITE GLOBE—The best for the Northwest

Sow in drills about two feet apart and half an inch deep, or sow broadcast, but in either case be sure to have the ground rich and freshly stirred. Thin early and keep free from weeds, so that the young plants will not be checked in growth. Any over-crowding will result in rough and poorly-flavored roots. It is important to get the spring and summer crop started very early, so that the turnips may have time to grow to sufficient size before hot weather causes them to become tough and bitter.

In Middle and Western States sow for fall and main crop middle of July to last of August, and in the manner given for spring sowing. In the field turnips are often sown broadcast, though in most cases better results are obtained by drill culture.

EXTRA EARLY WHITE MILAN

This variety is remarkably early. The tops are very small, strap-leaved, upright and compact, so that rows can be planted close together. The roots are clear white, very smooth, flat and are of best quality when only about two inches in diameter. The flesh is clear white, mild, sweet and tender. Very desirable for early use, especially for forcing. Per pkt. 5c; oz. 15c; 2 ozs. 25c; $\frac{1}{4}$ lb. 35c; lb. \$1.00, postpaid.

EXTRA EARLY PURPLE TOP MILAN

Similar to Extra Early White Milan, except that the roots are a little flatter and an attractive purple-red on the upper portion. Well adapted for forcing. All in all, the Milan turnips leave nothing more to be desired in the way of an extra early garden turnip. Per pkt. 5c; oz. 15c; 2 ozs. 25c; $\frac{1}{4}$ lb. 40c; lb. \$1.50, postpaid.

EARLY PURPLE TOP, STRAP LEAVED

A very early strap-leaved variety, very extensively used for the table. The leaves are few, entire, upright in growth. The roots are flat, of medium size, purple or dark red above ground, white below. The flesh is white, fine-grained and tender. Roots when in best condition for table use are about two and one-half inches in diameter but can be grown much larger for stock feeding. This sort is also known as Early Red Top, Strap Leaver. Per pkt. 5c; oz. 10c; 2 ozs. 15c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid.

EARLY PURPLE TOP, STRAP LEAVED

EARLY WHITE FLAT DUTCH, STRAP LEAVED

A very early, white turnip, extensively used for the table, especially in the southern states. The leaves are entire, toothed on the margin but not divided or lobed, and are upright in growth. The roots are of medium size, flat, very white fleshed, fine grained and sweet. The roots when in best condition for table use are about two and one-half inches in diameter. This variety is also grown as a field crop. Per pkt. 5c; oz. 10c; 2 ozs. 15c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid.

WHITE EGG

An early, oval or egg-shaped variety with smooth, clear white roots of medium size which grow half out of the ground. The tops are small with leaves distinctly cut. The flesh is clear white, firm, fine grained and sweet. The roots of this quick growing garden sort when in best condition for use are usually about two inches in diameter and about three and one-half inches long. Per pkt. 5c; oz. 10c; 2 ozs. 15c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid.

PURPLE TOP WHITE GLOBE

This excellent table variety is globular in shape, of good size and very attractive appearance. The roots are large, purple or dark red above ground, white below. The flesh is white, fine grained and tender. The roots when in best condition for the table are about three inches in diameter, but can be grown much larger for stock feeding. This sort keeps well for so early a variety and is one of the best for market use. It is also known as Red Top White Globe. Per pkt. 5c; oz. 10c; 2 ozs. 15c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid.

LARGE WHITE NORFOLK

This sort is usually grown for feeding stock, and although a little coarse in texture it is of good quality for the table, but for the latter purpose is in best condition when the roots are about 4 inches in diameter. The roots are white and smooth, grow to the largest size, and are globe-shaped or slightly flattened. The variety is allowed to stand out during the winter in the south where the tops are used for greens. Per pkt. 5c; oz. 10c; 2 ozs. 15c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid.

MIXED TURNIP SEED

All sorts and varieties, long, round, oblong, etc.
Pkg. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; 1 lb. 40c, postpaid

TURNIP (Continued)

LARGE AMBER GLOBE

One of the best yellow fleshed varieties, grown usually for stock feeding. The roots are of large size and of globular shape. The skin is clear yellow except the top which is tinged with green. The flesh is light yellow, fine grained and sweet. The variety keeps well and is a good cropper.

Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid

POMERANIAN WHITE GLOBE

One of the most productive kinds and in good, rich soil the roots will frequently grow to twelve pounds in weight. The roots are globe-shaped or slightly flattened; skin very white and smooth. This sort is used for stock feeding and is also good for table use if pulled when the roots are not more than four to five inches in diameter. Where the winters are mild the tops are used for greens. Per pkt. 5c; oz. 10c; 2 ozs. 15c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid.

COW HORN or LONG WHITE

This variety is clear white, except a little shade of green at the top of the root, which is long and carrot-like in form, cylindrical but usually ending in a point, and slightly crooked. The roots are often twelve to fifteen inches long by about two and one-half inches in diameter and grow about three inches out of the ground. The flesh is fine grained and well flavored, and for table use is in best condition when the roots are about two inches in diameter. Desirable for stock feeding and has obtained considerable favor as a market sort. The variety is of very rapid growth and well adapted for fall and early winter use. Per pkt. 5c; oz. 10c; 2 ozs. 15c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid.

EARLY SNOWBALL TURNIP

This globe-shaped, white-skinned early Turnip is large, smooth and handsome; flesh white and of mild flavor, an excellent winter keeper, maturing its crop in about 65 days. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c

MIXED RUTABAGA SEED, VERY POPULAR—Pkg. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid

ORANGE JELLY or GOLDEN BALL

A distinct variety, one of the most delicately flavored of the yellow-fleshed turnips. The tops are small. The roots are medium sized, round, very smooth and with deeper yellow skin than most of this class. The flesh is firm, crisp and of most excellent quality. The roots are in best condition for table use when about three inches in diameter. This variety is of quick growth, adapted to spring as well as fall planting, and keeps exceptionally well. Known also as Robertson's Golden Ball. Per pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid.

PURPLE TOP YELLOW ABERDEEN

A medium sized, round, late maturing, long keeping yellow-fleshed turnip. Roots yellow with purple top. Flesh pale yellow and of very firm texture, approaching the Ruta Baga in this regard, but tender and sweet. Since it requires a longer time to mature, the seed should be sown about two weeks earlier than most sorts. It is hardy, productive and valuable for stock feeding. Per pkt. 5c; oz. 10c; 2 ozs. 15c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid.

YELLOW BORTFELDER

Bortfeld (Long Yellow)—Sometimes called long yellow Cow Horn. Pure yellow except a little shade of green at the top. Grows part out of the ground and is of very rapid growth; a heavy cropper and of delicious flavor. It has proven itself to be far superior to any turnip ever introduced for stock feeding as it is a heavy yielder and relished by all stock.

Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid

MIXED TURNIP SEED

All sorts and varieties, long, round, oblong, etc.
Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; 1 lb. 40c, postpaid

RUTABAGAS or SWEDES

Culture of Ruta Bagas—Sow the seed from about the middle of June to the middle of July. Ruta Bagas require ground enriched with well-rotted manure, and should be sown in drills about two and one-half feet apart and the young plants thinned eight to twelve inches apart in the row. Keep free from weeds by frequent cultivation, and when the roots are full grown and before hard freezing weather, pull them, cut off the tops and store in a root cellar or pit. Ruta Bagas are sometimes sown broadcast and left to take their chances with the weeds and bugs. So treated, the crop is seldom a success, though occasionally on new clearings, free from weed seed, fair results are obtained.

BUTZER'S BEST

This is a strain of Purple-Top Yellow Ruta Baga of American origin, selected to a smaller top and a much shorter neck than is usually found, while the roots grow to a large size, and are of the finest quality and excellent for table use and stock feeding. We consider this one of the most desirable kinds on our list.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. 75c

IMPROVED PURPLE-TOP YELLOW

A fine strain. Per oz. 10c; $\frac{1}{4}$ lb. 30c; lb. \$1.00.

MONARCH or TANKARD

This is a yellow-fleshed sort, having very large tankard-shaped roots, with relatively small necks, and tops. Color purplish-crimson above ground, yellow below; flesh very solid, fine-grained and of the best flavor.

Per pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 75c

LARGE WHITE

Large size, white skin, white flesh.

Per oz. 10c; $\frac{1}{4}$ lb. 30c; lb. 75c

Each variety, 5c per pkt., and prices postpaid.

Pkg. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c, postpaid

SUNFLOWER

Large Russian—This has very large single heads borne at the top of a single unbranched stalk usually, and with much more and larger seed than the common sorts. It is used extensively for feeding poultry. The plant often grows 10 feet high. Sow seed as soon as ground is fit for planting corn, in rows 3 to 4 feet apart and 10 inches apart in row. Cultivate same as corn. When the seed is ripe and hard, cut off the heads and pile loosely in any airy dry place where they will soon cure so as to be threshed out and cleaned. This variety will yield 1,000 pounds or more of seed per acre. Some species are planted largely in the flower garden for ornament. (See Flower Seeds under *Helianthus*.) Pkt. 5c; 1 oz. 10c; lb. 25c, postpaid; for larger quantities inquire for prices.

LISTED ON PAGE 7**

SWEET, MEDICINAL AND POT HERBS, FROM SEED

To preserve varieties of which the leaves and stems are used, the stems should be cut from the plants just before the blossom appears (leaving a few joints at the base to sprout into fresh growth), tied in small bunches and hung up to dry. Where wanted for home use it is preferable to leave them hanging in a cool loft or garret until they are needed for use. The varieties marked with an asterisk (*) are hardy perennials, living over from year to year, and need replanting when the old plants become exhausted.

ANISE—Used for flavoring. Pkt. 5c.

BALM—Very fragrant leaves. Pkt. 5c.

BASIL, SWEET—Leaves useful for flavoring.

Crop Failure Pkt. 5c

BORAGE—Leaves used for flavoring. Pkt. 5c.

CARAWAY—Seeds used for flavoring. Pkt. 5c.

CATNIP—Leaves used for seasoning. Pkt. 10c.

CORIANDER—Seeds used for flavoring. Pkt. 5c.

DILL, MAMMOTH—Used for flavoring pickles. Pkt. 5c

FENNEL, SWEET—Seeds aromatic. Pkt. 5c.

HOREHOUND—Very useful for curing coughs. Pkt. 5c

LAVENDER—(*Lavendula spica*)—A hardy perennial growing about two feet high. It is used for the distillation of lavender water or dried and used to perfume linen. It should be picked before it becomes dry and hard, and dried quickly. The seed is of rather slow and uncertain germination.

Per pkt. 10c; oz. 30c; 2 ozs. 55c; $\frac{1}{4}$ lb. 90c; lb. \$3.00

LAVENDER, True—(*Lavendula vera*)—Perennial. Mostly grown for the sweet-scented flowers which, when dried, are placed in the linen closet to impart their delicate perfume to the linen. Commercially grown for perfume factories.

Per pkt. 25c

VEGETABLE PLANTS

We have grown for us large quantities of choice vegetable plants, and can supply all of the varieties listed below, in their proper season, in most any quantity. We can supply all vegetable plants in two grades—plants direct from the seed beds and those that have been transplanted into shallow boxes. Transplanted plants are much stronger and better rooted, and are well worth the price, especially in the early part of the season. NO PLANTS SENT C. O. D.

WE GROW ONLY THE FOLLOWING PLANTS. NO PLANTS SENT C. O. D.

CABBAGE

EARLY JERSEY WAKEFIELD, COPENHAGEN MARKET, DANISH BALLHEAD

Transplanted and "pulled" plants. Early and late at seasonable times.

Prices	Postpaid	Not Prepaid	Doz.	100	100	1000
Transplanted	\$0.25	\$1.25	\$1.00	\$8.00		
Not transplanted	.15	1.00	.75	6.00		

CAULIFLOWER

EARLY SNOWBALL, DRY WEATHER, KING WHITE

Cauliflower seed is scarce and high in some varieties and plant prices subject to change.

Prices	Postpaid	Not Prepaid	Dozen	100	1000
Early Varieties, transplanted	\$0.30	\$1.75	\$12.00

NOTICE—Although we exercise the greatest care in the packing and dispatch of Vegetable Plants, we cannot guarantee safe arrival. Our responsibility ends on delivery to P. O. or Express Office.

No plants sent C. O. D. and no Pot Plants sent by Mail.

MARJORAM, Sweet—(*Origanum marjorana*)—An aromatic herb for seasoning. The young tender tops and leaves are used green in summer to flavor broths, dressings, etc., and are also dried for winter use. Usually grown as an annual as it is not hardy enough to endure the winter of the northern states. Plant erect but branching with small oval grayish green leaves and small purplish or whitish flowers.

Per pkt. 5c; oz. 25c; 2 ozs. 40c; $\frac{1}{4}$ lb. 75c; lb. \$2.50

ROSEMARY—Leaves very fragrant. Pkt. 5c.

RUE—A medicinal plant. Pkt. 5c.

SAFFRON—Flowers used for coloring; leaves for flavoring. Pkt. 5c.

SAGE—A highly aromatic herb; most useful of all. Pkt. 5c

SAVORY, SUMMER—Leaves for flavoring soups. Pkt. 5c

*TANSY—(*Tanacetum vulgare*)—Pkt. 5c; oz. 30c.

TAGETES LUCIDA—Considered an excellent substitute for the True Tarragon, which does not seed. Per pkt. 10c; oz. 45c

TARRAGON—(Roots only)—*Artemisia Dracunculus*—Does not produce seed. 35c each, \$3.50 per doz.

*THYME—(*Thymus vulgaris*)—The leaves are used for seasoning; a tea is also made for nervous headache. Per pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 75c

*WORMWOOD—(*Artemisia asinina*)—Used medicinally, and is beneficial for poultry; should be planted in poultry yards. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c

TOMATOES

EARLY JEWELL, EARLIANA, JOHN BAER, YELLOW PEAR

Tomato plants should not be set out before the weather is settled and ground warm, unless they are protected from frost.

If you do not know what variety is best, tell us; we will give you the right one. Postpaid Not Prepaid

BUTZER'S FLOWER SEEDS

STANDARD VARIETIES, NOVELTIES and SPECIALTIES

Plant flowers for your table, flowers for your home, and flowers for your friends. You can never have too many flowers. An abundance of pretty bouquets can be had with so little work and so little expense that every home should have the cheering influence of flowers. The culture of many is so very simple that anyone can succeed. Flowers are divided into three classes: Annuals, which produce flowers, mature and die in one season. Biennials, which grow from seed one year and bloom and die the second year. Many of these will produce flowers the first year if sown early enough. Perennials, which live for several years, producing flowers annually after the first season. These are grown from seed and also by setting out cuttings, slips, or divisions of roots. Perennials are very satisfactory, as they live for many years and produce large quantities of very beautiful flowers.

ABRONIA

Umbellata Grandiflora (Sand Verbena)—6 in. A charming trailing succulent plant, with Verbena-like heads of fragrant flowers, of bright rose with white center; it delights in a dry, poor soil and sunny situations on rock-work. Per pkt. 10c.

ABRUS

Precatorius (Crab's Eye Vine or Weather Plant)—This beautiful plant has created a great sensation. If the leaves stand upward the sky will be cloudless; if they stand out straight, changeable weather is indicated; when the leaves hang straight downward, water may be expected to fall in torrents. A local storm is indicated by the curling together of the leaves. Bears clusters of bright yellow flowers, followed by pods with brilliant red seeds used for making beads, etc. Seeds should be soaked in luke-warm water before planting. Per pkt. 10c:

ABUTILON

Royal Prize (Flowering Maple or Chinese Bell Flower)—3 to 4 ft. Per pkt. 15c.

*ACHILLEA (Milfoil, Yarrow)

Achilleas are of easy culture and grow in any good garden soil. They are useful for the border, wild garden or shrubbery; also for cutting.

Kelwayi—Dark blood-red. Pkt. 25c.

The Pearl—2 ft. June to August. Pure white, fine for cutting; blooms all summer. Per pkt. 15c.

*ACONITUM (Monkshood)

Do not plant near vegetable gardens. Roots are poisonous. Bold spikes of hood-shaped flowers, valuable for cutting; very effective in flower borders and shrubberies, thriving anywhere.

Napellus—2½ ft. August. Fine rich blue flowers. Per pkt. 10c.

ACROCLINIUM (Everlasting)

Roseum—2 ft. A pretty everlasting, bearing graceful, daisy-like flowers, pretty bright rose with yellow center which, when cut in the bud state can be dried and used for winter bouquets. Per pkt. 5c.

Roseum Flore Alba—Graceful, white, daisy-like flowers with yellow center. Per pkt. 5c.

Roseum Flore Pleno—Double pink. Per pkt. 10c.

Roseum Flore Alba Pleno—Double white. Per pkt. 10c

Roseum Single Mixed—Per pkt. 5c; ¼ oz. 25c.

Roseum Double Mixed—Per pkt. 10c; ¼ oz. 30c.

*ADLUMIA (Allegheny Vine)

Cirrhosa—15 ft. The feathery foliage is like the Maidenhair Fern. Delicate rose pink and white flowers cover the plant. Per pkt. 10c.

*ADONIS

Vernalis—18 in. May. Large star-shaped yellow flowers. Per pkt. 10c.

AFRICAN ORANGE DAISY

See *Dimorphotheca*

AFRICAN BLUE-EYED DAISY

See *Arctotis Grandis*

AGAPANTHUS

Umbellatus (Blue Lily of the Nile)—1 ft. Bright blue flowers produced in clusters on long stems. Does well out of doors in all Southern States. Greenhouse plant in the North. Pkt. 15c.

*AGATHEA

Coelestis (Blue Daisy)—Flowers sky blue with yellow disk; easy growth. Per pkt. 10c.

AGERATUM

One of the best of summer flowering plants grown from seed. The plants start readily, grow rapidly and soon come into bloom, and when they begin to bloom they flower uninterruptedly throughout the season. During the hot, dry summer months there are no brighter or more freely produced flowers.

Album—White. Pkt. 5c.

Blue Perfection—This is the darkest colored of all large flowering Ageratums. 9 inches. Pkt. 5c

Dwarf Blue—6 in. A charming variety of compact growth, covered with heads of feathery flowers of a deep lavender color. Pkt. 5c.

Little Dorrit Blue—One of the best dwarf blue ageratums. Pkt. 5c.

Fine Mixed—All colors. Pkt. 5c.

AGERATUM, BLUE Cap (New)

Surpasses Little Dorrit in dwarfness, compactness, and in the size of the individual flowers; it also has a deeper and richer color. The ideal variety for low edging of flower borders. Pkt. 15c.

*AGROSTEMMA (Coronaria)

Rose Campion—One of the most attractive of the hardy perennials. Blooms the first season from seed, producing pretty pink-like blossoms on long slender stems. Fine for both mass planting and for bouquets. Height about 18 inches. Perennial. Per pkt. 10c.

AGROSTIS

Nebulosa (Cloud Grass)—1½ ft. An airy and graceful annual grass; looks like a line of mist when in bloom. Beautiful to mix with cut flowers. Pkt. 10c.

*ALSTROEMERIA

Aurantiaca—Belongs to the Amaryllis family, quite hardy, flowers orange color streaked with red. A well established plant will produce five to six flower stalks carrying ten to fifteen blooms. Pkt. 25c.

ALONSOA

Warscewiczi—15 in. A fine plant with bright vermillion-scarlet flowers, suitable for bedding. For a red, white and blue border plant *Alonsoa* for red. Sweet Alyssum for white and *Ageratum Blue* Perfection for blue. ⅛ oz. 15c. Pkt. 10c.

ALYSSUM

A very pretty plant for beds, vases, baskets, edgings or rock work. Sweet scented and blooms profusely all summer.

Sweet (Maritimum)—This very hardy annual for borders, edging or massing in small beds, comes into bloom early in the spring, covering itself with clusters or trusses of small, pure white cruciform flowers. They have a peculiar, delicate fragrance and are useful in small bouquets. Usually not over eight inches high but spreading. Pkt. 5c; oz. 25c.

Lilac Queen—Beautiful soft lilac flowers, changing to white. Per pkt. 10c; oz. 25c.

Little Gem—Very dwarf—4 inches—and spreading. They quickly become one mass of white fragrant flowers, remaining in full bloom from spring to fall. Per pkt. 10c; ½ oz. 20c; oz. 30c

Lutescens—Yellowish flowers, 6 inches. Per pkt. 10c

Procumbens—(Carpet of Snow)—A new and very select strain, carefully selected. Plants very spreading and only about 3 inches tall. Blooms are massed, completely hiding all foliage. Pkt. 10c.

ALYSSUM (Perennial)

*SAXATILE COMPACTUM

(Basket of Gold)—1 ft. May-June. Producing masses of golden flowers very early. May be planted effectively with *Arabis*. Per pkt. 10c; ¼ oz. 40c.

AMARANTHUS

Tricolor—A hardy annual with leaves of red, yellow and green; well known as "Joseph's Coat." Especially brilliant if grown in rather poor soil.

Per pkt. 10c; oz. 30c.

Caudatus—(Love Lies Bleeding)—Blood-red, drooping. Per pkt. 10c.

All varieties mixed. Per pkt. 5c.

AMMOBIUM

Alatum Grandiflorum—2½ ft. This pretty white Everlasting should be in every garden. Grows well in sandy soil.

Pkt. 10c

ANAGALLIS

Grandiflora Mixed—6 in. Lovely dwarf plants, exceedingly effective as edgings, also charming on rock-work and in pots.

Pkt. 10c

Grandiflora Coerulea—Dark blue, center deep purple. 10 inches.

Pkt. 10c

Those Marked * are Perennials

*ANCHUSA

Stately and handsome perennials belonging to Forget-me-not family. The leaves are rough and hairy and the drooping flowers are borne in racemes on branching stems.

Italaca, Dropmore Variety—5 ft. June-July. Beautiful gentian blue, flowers one of the best perennials. Per pkt. 10c

Capensis—Annual blue. Per pkt. 5c.

*ANEMONE (Wind Flower)

Very pleasing hardy plants for the herbaceous border. Fine large flowers, few plants compare with them in beauty. Excellent for bouquets and table decorations.

Coronaria (Poppy Anemone)—Mixed. June. 10 in. Per pkt. 10c

St. Brigid's Strain—May-June. Double and single mixed. 12 in. A beautiful selection of the Coronaria varieties in a wonderful array of colors. Per pkt. 10c.

Pulsatilla—1 ft. April-May. Well adapted for rock-work or border flowers, varying from lilac to purple. Per pkt. 10c

Pulsatilla Rubra—6 to 9 in. April-May. Dark red with erect flowers. Per pkt. 10c.

*ANTHEMIS (Marguerite)

These Hardy Marguerites are most satisfactory perennials, succeeding in the poorest soil. The flowers are yellow.

Kelwayi (Hardy Marguerite)—2 ft. Daisy-like yellow blossoms, produced all summer. Excellent for cutting. Per pkt. 10c.

ANTIRRHINUM (Snapdragon)

Without question one of the most desirable flowers for general garden culture. They come in a great variety of colors and are equally good for bouquets as for mass planting. They are biennials, but can be handled as annuals also. When sown in early May they bloom in July and then until frost. If covered slightly they will come through the winter nicely and bloom abundantly the second year. For very early flowers start in the house and transplant outdoors when weather is favorable.

Tall Maximum or Giants—32 inches

This is the newest creation in Giant Antirrhinums, and is a marked advance over the older Tall Large Flowered type in size and brilliancy of color. The flowers are closely placed on the stems.

Apple Blossom—Rosy pink, yellow lip.

Copper King—Velvety copper scarlet.

Old Gold—Deep golden yellow.

Purple King—Deep glowing purple.

Snowflake—Pure white, yellow tube.

The Rose—Rose pink.

Finest Mixed.

Per pkg. 15c, 2 for 25c

ANTIRRHINUM (Snapdragon)

Tall Large Flowering—24 to 36 in.

Golden King—Giant yellow.

Queen Victoria—Pure white.

Rose King—Deep rose.

Scarlet.

Finest Mixed.

Pkt. 10c; 3 pkts. 25c

ANTIRRHINUM
HALF-DWARF SNAPDRAGONS

15 to 20 inches

Are particularly good for bedding, as they require no staking. The flowers are most wonderful, in many new shades and tints.

Climax—Orange shading to yellow in lip.

Defiance—Orange red.

Empress—Rich velvety crimson.

Firebrand—Fiery orange-scarlet.

Golden Queen—Rich yellow.

Nelrose—Deep rose pink.

Philadelphia pink—Pure pink.

Silver Pink—Delicate rose-pink, seemingly covered with a silver sheen.

Each of above, Per pkt. 10c, any 3 for 25c.

Mixed—Per pkt. 5c.

BUTZER'S SPECIAL MIXTURE

ANTIRRHINUM (Snapdragon)

Includes all these and many other charming varieties and a packet will furnish you with a never-ending color combination of long-stemmed cut flowers suitable for home, church or hospital decoration.

Per pkt. 10c; $\frac{1}{4}$ oz. 25c; $\frac{1}{4}$ oz. 40c; 1 oz. \$1.25

You Can Select 7-5c packages for 25c
Select 8-10c packages for 50c
Select 5-15c pkgs. Flower Seeds for 50c

ANTIRRHINUM MAJESTIC

(Super Giant Snapdragons)

Half Dwarf Sorts

Majestic Antirrhinums are characterized by having the largest possible florets closely spaced in large spikes on a medium tall plant. The flowers are the largest of any type, with far better spacing than that found in any other type. They have been proven the best for both cut flowers and borders and will, no doubt, supersede the other strains when a complete color range has been developed. So far, the colors run principally to the orange and terra cotta shades, which are, of course, favorites in Antirrhinums.

Eldorado. Deep golden yellow, the richest tint to date in this family. Pkt. 15c.

Golden Dawn. Golden buff overlaid salmon. Pkt. 15c.

Orange King. Coloring is an exquisite blend of shades, rich terra cotta above, the lip golden yellow merging to pure deep orange at the base. Pkt. 15c.

Red Chief. Color is a rich deep scarlet. Pkt. 15c.

Rose Marie. Light salmon rose with gold center, a most charming and delightful shade, probably the best of all. Pkt. 15c.

Sunset. Color delightful combination of bright terra cotta above, shading gradually downward into a rosy salmon. Pkt. 15c.

Twilight. Delicate apricot with yellow and salmon shading. Pkt. 15c.

Majestic Mixed. Pkt. 15c.

BUTZER'S ANNUAL FLOWER MIXTURE

A splendid mixture of the true annual flowers so blended as to give a succession of bloom from early spring to late fall. All colors may be found in this mixture. For best results the seed should be sown in a prepared seed bed.

If you have a piece of ground you cannot irrigate or have not time to give particular attention, yet you want to have something beautiful instead of unsightly weeds, we advise you to plant our Annual Flower mixture. It contains a large number of different kinds of hardy varieties that will grow with the least of care, and, produce great quantities of flowers.

Pkt. 15c; 2 for 25c; oz. 50c, postpaid

*AQUILEGIA (Columbine)

Charming hardy perennials growing from one to three feet high, bearing in countless numbers through May and June their exquisite blossoms of clear blue, white, rose, yellow, purple, striped, etc. For planting in permanent borders or naturalizing along the edges of woods or shrubbery this old-fashioned favorite is one of the best of all hardy plants.

LONG SPURRED HYBRIDS

Long Spurred Hybrids—The flowers are very large and distinct shades of blues, lavenders, mauves, whites, creams, pinks, reds, yellows, etc. Many of these colors being entirely new in the species and are the result of very many years' careful hybridization. Per pkt. 15c

Mrs. Scott Elliott's Strain of Long Spurred Hybrids. The blooms are of large size and the spurs very long. The colors range through shades of lavenders, mauves, blues, purples, whites, creams, yellows, pinks, reds, etc. There are no jarring or crude tints, and the whole form a most harmonious mass of coloring seldom seen in other flowers.

Per pkt. 25c

Canadensis (Turk's Cap) — Handsome scarlet and orange flowers.

Per pkt. 10c

Chrysanth—3 ft. Yellow, long spurred. Pkt. 10c

Coerulea (Rocky Mountain Columbine)—3 ft. One of the most beautiful of our native American flowers. Sepals, deep blue; petals, white.

Per pkt. 10c

Coerulea Rosea (Rose Queen)—2½ ft. Beautiful flowers of light to dark rose with white center and yellow anthers, a most delicate combination of colors.

Per pkt. 25c

Farquhar Pink—Very fine.

Per pkt. 25c

Vulgaris Double Mixed—Per pkt. 10c.

Single Mixed—Many varieties.

Per pkt. 10c

Double Mixed—Per pkt. 10c.

BUTZER'S SPECIAL MIXTURE

*AQUILEGIA (Columbine)

This mixture contains a great variety of all long spurred types in a splendid blend of colors. We do not believe that a more varied mixture of these choice columbine can be had.

Per pkt. 25c

*ARABIS (Rock Cress)

Charming dwarf spring-flowering plants of easy cultivation; valuable for beds, edgings. They do well in any soil, but need plenty of sun.

Alpina—6 in. A most useful hardy perennial for spring bedding and rockeries. Early in the spring the pure white flowers make a pleasing contrast in beds and borders with Alyssum saxatile.

Per. 10c

ARCTOTIS

Grandia, the Blue-eyed African Daisy—A quick-growing, half-hardy annual, forming a bush two to three feet across, with soft whitish foliage. The flower stems are long, while the flowers are large and showy—from two to three inches across—color pure white with a blue eye, surrounded by a narrow yellow zone, the under part of the petals being lilac blue; height 18 inches. Per pkt. 10c.

ARCTOTIS HYBRIDS (New)

Another of the lovely flowers which have come to us lately from Africa. The hybrids come in a brilliant assortment of showy daisy-like flowers predominating in orange and bronzy red shades, but also comprising many lovely shades of rose, cream, yellow and salmon. In the milder climates they may be classed as a perennial, but in the northern latitudes they are better treated as an annual. They flower within six months from seed, and bloom profusely through the hot summer season. Pkt. 15c.

ARGEMONE

Grandiflora (The Prickly Poppy)—2 ft. Lovely plants with an ornamental foliage and large, handsome poppy-like flowers, snowy white, filled in the center with golden stamens, very beautiful. Per pkt. 10c.

***ARMERIA (Thrift Sea Pink)**

Grand plants for crevices of wall and rocks, and also for growing in flower borders or as permanent edgings; excellent plants for the sea coast. June-July.

Formosa—9 in. Pretty rose pink. Grand for borders. Pkt. 10c

LAUCHEANA (Dwarf Thrift)

Most of us know the Giant Thrift, but we have not yet become so familiar with the dwarf strain. Laucheana is a very free flowering, dwarf variety, with medium sized flower heads of deep rose. They combine very nicely with Forget-me-nots in the rockery or dwarf border. Pkt. 10c.

Maritima—3 to 6 in. May-June. Silvery pink flowers. Per pkt. 15c

***ARENARIA (Sand Wort)**

A fine plant for shady place in rock garden.

Montana—White—Pkt. 25c.

***ASPERULA**

Odorata Woodruff or Waldmeister. An herb whose leaves are used in making beverages or when dried used to lay among linens. 6 to 8 in. Also useful for carpeting, shady places and for edgings. Per pkt. 10c

**BUTZER'S
ROSE CITY
MIXTURE
OF ASTERS**

This special mixture includes all of the newest and is truly an unrivaled mixture. This mixture will afford a splendid supply of flowers during the entire season.

The best mixture on the market.

Pkt. 10c; 3 pkts. 25c.

ASTERS**QUEEN OF THE ANNUALS**

In recent years we have paid particular attention to American grown Asters, for they have greatly increased the popularity of this flower. We know of no other flower so easily raised from seed, which combines so much beauty with grace and usefulness and is more satisfactory than Asters. They make a brilliant effect when grown in masses and furnish a constant supply of cut flowers. Every garden, large or small, should contain Asters.

Culture—Sow either in the open ground in May or in March or April in cold frame, spent hot-beds or pots or boxes in the house, covering the seed with about $\frac{1}{4}$ -inch of good rich soil; when the plants are strong enough, transplant about 18 inches apart in deeply-dug, well-prepared beds. Asters must not be planted in freshly manured soil nor in soil that has been planted to Asters for two or three years previous. Slaked lime or fresh wood ashes are beneficial if stirred in the soil a little before planting and are said to counteract the ravages of the aster blight. A few soakings with tobacco water around the roots during the growing season is also recommended.

AMERICAN BEAUTY

Similar in type of flower and growth to the well known Late Branching Asters, but differs in that all the large blossoms are produced on much longer and heavier stems. Some of the individual stems measure more than two feet in length. It makes a very heavy growth, and is one of the latest flowering Asters that we know. This should be in every garden.

Carmine Rose.	Pink.
Crimson.	Rose.
Lavender.	White.
Peach Blossom.	Mixed.
Purple.	Purple.

Per pkt. 10c; any 3 pkts. for 25c

CALIFORNIA GIANT DOUBLE

We take pleasure in recommending this type as the best Aster on the market today. Characterized by the well known Crego or Ostrich Feather type of flower, combined with the Beauty Asters' long, non-lateral branching stems and sturdy habit of growth, the California Giant Double type of Aster stands at the head of the list, not only for florists' use but also for private gardens where quality is appreciated.

Apple Blossom	Deep Rose
Peach Blossom	White
Light Blue	Dark Purple
Light Purple	Mixed

Per pkt. 10c; 3 pkts. for 25c

GIANT CREGO ASTERS

The Crego is one of the largest of all Asters, the petals being exceedingly long and wavy and the flowers borne on stems some fifteen inches in length. It is a monster among Asters. A real treat awaits anyone who plants this variety.

Crego Pink.	Crego Rose Pink.
Crego Blue.	Crego Shell Pink.
Crego Deep Rose.	Crego Crimson.
Crego Purple.	Crego White.
Crego Lavender.	Crego Mixed.

Per pkt. 10c; 3 for 25c

SINGLE GIANTS OF CALIFORNIA

It was developed out of the Double Giants of California type. The flowers are large, measuring three to four inches across, with stems 18 to 24 inches in length. The petal has a slight twist, which adds a piquant touch to its beauty. The white blossoms resemble Shasta Daisies in appearance, but their greater length of stem makes them more graceful and better adapted to florist's use. In the garden, the Single Giants of California add a charming note of simplicity among the fuller types of Asters. We believe this new, single type of Aster is destined to become very popular. We can supply this in White, Rose, Light Blue, Purple, and Mixed at 15c per pkt., 2 pkts. 25c.

IMPROVED NEW ASTER

Giant California Sunshine Mixed—They are the result of a direct cross between the now well-known California Giants and the dwarf, much-branched Sunshine type, hence the name. Plants of this new race grow 3 feet high and bear blossoms on long, stiff stems, admirable for cutting. The individual blooms are enormous, 4 to 5 and 6 inches in diameter.

With the disk a lovely light-yellow and the encircling guard petals varying shades of Enchantress pink, apple blossom, deep-rose, blue and lavender, there are produced color contrasts startlingly beautiful

Pkt. 20c

THE SUNSHINE ASTER

The plants are bushy and strong, with many flower stalks. Some of the flowers have twisted petals and some have quilled petals; all have a cushion center of tiny quills of a contrasting color which makes a flower look as if it were covered with snowflakes. The blue flowers are dotted with a paler blue and some in white, and the rose in a lighter shade of pink or white.

White.	Light Blue.
Flesh.	Dark Blue.
Pink.	Mixed.

Each of the above, pkt. 10c.

PEERLESS YELLOW ASTER

This is the best yellow Aster. The flowers are of fair size; they are borne on long stems; the color is a pleasing light yellow. Pkt. 15c.

GIANT OSTRICH FEATHER ASTER

The finest type of the Giant Comet, or Ostrich Feather type of Aster. Much larger than the Giant Comet, the petals longer, more twisted, and produced in greater abundance. Borne on long stems, they make cut-flowers par-excellence.

Shell Pink.	Rose Pink.
Rose.	Pink.
Crimson.	Sky Blue.
Light Blue.	White.
Dark Blue.	

Each of the above, pkt. 10c; any 3 pkts. for 25c.
Mixed, all colors, pkt. 10c.

THE KING ASTER

The habit is similar to the popular Giant Branching, vigorous in growth, long stiff stems. In form the flower is entirely distinct from any other variety; petals somewhat resemble the quilled varieties, but are much larger and broader, those in the center being curled and incurved, completely covering the crown. In shape and size the bloom is round, full and very large.

White.	Crimson.
Pink.	Violet.
Rose.	Lavender.
Blackish Blue.	Mixed, all colors.

Each of the above, pkts. 10c; any 3 pkts for 25c.

MAMMOTH PEONY-FLOWERED ASTERS

An exceptionally fine late-flowering Aster. The immense double blooms measure 4 to 5 inches across and are made up of numerous petals which fold gracefully toward the center as in Peonies. They are almost round and have a grace that makes them desirable for garden display and for cutting. The flowers are borne on stems 15 to 20 inches long. Very vigorous plants, branching at the base and growing 2½ to 3 feet tall.

Rosebud—Clear, deep rose, a lovely color.

Azure Fairy—Clear azure-blue, very fine.

Maiden's Blush—Delicate flesh color.

Peach Blossom—Pink, a lovely flower.

Swansdown—Pure white, exceptionally fine.

Mixed—Any of these—15c per pkt.

NEW SUPER GIANT LOS ANGELES ASTER

A marvelous new Giants of California late type, the largest yet introduced; the flowers are not only very large, but most artistic, due to the unusual curling and interlacing of the petals. Color, pure shell-pink; stems unusually long; no disbudding necessary, due to its non-lateral habit. Pkt. 15c.

HEART OF FRANCE ASTER

Heart of France opens red as the purest ruby, deepens with age and retains its remarkable color to the very end. The petals appear strikingly changeable, showing now a glow and sheen quite unique, now a soft warm velvety texture. In any light, natural or artificial, Heart of France is startlingly beautiful and will command instant admiration. Pkt. 10c.

*PERENNIAL ASTERS (Michaelmas Daisy)

Now fill a most important place in all hardy flower gardens, lighting up the borders and shrubberies with their masses and clouds of dainty and brightly colored blossoms throughout the autumn months up to November, when other flowers are scarce.

All Sorts Mixed—Extra fine, from a splendid collection; sown early in spring, they will flower the same year.

Per pkt. 10c

*ASTER ALPINUS

Both of the above varieties are excellent for the perennial rock garden.

Alpinus Goliath—Large, soft blue. Pkt. 20c.

Alpinus Nixe—Light blue, star-shaped. Pkt. 15c.

*AUBRIETIA

Large-Flowered Hybrids. The beautiful mauve spring bedding plants makes the garden so gay in the early months of the year. Aubrietas produce great masses of bloom and are charming companions of Yellow Alyssum and White Arabis. Grows well from seed. Sow in June and plant out in autumn where required for flowering in spring. A valuable strain including a wide range of many unusual colors which cannot be fixed and offered separately. Height 6 inches.

Pkt. 25c

*AURICULA

These are among our most delightful spring flowers. They require a partially shaded location.

Auricula—6 in. Flowers in early spring in colors of yellow, brown and red.

Per pkt. 25c

BABY BREATH (See Gypsophila)

BACHELOR'S BUTTON

See Centaurea.

BALLOON VINE

Thrives in light soil. One of the prettiest climbers. Remarkable for its inflated membranous capsules containing the seed. It is sometimes called Love in a Puff. Flowers white. Pkt. 5c.

BALSAM

Balsam or Lady Slipper—Double Camellia Flowered—An old and favorite garden flower, producing its gorgeous masses of beautiful brilliant colored double flowers in the greatest profusion; of easy culture; succeeds in a good rich soil. Our strain is unrivaled for great variety and size of flowers.

Double Bright Scarlet.

Double Rose.

Double White.

Double Salmon Rose.

Finest Double Mixed.

Above, Pkt. 5c.

BALSAM (Apple) (Pear)

Apple—10 ft. A very ornamental and quick growing climber. While it has a flower, it is grown mostly for the effect of the fruit which follows. This is yellow, looks not unlike an apple—hence its name. When ripe it opens and shows the seeds and blood-red interior.

Per pkt. 10c

Pear—like above, only the fruit is pear-shaped.

Per pkt. 10c

Balsam—Apple and Pear mixed. Per pkt. 5c.

BARTONIA

Aurea—12 in. One of the most showy of annuals, excellent both for beds and borders; producing showy, golden-yellow flowers. The foliage is gray and thistle-like, and is exceedingly brilliant in the sunshine. It will not stand transplanting, so should be sown where intended to bloom. Sow in the open ground early in May. Blooms through summer and fall. Per pkt. 10c

BEAN (Runner)

Scarlet Runner—Largely grown as an ornamental for its attractive flower clusters. The young shelled beans are quite palatable and serve the same purpose as shelled Limas. Pkt. 10c.

**BEGONIAS—TUBEROUS ROOTED**

These are not so hard to grow to perfection if you prepare your soil before planting the bulbs. They prefer a rich soil with a liberal quantity of Peat or leaf mold. This should be thoroughly dug in and incorporated with the soil. If your soil is not rich add some Bone Meal at the same time. Plant them about one foot apart and the bulb about one inch deep. Do not water them until the leaves appear, at no time when in growth should they be allowed to become dry.

The bulbs that we are offering this season are grown by a specialist in Oregon and we believe far superior to those that are grown in the warmer climate. We are only offering them in mixed colors. When we last saw them they were a wonder to look at. We believe they will please you as much as they did us.

30c each or \$3.00 per dozen, postpaid

The trailing tuberous Begonia is a recent introduction and it is a profuse bloomer in all shades except blue. (Price same.)

Plants for shady or half shady places are not many. The tuberous Begonia is a welcome acquisition, as it blooms the entire season, till the frost kills it. The tubers should be dug and kept dry in a basement free of frost till next spring, when it is planted again.

BELLIS—See Daisy

***BOCCONIA**

Cordata (Plume Poppy)—5 ft. A handsome border plant, having large lobed heart-shaped leaves with silvery undersurface, and flower plumes of a pretty cream color.

Per pkt. 10c

BRACHYCOME (Swan Diver Daisy)

A free flowering dwarf-growing annual which is covered during the greater part of the summer with an abundance of pretty blue and white flowers. Fine for edging, small beds or pot culture. Height, 9 inches.

BRIZA Pkt. 10c

Maxima (Quaking Grass)—12 in. Valuable for winter bouquets and wreaths. The seed clusters are heart-shaped and gracefully poised on such slender stems that they are almost constantly in motion.

Per pkt. 10c

BURNING BUSH—See Kochia.**BROWALLIA**

A half-hardy annual, making a fine bedding plant. Blooms profusely. The flowers are bright ultra-marine blue, and also sky-blue with white center.

CACALIA—2 ft. Mixed, pkt. 10c

Each flower is a miniature paint brush of orange-scarlet produced on long wiry stems which make it an excellent cut flower. An old but little known annual for the border worth trying.

Tassel Flower or Flora's Paint Brush—Scarlet and orange mixed. Pkt. 10c

***CALAMINTHA**

Alpina—6 in. A very graceful little rock plant, spreading tufts of pretty foliage, spangled with lavender blue flowers.

Per pkt. 25c

CALENDULA (Pot Marigold)

This is the Marigold of Shakespeare's time. An annual of easy culture. Plants grow about one foot high and one foot in diameter and literally covered with large double flowers. Blooms from July to frost.

Apricot Queen—See Page 2.

Orange King—The outer petals are slightly imbricated, while those of the center are curved like those of the peony. Color glowing orange. Pkt. 10c.

The Ball—It has fine stems, immense double flower of a brilliant glisten orange. A great favorite on the Cut Flower Market. Pkt. 10c.

Balls Gold—Dark golden yellow. Pkt. 10c.

Lemon Queen—Large sulphur yellow. Pkt. 10c.

All Colors Mixed—Pkt. 5c.

Campfire (Sensation)—Has proven to be the best forcing orange Calendula on the market. The flowers are extremely large and very dark orange with a scarlet sheen, making them most attractive. This strain has been carefully selected and will produce very strong stems for forcing purposes. Pkt. 10c.

CALENDULA Chrysanthia or Sunshine—See page 2

CALENDULA Golden Radio—See page 2

CALENDULA—Pastel Shades Mixture—See page 2

CALIFORNIA POPPY

See Eschscholtzia

CALLIOPSIS (Tickseed)

CALLIOPSIS (Tickseed)

Very graceful border plants, supplying throughout summer an abundance of elegant showy flowers which are greatly prized for bouquets and vases. They will thrive anywhere, even in city gardens, where their bright colors are highly appreciated.

Crimson King—Per pkt. 5c.

Golden King—Pkt. 5c.

Radiata Tigrinia (Tiger Flower)—6 to 8 in. Flowers large reddish-brown, turning golden yellow. Per pkt. 10c

Tall Double Mixed—Per pkt. 5c.

Tall Single Mixed—Per pkt. 5c.

Special Mixed—Per pkt. 5c.

***CAMPANULA (Canterbury Bells)**

Bellflower—Well known, beautiful, hardy herbaceous perennials, bearing a great production of attractive bellflowers; thrives best in light, rich soil; some of the varieties flower the first season if sown early.

Single Finest Mixed—All colors. Pkt. 5c.

Carpatica—Single Blue, grows 1 ft. high; compact; good for borders. Pkt. 5c.

Double Blue, White, Rose and Mixed—Pkt. 10c.

Campanula Calycanthema—Cup and Saucer—Lilac, Rose (delicately rosy-pink). Pkt. 10c; White (pure white), Pkt. 10c; Blue (a fine clear shade), Pkt. 10c; Mixed (all colors), Pkt. 5c; Striped (white, striped blue), Pkt. 10c.

Persicifolia, Mixed (Peach Belis)—Beautiful bell-shaped flowers which come in colors of blue and white. Pkt. 10c

Pyramidalis, Blue (Chimney Bellflower)—Rich blue saucer-shaped flowers; 18 inches high. Pkt. 10c

Pyramidalis, White—A pure white form of the above. Pkt. 10c

CANTERBURY BELLS (Annual)

New Annual Canterbury Bells—Here is, indeed, a novelty that every gardener will appreciate. In every way like the biennial Canterbury Bells, this new strain will bloom from seed in less than six months, and it is now possible to have these beautiful flowers in bloom at almost any time of the year. Plants grow from 2 to 2 1/2 feet tall and bear from 6 to 8 spikes of bloom. The colors have not as yet been segregated, but all the known shades of Canterbury Bells appear in the mixture. Pkt. 25c.

CANARY BIRD FLOWER

This is one of the most beautiful of climbers, with handsomely fringed rich yellow flowers and delicate foliage.

Per pkt. 5c

CANDYTUFT (Hyacinth Flavereal)

Candytuft has long been among the most highly prized of garden annuals. The best effect is produced by raising the plants in masses, and sowing the seeds where the plants are to bloom.

Littie Prince—Dwarf white. Pkt. 5c; oz. 70c.

White Empress—Very sweet and attractive.

Pkt. 5c; oz. 50c

CANDYTUFT (Iberis Umbellata)

Lilac—Per pkt. 5c. Flesh—Pkt. 5c.
Crimson—Per pkt. 5c. White—Pkt. 5c.

Rose—Per pkt. 5c. Lavender—Per pkt. 5c.

Rose Cardinal—Pkt. 5c. Mixed—Per pkt. 5c.

***CANDYTUFT (Perennial)**

Dwarf evergreen plants, 6 to 10 in., covered with blooms in spring and early summer. Excellent for rockeries or borders where bright dwarf masses are wanted.

Gibraltarica—Pinkish white. Per pkt. 10c.

Semperfivens—Flowers form a sheet of whiteness.

Per pkt. 10c

***CANNA**

The seed should be pierced in one spot with a file and soaked in lukewarm water for 24 hours before sowing. A splendid lot of plants may be produced.

Choice Mixed—Pkt. 5c.

CARDINAL CLIMBER

Ipomea Quamoclit Hybrida—The finest new annual climber introduced in many years. Very graceful and beautiful, growing rapidly, and in a warm, sunny location, in good soil, it reaches a height of 20 feet and is densely clothed with deeply laciniate palm-like, rich green leaves, bespangled with clusters of fiery scarlet, tubular spear-shaped flowers, measuring 1 1/4 inches across. Pkt. 10c

***CARNATIONS**

Engleman's—We believe that there is no better carnation than this, over 80 per cent will be double and is a perpetual bloomer. Mixed, per pkt. 25c

CARNATION

Marguerite—This exceedingly valuable departure in Carnations has proved a complete success. Its most important feature is the fact that it flowers easily the first year from seed—that is, from seed sown in February or March, plants can be had in full bloom by August. The proportion of fine double flowers is very great, being usually 70 to 80 per cent; these are varied and beautiful in color and exceedingly useful for cutting. The habit of the plant is robust, and hence very useful for bedding purposes. Finest mixed. Pkt. 5c

Those Marked * are Perennials

***CARNATIONS**

A half-hardy, perennial, used generally for greenhouse florist's trade in winter and for a general garden favorite in summer. There are a large number of varieties and colors, but the early flowering mixtures are recommended for out-door culture. Sow the seed early in the year and transplant in March or April.

Chabaud Mixed—A remarkable strain raised by a Carnation specialist. Blooms in 5 months after being sown, and continues to flower indefinitely in the greatest profusion. Pkt. 15c

Chabaud Double Dark Red. Pkt. 15c.

Chabaud Double Scarlet. Pkt. 15c.

Chabaud Double White. Pkt. 15c.

Chabaud Double Yellow. Pkt. 15c.

Finest Double Mixed—Saved from extra fine flowers. Pkt. 25c

CASTOR OIL BEAN—See Ricinus

CAT MINT—See Nepeta

CATCHFLY—See Silene Armeria

CATHEDRAL BELLS—See Cobaea

CELOSIA CRISTATA (Cockscomb)

Showy, half-hardy annuals of easy cultivation; 1 foot; producing large, brilliant, comb-like flower heads.

Tali Crimson—Pkt. 10c.

Dwarf Mixed—All the above and others.

Pkt. 10c; 1/8 oz. 30c

Tali Cockscomb Mixed—18 to 24 in. Pkt. 10c

Plumosa or Plumed Varieties—2 1/2 to 3 ft. These stately plants are considered among the most ornamental, and should not be omitted in any garden. They generally form pyramidal bushes branching out in candelabra shape, and the numerous massive plumes which resemble ostrich feathers, wave gracefully above the foliage.

Plumosa Mixed, all colors. Pkt. 5c, 1/4 oz. 15c.

CELOSIA

The Chinese Woolflower (Celosia Childsii)—Plants grow two to three feet high, the bloom starting early with a central head, round and globular, which often reaches the immense size of two feet in circumference. Scores of branches are thrown out, each bearing a ball of scarlet wool. All these branches support numerous laterals with small heads of bloom mixed with fresh green foliage, so that a plant looks like an immense bouquet splendidly arranged and set in the ground. None of the blooms fade in any way until hit by frost; but all continue to expand and glow with a deepening richness of color, a dark crimson-scarlet. Childsii Yellow. Pkt. 15c. Childsii White. Pkt. 15c. Childsii Scarlet. Pkt. 15c. Childsii Mixed. Pkt. 15c.

CENTAUREA**Double Cornflowers (Centaurea Cyanus)**

These are also known as Bachelor's Buttons, Blue Bottle, Ragged Sailor, Bluet and sometimes as Ragged Robin, but which name belongs to one of the *Lychnis* and frequently results in confusion. It is always best to order by the botanical names. They are well known to every flower lover and always included in old-fashioned gardens.

Blue—This is the dark blue sort so much in demand for cutting. Pkt. 5c; oz. 30c.

White. Pkt. 5c, oz. 25c. Pink. Pkt. 5c.

Mixed. Pkt. 5c.

CENTAUREA IMPERIALIS**(Sweet Sultans)**

This beautiful class is undoubtedly the finest of all Sweet Sultans for cut-flower purposes. The charming, sweet-scented, artistic-shaped flowers are borne on long, strong stems and when cut will stand for several days in good condition. It is best, in this latitude, to sow very early in the spring, so that they may perfect their flowers before very hot weather comes; 2 1/4 feet. Following distinct colors:

Brilliant Rose—Pkt. 5c. White—Pkt. 5c.

Purple—Pkt. 5c. Mixed—Pkt. 5c.

Deep Lavender—Pkt. 5c. Rosy Lilac—Pkt. 5c.

Moschata Mixed—Sweet Sultan, white, red and blue. Pkt. 5c

CENTAUREA (Dusty Miller)

Candidissima—10 in. Thick silvery white leaves, used for bedding purposes. Pkt. 10c

Gymnocarpa Dusty Miller—1 ft. Foliage finely cut of silvery gray color, used for bedding. Pkt. 10c

***CENTAUREA (Perennial)**

A dry, sandy soil of moderate fertility, seems to suit them best, keeping up a profusion of bloom all summer. *Montana*, Blue—Large-flowered perennial Cornflower. Pkt. 10c

Montana alba—White. Pkt. 10c.

***CERASTIUM**

Tomentosum (Snow in Summer)—4 in. Silvery white foliage, covered with snow-white flowers in early summer. Per pkt. 15c

***CHEIRANTHUS**

Allioni—1 ft. Fine rock or border plant with orange flowers. Pkt. 10c

***CHELONE**

Long coral-red spike like a pentstemon.

Hybrida, Mixed (Turtle Head)—3 ft. July and August. Allied to Pentstemon; throws out long spikes of brilliantly-colored flowers. Pkt. 10c

Barbatus Coccinea—Red. Pkt. 10c.

CHIMNEY BELLS—See *Campanula Pyramidalis*

CHINESE BELLFLOWER—See *Platycodon*

CHINESE LANTERN PLANT—See *Physalis*

Franchetti

CHINESE WOOL FLOWER—See *Celosia Childsii*

CHRYSANTHEMUM

These outdoor "summer Chrysanthemums" are showy for bedding or borders in the garden and desirable for cut flowers. Plants become more bushy and shapely if pinched back in early growth and the practice of disbudding will result in much larger flowers. These annuals are not the winter flowering sorts sold by florists and which are propagated only by division of roots.

Coronarium—Double Tall Mixed. Pkt. 5c.

Coronarium—Double Dwarf Mixed. Pkt. 5c.

Carinatum—Single Mixed. Pkt. 5c.

Carinatum—Double and Single Mixed. Pkt. 5c.

CLARKIA

One of the prettiest and showiest of hardy annuals that bloom freely and have flowers of such various bright colors that a bed of them in full bloom is a beautiful sight; useful for hanging baskets, vases and as edgings to beds of larger growing plants. Sow outdoors in early spring and grow in partial shade. The plants keep up a continuous bloom through midsummer to late autumn. Average height 1½ ft.

Alba Elegans—Double pure white.

Apple Blossom Elegans—Double pink.

Brilliant Elegans—Double salmon pink.

Salmon Queen Elegans—Double salmon.

Scarlet Queen Elegans—Double orange scarlet.

Purple Prince Elegans—Double purple.

Choice of above, pkt. 5c

Double Elegans Mixed. Pkt. 5c; ¼ oz. 15c.

Double and Single Mixed. Pkt. 5c; ¾ oz. 15c.

Clarkia Enchantress (New)—See Page 3.

CLEOME

Pungens (Spider Plant)—5 ft. A showy garden annual producing curious heads of flowers of bright rose color; of easy cultivation, blooming until late; a good bee plant. Pkt. 10c

CLOVE PINKS—See *Pinks* *Plumarius*

COBOEA

Cobaea Vine, *Cathedral Bells*—One of the handsomest and most rapid growing annual climbers, running up to 30 feet in a season. The flowers are bell-shaped and of a purplish lilac when full grown. It is a very prolific bloomer, one that makes a show the first year, both in vines and flowers, one that is always clean of insects. We know of none better. ¼ oz. 15c

Blue—Pkt. 5c; White—Pkt. 5c; Mixed—Pkt. 5c.

COCKSCOMB (See Celosia Cristata)

COIX LACHRYMAE (Job's Tears)

Curious ornamental grass with broad, corn-like leaves and lustrous slate colored seeds used for beads. Valuable winter bouquets with everlasting flowers. Plant outdoors early spring in hills 3 ft. apart. Pkt. 5c; oz. 15c

COLUMBINE (See Aquilegia)

***COREOPSIS (Tickseed)**

One of the most popular hardy plants, the flowers are a rich golden yellow of a beautiful graceful form and bloom June to October.

Lanceolata Grandiflora—2 ft. Large orange-yellow flowers on long graceful stems. About the best yellow cut flower blooming incessantly. Pkt. 10c

***COREOPSIS (Double)**

Lanceolata Grandiflora Fl. Pl. (Double Flowering Coreopsis)—This new double and semi-double form is just as easy to grow as the single and the extra petalage adds a further charm to the flower. Pkt. 10c

CORNFLOWERS (See Centaurea)
COSMIDIUM

Two feet. The flowers are golden yellow with a broad circle of a rich orange around the disc, a pleasing combination. Plants produce a succession of bloom all summer. Pkt. 10c

**COSMOS**

One of the best and showiest annuals for late summer blooming. The flowers are borne on long stiff stems and with the feathery foliage make beautiful bouquets. Will last about a week in water.

Mammoth Flowering—White, pink, red, crimson or mixed.

Pkt. 10c; ¼ oz. 20c.

EARLY FLOWERING COSMOS

Seed started early in the house or frame, will produce flowers a month earlier than Mammoth.

Crimson. Pkt. 10c. White. Pkt. 10c.

Pink. Pkt. 10c. Mixed. Pkt. 10c, ¼ oz. 30c.

COSMOS CRESTED

Anemone Flowered or Crown and Crested—These differ from the other cosmos in the formation of the center of the flower, which develops a crown or crest, like an anemone, the guard petals remain the same.

Crimson. White Queen.

Malmaison Pink. Mixed.

Pink Beauty.

Each of the above, pkt. 10c.

COSMOS

Klondyke—A gorgeous orange-yellow flower with very handsome foliage more coarsely laciniate than others. Pkt. 10c

***CRUCIANELLA**

Stylosa—Tangled masses of elegant foliage, with crowned heads of light red flowers. Pkt. 15c

CYNOGLOSSUM (Chinese Forget-me-not)

This easily grown annual deserves to be grown quite extensively on account of its wide range of adaptation, easy culture, and attractiveness. It thrives in a dry sunny location where few other flowers will make a show and blooms continuously from June until September. No special care is required to create attractive beds or borders with it.

Sow the seed during April or May, covering it with ¼ inch of fine soil. When plants are about 2 inches tall thin to stand 6 inches apart. The plants will soon bear a mass of bright blue Forget-Me-Not-like flowers. Pkt. 10c.

STIMUGERM
LEGUME INOCULATION

Makes
Wonder Garden

CYPRESS VINE (Ipomoea Quamoclit)

CYPRESS VINE

A most beautiful rapid growing climber with delicate dark green, feathery foliage and many bright, star-shaped, scarlet or white blossoms. Planted by the side of veranda, tree or stakes, and trained properly, there is no handsomer climber.

Seed is usually sown outdoors early in spring in the row where the plants are to remain. Cover seed one-half inch deep. Germination will be hastened if the soil is warm and kept in moist condition. Thin the young plants four to six inches apart. Tender annual; About 15 feet high.

Rose—Pkt. 5c; oz. 25c.

Scarlet—A very deep, rich shade. Pkt. 5c; oz. 25c.

White—Clear paper white. Pkt. 5c; oz. 25c.

Mixed—The two colors above. Pkt. 5c; oz. 20c.

*DAHLIA

Seed may be sown in spring in open ground after danger of frost is over, but for best results sow in shallow pans at any time from March to June, and transplant the seedlings to small pots. When strong enough and danger from frost is over plant out one foot apart. These plants will produce tubers which should be taken up in the fall and replanted the following spring; these roots will flower freely the following autumn. Tender herbaceous perennial, three to four feet high.

Finest Double Mixed—Seeds saved from choicest double flowers, including shades of red, pink, dark maroon, yellow, white, etc. Pkt. 15c.

Finest Single Mixed—Will produce brilliant flowers running through a wide range of striking colors.

Pkt. 10c; oz. 50c.

Finest Cactus—From the best varieties, mixed.

Pkt. 10c

Collarette—Our special strain of Collarette varieties contains a great variety of distinct shades and colors, the majority being equal in form to named varieties.

Pkt. 10c

All Varieties Mixed. Pkt. 10c.

DAHLIA BULBS (See pages 61, 62, 63)

*DAISY

Daisy, or Bellis Perennis—Plants of Double Daisy will bloom the first summer and will continue to bloom for years if given slight protection during the winter. They are very pretty when in bloom, and deserve to be grown much more than they are. They commence blooming in April and continue to bloom until summer. They are not very particular as to soil, but should be grown where they have partial shade.

Double Red. Pkt. 10c.

Pink. Pkt. 10c.

Double Rose—Finest strain. Pkt. 10c.

Double White—Clear white. Pkt. 10c.

Double Mixed—Shades of rose and white. Pkt. 10c.

*SHASTA DAISY

A fine perennial plant bearing large white single blossoms, with yellow centers; an excellent cut flower and admired everywhere. Soak seed in warm water over night before sowing. Pkt. 10c.

*DATURA

Seed may be sown outdoors after danger of frost is over, but for early blooming sow in hotbed and transplant about three feet apart each way. Roots can be kept all winter in cellars. Tender annual; three feet high.

Wrightli—Pure white at the center shaded into lilac and blue; magnificent large single flowers. In warm latitudes can be continued as a perennial. Pkt. 10c.

DELPHINIUM CLIVEDEN BEAUTY

Cliveden Beauty is the same beautiful light blue as the Belladonna Delphinium but is a highly improved strain. The flowers are larger and the plant a more robust grower, very even in height, making a striking show in the garden or when used for cutting. Pkt. 15c

*DELPHINIUM

Delphinium—Hardy Larkspur. Very decorative border plants ranging in height from the 18-inch Cashmerianum to the stately Hybrids, 5 to 6 feet tall, whose side shoots flower after the main spike has finished, thus prolonging the blooming period. If the flower spikes are removed as soon as they fade, new ones will continue to appear, at intervals all summer. The colors run from pure white to darkest blue. Some varieties have a black center, others show a pleasing contrast, in shades of blue, between the inner and outer petals. Stake all varieties when 18 inches high to prevent them from blowing down.

*Butzer's Portland Hybrids—This mixture is a wonder. The plants are strong and vigorous. The flower spikes are tall and graceful, covered from bottom to top with the most beautiful hollyhock-like flowers. The colors are from the palest lavender to the richest blue, some with white centers, others with black, reminding one of bees at work.

Pkt. 15c

*DELPHINIUM

Belladonna—Light Blue, 2 feet. Flowers exquisite shade of turquoise blue. Pkt. 15c.

Belladonna—Dark Blue. Pkt. 15c.

Chinese Album—White. Pkt. 5c.

Cardinale—Brilliant scarlet. Pkt. 10c.

Chinese Dark Blue. Pkt. 5c.

Chinese Light Blue. Pkt. 5c.

Chinese Blue Butterfly. Pkt. 5c.

Finest Mixed. Pkt. 5c.

Nudicaule Scarlet. Pkt. 25c.

DIANTHUS—See Pinks

DIDISCUS (Blue Lace Flower)

Coeruleus—This pretty and interesting annual blooms most profusely from July until November; plants grow about 18 inches high, and have as many as 50 flowers open at one time.

Pkt. 15c

DIGITALIS (See Foxglove)

DIMORPHOTHECA

(African Golden Daisy)

Aurantiaca—(Golden Star of the Veldt)—1 ft. Rare and very showy annual from South Africa, having daisy-like flowers of a glossy salmon-orange shade with black central ring, a lovely color when flowers open in the sun.

Dimorphotheca—New Shades—Salmon Beauty, White Beauty, Golden West, Orange, Mixed. Per pkt. 10c

DIMORPHOTHECA RINGENS

A beautiful species of the Cape Marigold, of light graceful habit and bearing elegant white flowers, 3 in. across, with dark blue-spotted center, reverse of petals blue and mauve; in bloom from spring to autumn.

Pkt. 10c

DIMORPHOTHECA—(Star of the Velt, African Daisy)

Most of us know the African Daisies and have admired their bright blossoms which are among the earliest to come in the spring. In a border or massed bed they are delightful, but for a really gorgeous display of colors in contrast, plant them with bedding Petunias. The showiest effect is obtained by using mixed colors of African Daisies, and the dark shades bedding mixture of Petunias, sowing the seed broadcast or setting out the plants informally, giving the appearance of being broadcast. The effect is startlingly beautiful and this bed or border will be the showiest spot in the garden. Dimorphothecas thrive in the hottest climates, so they can be grown in any part of the country, or in the hottest corner of the garden. Special Mixture, per pkt. 10c

DOLICHOS (Hyacinth Bean)

Princess Helen—(Daylight)—Snow white flowers followed by silvery white seed pods. 1 oz. 25c; Pkt. 5c

Purple Soudan—(Darkness)—Attractive rose-violet flowers with dark ruby-purple seed pods. 1 oz. 25c; Pkt. 5c.

Mixed, all colors—2 oz. 35c; 1 oz. 20c; pkt. 5c.

Echinocystis Lobata—See Wild Cucumber.

*EDELWEISS

Leontopodium Alpinum—4-12 in. June-July. The true and famous Edelweiss of the Alps. The flowers are of downy texture, pure silver white and star-shaped. Succeeds in almost any soil with full exposure to sun.

Per pkt. 25c

***ERIGERON (Flea Bane)**

Valuable summer flowering plants with elegant single aster-like flowers, much prized for cutting.
 Elatier Speciosus Hyb. Grandiflorus—Large flowers, rich purple. Pkt. 20c
 Elatier Grandiflorus—Rosy. Pkt. 20c.

***ERINUS**

Alpinus—Pretty rosettes of foliage and racemes of rosy purple flowers. A first rate rock plant and also invaluable for establishing on old walls or between steps. 4 in. May-June. Per pkt. 35c

***ERYSIMUM**

Pulchellum (Fairy Wallflower)—A new dwarf species forming close mats of dark green, later eclipsed with yellow bloom. Sandy soil. Per pkt. 15c

**FORGET-ME-NOT (Myosotis)**

Half-hardy perennial, which flowers the first year from seed if sown early. Will bring forth lovely blossoms throughout the whole summer and fall. Flowers are borne on long stiff stems, and of the most exquisite colors. They succeed best with moisture in a somewhat shaded position.

Blue. Pkt. 5c.

White. Pkt. 5c.

Pink. Pkt. 10c.

Mixed. Pkt. 5c.

FOUR O'CLOCK

Marvel of Peru—A hardy annual, growing luxuriantly in any ordinary soil, and bearing a profusion of bright, handsome flowers of various colors, shades and markings. Flowers open at four o'clock, close in the morning. Choice Mixed. Pkt. 5c; oz. 20c

***FOXGLOVE (Digitalis)**

Digitalis—A hardy perennial, blooming the second year from seed. Grows usually about 3½ feet, although in very rich soil sometimes 6 feet. The bell-shaped flowers are borne on long spikes, and come in shades of purple, lavender, rose and white, all spotted lightly inside the blossoms. Thrives best in cool, shady locations.

Gloxiniaeflora—This is a fine strain of the ordinary Foxglove (D. purpurea), with handsome spotted Gloxinia-like flowers on long spikes.

Purple. Per pkt. 10c. White. Per pkt. 10c.

Rose. Per pkt. 10c. Mixed. Per pkt. 10c.

The Shirley—A magnificent strain of the highest beauty, the results of many years of careful re-selection by the Rev. W. Wilks in his famous garden at Shirley; growing 5 to 7 ft. high, the 4-ft. long inflorescences bearing enormous flowers ranging from pure white to the deepest rose, and wonderfully blotched and spotted dark maroon, crimson and chocolate. Pkt. 15c.

Lutzi—Salmon. Pkt. 10c.

Butzer's Special Mixture of Digitalis—A grand mixture of the above, and many other colors. Pkt. 10c.

GAILLARDIA (Blanket Flower)

Both the annual and perennial varieties of Gaillardia are very showy and free bloomers all summer long until frost; good in any situation and easily grown. The individual flowers are of large size, very durable, and most brilliant in color; fine for bouquets. 2 to 3 ft.

*Portola Hybrids—This strain of Hybrid Gaillardia has been obtained from a specialist who has developed a splendid type, covering only the best varieties. The flowers are as large as sunflowers. Pkt. 10c.

*Dazzler—Large flowers up to 5 inches across, bright golden yellow with rich maroon red center, fine for cutting. Pkt. 10c.

*Grandiflora (Perennial)—A compact variety, forming bushy plants 12 to 15 inches high, and bearing its long-stemmed flowers well above the foliage. In coloring the flowers are as rich and varied as those of the tall-growing sort. Pkt. 10c; oz. 50c

*Butzer's Special Mixture of Gaillardias—A grand assortment of all varieties. Fine for cut flowers. Pkt. 10c

All the following Picta sorts are most elegant annuals and well deserve generous plantings.

Picta—Red and yellow; very brilliant. Pkt. 5c; oz. 50c

Picta, Lorenziana—Double; mixed colors; flowers large. Pkt. 5c; oz. 50c

Picta, Mixed—Finest colors. Pkt. 5c; oz. 50c.

GAILLARDIA

*Burgundy—Shining wine-red flowers about 2½ in. in diameter, on long stiff stems, from June until fall. Blooms from seed the same year, if sown early, comes 60% true from seed. Pkt. 15c.

**ESCHSCHOLTZIA**

Eschscholtzia, or California Poppy—A hardy annual, with fine-cut, feathery foliage and beautiful velvety cup-shaped flowers. Grows from one to one and a half feet high, and blooms profusely. Seed may be sown in the fall, and any time thereafter till April, and blossoms may be had from early in January till late in summer. Of the easiest culture. Any soil will do, but the better the soil the larger the plants and blossoms. It is best to sow the seed in the garden, where the plants are to remain, as they do not transplant easily.

Carmine King—Deep carmine. Pkt. 5c.

Crimson—Carmine crimson. Pkt. 5c.

Golden West—Yellow orange center. Pkt. 5c.

Lovely—Rose pink suffused salmon. Pkt. 5c.

Mikado—Orange crimson. Pkt. 5c.

Scarlet Beauty—Deep scarlet. Pkt. 5c.

Tango—Bronze red overlaid Terra Cotta. Pkt. 5c.

The Geisha—Inside petals brilliant gold, outside orange crimson petals fluted. Pkt. 10c.

Mixed—An excellent mixture producing deep yellow creamy white, scarlet and orange flowers. Pkt. 5c; oz. 40c.

ESCHSCHOLTZIA, Bush—See Hunnemannia, page 4.

DOUBLE CALIFORNIA POPPIES

A new and delightful form of poppy. The flowers resemble miniature roses.

Double Salmon Beauty (New)—You will like this beautiful new poppy. Good form and exquisite color Pkt. 15c.

Double Orange—Double form of Aurantiaca.

Pkt. 10c

Double Rose—Very fine. Pkt. 10c.

You Can Select 7-5c packages for.....25c
 Select 8-10c packages for.....50c
 Select 5-15c pkgs. Flower Seeds for 50c

This Applies to Flower Seeds Only

GAURA

Lindheimeri—3 ft. A graceful plant bearing numerous spikes of rosy white flowers from July until frost. Pkt. 10c

GERBERA (Transvaal Daisy)

Jamesoni Hybrids—They are half-hardy perennials, usually grown as greenhouse or window plants. The daisy-like blossoms, 2 to 4 inches across, being borne on long stems, are unsurpassed as cut flowers, as they are of wonderful lasting quality. For garden culture in cold climates the plants are wintered over in cold frames like pansies, etc. They are easily grown from seed and will commence flowering the first year, although old plants will produce the greater abundance of bloom. The colors include a galaxy of incomparable delicacy and richness, in which a wilderness of tints from pure white through yellow, orange, salmon, rose, cerise and ruby-red to violet are represented. Does remarkably well in California. Pkt. 25 seeds, 25c

Gerbera—Scarlet shades. Pkt. 25c.

*GEUM

Geums belong to the Rose family. The species described are showy, free-flowering kinds producing a wealth of attractive flowers which are much prized for cutting. They are of a tufted habit of growth with pinnate leaves. Excellent for border culture. To avoid wilting after cutting put stems in warm water.

Lady Stratheden (Golden Ball)—Flowers loosely double, a delightful shade of golden yellow. Cut blooms of this with sprays of *Euphorbia Polychroma* make a charming cut flower combination. Pkt. 15c.

Mrs. Bradshaw—The double orange-scarlet flowers are very large and full; comes quite true from seed and blooms the first year. 2 ft. June-September. Pkt. 10c

GILIA

A hardy annual, growing 12 inches high, small delicate flowers valuable for rock work or borders. Tall Sorts, Mixed, Pkt. 5c; ½ oz. 15c.

GLOBE AMARANTH

(*Gomphrena globosa*)

An everlasting, with beautifully colored flowers resembling clover-heads. They retain their color, and are lovely in winter bouquets.

Mixed. Each, pkt. 10c.

*GLOBULARIA (Globe Daisy)

Shrubby plants for the hardy garden or rockery, producing fluffy balls of blue flowers during the summer. They all require light soil in a warm, sunny position.

Trichosantha—Dark blue. 12 in. Pkt. 20c.

GODETIA SYBIL SHERWOOD

A glorious new shade of bright salmon-pink softened by an undefined edging of white. The plant is robust, growing about 20 inches tall, and flowers so freely that the foliage is practically hidden by the blossoms. Suited for borders, superb as a pot-plant, and ideal for cutting, the flowers lasting many days in water. Godetias thrive best in localities where the summers remain reasonably cool. Where they do not, early sowing indoors or in hotbeds is advisable. Sow or transplant outdoors after danger of frost is past. Pkt. 15c

GODETIA (Dwarf)

A hardy annual, very valuable for bedding and borders. For mass effects in shades of rose, red or pink it is unexcelled. The satiny cup-shaped flowers cover the compact-growing plants. The seed should be sown in the fall or early spring.

Brilliant—Carmine rose. **Gloriosa**—Blood red.

Crimson Glow—Crimson. **Lady Satin**—Rose.

Duke of York—Rich scarlet. **Rosamond**—Shell pink.

Duchess of Albany—White. Mixed.

Each of the above, pkt. 5c.

GODETIA—Schamini Type

Tall Double, Azalea Flowered

Are quite different from other sorts, inasmuch as they throw up flower spikes much like a gladiolus only more graceful, which are closely set by double flowers in bright and attractive colors. An excellent cut flower. Glorify your garden with Godetia.

Carmine—Pkt. 5c. **Rosy Morn**—Deep rose. Pkt. 5c.

Crimson—Pkt. 5c. **Pink**—Pkt. 5c.

Mauve—Pkt. 5c.

White—Pkt. 5c.

Rose—Pkt. 5c. **Finest Mixed of above**—Pkt. 5c.

GOURDS

All Varieties

Mixed

5c

Per pkt.

25c

Per oz.

GOURDS (Ornamental)

These are desirable in many places where an immense amount of vine is wanted quickly. The blooms of some are quite striking and handsome. With many sorts the fruit is unique and ornamental and often useful. The small fancy gourds are excellent toys for children, while the larger gourds may be used as dippers, sugar troughs and bowls.

Apple Shape—Pkt. 5c. **Dipper Shape**—Pkt. 5c.

Orange Shape—Pkt. 5c.

Bottle—The original Thermos bottle. Used by the pilgrims of the Orient. Pkt. 5c

Calabash or Pipe Gourd—Odd-shaped fruit which is used to an advantage in making pipes. Pkt. 10c

Dishcloth or Towel—Many women prefer a dishcloth made of this Gourd to anything else, as it is always sweet and clean as long as any part of it is left.

Pkt. 5c

Hercules Club—Fruit grows 3 to 4 ft. long. Pkt. 5c

Nest Egg—Fruit looks exactly like a hen's egg and may be used as nest eggs. Pkt. 5c

Pear Shaped—Striped yellow and green. Pkt. 5c

Sugar Trough—Thick shells, very durable. Pkt. 5c

Large Varieties Mixed—Pkt. 5c; oz. 25c.

Small Varieties Mixed—Pkt. 5c; oz. 25c.

All Varieties Mixed—Pkt. 5c; oz. 25c.

GREVILLEA

Robusta (Silk Oak)—1 to 5 ft. It is easy to manage, grows rapidly from seed, and is pretty in all stages of growth; with its long, drooping, silky foliage it reminds one of a palm or fern.

Pkt. 10c

GYPSOPHILA

Graceful plants of light fairy-like growth. Much in demand for cutting and combining with other flowers for bouquets and vases.

Elegans Grandiflora Alba (Angel's Breath)—This is an improved, large-flowering, pure white, of free, easy growth. Several sowings should be made during the season to keep up a supply. Pkt. 5c; ½ oz. 20c; oz. 30c

Elegans Carminea—Pkt. 5c.

Elegans Rosea—Soft pink. Pkt. 5c.

Muralis—6 in. A lovely little rock or edging plant with rose-pink flowers. Pkt. 10c

*GYPSOPHILA (Perennial)

Paniculata (Baby's Breath)—2-3 ft. July-August. Small flowers on branched stems, so thick as to give the plant a white lace-like effect. Per pkt. 10c

Paniculata Flore Pleno (Perennial)—A great improvement on the single-flowered type and more lasting, the flowers forming miniature balls of white petals. Not quite fixed, but about 25 per cent come true. The plant is difficult to propagate by division, and seedlings prove much more vigorous.

Pkt. 10c

Repens—Dwarf white, fine for rockery. Pkt. 15c

Repens Rosea—Pkt. 15c.

GYPSOPHILA PACIFICA (Perennial)

The new hardy pink Baby's Breath. Thrives in any soil. The second year the seedlings form dense bushes 4 feet high, and the thread-like stalks, on strongly ramified stems, bear myriads of tiny pink blooms in slender, spreading panicles. Pkt. 25c.

Those Marked * are Perennials

*HELENIUM (Sneezewort)

Late-flowering hardy perennials; broad heads of elegant, golden-yellow flowers; fine for cutting. 5 to 6 ft.
 Autumnale superbum—Pkt. 10c.
 Riverton Beauty—Rich lemon-yellow, with a large purplish-black cone. Per pkt. 10c

*HELIANTHEMUM

Mutabile (Rock Rose)—Low-growing evergreen plants forming large clumps, completely covered with bloom during July and August. Pale rose changing to lilac then to white. 8-12 in. Excellent for rockeries. Mixed colors. Pkt. 10c

HELIANTHUS (Sunflower)

Hardy annuals, of stately growth, remarkable for the size and brilliancy of their flowers. Very useful as cut flowers. Effective in forming background of large beds or borders and for distant effect.

Chrysanthemum Flowered—Perfectly double; the color is the brightest golden yellow. The flowers are so perfect in form that they resemble very much double Chrysanthemum-Flowered Asters, with long stems; grows seven feet high, and bears profusely all summer long. Pkt. 5c

Dwarf Red—Pkt. 5c.

Nanus Flore Pleno—2½ feet. Double dwarf, beautiful for massing in beds. Pkt. 5c

Russian Mammoth—Single, of gigantic dimensions. For larger amounts see Farm Seed pages. 1 oz. 5c

Miniature-Flowered Sunflowers—The varieties of Helianthus cucumerifolius form spreading bushes with small graceful foliage and bear a multitude of small elegantly formed flowers, which are borne for a long time in succession, and are invaluable as cut flowers. Pkt. 10c; oz. 40c

*HELIANTHUS (Hardy Sunflower)

Angustifolius (Autumn Glory)—5 to 7 ft. The great massing branches are a sheet of solid bloom of the clearest and richest golden yellow. Flowers are like great daisies flecked with gold. Blooms very late in season after frost has killed everything else. Per pkt. 15c

Flowering Heliotrope Plants (from seed grown in spring)—It is but little known that seed sown in February and March will produce large flowering plants the first summer. Our mixture contains seeds from many named sorts, and will produce fine plants with proper treatment.

Mammoth Flowering. Pkt. 10c.

HELICHRYSUM (Everlasting Flower)

A free-flowering, hardy annual, growing four to five feet high and bearing beautiful straw-like flowers in a great variety of shades and colors. The stems are long and the blossoms large. It is the best and most satisfactory of the everlasting flowers, and makes a very handsome dried bouquet. Rose Carmine. Pkt. 5c.

Crimson. Pkt. 5c.

Fireball. Pkt. 5c.

Silverball. Pkt. 5c.

Goldenball. Pkt. 5c.

Rose Queen. Pkt. 5c.

Salmon Queen. Pkt. 5c.

Violet Queen. Pkt. 5c.

Finest Mixed. Pkt. 5c.

Those marked * are Perennials

*HEUCHERA (Coralbells)

Beautiful plants for front row of borders, with slender, fairy-like spikes of richly colored flowers; most striking in the garden and light and graceful for cutting.

Sanguinea Hybrida Grandiflora—New large flowered hybrids, very fine. Per pkt. 25c

*HIBISCUS (Rose Mallow)

Noble shrub-like plants, with handsome green foliage, bearing throughout summer large bright flowers, from 3 to 5 inches in diameter. Very hardy. Suitable for garden and indoor use when cut.

Golden Bowl—Deep cream, with a velvety maroon center. Pkt. 10c

Mixed Mallow Marvels—Grand assortment. Pkt. 10c

*HIERACIUM

Villosum (Shaggy Hawkweed)—12 in. July. Plant is covered with a white silkiness effective for its large golden yellow flowers and silvery foliage, suitable for rock work. Per pkt. 15c

*HOLLYHOCK

A hardy perennial of upright, stately growth, five to eight feet high. The very double varieties are the most desirable, but the newer, semi-double, fringed types are also very popular. Hollyhocks make a fine row in the garden, or a fine background next to a building or high wall or fence.

Allegheny—Mixed. The semi-double, fringed variety. An artistic and pretty sort. Pkt. 10c

Double Varieties—White, Maroon, Rose, Scarlet, Salmon, Yellow, Crimson, Blood-red. Each color, pkt. 10c

Newport Pink—The finest pure pink, exquisite shade. Pkt. 10c

Double Varieties, Mixed—Pkt. 5c.

Double Imperator Improved—4 to 5 ft. Flowers measure 5 to 6 in. across with an entirely new formation. The blooms are composed of a very broad collar of frilled and fringed petals in a kaleidoscopic variety of color hitherto unknown in the genus. Very vigorous branching type. Pkt. 15c

*HOLLYHOCK (New)

Triumph, Mixed—Of branching type, growing 4 to 5 feet tall. Has attractively waved and fringed flower petals. Many rich colors. Pkt. 15c.

HONESTY (See Lunaria)

HYACINTH, Bean (See Dolichos)

IBERIS (See Candytuft)

ICE PLANT

Mesembryanthemum Crystallinum—6 in. Foliage very ornamental, being covered with ice-like globules and prized for garnishing; a valuable plant for dry, sunny situations on banks, rockwork, old walls and ruins, etc., also for sunny borders. Pkt. 5c

*INCARVILLEA

Grandiflora—Likes a sunny situation, spikes of elegant Gloxiniaeflora-like flowers. Finely cut foliage. Pkt. 10c

*INULA

Ensfolia—9 in. July-Sept. Vigorous plant and a continuous bloomer with large yellow aster-like flowers and rather coarse foliage. Per pkt. 25c

IPOMOEA

Beautiful rapid annual climbers. Foliage very dense and in some kinds of remarkable shape. The flowers in their wide range of delicate coloring are poised on slender stems.

Grandiflora Alba—(Moon Flower)—Large white blossoms, five to six inches across, which expand at night. Pkt. 10c

Sky Blue—(Moon Flower)—Of strong, vigorous growth, the plants quickly attain a height of twelve to fifteen feet. Pkt. 10c. Fine Mixture—Pkt. 5c

JOB'S TEARS—See "COIX"

KOCHIA

Kochia (Standing Cypress, or Belvedere)—An easily grown annual, which, sown thinly in spring, soon forms a cypress-like hedge of the most lively green and of perfect symmetry; by mid-summer it attains a height of about three feet, and on the approach of autumn the whole plant becomes a deep red.

Pkt. 5c; 1/4 oz. 25c

*KUDZU VINE (Pueraria Thunbergiana)

A new climber of great merit. This vine is one of the most rapid climbers there is, growing to 20 feet quickly. Called also Jack-and-the-Bean-Stalk. Hardy perennial.

Pkt. 10c; oz. 50c

LANTANA

Hybrida, Mixed—2 ft. Shrubby plant with Verbena-like flowers in shades of white, red and yellow. May be grown in pots or set out in summer. They have an agreeable aromatic perfume.

Pkt. 10c

LARKSPURS

This is one of the best known garden flowers. A vast improvement has been effected, by careful selection and attentive cultivation, in size and color of the blossoms and the general habit of the plant. Hardy annuals. (For Perennial Larkspurs, see Delphinium.)

LARKSPUR GIANT IMPERIAL

Tall, upright, compact, basal branching in habit, the Giant Imperials have superseded all other types of Larkspurs for florists' and general garden use. The delphinium-like spikes of double flowers, carried on stems 4-5 feet long, are compactly placed on the upright growing plants, requiring only about one-half the space needed for the old stock flowered type of Larkspur.

NEW AND EXCEPTIONAL VARIETIES

Blue Bell (New)—A delightful clear light blue. Upright type with long base branching spikes. Pkt. 15c

Carmine King—This is one of the finest new larkspurs. Long straight laterals, growth upright and close to the center stalk, color rich carmine. Pkt. 15c; 1/4 oz. 35c.

Miss California—Here is a new color that you will like—a rich deep pink on salmon ground. Plants grow 3 to 5 feet tall and branch freely. Pkt. 15c; 1/4 oz. 35c.

Los Angeles Improved—Rich rose colored spikes with dark green foliage. Pkt. 15c; 1/4 oz. 35c.

La France—Exceptionally pleasing light salmon pink—lighter shade than Miss California. Pkt. 15c; 1/4 oz. 35c.

Blue Spire—A magnificent tall blue larkspur. Pkt. 15c; 1/4 oz. 35c.

Lilac Spire—Base branching type of larkspur, with exquisite lilac colored spikes. Pkt. 15c; 1/4 oz. 35c.

White Spire—Dazzling pure white similar in habit to above. Pkt. 15c; 1/4 oz. 35c.

Rose City Mixed Larkspur—A mixture of the newest larkspurs, including the new salmon shades. Pkt. 15c; 1/4 oz. 35c.

Collection—One packet each of any five exceptional varieties, your choice or ours—50c.

LARKSPUR

TALL DOUBLE STOCK FLOWERED

The following are the best varieties:

Bright Rose—Pkt. 5c. **Lilac**—Pkt. 5c.

Dark Blue—Pkt. 5c. **Los Angeles**—Rose on

Delicate Lavender—Pkt. 5c. **salmon**—Pkt. 10c

Rose—Pkt. 5c. **Scarlet Rose**—Pkt. 5c.

Flesh—Pkt. 5c. **White**—Pkt. 5c.

Special Mixture—Annual Larkspurs. A charming mixture containing all the bright and delicate shades, makes wonderful cut flower material and should be planted generously. Pkt. 5c.

*LATHYRUS LATIFOLIUS

(Hardy Pea)

Very decorative climbing vines of the Pea family, for growing on fences, trellis, etc., as floral screens and for cutting. Blooms all summer.

Pink Beauty—Pale pink variety. Pkt. 10c.

Rubra—Bright rosy crimson. Pkt. 10c.

White Pearl—Large-flowering white. Pkt. 10c.

Mixed—The above colors. Pkt. 10c.

LAVATERA

The Lavateras or Annual Mallows are showy and effective plants covered during the entire summer with bloom. For large borders and cutting they are very desirable.

Splendens Alba—Very large, silky, pure white flowers. Pkt. 10c.

Splendens Rosa—Very large, bright rose flowers.

Pkt. 10c

Splendens Mixed—Pkt. 5c.

LEPTOSIPHON

French Hybrids—Free flowering hardy annuals useful for edging and rockwork. Plants are thickly studded with charming bright flowers of various colors. Pkt. 10c

LEPTOSYNE

Stillmani—1 1/2 ft. One of the quickest annuals, blooming within five weeks from date of sowing, and the golden-yellow flowers continue in perfection for a long period. Excellent for cutting.

Pkt. 10c

Maritima—3 ft. Large lemon-yellow Marguerite-like flowers on long stalks.

Pkt. 10c

*LIATRIS (Kansas Gay Feather)

It grows in long spikes 4 to 5 feet tall and densely covered with slender grass-like leaves of a light green. The small flowers are light rosy-purple; a peculiar habit of the Liatris is that the succession of bloom is from the top downward rather than from the lowest blooms up to the highest as in all other spike flowers.

Pycnostachya—4 to 5 ft. One of the choicest and boldest species. Flowers purple in dense spikes, which bloom a long time. Foliage thick and grasslike; excellent for masses in the border. July-August. Pkt. 25c

*LINARIA (Toad Flax)

Showy free-flowering plants of a trailing habit. Good for borders, window boxes or rockeries.

Cymbalaria (Kenilworth Ivy)—3 in. Dainty lilac and orange; flowers throughout summer; trailing habit.

Per pkt. 10c

Dalmatica Macedonica—The dainty flowers resemble those of snapdragon, bright yellow with orange tip.

Per pkt. 25c

LINUM

Grandiflorum Rubrum (Crimson Flax)—2 ft. One of the most brilliantly colored of summer annuals, flowers glowing crimson-rose. Very beautiful in beds and borders, and may be had in bloom from May to October by successive sowings.

Pkt. 5c

LOBELIA

A hardy annual and hardy perennial. The annual grows four to six inches high, is of compact growth, and literally covered with small bright flowers. Used for ribbon work and borders or hanging baskets.

Crystal Palace Compacta—Rich, deep blue; dark foliage; the finest dark blue for bedding.

Pkt. 10c

The following variety is especially effective in hanging baskets or window boxes, where a long drooping effect is desired.

Speciosa—True dark blue, dark foliage. Pkt. 10c.

Sapphire—Large, deep blue flowers, with a pure white eye which occupies one-third of the corolla. Pkt. 15c

Love in the Mist—See Nigella.

LUNARIA

Annua (Biennis) (Honesty or St. Peter's Penny)—Flowers purple, followed by silvery seed pods, prized for winter decoration. Annual but readily self-sows.

Per pkt. 10c

LUPINUS

Tall Annual Varieties Mixed—2 ft. Ornamental, free flowering, easily grown, with long graceful spikes of rich and variously colored pea-shaped flowers; valuable for mixed flower borders and beds. Pkt. 5c; oz. 20c
Dwarf Annual Varieties Mixed, 1 ft. Pkt. 5c; 1 oz. 20c

LUPINS HARTWEGI GIANTS MIXED

Annual Lupins are favorite garden flowers in almost all parts of the country, flowering freely without any special care. This improved new giant strain is over a foot taller than the ordinary strain, reaching a height of three or four feet. There are five or six long basal branched spikes to each plant, bearing closely placed giant blooms, in a color range including dark blue, sky blue, rose and white. Pkt. 10c.

*LUPIN (Perennial)

Most beautiful hardy border plants producing tufts of soft green foliage, from which arise in continuous succession the stately spikes of bloom.

Polyphyllus (Old-fashioned Garden Lupin)—Blue. 3 ft. Stately spikes of blue, flowers all summer. Pkt. 10c

Albus—Large pure white spikes. Pkt. 10c.
Roseus—4 ft. Light and dark rose flowers on long stem; fine for cutting. Pkt. 10c

Mixed—Splendid value. Pkt. 10c.

*LYCHNIS

Alpina—Close tufts, olive green foliage, clusters of rose colored flowers. Pkt. 20c

MALOPE (Mallow-Wort)

Showy plants for large mixed flower and shrubby borders. The flowers are large and handsome.

Grandiflora Mixed—Pkt. 10c.

MALLOW (See Lavatera)

MARIGOLD

A hardy annual, shrubby plant, in dwarf and tall varieties, growing from six inches to three feet high.

TALL DOUBLE AFRICAN

El Dorado—Large double imbricated flowers in all shades of yellow; 3 ft. Pkt. 5c

Lemon Ball—A counterpart of Orange Ball, except in color, which is a soft lemon-yellow. Pkt. 5c

Lemon Queen—Soft lemon yellow.

Orange Ball—Large, perfect, double-quilled flowers, of a rich deep golden-orange color; the finest of all and very showy. Pkt. 5c

Prince of Orange—Large flowers of a deep golden orange color; very showy. Pkt. 5c

Finest Mixed—Pkt. 5c.

DWARF DOUBLE AFRICAN MARIGOLDS

Few annuals are as effective as the French Marigolds or flower for so long a period; they all form dense bushes not over 12 inches high, and are unequalled for borders or beds.

Dwarf Orange Ball—A splendid pure golden yellow, flowers of good size and makes a very effective golden line or bed. Pkt. 5c

Dwarf Lemon Ball—Similar to the above except in color, which is a light lemon-yellow. Pkt. 5c

Dwarf Finest Mixed—Pkt. 5c.

FRENCH TALL DOUBLE

Finest Mixed—Pkt. 5c.

DWARF FRENCH VARIETIES DOUBLE

Dwarf Dark Brown—Beautiful reddish brown.

Pkt. 5c

Dwarf Legion of Honor—Brown, spotted yellow.

Pkt. 5c

Robert Belst—Dark Brown and Orange. Pkt. 5c.

Finest Mixed—Pkt. 5c.

DWARF SINGLE FRENCH MARIGOLD

Fire Cross—Red and yellow. Pkt. 5c.

Legion of Honor (Little Brownie)—A single-flowering Marigold, forming compact bushes 9 inches high. Begins flowering early, commencing in June, continuing until frost. The flowers are golden yellow, marked with a large spot of velvety crimson at the base of each petal. Pkt. 5c

Finest Mixed—Pkt. 5c.

MARIGOLD

Monarch Strain of Dwarf French Double Mixed—New, symmetrical compact habit, comprising a wide range of fine colors including orange, bronze and mahogany. The color combinations are very glowing, giving a rich and pleasing effect to the group or border. Pkt. 10c.

Mexican Marigold (Signata Pumila)—10 in. A miniature type forming compact plants completely covered with bright yellow flowers with brown stripe down the center of each petal. Very striking for edgings. Pkt. 10c

Marigold Guinea Gold—A distinct new type with broad, overlapping, loosely formed petals, giving a most graceful, and very showy appearance to the flower. The plants grow 2½ feet high and produce an abundance of fine flowers, 2 to 2½ inches across, of a brilliant shade of orange, flushed with gold. Reproduce practically 100 per cent true. The characteristic Marigold odor, too, is much less pungent than in other sorts. We recommend early sowing. Pkt. 10c

MARVEL OF PERU (See Four O'Clock)

MATTHIOLA

Bicornis (Evening-scented Stock)—15 in. The flowers in the morning, evening and after a shower emit a delicious perfume perceptible at a considerable distance. Pkt. 10c

MATRICARIA

Capensis Fl. Pl. (Feverfew)—3 ft. Neat, small, double white quilled flowers, well adapted for bedding and cutting. They are perennials in mild climate. Pkt. 10c

Eximia, Golden Ball—1 ft. Of compact habit, suitable for edging, with very striking double yellow flowers. Pkt. 10c

MECONOPSIS

Baileyi—The new and beautiful blue Thibetan poppy. It is a graceful plant, with downy pale green leaves, the brilliant Cambridge-blue pendant flowers, 4 inches across, being carried singly on stems about 2 feet high. Pkt. 50c

MINA

Lobata—12 ft. A climber of luxurious growth, with tube-shaped flowers; produced in greatest profusion. In color they are particularly attractive, the bud being first bright red, but changing through orange-yellow to creamy white when fully expanded. Pkt. 10c.

MIGNONETTE (Reseda)

A well-known fragrant favorite, and no garden is complete without a bed of Mignonette; sowings made in April and again in July will keep up a succession from early summer until frost; can also be grown in pots for winter and early spring flowering.

Sweet-Scented (Reseda Odorata)—The old-fashioned variety with small spikes, but the most sweetly scented of all. Pkt. 5c; oz. 15c

Machet—Adapted for pot culture; dwarf pyramidal growth, bearing numerous flower stalks; highly colored and very fragrant. Pkt. 10c; ¼ oz. 25c; oz. 75c

Red Goliath—Of strong, yet compact habit, with rich green foliage; the giant trusses of flowers being borne on erect, strong, stiff stalks and surpassing all others in brilliancy of color; especially suited for house culture. Pkt. 10c

MOON FLOWER—See Ipomoea MORNING GLORY

Tall Morning Glories Mixed—A great variety of colors of the old-fashioned, popular, rapid-growing climber. Oz. 15c; pkt. 5c.

Dwarf Morning Glories Mixed—Hardy annual, one foot in height. Colors range from pure white to deep purple. Oz. 20c; pkt. 5c.

Imperialis (Japanese Morning Glory), Fine Mixed—The Japanese Morning Glory requires a warm situation to do well. The south side of a wall or building where the plants are protected from the north and west winds will mostly be found beneficial for these vines. ¼ lb. 55c; 1 oz. 25c; ½ oz. 15c; pkt. 10c.

Setosa (Brazilian Morning Glory)—A summer climber, making a dense shade. Flowers rose colored; three to four inches in diameter. Pkt. 5c.

You Can

NASTURTIUMS, Dwarf

Dwarf Nasturtiums Mixed—This splendid mixture contains all the named varieties and every color. No finer mixture can be made. They will produce enormous flowers on long stems, in a wonderful variety of colors. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 30c; lb. \$1.

DWARF NASTURTIUMS

Aurora—Bright chrome-yellow flowers attractively veined with purplish crimson. A profuse bloomer with strong, sturdy bushes carrying a magnificent display of large, well-rounded blooms. The foliage is rich green. Pkt. 5c; oz. 15c; 4 oz. 50c

Dwarf Beauty—The large, nearly-round flowers are a glowing shade of orange with scarlet markings. A most appealing variety which will make a fine show in the garden. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

Bronze Colored—Of a peculiar burnished bronze color. Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

Chameleon Dwarf—Flowers of most diversified coloring and many brilliant markings on a single plant.

Per pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c

Cloth of Gold—The bright golden yellow leaves form compact plants above which the brilliant scarlet flowers stand out with a sharp but pleasing contrast. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c

Empress of India—This variety shows a fine contrast between the rich salmon-scarlet flowers and the deep purplish green leaves. One of the finest for borders or beds. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

Golden King—A very fine rich glowing orange-yellow which blends well with the dark purplish green foliage. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c

Golden Queen—Of finely rounded form, only six to eight inches high and with small light golden-green leaves. The flowers are self-colored in a rich tint of orange-yellow, intensely glowing. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c

King of Tom Thumbs—Glowing pure scarlet flowers of large size and perfectly round shape. An excellent free bloomer. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

King Theodore—A fine variety with dark green foliage and rich velvety crimson flowers. Fine well-rounded bushes. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

Spotted King or Lady Bird—Golden yellow, barred crimson. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

Vesuvius—The flowers are large; of fine form. The petals are salmon-rose, heavily veined with salmon-orange. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

DWARF "IVY-LEAVED"

All Colors in Mixture—This mixture, like the Tall Ivy Leaved Mixture, contains most remarkable range of colors. There are colors and color combinations that are not found in any other strain of Nasturtiums. It is indeed a glorious mixture! Every one who grows Nasturtiums should plant at least a packet of the seed, in order to become acquainted with this grand new type. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.00, postpaid.

NASTURTIUMS TALL OR TRAILING

These are all of strong, vigorous growth, throwing out running shoots that can be trained upon strings or wires, or can be readily made to climb ordinary paling fences or wire netting. They are very showy, also, planted at the top of a steep slope and allowed to run down the bank.

Brilliant—Bright scarlet flowers held above the dark green leaves. A very showy flower of large size and heavy substance. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

Butterfly—The color is a light lemon-yellow, marked on the three broad lower petals with a blotch of rich terra cotta red. The two upper petals are marked in shades of bright red. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

Cameleon (Tall)—Not only are the flowers of various colors produced on the same plant, but these flowers are variously splashed and bordered. On the same plant are found self-colored flowers, some curiously stained, while others are banded with light or dark shades. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.20.

Cloth of Gold—This fine variety is outstanding because of the contrast of the velvety maroon flowers against the golden yellow foliage.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c

Firefly—Bright yellow, spotted cardinal red, calyx and spur ruby. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

King of the Blacks—Dark mahogany-red blooms and deep bluish green foliage. A strong grower and very free bloomer. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c.

Moonlight—Exquisite light straw-yellow flowers of unusual size borne in great profusion.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c

Sunlight—The flowers, of largest size, are most beautifully colored—clear, rich, golden yellow. Individual flowers measure nearly three inches across, and are produced most profusely.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c

Scarlet—The flowers are of magnificent size and of compact, rounded form. The color of the flowers is a magnificent bright scarlet. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c

Twilight—The flowers are extra large and most pleasing in color, having a faint salmon or buff tint, heavily suffused with rosy salmon.

Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c

BUTZER'S ROSE CITY MIXTURE OF TALL NASTURTIUMS

This mixture is absolutely unequalled; nothing better to be had anywhere. In it will be found all the choicest colors of tall Nasturtiums, of all the new shades, as well as the standard sorts. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{2}$ lb. 30c; lb. \$1.00.

TALL IVY-LEAVED NASTURTIUMS

The plants are of running growth, with star-like pointed leaves of rich green, veined with white, so that the young shoots, where the leaves are set closely together have a marked resemblance to the foliage of the hardy English Ivy. The flowers are of medium size and of most distinct form. The petals are quite narrow, and standing well apart from each other, present a striking star-like appearance. Many colors mixed. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 60c.

For Double Nasturtiums See Page 5

NEW SWEET-SCENTED Dwarf Double NASTURTIUM "GOLDEN GLEAM"

The plant forms a vigorous, large bush which throws out short runners, averaging eighteen inches. The flowers commence to come as soon as the plant nears complete development, and at the time it is in full bloom the entire plant, including the runners, is a blaze of color. The large, golden-yellow flowers average two and one-half to three inches across. They are borne on erect, stiff stems six inches in length. Consequently the flowers stand well above the foliage, an arrangement which adds immeasurably to the showy appearance of the plant.

Per Packet 10c

NEMESIA—1 foot

Free-blooming dwarf bushes for pot culture and open borders. Sow in spring under glass, and transplant; or sow out of doors in May, in patches where they are intended to flower.

Large Flowered Mixed—1 ft. It is the finest strain of the most popular flower, both for size and massive build of the individual flowers, also for the richness and variety of colors. Pkt. 10c.

NEMOPHILA (Baby Eyes)—6 inches

Hardest of annuals, and of the easiest culture. Makes a very effective front row to a bed or border, and should be sown out-of-doors in spring, in patches, where they are to flower.

Insignis Mixed, all colors—Cup-shaped flowers in many bright colors, the blue shades particularly attractive. Pkt. 10c

NEPETA

These little plants give clouds of bright blue flowers all summer. Makes a fine permanent edging and an excellent rock plant.

Mussini—May-September. Light blue. 1 ft. Pkt. 10c

NICOTIANA (Sweet Scented Tobacco Plant) 2 ft.

One of the easiest annuals to raise and one of the most effective. The blossoms in shape are not unlike a Petunia blossom, but with a longer tube. The flowers open toward evening and emit a powerful perfume.

Nicotiana Affinis Hybrids—Mixed Colors. Pkt. 10c

Affinis—The popular free-flowering variety; fragrant star-shaped white flowers; annual, 3 feet high. Pkt. 5c

NIEREMBERGIA

Gracilis—6 in. Flowers white, shading to and veined lavender, an exceedingly graceful plant for hanging baskets, rockwork, etc. Pkt. 10c

NIGELLA

(Love in a Mist, or Devil in the Bush)—A compact free flowering plant, with finely cut foliage, curious-looking flowers and seed pods; of easy culture, growing in any garden soil; hardy annuals; blue and mixed; one foot.

Mixed—Pkt. 5c.

Double Blue—Pkt. 5c.

Double White—Pkt. 5c.

Double Purple—Pkt. 5c

*OENOTHERA

These open their flowers in the evening and one can enjoy a thrill in his garden if he will sit for 15 minutes at twilight and watch the Evening Primroses (Oenothera) drop their calyx and unfold their petals. We have had a plant in our garden. The buds are closed when we start the hose going, but before we get through, presto! a wealth of large golden blooms greets us and bids us "good night."

Lamarckiana Evening Primrose, Mixed—½ to 2 ft. Neat plants, with large, saucer-shaped flowers, white or golden-yellow; open at dusk; emit a delightful perfume. Pkt. 10c

Missouriensis (Macrocarpa)—1 ft. Long trailing stems with large yellow flowers. Pkt. 10c

BUTZER'S PANSIES

Pansies are too well known to require any description, as they are favorites with all. For best results you must start with a good strain. The finest Pansies are, as a rule, shy seeders, which accounts for the difference in the price of the various mixtures offered.

Sow Pansy seed in August or September, in fresh, moist soil, cover lightly and press seeds in with a board. Keep the bed moist by watering, and if the weather is hot and dry by mulching with straw or by shading with cloth. The seeds will germinate in about two weeks, when the straw or cloth should be removed. In from four to six weeks, transplant to a slightly raised bed, setting the plants about 3 inches apart each way. Protect during winter with straw or leaves, and transplant to desired location early in the spring. Seed may be sown in the open ground in the spring as soon as soil can be fitted.

BUTZER'S PANSIES

We have discarded the ordinary Pansies in separate colors in favor of these, which produce very large flowers, plants of strong robust growth, and well adapted to the conditions of our climate.

Adonis—Light blue with white center. Pkt. 10c

Atrosanguinea—Deep blood red. Pkt. 10c

Auricula—Flowered—Fine shades. Pkt. 10c

Aureola—The lower three petals of rose, carmine or purple-red ground-color, with very effective large dark spots; the upper two petals of lighter coloring, whitish to yellow, with rose to dark red border; a charming mixture of colors. Pkt. 10c

Aurora—Brilliant purplish-crimson, with white margin; very effective. Pkt. 10c

Black With Gold Bronze—Very fine. Pkt. 10c

Cardinal—Very large bright red, beautiful. Pkt. 10c

Crimson King—Splendid. Pkt. 10c

Cassier, Bridesmaid—Charming apple blossom tints. Pkt. 10c

Cassier—5 spotted golden-yellow, extra fine. Pkt. 10c

Cassier Hortensia—Red, new, beautiful color. Pkt. 10c

Coquette de Poissy—Rosy light blue. Pkt. 10c

Diana—Cream-colored, distinct. Pkt. 10c

Emperor Frederick—Flowers deep, rich purple, shaded golden; center golden-bronze; margin scarlet and yellow. Very charming. Pkt. 10c

Emperor William—Extra fine. Rich, metallic blue, blotched. Pkt. 10c

Fairy Queen—Light blue, edged white. Pkt. 10c

Fire King—Red with black blotches. Charming. Pkt. 10c

Freya—Violet-purple, silver edged. Pkt. 10c

Gold-Margin—Very fine. Pkt. 10c

Havana—Brown; beautiful. Pkt. 10c

Indigo-Blue—Magnificent. Pkt. 10c

King of the Blacks—Very dark. Pkt. 10c

Lord Beaconsfield—Deep purple violet, shading to white. Pkt. 10c

Lulu Perret—Flowers large, bronze-yellow, with dark center. Pkt. 10c

Madame Perret—Large-flowered red-marbled shades, pretty. Pkt. 10c

Mauve Queen—Rosy lilac, pretty. Pkt. 10c

Mercury—Deep black-purple-red, beautiful. Pkt. 10c

Meteor—Fiery brown. Pkt. 10c

Nigra—Black, very beautiful. Pkt. 10c

Odier—5-spotted white. Flowers extra large, perfectly round and exceedingly attractive; the most beautiful of all white pansies. Pkt. 10c

Orange King—Dark orange. Pkt. 10c

Orchid (Cattleya)-flowered Almond-blossom—Delicate rose. Pkt. 10c

Orchid (Cattleya)-flowered "Sunlight"—Bright yellow, with distinct red-brown spots. Pkt. 10c

Peacock—Flowers large, peacock-blue, with white edge, very fine. Pkt. 10c

Prince Henry—Flowers very large, intensive dark blue, with 3 black-blue blotches. Pkt. 10c

Pretiosa—Large-flowered curled five blotched, violet on carmine-crimson ground, with broad white border, very pretty. Pkt. 10c

Quadricolor—Beautiful blending of colors, blue, red and white, with clear edge. Pkt. 10c

Raphael—Light blue, blotched and veined dark violet. Pkt. 10c

Rosy Lilac—Very pretty. Pkt. 10c

Rubra—Splendid red varieties. Pkt. 10c

Snowflake, Snow Queen (candidissima)—Delicate pure white. Pkt. 10c

Striped—Pkt. 10c.

Violet—Black-blue. Pkt. 10c

Victoria—Magnificent red. Pkt. 10c

Violette borde blanc—Violet, white margined. Pkt. 10c

Vulcan—Very large, brilliant dark red, with 5 black blotches. Pkt. 10c

White With Eye—Pkt. 10c.

Yellow With Dark Center—Pkt. 10c.

Yellow (Golden Queen)—Pure yellow, very fine. Pkt. 10c

8 packages of the above pansies—your selection for 50c, postpaid

BUTZER'S GIANT PANSIES

BUTZER'S ROSE CITY GIANTS

The plants distinguish themselves by their robust growth, and form compact bushes of round shape, with strikingly large, healthy looking foliage.

The imposing five-spotted flowers which on long, vigorous stalks surmount the foliage in the most graceful manner, are of enormous size, perfectly round form, original structure and unusual substance. The individual petals are exceedingly broad and cover each other in such a manner as to make the flowers appear almost double. With most of the flowers the border of every petal being conspicuously undulated and curled, which grants the flowers a striking and very peculiar appearance, entirely new to this class of plants.

The beauty, brilliancy and richness of color being the most striking; also very rare and new tones of red and brown are met with in these flowers.

Butzer's Rose City Giant Pansies

Per pkt. 25c; 5 pkts. \$1; $\frac{1}{16}$ oz. \$1; $\frac{1}{4}$ oz. \$3; $\frac{1}{2}$ oz. \$5; 1 oz. \$8.

BUTZER'S OREGON GIANT PANSY MIXTURE

A mixture of pansies unrivaled for diversity of coloring and markings.

This mixture is made up from the finest named varieties grown by a pansy specialist.

Per pkt. 10c; $\frac{1}{4}$ oz. 75c; $\frac{1}{2}$ oz. \$1.25; oz. \$2.00

SWISS GIANTS

A truly magnificent new strain of Giant Pansies, more beautiful than any others we have ever seen. It produces well rounded, compact plants which are literally covered with immense, heavy blossoms of remarkable substance and texture. The range of color is simply remarkable and by far the majority of plants bear heavily ruffled and crinkled blooms, carried on long stiff stems. Pkt. 25c; 5 pkts. \$1.00; $\frac{1}{16}$ oz. 90c; $\frac{1}{4}$ oz. \$2.50; $\frac{1}{2}$ oz. \$3.50; oz. \$6.00.

Swiss Alpenglow—The color is of a rich velvety garnet with three dark blotches. A most striking and attractive color. Pkt. 25c

Swiss Blue (Ullswater) (Thuner Sea)—The coloring is unusual and attractive. A solid blue flower with a blue black center. Pkt. 25c

Swiss Yellow—Of the true Swiss type. Rich yellow with blotches on the three lower petals. Pkt. 25c

Maple Leaf Giant Mixture—A distinct variety by Vaughan introduced two years ago. It is quite different to other types. The leaves are of giant size and the flowers are 4 to 5 inches across, under good cultivation. Of wonderful substance and fine form. Many charming colors are included. This has been a prize winner whenever shown. Pkt. 25c

*PENTSTEMON (Beard Tongue)

They are very showy, growing from 2 feet to 4 feet high, are rather bushy and have very long, slender spikes which bear many trumpet-shaped flowers with hairy throats from whence the name "Beard Tongue" comes.

"Sensation."—As a bedding plant this takes rank with the Petunia, Phlox, etc. It grows about 30 inches high, every branch being a spike of large, Gloxinia-like flowers in a very wide range of bright colors, including rose, red, carmine, cherry, pink, lilac, purple, etc. Pkt. 10c

PETUNIA

The Petunia is without a peer among annuals for effective summer bedding or indoor culture. They are of easy culture, early to bloom and continue throughout the summer until the first killing frost. No other flower produces a great diversity of color, retaining their freshness for so long a period. The doubles may be perpetuated, if desired, by taking cuttings late in the summer, for winter house blooming plants. Provide good soil and a sunny location.

DWARF GIANTS OF CALIFORNIA

Produce flowers larger than any other type. They have open yellow throats, heavily marked and delicately veined. Compact, strong, and vigorous. Mixed colors, pkt. 25c.

PETUNIA

GIANTS OF CALIFORNIA, MIXED

The flowers are very large and the colors embrace every conceivable shade of crimson, white, violet, lavender, etc.

Pkt. 15c

ROSY MORN

Of compact growth, literally covered with flowers one and one-half inches in diameter. The throat is silver white, while the edge is heavily flushed with soft rose-pink. Pkt. 10c

FINE MIXED SINGLE VARIETIES

Fine Mixed—Excellent for bedding; many colors; $\frac{1}{4}$ oz. 50c; pkt. 10c.

Hybida Single Red. Pkt. 10c.

Hybida Single White. Pkt. 10c.

DOUBLE PETUNIAS

Our Double Petunias are selected with the greatest of care and contain the largest percentage of double flowers possible.

Giant Double Fringed Mixed. Per pkt. 25c.

BALCONY PETUNIAS

A splendid large and free flowering type either for window boxes, vases, hanging baskets, etc., the flowers average 3 inches across and make a very effective display over a long season.

Balcony Blue—Velvety Indigo blue.

Balcony Rose—Brilliant rose-pink; very effective.

Balcony Red.

Balcony White—The pure white form.

Balcony Crimson—Rich velvety crimson.

Balcony Mixed—All colors.

Choice of above, per pkt. 10c

PHACELIA

Campanularia—8 in. A very beautiful annual, producing a terminal raceme of intense gentian-blue flowers with conspicuous white anthers; very effective for edgings, etc., and a charming pot plant. One of the earliest annuals to bloom and flowers last in perfection a long time. Pkt. 15c

***PAEONIA MOUTAN (Tree Peony)**

These immense beautiful and well known flowers from another source of Japanese pride, are too well known to require description. Their present popularity is due to the great improvement in them in recent years, their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of these massive, finely formed and rich colored flowers. The attention given to them in Japan and Europe has resulted in the production of many notably fine new varieties which rank about first for lawns or flower borders or shrubby decoration. Sow seed outdoors in well pulverized, rich soil, covering about one inch. Germination is very slow, taking from 3 to 4 months. With ordinary care they will bloom the third year.

Pkt. 25c; $\frac{1}{2}$ oz. \$1.00; oz. \$1.80, postpaid

**PHLOX DRUMMONDI**

It will grow and thrive in any kind of soil if given a sunny position, but prefers a light, rich loam. Seed may be sown in the open ground any time after danger from frost is past, and in a few weeks they are a sheet of bloom, remaining so until frost. They may be used in a variety of ways, such as a carpet to beds of Roses, in boxes, vases, etc.; but it is when grown in masses, in beds or borders, that they show to best advantage.

Crimson—Pkt. 10c. White—Pkt. 10c.

Flesh—Pkt. 10c. Rose—Pkt. 10c.

Lilac—Pkt. 10c. Scarlet—Pkt. 10c.

Primrose—Pkt. 10c. Violet with white eye—Pkt. 10c.

PHLOX DRUMMONDI

Finest Mixed—It is composed of the finest and most distinct varieties and will give a most varied assortment of brilliant colors. The trusses are large, well rounded, and closely formed, and the individual florets are of the largest size, firm substance, and most distinct and brilliant colorings.

Pkt. 10c; $\frac{1}{4}$ oz. 50c; oz. \$1.50

Star Phlox (Star of Quedlinburg)—Of dwarf habit with very pretty star-shaped flowers. A novel and beautiful variety. Mixed colors.

Pkt. 10c

***PHLOX (Hardy)**

(*Decussata*.) Perennial varieties mixed from a celebrated collection. Seed slow in germination and may not sprout in a year.

***PHYSALIS**

Franchetti (Chinese Lantern Plant)—1½ ft. Flowers yellow with dark center. Produces balloon-like husks, which turn bright red when ripe and resemble Chinese lanterns.

Per pkt. 10c

***PHYSOSTEGIA (False Dragon Head)**

3-4 ft. Extremely beautiful with spikes of rosy pink, lilac or white flowers, which are tube-shaped similar to a tiny antirrhinum blossom. The buds and flowers grow on the stem as if growing four sides of a square; very attractive foliage surrounding the graceful spikes. Flowers in August.

Virginica Alba—White. Pkt. 10c.

Virginica—Dense bushes with spikes of delicate pink tubular flowers.

Pkt. 10c

PINKS OR DIANTHUS

A magnificent genus, embracing some of the most popular flowers in cultivation, producing a great variety of brilliant colors and profusion of bloom. The varieties classed as annuals are really biennials, but are treated as annuals and may be sown out of doors when the danger from frost is past, and in a few weeks' time they are a mass of bloom, continuing so until after hard frost. As a rule, they survive the winter if given slight protection, flowering abundantly the following season. They grow about a foot high, and can be used in beds or borders of solid or mixed colors. The double flowering sorts are almost as fine as carnations for cutting. They are not particular as to soil, but should have a sunny location.

Double China (D. Chinesia fl. pl.)—Small, double flowers, borne in large clusters, of many colors, mostly with white edge.

Pkt. 5c; $\frac{1}{4}$ oz. 15c

Heddewig's Double (D. Heddewigii fl. pl.)—Japan Pinks. Very large double flowers of a wide range of color, running from white and light pink through shades of red to rich, velvety crimson, and deep maroon almost black.

Pkt. 5c; $\frac{1}{4}$ oz. 25c

Single Mixed—Large single flowers of rich and varied colorings.

Pkt. 5c; $\frac{1}{4}$ oz. 20c

Double Japan Mixed (Chinensis laciniatus)—The flowers are rich in hue; very double, deep fringed petals. Colors vary from white to rose, lilac, carmine, crimson scarlet, purple, brown and almost black, spotted and striped.

Pkt. 10c

All varieties mixed, Pkt. 5c

***PINKS (Hardy)**

Allwoodii—A new race of hardy plants belonging to the Dianthus family. It makes an ideal pot plant. The flowers are about 75 per cent double and appear in all colors except yellow. The single flowers are quite as handsome as the double and have the advantage of making larger clusters. It is exceptionally hardy, commencing to flower in early spring and continuing through summer and fall.

Pkt. (25 seeds) 50c

***PINKS (Hardy)**

These very desirable sweet-scented, low-growing, early-blooming and free-flowering Hardy Garden Pinks are unequalled for the borders of beds, drives, and the old-fashioned garden and should be planted in quantity in any good garden soil with full sun and an open situation.

Caesius (Cliff Pink)—Flowers delicate rose color, fragrant, 1 ft. or less.

Seeds, per pkt. 25c

Deltoides (Maiden Pink)—6 in. Beautiful little plant with narrow leaves, with a profusion of small flowers during July and August.

Per pkt. 25c

***HARDY PERENNIALS or CLOVE PINKS**

Hardy Perennials, or Clove Pinks (Plumarius)—Scotch or Grass Pink. When treated like an annual, if seed is sown in March, the plants will bloom the first year. The delicately fringed, variously colored flowers are fragrant, attractive and fine for bouquets.

Pkt. 10c

DIANTHUS SWEET WIVELSFIELD

This remarkable new hybrid is quite distinct from the annual Sweet William. It has a great variety of color, and a long blooming season. Magnificent bedding subject. Pkt. 15c.

DIANTHUS LACINIATUS SPLENDENS

See Page 3

PLATYCODON (Chinese Bell Flower or Balloon Flower)

Very handsome border plants of the Campanula family, the flowers in bud having the appearance of inflated balloons; they flower from June to September.

Grandiflorum—1-2 ft. Large, handsome, deep blue flowers.

Per pkt. 10c

***BUTZER'S PERENNIAL FLOWER GARDEN**

We have made up a mixture of the most showy and easily grown perennials. As a great many of our customers do not care for the names of the different varieties but want a lot of flowers the whole season, with this in mind we have made up this mixture. Under ordinary gardening methods, the planter may expect quite a surprise at the great display of beautiful flowers. Try a package on our say-so. Large Package, 15c, 2 for 25c; oz. 50c, postpaid.

*POPPIES PERENNIAL VARIETIES

Perennial poppies do best in rows one and one-half feet apart and one foot apart in the row. Seed may be sown outdoors either in spring or fall.

Alpine Mixed—6 in. A charming miniature poppy with brilliantly colored flowers including white, pink, apricot, yellow or orange-scarlet, etc. Useful for rock-work. **Per pkt. 35c**

Orientale Hybrids Mixed—A choice mixture of Orientale Poppies in shades of white, salmon, orange, scarlet and crimson. **Per pkt. 10c**

Oriental Scarlet—**Pkt. 10c.**

We do not furnish seed of the opium poppy.

Nudicaule (Iceland Poppy)—15 in. Mixed. Elegant free flowering plants bearing flowers in abundance all summer. **Pkt. 10c**

Nudicaule Yellow, Orange, White—Any color.

Mixed, pkt. 10c

Coonara Pink—A charming warm rose-pink, faintly suffused with salmon-pink, combining the pink and salmon shadings in wonderful delicacy. The plants are more vigorous than is usual in Iceland Poppies, and the flowers are much more freely produced on long, slender stems throughout the season. They will keep well if cut in bud and the end of stems seared for a moment. If sown in the hot-bed in March or April, plants will bloom the same year. **Pkt. 25c**

SINGLE ANNUAL POPPIES

Eldorado Salmon Shades—The introducer made a selection of these most popular shades and these will especially appeal to those admiring pastel shades in flowers. **Pkt. 10c**

Eldorado Pink Shades—**Pkt. 10c.**

Eldorado Mixed—The flowers are large, single, semi-double and double, and contain magnificent shades of soft salmon, orange, orange-scarlet, pink, rose and white, without any dark markings whatever. The substance of the petals in some of the lighter shades is as delicate as China silk. **Pkt. 10c**

Flanders Poppy—Vivid scarlet-red. This flower has in the minds of men been associated for over two hundred years with the battlefields of Flanders. Was the first official flower of the American Legion. **Pkt. 10c; 1/2 oz. 35c; 1 oz. 60c; 1/2 lb. \$2.00**

Glaucum—Large tulip-shaped flowers of dazzling scarlet; not unlike a Scarlet von Thol Tulip. **Pkt. 10c**

BE SURE TO ORDER A SWEET PEA COLLECTION. THERE IS NOTHING BETTER

DOUBLE ANNUAL POPPIES

American Flag—Flowers very large, snow white, scarlet bordered. **Pkt. 5c**

Double Cherry Red—**Pkt. 5c.**

Double Heliotrope—**Pkt. 5c.**

Mikado (The Striped Japanese Poppy)—This beautiful Poppy is very distinct in character and color. The flowers are brilliant scarlet and white, with elegantly curved petals, like a Japanese Chrysanthemum. **Pkt. 5c**

Salmon Pink—**Pkt. 5c.**

Cardinal—A splendid dwarf variety of the carnation-flowered type, growing about two feet high and bearing large globular, fringed flowers of an intense cardinal red. **Pkt. 5c**

Shell-pink—Similar in every way to Cardinal and White Swan, except color, which is a soft sea-shell or chamois-pink. Very dainty. **Pkt. 5c**

White Swan—Immense double flowers, beautifully fringed and of purest white, of the same dwarf habit as Cardinal and Shell-pink. **Pkt. 5c**

Double Carnation-Flowered, Mixed—Of dazzling richness and in a great variety of colors. A remarkably pretty Poppy. **Pkt. 5c; oz. 35c**

POPIES—SHIRLEY

Shirley Poppies—Silk or Ghost; have beautiful satiny flowers of various colors, all with white centers, which make the plants very attractive. Foliage is hairy and finely cut.

American Legion—Brilliant orange scarlet. **Pkt. 5c**

Blue Shirley—Various shades of blue. **Pkt. 10c.**

Rose Shirley—Shades of rose and pink. **Pkt. 10c.**

White Shirley—Pure white. **Pkt. 10c.**

Shirley Mixed—Beautiful shades in delicate shades of rose, apricot, salmon-pink, and blush to glowing crimson with a sprinkling of blues. **Pkt. 10c; oz. 30c**

BUTZER'S SPECIAL POPPY MIXTURE

Double and Single—Comprises not only all the Double and Single Poppies described, but also a number of other sorts specially purchased for this mixture, including some entirely new ones. Will make a grand display. **Pkt. 10c; 1/2 oz. 20c; oz. 30c**

PORTULACA—Rose Moss

Will grow and bloom abundantly all summer in a dry, hot location, where most other plants will soon die. The flowers are of the richest colors and make a beautiful border.

Culture for Portulaca—Sow in open ground when danger from frost is past. Cover the seeds to a depth of four times their size and press the surface firmly with a board. Water with fine spray. Thin out so that the plants will not become crowded. For early flowering sow in hot-bed or shallow boxes in the house in March; transferring to the open ground in May and June.

Single—Mixed colors. **Pkt. 5c.**

Double—Mixed colors. **Pkt. 10c.**

Double and Single—Mixed. **Pkt. 5c.**

*POTENTILLA (Cinquefoil)

Potentillas greatly resemble the Strawberry plant, especially in the manner of growth and the foliage. This is a trailing plant which covers the ground rapidly and sends out roots as it goes along. The flowers are very showy, the colors are very bright.

Willmottium Flowers—Salmon pink, very freely produced. **Pkt. 25c**

Those Marked * are Perennials

*PRIMULA (Primrose)

Exceedingly fine, free flowering plants for both bedding and greenhouse use, producing clusters of brilliant colored flowers indoors from November to May; hardy varieties continually in bloom.

Primula Malacoides (Baby Primrose)—This variety is extensively grown for winter blooming. The small lavender-pink flowers are borne in great profusion.

Pkt. 15c; 2 pkts. for 25c

Primula Malacoides Mixed—Pkt. 15c, 2 for 25c.

Veris Polyanthus Mixed—An extra choice large flowered mixed strain. Pkt. 10c

Veris Acaulis Mixed—Pkt. 10c.

Vulgaris (English Primrose)—Canary yellow, fragrant. Pkt. 15c

Japonica Mixed—Several superimposed whorls of flowers on stems. 8-24 in. high. June. Per pkt. 15c

PYRETHRUM

Aureum (Golden Feather)—Dwarf plants with bright yellow foliage extensively used for edging; usually grown as an annual. Pkt. 5c; 1/4 oz. 20c

Hybridum Double and Single Mixed—Large, daisy-like flowers ranging in colors from light pink to deep red; bloom in spring and fall; height 2 feet. Hardy perennial. Mixed. Pkt. 10c

Pyrethrum—White. Pkt. 10c.

Pyrethrum—Red. Pkt. 10c.

RHODANTHE (Everlasting)

A charming annual; succeeds in a light rich soil and a warm sheltered situation; valuable for pot culture; flowers everlasting.

Maculata Alba—White. Pkt. 10c.

Maculata Rosea—Rose. Pkt. 10c.

Mixed—Pkt. 10c.

RICINUS

Castor Oil Bean (*Ricinus*)—This has large leaves and a tropical appearance. All it requires to flourish is heat. It is a quick growing annual, 6 to 15 feet tall. Leaves are green or reddish. Commercial castor beans are of a different variety.

Red Spire—The shapely, bushy plants attain a height of about 6 feet, with pretty palmate leaves of a bronzy green with prominent red ribs and veins, and producing through the summer and autumn numerous spikes of flowers or seedpods 9 to 18 inches long, of a brilliant rosy crimson; altogether a most effective semi-tropical plant, valuable alike for its foliage and flowers and like other *Ricinus*, absolutely insect-proof. As single specimens or in beds on the lawn for filling up a corner, or making a hedge or line, this is one of the most ornamental plants ever introduced. Per pkt. 10c

Sanguineus—Tricolor. Has blood-red stalks and green leaves with red veins. Pkt. 10c; oz. 25c

Zanzibarensis—Mixed. A very large leaved variety, deep green and bronze, growing 10 to 15 feet high. Pkt. 10c; oz. 25c

Mixture of all varieties, pkt. 10c; oz. 20c.

*ROMNEYA

Coulteri (California Tree Poppy)—5 ft. Flowers all summer. Beautiful snowy white fragrant flowers.

Pkt. 15c

RUDBECKIA (Cone Flower)

Bicolor Superba—Fine free-flowering annual variety, growing about 2 feet high; forming a dense bush and producing in great abundance on long stems its bright flowers. The disc is brown, the florets golden-yellow, with large velvety-brown spots at the base; very effective and useful for cutting. Pkt. 10c

Bicolor Superba—Semi-double. Pkt. 10c.

Purpurea (Giant Purple Cone-Flower)—A most interesting hardy perennial, producing all summer large, showy reddish-purple flowers, about 4 inches across; 3 feet. Pkt. 15c

SALPIGLOSSIS (Painted Tongue)

These showy, half-hardy annuals bear beautiful funnel-shaped flowers having dark veins in a ground which varies from white to crimson, yellow, orange, etc., and intermediate shades. They are easily grown, require a light, rich, sandy loam and will respond to liberal treatment. Bloom from late summer until frost. 2 ft.

Crimson.

Brown and Gold.

Dark Red.

Crimson and Gold.

Yellow.

Purple and Gold.

Scarlet and Gold.

Rose and Gold.

White and Gold.

Price, any of above, pkt. 5c. each

Extra Fine Mixed—Flowers of many beautiful shades, finely veined or penciled. A choice mixture of large flowering varieties. Pkt. 5c; oz. 80c

SALVIA

Salvia or *Flowering Sage*—A tender perennial blooming the first season from seed and growing two to three feet high. The blossoms are borne on long stems in racemes or spikes, and are fragrant. The plant forms a bunch and blooms profusely during the whole summer and fall.

America, or *Globe of Fire*—This is the freest and most continuous bloomer; also the most uniform in habit of growth, which makes it particularly valuable for bedding or planting in lines. Per pkt. 25c

Salvia Splendens (Scarlet Sage)—One of the handsomest flowering plants we have for garden decorations. Excellent for filling large beds or borders in the garden; continuously in bloom from early August until the first killing frost. Beautiful scarlet; large flowering. Pkt. 5c; 1/4 oz. 50c

Clara Bedman (Fireball)—The plants form handsome globular bushes about two feet in diameter. The spikes grow upright and stand clear above the foliage, completely enveloping the plant, and are of a most brilliant dazzling scarlet. Pkt. 10c

Pratensis Atro-Violacea—Dark violet, 20 in. Pkt. 25c

Zurich—A splendid dwarf variety, growing about 2 feet high, and is especially valuable on account of being the earliest to bloom, flowering ten days in advance of any other sort. Pkt. 5c; 1/8 oz. 75c

SALPIGLOSSIS

Purple Self (New)—See Page 4.

SANVITALIA

Procumbens Fl. Pl.—6 in. Sanvitalia flowers are much like tiny Zinnias, being golden yellow with very dark purple centers, some of them single and others double. The plants grow only six inches tall, or rather they are prostrate and spread over the soil instead of growing upward. They start blooming in June and continue until frost.

Pkt. 10c

***SAPONARIA**

Ocymoides Splendens—6 in. A showy dwarf trailing plant, producing a sheet of vivid crimson flowers. June-August.

Per pkt. 10c

***SAXIFRAGA (Megasea)**

These will thrive in any kind of soil and in any position; grow about 1 ft. high and are admirable for the border of shrubbery, forming masses of handsome, broad deep green foliage with pretty rose-pink flowers which appear very early in the spring.

Decipiens Grandiflora—Masses of white flowers. 18 in. Per pkt. 25c

Rhei Superba—Rose. 12 in. May-July. Seeds, pkt. 25c

SCABIOSA

(Mourning Bride, Sweet Scabious, Pin-cushion Flower, etc.)

These are firm favorites with many of our customers. Seed can be sown any time in the spring, after danger of frost is past. They grow about 2½ feet high, and come into bloom early in July, and continue without interruption until hard frost. The beautiful flowers in exquisite shades are borne on long stems, and when cut keep in perfect condition for the best part of a week. They make effective borders or beds, and no garden is complete without Scabiosas, especially where flowers are wanted for cutting.

Lavender. Fiery Scarlet
Black Purple. Flesh.
Cherry Red. Rose.
Yellow. Shasta—Pure white.
Mxed.

Price, any of above, Pkt. 5c each

***SCABIOSA (Perennial)**

*Caucasica Alba—White. Pkt. 10c.

Caucasica Perfecta—Light blue flowers, long stem; fine for cutting. 18 in. June-October. Seeds, pkt. 15c

Caucasica New Hybrids—A collection of new shades in this well-known perennial family. Per pkt. 25c

*Columbaria—This is a novelty from South Africa. There is a decided place for this in your Perennial list. It is hardy, low growing, with a fine light green foliage. Some of the flowers measure two and a half inches across, with short compact petals, borne on long slender but strong stems. We offer this in two colors, lavender and pink.

Per pkt. 25c

SCHIZANTHUS

Butterfly or Fringe Flower

Very popular charming annuals, very decorative for garden beds and indispensable for pot plants for the house, where, by successive sowings, a continuous display may be enjoyed almost all the year around. The plants are compact, 1 to 1½ feet high, and their fluorescence is such as to completely obscure the foliage, making them veritable pyramids of dainty, airy, butterfly-like flowers. The seeds germinate very quickly and the plants come into bloom a few weeks from sowing.

Hybridus Grandiflorus—1 ft. (The Poor Man's Orchid.) Neat pyramidal bushes covered with a multitude of small butterfly-like flowers of the most brilliant and striking color designs.

Pkt. 10c

Wisetonensis—1½ ft. A charming annual with graceful fern-like foliage and a profusion of flowers varying from almost white with yellow eye to a brilliant rose with bronzy brown center. A really beautiful subject for the flower border from seed raised in February, and for winter decoration in greenhouse from seed raised in May and June.

Pkt. 10c

Mixed—All colors. Pkt. 5c; ¼ oz. 15c.

***SCUTELLARIA**

Celestina—Blue. Pretty Siberian rock plant. Pkt. 10c

SCHIZANTHUS SUNSET HYBRIDS (Bedger) (Grower's Description)

This carefully bred strain is the result of our years of endeavor to produce an arrestingly bright strain of this ever popular flower. Sunset Hybrids is the accomplishment of this ideal, a well-balanced blend consisting of bright red and carmine shades, each butterfly-like flower delicately marked with gold or white. The two foot plants are covered with a mass of flowers, which are excellent for cutting. One of the most easily grown garden annuals, it is also fine for pot plant use. Pkt. 15c.

***SIDALCEA**

Erect-growing, more or less branching plants, producing their showy flowers during June-July. They will succeed in any garden soil in a sunny position.

Rose Gem—2-3 ft. July-August. Beautiful rose-pink flowers. Very distinct.

Per pkt. 15c

***SILENE (Catchfly)**

Useful plants for front row of herbaceous border, bearing quantities of bright flowers.

Schafta—4 in. July-October. Bright rose; one of the best Autumn border plants.

Per pkt. 15c

SNAPDRAGON

(See *Antirrhinum*)

***SOLIDAGO (Golden Rod)**

Virgo-aurea Alpestris—Yellow. 10 in. Spring.

Per pkt. 15c

STACHYS

Lanata—1-1½ ft. Grown for the effect of its dwarf, white woolly foliage; the flower spikes should be removed.

Per pkt. 10c

STATICE (Sea Lavender)

Our annual Statice is not only a beautiful flower in the border, but dries retaining its true colors, which are rare among everlasting, and have come to be indispensable in making winter bouquets.

Bonduellii—Producing numerous heads of bright yellow flowers.

Pkt. 10c

Sinuata Blue—Pkt. 5c. Sinuata Lavender—Pkt. 5c.

Sinuata Rose—Pkt. 5c. Sinuata Mxed—Pkt. 5c.

Sinuata White—Pkt. 5c.

Yellow—Pkt. 5c.

Russian (Suvorowii, or Rat Tail)—1 ft. Flowers bright rose color. Pkt. 10c.

***STATICE (Sea Lavender)**

They are stemless, the leaves springing direct from the root stock and the flower stems are more or less twiggly, bearing their small flowers in much-branched panicles. The flowers are useful for drying for winter use. They belong to the Thrift order.

Caspia—The multitude of small flowers composed in spikes of a height of 2 to 3 feet, are of a tender lilac color. Per pkt. 15c.

Latifolia—2 ft. Dense branching plumes of deep blue flowers. Per pkt. 10c.

Perezii—Bright blue. Pkt. 25c.

STEVIA

Serrata—2 ft. Free-blooming plants, bearing a multitude of fragrant pure white flowers; suitable for summer or winter blooming and cutting.

Pkt. 10c

STOKESIA (Cornflower Aster)

Cyanea—This is not new, but is a rare and beautiful hardy perennial. The plant grows about 24 inches high, each bearing from 20 to 30 handsome lavender-blue cornflower-like blossoms; in bloom from July till frost. One of the choicest subjects for the hardy border and indispensable for cutting.

Mxed, Pkt. 5c

STIM-U-PLANT
An All the Year Fertilizer

STOCKS

Gilliflower—The Stock is one of the most popular annuals, either for bedding or pot culture; for brilliancy and diversity of color, fragrance, profusion, and duration of bloom it is unsurpassed. Start the seed in February and March, and as soon as the plants have their second pair of leaves, prick out into shallow boxes and in about four weeks the plants will be ready to pot; from which they should be transferred to the open ground in May or June.

IMPROVED LARGE FLOWERING 10 WEEK STOCKS

Azure Blue.	Flesh.
Brilliant Blue.	Rose.
Blood Red.	White.

ROSE QUEEN—Brilliant Deep Rose.
SALMON KING—Salmon Rose.
SOUVENIR DE MONACO—Crimson.
SUMMER NIGHT—Dark Blue.
ALL COLORS MIXED.

Price any of the above, 10c pkt., 3 for 25c

SUNFLOWER (Helianthus)

These comprise plants of majestic growth and immense showy flowers, suitable for shrubberies, woodlands, wild gardens and subtropical gardening; the dwarfer kinds, with smaller flowers, are charming when grouped in mixed flower borders.

Chrysanthemum Flowered—Perfectly double; the color is the brightest golden yellow. The flowers are so perfect in form that they resemble very much double Chrysanthemum-Flowered Asters, with long stems; grows seven feet high, and bears profusely all summer long. Pkt. 5c

Russian Mammoth—Single, of gigantic dimensions. Sow a few seeds in the center of the garden and it will provide in late summer a feeding table for a large number of birds. 1 oz. 5c.

SWEET PEAS GIANT SPENCER

Too many varieties of Sweet Peas. It has always been a puzzling question to small growers, who, desiring to grow only a limited number of sorts, with as great an assortment as possible, are sometimes rather disappointed because some of the varieties are so nearly alike.

It will be realized that exhibitors and other keen growers are influenced by delicate shadings of color, by difference in form, by the way the blooms are placed on the stem, and so forth. We, therefore, keep a sufficiently wide range of varieties to suit these tastes, although, to the casual eye many of them are very much alike. We have made up our list of varieties, which, we believe, will answer all purposes.

Culture—Early planting is advised so that they may bloom before very hot weather. Dig the soil deeply to allow deep rooting. Open a trench four to six inches deep, in which plant the seeds early in February and cover with an inch of soil and press it firmly. When up about two inches begin cultivating and gradually fill the trench until it is level. Do not allow the roots to become too dry; water at least twice a week. Be sure to gather the blooms, otherwise the vines will stop flowering.

Fall Planting—Sweet peas may also be started in October, November and December, planting four to six inches deep; give them slight protection and they will become well rooted and grow off at the first opening of spring and produce an abundance of blooms earlier and for a longer season than spring plantings.

Gather sweet pea blooms frequently; the more you cut them the better and longer they bloom.

SWEET PEA COLLECTION

BUTZER'S ROSE CITY 25c Postpaid

This Collection Contains One Package
Each of the Following—All
Giant Spencers

CREAM

What Joy—A new cream variety of a rich deep primrose-yellow shade.

PINK

Pinkie—A very lovely clear deep pink, magnificent flowers.

LAVENDER

Austin Frederick Improved—The color is a pleasing shade of bright lavender.

ORANGE

Colorado—Here is a shade of orange that will appeal to many on account of its richness and brilliance. Large, well-placed blooms.

STRIPED

America—The ground color is ivory-white, distinctly striped with brilliant crimson-red. It is a charming variety which blooms very freely and carries its striking blooms in threes or fours on fine long stems. It makes an exquisite bunch.

SCARLET

Fire—The name suggests the burning color of this new fine variety—scintillating flaming scarlet-cerise-red.

25c FOR THIS COLLECTION

SWEET PEAS—STANDARD GIANT SPENCERS

FOR SPRING AND SUMMER BLOOMING

The Giant Spencers listed below are particularly recommended for spring and summer blooming and will thrive in any climate where other sweet peas will grow.

This strain of Sweet Peas bears three and four very large flowers on long, stiff stems. Many of the flowers are ruffled and wavy and the great assortment of shades makes them a remarkable strain for all purposes.

All Named Varieties—Pkt. 10c; 8 pkts. your selection for 50c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.50, postpaid.

BLUE

Blue Bird—A fine blue variety of large size and brilliant coloring. The flowers are much waved and frilled. Elegant long-stemmed spikes.

Mrs. Tom Jones—This is a real true blue.

BLUSH

Elegance—Delicate and beautiful in color, robust and free in growth and habit, this charming sweet pea has become a general favorite with all growers.

Valentine—A variety of great merit. The plants make a strong, vigorous growth.

CREAM

Daffodil—A vigorous variety with exquisitely frilled and waved rich cream blooms.

What Joy—A new cream variety of a rich deep Primrose-yellow shade.

CREAM-PINK

Fluffy Ruffles—A remarkable new type with large double and ruffled blooms. The color is an exquisite light cream-pink.

Margaret Atlee—Rich glowing rose-pink on a cream ground, with a subtle suffusion of salmon and amber overlying the entire flower.

Mary Pickford—A very large flower. The color is a dainty and appealing cream-pink with a soft suffusion of salmon. Blooms very profusely.

Miss California—This exquisite California variety is a charming iridescent tone of cream-pink with a salmon and orange hue. Large attractive sprays.

CRIMSON

Charity—The blooms are a rich brilliant crimson which does not burn in the sun.

Crimson King—In our opinion this is the finest sweet pea of a true crimson shade. A bold flower of excellent shape, carried on fine long stems.

DEEP CERISE

Fiery Cross—The standard is a scorching fire-red or rich orange-scarlet.

Royal Scott—Of all brilliant shades there are none that surpass "Royal Scott." It does not fade or burn in the hottest sunshine.

DEEP PINK

Hawmark Pink—The color is a most beautiful shade of rich rose-pink, deeply flushed and shaded with salmon.

Hercules—A flower of great substance and exquisite size, and beautifully waved. The color is a magnificent soft rose-pink self.

Pinkie—A very lovely clear deep pink, magnificent flowers.

LIGHT PINK

Elfrida Pearson—The color is a lovely pink, buds and flowers tinted with salmon-pink.

Daisybud—The color of the flowers is a harmonious combination of apple blossom tints with a suggestion of cream-pink.

LAVENDER

Austin Frederick Improved—The color is a pleasing shade of bright lavender.

Hawmark Lavender—There is nothing so pure in lavender as this.

R. F. Felton—This has made many friends on account of its wonderful color and magnificent size.

LIGHT CERISE

Hawmark Cerise—Glowing rose-cerise on cream ground. It is an excellent flower.

AN OUNCE WILL PLANT 25 FEET OF ROW
All Named Varieties Sweet Peas—Pkt. 10c; 8 pkts. your

SUPERB SPENCER or ORCHID-FLOWERED SWEET PEA

MIXTURE

This popular mixture is planted each year by thousands of our customers who like to have a showy row of Sweet Peas. This mixture contains the very best of the named Sweet Peas as well as some of the unnamed. We believe that it is the very best mixture that can be made, and we know that it will surely be a delight to you and also to your friends. All of the leading colors are represented. Plant them this fall. Price per pkt. 5c; oz. 15c; 2-oz. 25c; 4-oz. 50c, postpaid

MAROON

Warrior—The color is rich reddish maroon, flushed with bronze. Lovers of dark shades will appreciate this fine color.

ORANGE-SALMON

Barbara—A superb salmon-colored self that makes a telling bunch, either for exhibition or table decoration. Requires shading against strong sun.

Colorado—Here is a shade of orange that will appeal to many on account of its richness and brilliance. Large, well-placed blooms.

Gold Crest—A light orange tint with rich salmon cast. Truly a beautiful flower.

Helen Lewis—Orange-rose wings and intense rich crimson-orange standard. An old favorite.

Robert Sydenham—A magnificent glowing orange.

Tangerine—This is the last word in orange-colored sweet peas.

ORANGE-SCARLET

Gloriosa—This is an outstanding English variety with large, well-formed flowers of a bright and glowing orange-scarlet self.

The President—A brilliant orange-scarlet flower, always of largest size.

PICOTEE

Youth—This is an outstanding white-ground picotee variety. Large size, and free blooming.

PURPLE

Olympia—Lovely, large blooms of a gloriously rich and bright purple color. It is a comparatively new variety of strong habit.

Royal Purple—The color is a rich warm purple, the younger flowers having a slightly softer color tone.

ROSE

Brilliant—A lovely bright rose.

Sunset—A beautiful shade of soft rich rose with a distinct halo of luminous yellow towards the base.

SCARLET

Huntsman—A bright shade of scarlet; really a wonderful bit of color. Perfectly sun-proof and of largest size. An outstanding English novelty.

SCARLET-CERISE

Wonderful—A truly wonderful shade of real scarlet, keeping its bright luster long after cutting. Always carries four flowers to a stem.

STRIPED

America—The ground color is ivory-white, distinctly striped with brilliant crimson-red. It is a charming variety which blooms very freely and carries its striking blooms in threes or fours on fine long stems. It makes an exquisite bunch.

Senator—The color is a varying combination of deep claret and chocolate, striped and flaked on a ground of light heliotrope.

WHITE

Giant White—A gigantic flower of exquisite form and pure color.

King White—Magnificent white; of perfect Spencer type; the immense petals, gracefully frilled, are a pure white of wonderful substance.

Model—An outstanding new black-seeded white sweet pea of magnificent proportions.

selection for 50c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.50, postpaid

CUPID, DWARF OR BEDDING

SWEET PEAS

These form a line of emerald-green foliage a little over a foot wide and 6 inches high, and from June until late summer are literally a sheet of bloom; the mixture contains all the colors.

Little Nell—Pink and white. Pkt. 10c.

Midshipmlte—White edged violet blue. Pkt. 10c.

Rosebud—Apricot pink. Pkt. 10c.

Mixed—Above three varieties. Pkt. 10c

(Sweet Rocket—Evening Scented Stock)

HESPERIS MATRONALIS

Belongs to the Wall flower family. Deliciously sweet-scented flowers for garden or cutting. 2-3 ft. June-August. Sow in spring in boxes and transplant in April or May—or sow in open ground in April for later bloom.

Purpurea—Purple. Pkt. 10c.

Mixed—Pkt. 10c.

*SWEET WILLIAMS

Dianthus Barbatus—A well-known attractive, free-flowering, hardy perennial, producing a splendid effect in beds and borders, with rich and varied flowers. The demand for separate colors has induced us to offer this season several of the best and most distinct flowers.

Dark Crimson. Pkt. 5c.

Pink Beauty. Pkt. 5c.

Scarlet Beauty. Pkt. 5c.

Double White. Pkt. 5c.

Double Mixed. Pkt. 5c.

Single Mixed. Pkt. 5c.

TAGETES—See Marigold

TASSEL FLOWER—See Cacalia

THALICTRUM (Meadow Rue)

The foliage is very finely divided like that of the Maiden-hair fern or Columbina and is useful in making bouquets. The flowers are borne in feathery clusters. Easy of cultivation. Belong to the Buttercup order.

Dipterocarpum—4 to 5 ft. Aug.-Sept. Very graceful plumes of rosy purple flowers with conspicuous yellow anthers.

25c per pkt.

THUNBERGIA

Black Eyed Susan—Beautiful rapid-growing climbers, fine for vases, rustic work or greenhouse culture. Half-hardy annuals; five feet. Fine mixed. Per pkt. 5c.

TRANSVAAL DAISY—See Gerbera

*TRITOMA

Hybrida Mirabilis—An annual Red-Hot Poker Plant. Seed should be sown in temperate heat from January to March, pricked off and treated like half hardy annuals. The seedlings may be planted in open ground from end of April to May and they will bloom freely from August to late in the autumn. Pkt. 15c.

TRUMPET FLOWER—See Datura

*TUNICA

Saxifraga—A pretty tufted plant with light pink flowers, produced all summer. Useful either for the rockery or the border. Per pkt. 15c.

URSINIA ANELHOIDES—See Page 2

VENIDIUM

Fastuosum—Brilliant orange flowers, 3 inches across, with dark center and black-purple zone. Plants grow 2 to 3 feet tall. Soft gray woolly leaves. Splendid for garden display and for growing under glass. An unusually showy plant. Pkt. 15c.

*VERBASCUM

Hybridum, Miss Willmott—Hardy biennial. The large flowers are produced in stately spikes, rising to a height of 5 to 6 feet and continue from July to frost. A lovely white variety.

Seeds, per pkt. 15c

Phoeniceum Hybrids—2 ft. Bears white, purple, rose or red flowers in erect spikes in summer. A native of Europe and Asia.

Pkt. 25c

VERBENAS

Verbenas are free flowering hardy annuals of low spreading growth. Single plants in rich soil will cover a space three or four feet in diameter and furnish a profusion of flowers. If the flowers are kept cut, the plants will bloom much more freely. Plants grown from seed are not only cheaper than those grown from cuttings, but are more vigorous.

Mammoth Strain—This is without doubt the finest strain in existence. White, scarlet, pink, purple, blue or finest mixed.

Pkt. 10c

VERBENA

Beauty of Oxford Hybrids—Many shades ranging from rose-pink to rose-red. Large blooms in elegant round trusses. Exceedingly showy. Pkt. 10c.

VERBENA HYBRIDA COMPACTA TYPE
(Edgnig Verbenas)

These are distinct from all other types of Verbena, very compact, dwarf, and free flowering. The color range is very wide, in bright shades. They are excellent for the annual rock garden in a sunny position, for borders or edgings, or for window boxes or pots.

Mixed, pkt. 10c

VERBENA ROYAL BOUQUET MIXED

As the name suggests, this type is excellent for cutting. The plants are definitely upright in habit, several 10 to 12-inch stalks to a plant, each bearing full clusters of the large starry eyed flowers at the tip. They are fine for pot culture, as well as cutting. The colors comprise a full range of the brighter shades. Pkt. 10c.

*VERONICA (Speedwell)

Among the prettiest of herbaceous plants, bearing in most cases blue flowers, which are much needed.

Prostrata Mixed—Blue and white. Trailer. June-July.

Per pkt. 25c

VIOLA CORNUTA

"Tufted Pansies"—The flowers are not so large as regular pansies but bloom so freely that for bedding effect they are unsurpassed. The colors are distinct and they also bloom for a long time.

Blue Perfection—Deep bright blue. Pkt. 15c.

Jersey Gem—Forms a large, compact plant, producing a continuous profusion of bloom for a very long period. The flowers are a very pleasing shade of deep violet-blue, with an occasional very slight variation in tint, and may be relied upon to come about 70% true from seed. A great feature of this fine variety is its wonderful power of resisting drought, the plants continuing to throw up flowers long after other varieties are withered up.

Pkt. 25c

Purple—Pkt. 15c; Mixed—Pkt. 10c.

VIOLET (Viola Odorata) (Sweet Violet)

No garden is complete without a nice bed of violets. They bloom ahead of other flowers, and their fragrance is delightful. They will thrive in shady places and therefore can be planted where other plants will not do well. A violet bed around the foot of a big shade tree is very attractive. Provide good rich soil and after you once get a bed established you can get any number of plants by dividing the roots. Hardy perennial.

Pkt. 10c

VIOLET ODORATA

Bosniaca—Free-blooming, small deep purple flowers. Pkt. 25c

Florariense—This variety forms large compact plants producing a continuous profusion of bloom for a long period, considerably longer than other Violas. The flowers are a very pleasing shade of pale lavender. The plants continue to throw up flowers long after other varieties are withered up. Splendid rock garden plant.

Pkt. 35c

Gracilis—Dark Violet Blue—Very free blooming new variety. Flowers same size and color as the Sweet Violet. Can be used in rock gardens in place of Viola Jersey Gem which it resembles.

Pkt. 35c

Gracilis Lord Nelson—Glowing violet-purple. 6 in. April-August.

Pkt. 35c

Johnny-Jump-Up or Viola Tricolor—The plants are easily raised from seed, come into bloom very quickly, and their delightful little pansy faces appeal to every one who admires a pansy or violet. Purple, blue and yellow are the three colors that give them their name and the combinations are variable. Perfectly hardy and will reseed itself. Pkt. 25c.

VISCARIA

Mixed—1 ft. Very showy and effective garden annual, producing freely throughout the summer large single flowers in red, white and blue shades. Very bright and effective for beds and useful cutting.

Pkt. 10c; 1/4 oz. 25c

VIRGINIAN STOCK—(French Forget-me-not)

French Forget-me-nots are fast growing, early flowering little plants for spring use in the annual rock garden or as an edging plant. They are in flower with such early blossoming varieties as alyssum, pansies, violas, and linarias. As they come before the nemesias, they could very well be used in the space to be filled later on by them. They are charming when grown either in mixture or in the separate colors of rose, crimson, white and mixed which are offered. Per pkt. 10c.

WALL FLOWER

Very highly prized, old-fashioned plants grown largely for their fragrance; half-hardy perennial varieties; 1½ feet.

Single Finest Mixed—Pkt. 5c.
Blood Red, Golden Gem Yellow, Paris Market Yellow, Brown. Per pkt. 10c

DOUBLE TALL BRANCHING WALLFLOWER

Double Tall Branching. Finest Mixed—Fragrant, 3 feet. Pkt. 10c

WILD CUCUMBER

The quickest growing climber on our list, attaining a length of 30 feet in one season. It is thickly dotted with pretty, white, fragrant flowers, followed by an abundance of ornamental and prickly seed pods. It will quickly cover an old tree or an unsightly building. Pkt. 5c; oz. 20c

“WILD” FLOWER GARDEN

To those who cannot bestow the necessary care required in a neatly laid out flower garden the “Wild” Flower Garden presents a substitute which for its usual varied effect, for cheapness and small amount of labor necessary for its construction, has no rival.

“Wild Flower Garden Seeds” are a mixture of over 100 varieties of hardy flower seeds. Per pkt. 5c; oz. 20c

XERANTHEMUM, MIXED

Plants 2 feet high, producing small double flowers, which are easily dried for winter bouquets. Grows readily from seed sown early in the spring. The flowers are very graceful. Free-flowering. Pkt. 10c

ZINNIAS—GIANTS OF CALIFORNIA

This type was introduced in 1926, with the conviction that it was a type that would become a favorite. This is a mutation from the Dahlia Flowered type and the general approval in the past four years has encouraged us to go further into the development of this for florists' and general use. The great advantage of this type is that the very large flowers are of enormous size and flat, getting away from the conical type of the Giants and eliminating the stiffness that has been so objectionable in Zinnias in the past. The flowers from the time they open are attractive, making them a good cut flower from the early bud until they are in full bloom. They are twice the size of the ordinary Giants.

Cerise Queen—Beautiful cerise rose.

Enchantress—Color same as Exquisite in Dahlia Flowered type.

Miss Wilmott—Soft pink.

Orange King—Cadmium or burnt orange.

Orange Queen—Golden yellow.

Purity—White.

Rose Queen—Striking bright rose.

Scarlet Gem—Glowing scarlet.

Finest Mixed.

Price, any of the above, 10 cents per package; 3 packages for 25 cents; 8 for 50c.

GIANT PICOTEE ZINNIAS

A remarkable new and distinct class with beautiful double flowers in orange, flesh, lemon, pink and cerise, each petal being distinctly tipped with various shades of dark, resembling the Picotee Carnations.

Golden Pheasant—A variety of the above, having flowers of a deep orange with maroon tips. Pkt. 10c.

Giant Picotee Mixed—Pkt. 10c.

Pumila Picotee “Delight”—An extra select variety in light and deep salmon shades; petals ruffled and curled. Pkt. 10c.

ZINNIAS

POMPON OR LILIPUT DOUBLE ZINNIAS

12 to 15 in.

The plants form handsome little bushes and fairly bristle with tiny, short-stemmed, very double flowers hardly exceeding a daisy flower in size. They are very pretty plants; bloom all summer until late in the fall.

Canary Gem.	Liliput Mixed, all colors.
Crimson Gem.	Purple Gem.
Delicate Flesh Gem.	Salmon Rose Gem.
Golden Gem.	Scarlet Gem.
Orange Gem.	White Gem.

Each of the above, pkt. 10c.

QUILLED TYPE ZINNIAS

Achievement or Victory Mixed—The petals are partially tubular or quilled giving the flower somewhat the appearance of a cactus dahlia and displaying a rich variety of colors mostly of the warmer shades, such as salmon, old rose, deep rose, lilac, bronze and dark red tones. On the reverse side the petals are light or dark lilac, making a wonderful combination of colors. The plants are of strong, robust growth and produce an abundance of very large, double flowers often 5 inches in diameter. Pkt. 10c.

ZINNIA FANTASY MIXED (Bodger)

(Grower's Description)

New zinnias are always welcomed by home growers and florists alike. While the giant flowered varieties are still popular, the trend of late years has been toward the smaller flowered, more graceful strains. The new Fantasy Mixture meets this demand in all details: the rounded flowers are composed of a mass of shaggy ray-like petals which give a delicate and refined appearance to the medium-sized double flowers, large enough to satisfy the desire for mass of color, yet small enough to lend themselves gracefully to flower arrangement. The color range includes the brightest shades of reds and orange, as well as the popular pastel pinks and cream. Pkt. 25c.

ZINNIA DESERT GOLD (Bodger)

(Grower's Description)

Several years ago we introduced the fascinating new zinnia, Crown O' Gold, in mixture. The yellow and gold shades in this mixture were immediately proclaimed the most attractive and sought after as separate colors. We are very happy now to offer these shades as Desert Gold, a variety containing the light and deep hues of gold, each petal overlaid at the base with a deeper golden yellow, giving a charming bicolor combination. Those who appreciate the finest in zinnias will welcome Desert Gold. Pkt. 25c.

SCABIOSA FLOWERED

A new zinnia much resembling the scabiosa. Flowers are 2 to 3 inches across, in many desirable colors and with stems suitable for bowl arrangement and small bouquets. A few off type may be expected. Mixed colors. Pkt. 25c.

“ROSE CITY” MIXTURE ZINNIAS

This is a mixture of all the standard varieties that we list and will give you a wonderful display of flowers.

Pkt. 10c; ¼ oz. 35c; 1 oz. \$1.00

SEED CATALOG

You also have thrust upon you without cost the annual seed catalog which helps you out where all else fails. It tells you in a nutshell what to plant, when, where and how to plant it, and most important of all, your seed catalog tells you where to buy the most reliable seeds. Send us an order and you will receive catalog as issued.

DAHLIA FLOWERED ZINNIAS

This wonderful flower creates a sensation wherever it is grown and it has probably gained popularity more quickly than any other improved garden flower offered in recent years. The large size, fullness of petals, extraordinary color range, and good keeping qualities have all contributed to its popularity. The flowers resemble in appearance the Decorative Dahlia and is called the Dahlia Flowered Zinnia for this reason. When in full bloom they often measure five to six inches in diameter.

3
Pkts.
25c

Canary Bird—A delicate shade of primrose—very large and holds its color well until out of bloom. Per pkt. 10c.

Crimson Monarch—By far the largest and best of the red shades. Flowers often 8 inches in diameter. Plants very vigorous. A marvelous production of extraordinary merit. Per pkt. 10c.

Dream—A fine deep lavender, turning to purple (Mallow Purple), a new, desirable shade in Zinnias. Per pkt. 10c.

Exquisite—By far the most pleasing of our collection. Truly DAHLIA flowered as regards form and size. Color light rose with center a deep rose. (Tyrian Rose.) Per pkt. 10c.

Golden Dawn (New)—A beautiful golden yellow of immense size and good form. Very attractive. Pkt. 10c.

Golden State—A very rich orange yellow (Cadmium). Yellow in the bud, turning to an attractive orange when in full bloom. Per pkt. 10c.

Illumination—Similar to Exquisite, but a striking self color of deep rose. (Tyrian Rose.) Per pkt. 10c.

Lemon Beauty—This is next to Crimson Monarch in size and form. It may be described as a golden yellow on brown. Decidedly a pastel shade, and should be in every collection. Pkt. 10c.

Meteor—A rich, glowing deep red (Spinel Red), and the darkest of all the red shades. Fine form, with good depth of petal. Very large and more floriferous than other reds. Per pkt. 10c.

Oriole—We consider this the most beautiful of its class. It is an immense orange and gold bicolor, changing slightly as it ages, but at all times worthy of the beautiful bird for which it is named. Pkt. 10c.

Old Rose—This is adequately described by its name, as it is of the real Old Rose Shade; it is large, and for charm and beauty we consider it ranks next to Exquisite. Per pkt. 10c.

Polar Bear—A very large pure white, the best white yet seen in Zinnias. True Dahlia form. Per pkt. 10c.

Purple Prince—A fine, deep purple (Rhodanthe Purple) large and well-formed. Pkt. 10c.

Scarlet Flame—A large, beautiful, bright scarlet, with a delightful blending of orange throughout the petal. This is not a bicolor. Per pkt. 10c.

Youth (New)—A beautiful soft rose self; valuable for forcing and a good skipper, having better lasting qualities than any other variety we grow. Pkt. 10c.

Butzer's Special Mixture—A well blended mixture, containing all the above novelties. Per pkt. 10c; 3 for 25c.

DWARF DOUBLE ZINNIAS—Large Flowering

THE BEST BEDDING VARIETY

This we consider the best Zinnia for bedding, forming bushy compact plants not over 2 feet high, bearing large perfect flowers.

Bright Scarlet, very rich.

Canary, clear yellow.

Price, any of the above, 10 cents per pkt.; 5 sorts 35 cents; $\frac{1}{4}$ oz. 25 cents.

Salmon Rose, a pleasing shade.

Snowball, pure white.

Mixed, all colors.

OREGON-GROWN ROSE BUSHES—"The World's Best"

Each 35c; 3 for \$1.00; 12 for \$3.25, Postpaid. Two-Year-Old Field Grown

These are Two-Year No. 1½ Field Grown—The Very Best Size to Plant

American Beauty (H. P.)—One of the largest, sweetest and best; rich, rosy crimson, shaded and veined in a most charming manner.

Angèle Pernet (Pernct)—A really enchanting color. The lovely cupped blooms of brownish orange-red, are edged with chrome-yellow, with golden yellow outside petals. In the autumn the flowers last longer, and have better coloring; very brilliant and attractive, especially in the morning. Makes a bushy, upright growth and blooms freely.

Aspirant Marcel Rouyer—Long shapely bud that

develops in a good sized, substantial double flower with heavy shell-like petals. Color, deep apricot, tinted red at center, reverse of petals shaded salmon-flesh with deep yellow veinings at the base.

Augustus Hartman (H. T.)—Brilliant red flushed with orange. Very large well formed flowers with high pointed center.

Austrian Copper (Rosa foetida bicolor)—Species. Rather more slender in growth than most of this group, reaching 4 to 5 feet. The wiry stems are covered in early summer with garlands of single flowers, vivid copper-red on the inner surface of the petals and bright yellow on the outside. Spectacular and of great interest.

Betty (H. T.)—Beautiful coppery-rose color, over-spread with golden-yellow; fragrant.

Cuba (H. T.)—As a bedding rose for brilliant mass effect we know of nothing that will equal this French introduction and although the flowers are semi-double, they possess a charm and brilliancy in color which is an entirely new tone in roses, a glorious bright vermillion-scarlet overlying an orange ground. This color combination is so intense that in full sunlight it glistens with an iridescent sparkle. A vigorous grower with dark green foliage which makes a splendid foil for the masses of richly colored blooms that it produces from spring to late fall.

Chateau de Clos Vougeot (H. T.)—A very rich, fiery scarlet shading to deep velvety crimson. It is delightfully fragrant, a prolific and continuous bloomer.

Cheerful (H. T.)—Large, full flowers of perfect shape and form, with enormous individual petals and grand general character. Color, rich orange flame over-spreading the petals to a distinct orange yellow base.

Columbia (H. T.)—This beautiful rose is of strong, vigorous habit of growth and exceptionally free-blooming. The flowers, which are of good size, are perfect in form, both in bud as well as when fully expanded. In color it is a most pleasing shade of rose-pink and delightfully fragrant.

Conrad F. Meyer—A most valuable addition to the list of hardy free-blooming roses. The color is a beautiful pure silvery pink. It is of ironclad hardiness.

Constance (H. T.)—Rich orange yellow, distinctly streaked and splashed with crimson, long pointed buds; free bloomer.

Countess Clanwilliam (H. T.)—A distinct and charming rose, producing flowers in great abundance. Color delicate peach pink, petals flamed and edged with deep cherry red. Long pointed buds opening to large full flowers. Of strong, vigorous habit.

Crimson Emblem (H. T.)—A superb new Irish rose of a rich and glorious crimson color heavily shaded maroon. Buds and flowers of superb form, of fine size and produced on fine long stems, admirably adapted for cutting. Wonderful mildew-proof foliage.

Dainty Bess—The finest single rose introduced in years. The five-petaled flowers are born in clusters of three and are delicate pink in color, with a brownish-red overcast, and a contrasting center of wine-red stamens, the bush is strong, tall and vigorous.

Dame Edith Helen—A magnificent, fragrant, full-bodied new rose of many substantial petals which curl back prettily, holding steadily to one vivid pink color, and that the rare Rose du Barri shade.

Donald MacDonald (H. T.)—Orange-carmine, semi-double flowers of medium size; perfumed. Blooms in sprays; compact growth.

Doris Dickson—Exquisitely formed medium-sized flowers, the base color of which is orange cream, but so heavily veined and pencilled with deep brilliant cherry that it is impossible to adequately describe the unique coloring. Growth vigorous, very free flowering, and extremely fragrant. A variety that is sure to become a favorite.

Dorothy Page Roberts (H. T.)—Coppery pink, suffused with apricot yellow, very free and perpetual, a delightful garden rose.

Duchess of Wellington (H. T.)—Intense saffron yellow stained with rich crimson which as the flower develops, becomes deep coppery saffron yellow. Delightfully fragrant.

Earl Haig—A type rare among red roses, and so of obvious interest to the selective buyer. Outside of its fragrance, freedom and unfading cherry-crimson color, the thick rolling petalage, and permanent high-built center, fix its superiority over less compact varieties.

E. G. Hill—Here is the finest new red rose in several years, with immense flowers of very lasting, dazzling scarlet, never fading or turning blue, but actually becoming deeper red as it opens. The flowers are borne on long stems, and are deliciously fragrant. The foliage is abundant.

Eldorado (Land of Gold) (H. T.)—Of free flowering habit and fragrance, in color it is of the golden yellow that is peculiar to the climbing rose Marechal Niel.

Etoile de France—This famous French Rose probably needs no extended description, for it is already quite well and favorably known. Flowers globular, very full and lasting, borne on stiff stems, well above the foliage. Color deep velvety crimson of much richness and brilliancy. Remarkable for its strong growth and free blooming qualities.

Etoile De Feu (H. T.)—Very attractive large substantial globular buds expanding to large, cupped, full to centre flowers, of a rich flaming orange-pink with flame colored shadings, borne profusely throughout the season. The plant is of vigorous free habit.

OREGON-GROWN ROSE BUSHES—"The World's Best"

Each 35c; 3 for \$1.00; 12 for \$3.25, postpaid

Evening Star (H. T.)—Medium size bud, large, full, double, globular, slightly fragrant, golden yellow, shaded apricot, free bloomer, vigorous grower.

Feu Joseph Looymans—Long pointed buds of orange buff, and large fairly double, free, fragrant flowers; yellow with apricot center. A splendid vigorous bedder.

Florence Pemberton (H. T.)—Large, full flowers, beautifully formed; creamy-white, suffused pink, particularly in center.

Frau Karl Druschki—

This giant white rose is without doubt the most popular variety of the day. For years we had been waiting for a hardy, strong-growing pure white garden rose when this superb variety appeared. Buds of immense size, egg-shaped, with heavy waxy petals opening into a mammoth snowy white bloom of great refinement. Rank growing, every shoot bearing a flower.

Hardy as an oak tree. Can be planted anywhere.

Fontanelle (H. T.)—One of the very largest hybrid teas, with remarkable size to the rounded petals. The color is a rich, clear yellow naturally deeper towards the center, particularly strong toned during cool weather. A stronger grower than most yellow varieties.

General MacArthur (H. T.)—Dazzling crimson scarlet; delicious perfume and magnificent foliage. Blooms in great profusion.

General Jacqueminot (H. P.)—Rich, velvety crimson, changing to scarlet crimson. A magnificent rose, equally beautiful in the bud state or open.

Golden Emblem—A grand new Irish rose of ideal habit of growth, with holly-like, glossy green foliage, each stem bearing a glorious golden yellow flower of the finest form. The peer of all yellow roses.

Golden Ophelia—Rich golden-yellow flowers in greatest freedom on stout, wiry stems, clothed with glossy, dark green foliage. Especially well adapted for cutting and personal adornment.

Grange Colombe (H. T.)—Large creamy white, with salmon and fawn centers. Plant very sturdy.

Grus an Teplitz or Virginia R. Coxe (H. T.)—Color fiery crimson, with a dark velvety sheen; very fragrant; free blooming.

Hadley—A grand dark-colored rose of American origin which has proven to be a wonderful variety for hot-house forcing and which

is equally desirable for out-door cultivation. The outstanding feature of this rose is the wonderful substance and texture of the petals. At times they appear as if stamped out of crimson velvet cloth. Strong rank grower with stout upright

canes clothed with bronzy-green foliage. Buds of elegant shape and flowers perfectly formed. Color deep velvety crimson sometimes shaded black, retaining its brilliancy at all seasons of the year.

Harrison Yellow (A. B.)—One of the best yellow roses for cold climate. Its cloud of blossoms is a miracle of soft yellow in the spring.

Hoosier Beauty (H. T.)—A grand hybrid-tea rose of American origin having been produced by a well known hybridist in the State of Indiana.

Flowers dark crimson shaded with maroon and veined with black.

Petals of remarkable substance—like so much crimson velvet. Buds beautifully formed with fine pointed shape opening into large double flower.

Hugh Dickson (H. P.)—This superb Irish rose stands in the front rank as a producer of the very finest brilliant crimson-scarlet roses. Of strong, vigorous growth and free flowering habits; one of our most favorite varieties.

Humboldt (H. T.)—Bud medium size, long pointed, flower medium double, very lasting, bright rose-pink on long stems. Vigorous, upright grower, few thorns, very hardy.

Hugo Roller (T.)—Flowers medium, well-shaped full double, moderately fragrant. Lemon-yellow, edged with crimson. Sold Out.

H. V. Machin—A gorgeous flower of large size described by the introducers as the most magnificent exhibition variety they have introduced; in color an intensely black-grained scarlet-crimson, carried on rigid, sturdy with with ideal foliage. A vigorous, strong growing rose for the garden.

Imperial Potentate (H. T.)—Rich, rosy carmine, fine buds, splendid cut flower, sweetly scented.

Irish Charm—One of a new group of very much worthwhile Irish roses. This one is a gem of exquisite form in the bud and open flower, deep blush pink, with a deeper apricot tint in the unopened bud.

Irish Elegance—Bronze orange in the bud, opening into large single flowers of a lighter shade. Vigorous growing and perpetual blooming.

Irish Hope (H. T.)—Bud large, long pointed, very lasting, extremely fragrant, rich rosy carmine with maroon shading. Vigorous upright grower, very hardy.

Isobel—A daintily colored, large, single, fragrant flower; delicate rose-pink with apricot shading.

Jean C. N. Forestier (Pernet)—Long, reddish carmine buds; flower carmine-lake, slightly tinted with orange and suffused with golden yellow. A very large, full, globular and extremely sweet-scented Rose. The plant is vigorous, and of branching habit.

Joanna Hill (H. T.)—A new yellow rose with an orange heart. Vigorous in growth, and blooms are borne singly on long, strong stems. The buds are large and long pointed. A vigorous habit of growth shows it will be of merit as a bedding rose.

J. B. Clarke (H. T.)—Irish variety of great merit either for garden decoration or cut flowers. The color is bright crimson shaded maroon; petals large, flowers very full and perfectly formed. Flowering from early summer until late autumn.

Juliet (H. B.)—Flowers beautifully formed, with petals of fine shape and substance. The color is a bright orange-red on the inside of petals, while the reverse side is of a rich old gold color.

John Russell (H. T.)—Rich velvety-crimson blooms, borne on upright stems. Flowers are very large and full and of good form. A rose for those who want something out of the ordinary.

Kaisser Aug. Victoria (H. T.)—Elegant, large pointed buds; large, full, double flowers; color delicate creamy-white; fragrant.

OREGON-GROWN ROSE BUSHES—"The World's Best"

Each 35c; 3 for \$1.00; 12 for \$3.25, Postpaid. Two-Year-Old Field Grown

Killarney Brilliant (H. T.)—Color an exquisite shade of deep shell pink lightened with silvery pink. The base of the petals is a soft silvery white relieved with enough yellow to make it more attractive. The buds are exceptionally long and beautifully formed.

Killarney Double White (H. T.)—A distinct rose similar to the famous Killarney in size, shape and fragrance, but snow white.

Kitchener of Kartoum (H. T.)—Dazzling scarlet; single flowers in great masses; a wonderful new decorative rose; should not be pruned but allowed to grow naturally. Something different.

La Champagne (H. T.)—Large buds and medium-sized, semi-double (25 petals), blooms peach-colored with yellow base. Vigorous plant. The buds are especially lovely, and the stiff stems hold the flowers erect, even after heavy rains.

La France (H. T.)—A silvery rose, changing to pink. A general favorite. Sweetest of all roses.

Lady Alice Stanley (H. T.)—A gem that everyone admires; it is absolutely perfect in every way; in color it is a beautiful shade of coral-rose, the inside of the petals shading to flesh-pink, fragrant.

Lady Ashtown (H. T.)—Pale Rose du Barri, shaded to yellow at base of petals. Reverse side of petals silvery pink; large, long pointed buds, opening into a beautifully formed flower; a rare and most beautiful variety.

Lady Hillingdon (T)—Deep apricot yellow, long and pointed bud. Flowers are of good substance and very lasting; foliage luxuriant; a fine forcing or garden rose, excellent for cutting.

Lady Margaret Stewart—

Unquestionably one of the finest of the newer roses, with buds of deep sunflower yellow, heavily veined and splashed with orange-scarlet, sometimes entirely of the latter color, and opening to a firm full flower, the general color effect of which is cadmium orange. The flowers are quite fragrant and the leathery sage green foliage which covers the long rigid stems seems to be entirely disease-proof.

Louise Catherine Breslau (H. T.)—Entirely distinct from all other roses in color; a superb shrimp-pink shaded coppery-orange and chrome yellow, large full flowers.

California to the more severe climate of other regions. Quite distinct in color, which is a glorious rich flame-pink, shaded golden yellow.

Lulu—Of particular value and beauty in bud form, they being abnormally long and substantial, with a swarthy orange red color. The flowers open up semi-double or single, brightened by an overflow of salmon-pink.

Mabel Morse—This clear bright yellow Rose of moderate size is sweetly perfumed. The color is retained better than in the older yellow varieties. Has superb glossy foliage, almost immune to disease. It is not a free bloomer, but each bloom is perfect when it comes.

Mme. Abel Chatenay (H. T.)—A rose of extraordinary merit. A free bloomer, with flowers of good size and substance. Color beautiful rosy carmine, with darker shadings. One of our finest decorative and garden roses and always in great demand.

Mme. Butterfly (H. T.)—A sport from the popular new rose Ophelia, which may be

said to be a glorified form of that fine variety. In this new sort all the colors are intensified making it a rich

harmony of bright pink, apricot and gold.

The unopened buds are especially distinct with their lovely shades of Indian red passing to golden yellow at their base.

Mme. Caroline Testout (H. T.)—A grand rose of the La France type, but with flowers larger and finer. Color, bright satiny pink; very fragrant and free in bloom. One of the handsomest roses and should be planted extensively.

Mme. Edouard Herriot—This vivid rose always catches and holds the eye first, no matter what other roses are present. Its red hot copper shade in the bud and softer coral tint of the open flower are probably the most sensational colorings produced in any rose. Won a \$5,000 prize offered by the "Daily Mail" of London, and has been famous ever since. The stems are sometimes weak and the bush is thorny,

but it is indispensable in every garden.

Mme. Leon Pain—Entirely distinct in color, a silvery-salmon, with deeper orange-yellow shaded center, the reverse of the petals being a salmon-pink; flowers large, full and well formed; very free-flowering and a splendid bedding variety.

Mme. Segond Weber—A grand Rose in every way. It is a vigorous grower, free-flowering, large, perfectly formed, cup-shaped, fragrant flowers of marvelous beauty. In color it is of that soft tone of salmon-pink which appeals to everyone.

Margaret McGredy—A brilliantly colored masterpiece, of glorious orange scarlet or brick red. Rather a short stout bud opening to a large, full, magnificent flower. No lanky leafless stems here, but a beautiful, heavily foliated, well-branched bush, forming a contrast for the dazzling flowers.

Mary Pickford (H. T.)—A rose of the same type as Souv. de Claudius Pernet, but much deeper in color.

OREGON-GROWN ROSE BUSHES—"The World's Best"

Each 35c; 3 for \$1.00; 12 for \$3.25, postpaid

Miss Lolita Armour (H. T.)—A magnificent new rose of a rich chrome yellow, shaded to coppery orange. Flowers large, of finest form, on stout canes.

Monsieur Julien Potin (H. T.)—This rose, the latest production of M. Pernet-Ducher, who introduced Mme. Edouard Herriot and Souv. de Claudius Pernet, will probably be popularly known as "Golden Pernet." Those who have seen it pronounce it the most gorgeous and unfading yellow yet introduced. The buds are long and the fully double blooms are of beautiful form.

Mrs. Aaron Ward (H. T.)—Deep golden-orange, shading out to creamy-yellow at edge of petals. Beautiful deep buds.

Mrs. A. R. Waddell (H. T.)

—A strong, rampant growing Hybrid Tea Rose, with foliage that is ornamental in itself. Large, long pointed buds of a bright rosy scarlet, opening into a finely formed flower of a rich apricot or salmon color.

Mrs. A. R. Barracough (H. T.)—Abundant, varnish-like foliage; vigorous upright growth blooming in great profusion. Large, pointed buds; flowers high centered, very lasting, bright watermelon pink with yellow base.

Mrs. Dunlop Best (H. T.)—Pointed, saffron-yellow buds, with dull apricot shadings, opening to rich, reddish apricot flowers of great sweetness and beauty. Very vigorous, low, spreading growth and is healthy and free flowering.

Norman Lambert
—A distinct color combination that is novel. The outside of the petals is a deep chrome-yellow with a marginal color effect of brilliant orange-scarlet merging to an irregular zone of burnt orange, the inside salmon-orange suffused bronze, shading to yellow at the base. The flowers are of medium size and form, delightfully fragrant and free-flowering. A splendid bedder.

Old Gold—Large reddish orange flowers with copper and apricot shadings. Free blooming. Handsome foliage. Richly beautiful.

Ophelia (H. T.)—Orange salmon buds, opening to flowers of dainty pink. The foliage is clean, dark and leathery—growth vigorous and free, producing long canes. Blooms early and continuously.

Padre (H. T.)—Coppery scarlet, flushed yellow at base, flowers semi-double with 15 to 20 petals, often curiously notched, exceptionally free bloomer. Color commands attention.

Patience (McGredy)

(H. T.)—One of the finest roses of very recent introduction. Its splendid long pointed buds are of a deep scarlet carmine opening to large fragrant double perfect blooms that shade from orange at the base of the petals to rich carmine at the edges, and extremely free flowering.

Paul Neyron (H. P.)—Luminous cerise-red. One of the largest roses under cultivation. It is a strong, healthy grower with clean foliage of a rich green shade. An excellent Hybrid Perpetual Rose.

Pax Labor (H. T.)—A mammoth very double Rose of pale yellow color that thrives best in warm weather. It is a prolific bloomer, with robust and beautiful foliage.

Pink Cochet—Very rank growing for a variety of its class. Strong canes almost thornless springing from the base all season long. Magnificent buds opening into flowers of grand size and build; very lasting and of sweet tea scent. Color deep rosy pink, inner side of petals shaded silvery rose. Fine for massing in beds.

Pink Radiance—Carmine-rose-pink of a magnificent, clear shade. Constantly in bloom from early spring until late fall. A strong grower of graceful upright habit.

Premier (H. P.)—A clear pleasing red; does not fade. Good form and habit, excellent for cutting and inside forcing; fragrant, thornless, free blooming.

President Herbert Hoover

A charming many colored rose. Deep copper red buds of fine form, opening to a lovely blending of orange yellow, flame, vivid rose-pink, and scarlet. Buds of superb shape, flowers large and fragrant. A dazzling color effect to delight the eye.

Queen of Fragrance (H. T.)—Large double elegantly shaped shell pink blooms, tipped with silver. Noted for its powerful perfume.

Rapture (H. T.)—A sport of that favorite variety Mme. Butterfly with deeper tinted flowers and of more vigorous habit of growth. Free flowering and richly perfumed.

Red Letter Day—Brilliant glowing crimson scarlet, opening into medium-sized cactus-shaped flower of curious formation. One of the freest blooming roses extant. Makes a fine decorative subject and equally desirable for bedding.

Rose Marie (H. T.)—Large globular bud, flowers very large, cupped double, moderately fragrant, clear rose pink, dark green foliage, growth vigorous, profuse bloomer.

Shot Silk (H. T.)—One of the most beautiful of Alex. Dickson & Son's introductions. Color orange-red, overshot with golden-yellow and flushed soft rose, bud of beautiful shape, the open flowers cupped with reflexing outer petals, growth vigorous and free.

OREGON-GROWN ROSE BUSHES—"The World's Best"

Each 35c; 3 for \$1.00; 12 for \$3.25, postpaid

Souv. de Claudius Pernet (H. T.)—On the order of Constance or Golden Emblem but with large elongated and beautiful formed buds. Color is clear brilliant yellow. Wonderful foliage.

Souvenir de Georges Pernet—Oriental red, tips of petals touched with cochineal. Entire flower faintly shaded with yellow. Flowers very large and full on strong stout stems. Extremely hardy. One of Pernet Duchere's finest productions.

Sunburst (H. T.)

—A veritable giant among yellow roses, throwing up heavy canes clothed with most ornamental foliage and crowned with glorious buds and flowers. The buds are very long and of most beautiful form, opening into a gorgeous colored flower. The color is a rich cadmium-yellow shaded with orange and copper. One of the very finest yellow roses yet raised.

Sunstar (H. T.)—Deep orange yellow veined and splashed crimson and vermillion; lovely buds.

Talisman—A splendid and very desirable new American Rose. The outside of the petals is bright golden yellow, shaded with pink. The inside is apricot, tinted gold and shaded rose-pink. A strong grower with glossy foliage.

T. F. Crozier—Flowers very large, full and globular with high built center, produced freely all through the season. Color bright canary yellow shaded and flushed with ivory.

Ulrich Brunner—Immense big blooms of a bright cherry-red shade with a lovely rich fragrance. Very free flowering and one of the finest for cutting. Ideal for trailing on a pillar.

William F. Dreer (H.)—Soft shell pink, base of petals rich golden yellow. Sometimes the entire flower is covered with a golden suffusion. This rose has the same parentage as the well known Los Angeles and like that sort is beautiful in all stages of development from the opening buds to the well expanded flowers. We are quite sure that all who try this variety will be pleased with it.

Winnie Davis—Fine apricot pink shading to the flesh tint at base of petals. A grand, hardy garden rose.

Moss Rose—A beautiful species distinguished by the moss-like covering of their buds. Vigorous, stocky growth, lustrous foliage and perfect hardiness; the flowers usually large and bloom exceptionally long.

Moss Rose—Pink, red and white. 35c each.

BABY RAMBLER AND POLYANTHA ROSES

35c each; 3 for \$1.00; 12 for \$3.25, postpaid

A type of roses which grow only a foot or two high, bear large clusters of flowers possessing great lasting qualities, and are always in bloom. They are fine for massing in beds, for bordering large rose beds or planted singly on the lawn. Perfectly hardy.

Cecil Brunner (The Fairy, or Sweetheart Rose)—A Polyantha variety with dainty double little flowers of perfect form produced in many flowered, graceful sprays; color a soft rosy-pink on a rich creamy-white ground.

Crimson Baby Rambler—Has the same bright crimson color as the Climbing Crimson Rambler and blooms in clusters of 20 to 40 flowers at one time on plants of fair size. "Baby Rambler" is one of the best red roses for bedding.

Ellen Poulsen—The brilliant rose-pink flowers are much larger than the Baby Rambler type of Polyantha roses.

Erna Teschendorff—Deep crimson and extremely attractive in contrast or when planted in masses.

Greta Kluis—A lovely shade of deep carmine-pink, passing to glowing carmine-red, on a plant of excellent habit and continuous-blooming quality. A variety we most heartily commend.

Golden Salmon—A most striking recent introduction, distinct and novel in color, a brilliant golden-orange scarlet, always in bloom and greatly admired.

Ideal—Ideal indeed for edging or for making a brilliant bed of rich, lustrous garnet, blooming continuously all summer and until frost. The color is retained remarkably well until the flowers drop.

Miss Edith Cavell—By all means the best of its color, which is a brilliant scarlet held right through until the flowers drop off.

Salmon Spray—An interesting novelty from Australia. Rich salmon-pink flowers, 2 to 3 inches across, are produced continuously in great heads of ten to twenty, lasting a long time without discoloration. It makes a much stronger growth than almost any other Polyantha and reaches a height of 3 feet or more.

Triomphe Orleanais—Flowers large, for the class, of a bright cerise-red which is very lasting. A vigorous grower, bearing its blooms profusely in clusters.

Baby Tausendschoen—Dwarf Polyantha with its bountiful bouquets of creamy white saucer-shaped flowers. Every petal edged with rosy pink.

STANDARD OR TREE ROSES

These differ from the ordinary bush, in that it has an upright stem several feet in height. These have been very scarce this year. We can supply the following varieties. See general list for description. Each \$2.00.

Each 50c; 3 for \$1.25; 12 for \$3.50, Postpaid. Two-Year-Old Field Grown

NOVELTIES and VARIETIES OF RECENT and PRECEDING YEARS

Autumn (H. T.)—For intense richness of color, this rose outdoes any other variety now in cultivation. The full handsome buds are a superb shade of burnt-orange, and the opening flowers are heavily suffused with russet-brown and bronzy red all overlaid on a background of rich yellow in a color combination reminiscent of the most glorious autumnal foliage. The bush is a good grower, and the foliage is heavily textured and healthy. It would be difficult to give a description of the colors in this rose which would exaggerate.

Briarcliffe (H. T.)—A fine rose of the Columbia type, producing large, longer buds than that favorite and has large, high pointed, double, very lasting, moderately fragrant flowers of a brilliant rose-pink at center, shading lighter at outer petals. One of the very good garden roses.

Cecil (H. T.)—A wonderfully decorative, new, single rose with good-sized five-petalled flowers of a glorious buttercup yellow. There is no other variety anything like it. It blooms continuously on a large, densely-branched bush with glossy green, mildew-proof foliage.

Duchess of Atholl (H. T.)—Uncommon and delightful in color, large globular bud of deep bronzy orange; large double flower of cupped form; intensely fragrant; vivid orange, flushed old-rose; vigorous and free flowering.

Edith Nellie Perkins (H. T.)—An outstanding, vigorous, and free flowering rose. Long, pointed buds of good size. Long lasting, double, fragrant flowers. Orient-red, shaded cerise-orange; inside salmon-pink.

Gaiety (H. T.)—A plump little bud of soft coral-pink, with a good deal of red on the outside of the petals in cool weather. Opens to a flower of pale salmon-pink. The growth is very strong, and the buds keep for a long time when cut. Just the dainty flower that you would choose for your buttonhole or for a dainty little basket of buds.

Golden Dawn (H. T.)—The ideal yellow garden rose. The ovoid, lemon yellow bud is heavily splashed with crimson and develops into a well-formed, sweetly-scented, large, double, sunflower yellow flower that reminds of the old favorite Marechal Niel. Vigorous and free flowering.

Hortulanus Budde (H. T.)—A Dutch rose of recent introduction. Dark glowing red, with long tight beautiful buds, opening to a semi-double flower with bright golden stamens in the center. A very strong growing bush and a very free bloomer.

Lady Inchiquin (H. T.)—A vivid garden variety of solid color, orange-vermillion brilliantined by cerise. The flowers are somewhat open, with curled petals; but are large and very free.

Li Bures—"The most pictorial rose in the test garden," said a prominent rosarian. The bud first shows orange-maroon and alternately displays tints of maroon and yellow in the moving panorama, ending with yellowish pink to old rose—a unique assemblage of attractive colors. Highly perfumed, on a vigorous plant with holly foliage.

Marion Cran (H. T.)—A truly remarkable novelty exhibiting a brand-new color expression with each phase of its flower development. At first—deep buttercup yellow, margined and flushed cerise. Next, as it opens—the outside of petals retain their color, but the inside is geranium scarlet flushed yellow and veined in orange. At last—the whole is rosy scarlet overlaid deep cerise, with a flush of buttercup. The flowers are of shapely fullness and good size, free; on bushy upright plants of continuous production.

Mevrouw G. A. Van Rossem—A marvelously beautiful rose with a unique color combination, a most striking blending of vivid orange and apricot on a golden yellow ground with frequently touches of bronze on the reverse of the petals. The sweet-scented flowers are very large, of perfect formation both in the bud as well as in the fully developed flower and are produced very freely. Each 75c.

Mrs. Erskine Pembroke Thom (H. T.)—The best yellow bedding rose we have today. It is of clean healthy vigorous growth with abundant dark bronzy disease-resistant foliage and a continuous free bloomer throughout the season. The good-sized buds are long and develop into full double, very shapely flowers of a rich, deep, lemon-yellow; sweetly scented.

Mrs. John Laing (H. P.)—Immense blooms of soft, clear pink, very fragrant on stiff, stocky stems. Produces a longer succession of blooms than most of its class and the bush is not quite so tall and rampant.

Mrs. Pierre S. du Pont (H. T.)—Medium sized long-pointed bud of a reddish gold opening to a semi-double, cupped, very lasting fragrant flower of a deep golden yellow. The plant is of strong vigorous compact growth. A profuse and continuous bloomer.

Mrs. W. E. Nickerson (H. T.)—An extremely vigorous free-flowering two-toned rose, salmon and orange on opposite sides of the petals. Lovely long buds, immense flowers and a good habit make it a most valuable new variety.

Mme. Alexandre Dreux—An excellent golden yellow of deep tone, with full, shapely flowers on erect branches.

Mme. Jules Bouche—A splendid white, at times slightly tinted with just a touch of tender blush pink. Long pointed, shapely bud and full double, fragrant, well-formed flower. Growth vigorous; a free and continuous bloomer.

Nona—We have admired this rose so much all through the several summers that we have observed it and cut so many of its wonderful long buds that we cannot help but be enthusiastic over it. It has the same appeal possessed by that dainty little rose, Lulu, but the buds are even longer than those of that variety, and the bush is loaded with them at all times from early in the spring until late in the fall. The blooms are semi-double, of rich vermillion and flame-pink. The bush is very large and the stems are very long and upright.

Olympiad (Mme.) (H. T.)—This brilliant new red rose first sent out spring of 1932 is now available in strong plants at popular prices. The color of Olympiad is unique—a lustrous dark Oriental scarlet, its depth of color accentuated by the golden base and intensified by a rich velvety sheen. The bud is long and pointed and the flower magnificent in every stage of development.

Princess Marie Jose—A new European rose of bright orange-vermillion, with shadings of yellow and red; large, full and high-centered, with a fruity perfume. The brightly colored flowers with their long stems will make a brilliant show in any garden.

Rose Hill (H. T.)—The newest Columbia sport, with larger petals of greater substance, and a deeper tone of pure rose pink. These thick outer guard petals do not break raggedly like some, thus preserving the original perfection of form. The stems are practically thornless.

OREGON-GROWN ROSE BUSHES—"The World's Best"

Each 50c; 3 for \$1.25; 12 for \$3.50, postpaid

NOVELTIES and VARIETIES of Recent Introduction

Rudolph Valentino—Delicately scented rose of a lovely shade of shrimp-pink or coral rose with golden suffusion. Unlike any other variety. Free, continuous bloomer.

Schwabenland (H. T.)—There are many pink roses but none just like this new variety either in color or in the splendid formation of its blooms. The flowers are large; over five inches in diameter, with high spiral center, the petals having a peculiar twist or curl. In color it is a luminous rich rose-pink, retaining its brightness until the petals drop, the flowers are carried singly on long stiff stems. A strong, healthy, hardy, vigorous grower and free flowering.

Sensation (H. T.)—Great large buds of scarlet crimson, shaded at times with maroon and with a rich sheen, opening out beautifully to very double flowers and lasting well when cut. The bush is most vigorous and free branching.

Sir David Davis (H. T.)—The flower is unfading, deep glowing crimson with a touch of yellow at the base, large, not formal, and sufficiently perfumed. The blooms come on long stems and are useful for house decoration.

CLIMBING ROSES

50c each, postpaid

Cl. Crimson Rambler, crimson.
Cl. Gloire de Dijon, yellow.
Cl. W. R. Richardson, copper.
Cl. Hiawatha, red.
Cl. Md. Ed. Herriott, copper.
Cl. Md. Cecile Brunner, pink.
Cl. Flower of Fairfield, red.

Vaterland—The most distinct dark colored variety yet introduced, deeper and richer in effect than the Hybrid-Perpetual variety Prince Camille de Rohan, a rich deep velvety scarlet maroon and a splendidly formed high centered flower of remarkable keeping qualities. The plant is of vigorous strong erect habit with healthy foliage and free and perpetual flowering; unquestionably the best of this type that has yet come to our notice.

Ville de Paris—A clear sunflower yellow rose which does not fade even in the hottest sun. The plant is a vigorous erect grower with handsome glossy reddish green foliage; disease proof, almost thornless and the stems are long.

Wilhelm Kordes—This German variety of bizarre and marvelously beautiful coloring is, in our opinion, one of the most interesting roses in our collection because of its extremely variable coloring. The color in general is red or pink on a yellow ground, but it varies from pink to red and yellow so greatly that it piques your curiosity into wondering what the combination will be in the next flower that unfolds. It is always attractive, with real substance and beauty of form.

American Pillar—A single flowering variety of great beauty. The flowers are of large size, 3 to 4 inches across, of a lovely shade of pink with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches and a large plant in full bloom is a sight not easily forgotten.

Black Boy—A sweet scented large fiery scarlet overlaid with maroon.

Climbing American Beauty—Its name is somewhat misleading, but is one of the best climbing roses; a strong healthy vigorous grower, frequently making shoots from 10 to 12 feet long, and good sized flowers for a climbing rose that blooms so freely; color deep rose pink, of good form and substance.

Dorothy Perkins—The old favorite soft shell-pink still popular.

Dr. W. Van Fleet—A rose, which on account of its dainty color and exquisitely shaped buds and flowers, has become a great favorite. The long pointed buds are of a rich flesh-pink on stems 12 to 18 inches long; splendid for cutting. A strong vigorous grower.

Mme. Gregoire Staechelin (The Spanish Beauty)—An outstanding climber, a strong, vigorous, healthy grower with good foliage: one of the earliest to bloom with buds and flowers of great beauty. The buds are shapely, long pointed on 12 to 14-inch long stems; the base color is an iridescent pearly pink tipped with crimson as the petals first unfold into shapely, semi-double fragrant flowers. Really a queen among climbing roses.

Paul's Lemon Pillar—A very beautiful and entirely distinct showy very large double, pale sulphur-yellow, passing to white, perfectly formed fragrant flower, that has proven hardy in this latitude. Fine as a pillar rose.

Paul's Scarlet Climber—The most popular of all climbing roses. Unequalled in brilliancy by any other variety, in color a vivid scarlet, of large size, produced in clusters of from 3 to 20 flowers on long, strong stems.

Silver Moon—Different from all other roses, with beautiful fragrant semi-double flowers four and a half inches and over in diameter; creamy white in color, petals of great substance, beautifully cupped.

Tausendschoen—A popular variety with large flowers with wavy azalea-like petals. In color it is a most delicate shade of soft pink when first opening, changing to carmine on the reverse of petals when fully expanded.

Cl. Claudius Pernet, sulphur yellow.
Cl. General McArthur, red.
Cl. Cascadia, white, fine for banks.
Cl. Kaiserin Augusta Victoria, cream, white.
Cl. Gruss an Teplitz, red.
Cl. Md. Caroline Testout, pink.
Cl. Sunburst, golden yellow.

LAWN GRASS

SUGGESTIONS FOR MAKING AND CARE OF LAWNS

It must not be supposed that by sowing grass seeds at any season of the year in soil of any character, and in any state of cultivation or neglect, a durable, attractive turf is to be formed. From the beginning the lawn is both troublesome and expensive, and even when obtained, it is like liberty, preserved only by "eternal vigilance." The coarser natural grasses and weeds will take possession unless kept down, and wherever, from any cause, a bare spot is formed it will rapidly enlarge unless repaired.

A good foundation must be secured, or the rest of the work will be entirely wasted, and too great care cannot be exercised, since the roots must be able to penetrate quite 18 inches in order to keep the grasses growing through the scorching days of July, August and September, if the ground is not already very rich, give a liberal application of fertilizer, avoiding the use of stable manure, as it invariably contains seeds of weeds and noxious grasses. Bone meal never produces the "burned" appearance so often noticed after the use of ammoniated fertilizers. Harrow or rake the surface to the finest possible condition and roll until all elevations and depressions have been removed.

Rake the seeds in lightly, following with a roller of medium weight, a firmly rolled surface being absolutely necessary if the ground be dry; small areas may readily be packed firm by the back of a spade. Sowings made in the Fall, from the first of September to the middle of October, are most successful, but if deferred until Spring, sowings may be made in February, March and April.

When the grass is well set, about 4 inches high, it should be cut with a sickle or mown with the machine set to avoid cutting too closely, 2 inches at least being left above the root. After then a cutting every ten days and an occasional rolling will make the grass finer, strengthen the turf and keep all rank-growing weeds in check. In the heat of Summer the mower should be arranged so as to leave ample protection to the roots. An occasional saturation is much better than the daily sprinkling commonly thought beneficial. If bare spots appear they must be patched up by breaking the ground about 10 inches deep, smoothing the surface and raking in double the usual allowance of seed. To maintain the vigor and color of the grass a light top dressing of bone meal two or three times a year is advisable. Liberal applications of Grozit Brand sheep manure are very beneficial and will give your lawn that rich, velvety appearance that is so much admired by everyone.

For quick results apply a light dressing of Vigoro, Morcrop or Sulphate of Ammonia.

BUTZER'S FANCY LAWN GRASS SEED

It is the easiest thing in the world to grow a beautiful lawn. There is nothing that gives quicker growth and a thicker sod than Butzer's Fancy Lawn Grass Mixture. It produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, elastic turf, and is often ready for mowing four weeks from sowing. This Lawn Grass is composed of a combination of various native and foreign, fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained from Spring to Winter, year after year, and without burning brown in Summer.

Whether you want to seed a small grass plot in your yard or a lawn of more pretentious size, you should use Butzer's Fancy Lawn Grass Seed. Sow 1 lb. to 400 square feet. Price per lb. 60c, postpaid

BUTZER'S SHADY LAWN GRASS SEED

For sowing on the north side of buildings, between houses, and for securing a lawn under large shade trees

In many lawns there are places which seem as if nothing can be grown; some are shaded by large trees and others by buildings. For these locations we have offered for some time our Butzer's Shady Lawn Grass Seed, which readily meets the desired requirement. Price per lb. 60c, postpaid

CREEPING BENT GRASS

(*Agrostis Stolonifera*.) Distinctive on account of its compact, creeping, rooting stems. Of rapid growth and spreading habit, forming a strong, durable turf. Good for lawns and putting greens because of its fine texture. If sown alone, use 50 lbs. to the acre. Write for price.

SEASIDE BENT

The long creeping stems and spreading habit of this splendid grass make it ideal for Putting Greens; it makes a lasting turf that withstands hard usage.

The leaves are fine and it develops a dense growth, making it valuable. Write for price.

CHEWING FESCUE

A low-growing grass, fine leaved, forms a close turf that prevents ingress of weeds, permanent in all kinds of soils, even the lightest and driest; unexcelled for lawns and golf courses when properly grown. Write for price.

Canadian Blue Grass—(*Poa compressa*)—Recommended in all pasture mixtures on dry soil; thrives well on clay or hard trodden and poor soil. Sow 28 pounds per acre. Write for price.

Kentucky Blue Grass—(*Poa pratensis*)—As is well known, this is the grass for which the State of Kentucky is famous. Although it is preeminently a pasture grass, it is frequently used in making lawns. When Kentucky Blue Grass is used for lawn purposes, the seed is generally sown at the rate of 30 to 40 lbs. to the acre. If White Dutch Clover is desired, this seed should be added at the rate of about $\frac{1}{2}$ pound to every 15 pounds of grass seed. Write for price.

Red, or Creeping Fescue (*Festuca rubra*)—Red Fescue is adapted to about the same general climatic conditions as Blue Grass and can be grown as far northward as any agriculture is possible. Its leaves are bright green and the plant does not grow in tufts but creeps by underground stems.

Rough Stalked Meadow Grass (*Poa Trivialis*)—A grass which deserves much greater popularity and should be better known as it is an ideal shade grass in the Northern half of the United States if it can have enough moisture. This grass is a perennial closely related to Kentucky Blue Grass but somewhat finer and softer. It has a splendid apple-green color and is a creeper. Sow in Fall or Spring, at rate of 1 lb. to every 300 square feet. Write for price.

Red Top (*Agrostis Vulgaris*)—A good perennial grass for permanent lawns and pastures.

Wood Meadow Grass—(*Poa nemoralis*)—In the Northern and Middle States this is the best of all lawn grasses for deep shade. Very hardy and a perennial. Its creeping roots establish a lasting, even and deep green turf.

GRASS AND FIELD SEEDS

We do not sell WHEAT or BARLEY for SEED

THERE IS A DIFFERENCE IN GRASS SEEDS
Even if farmers have a surplus of cheaper, local grown seed. There is as much difference between poorly cleaned, country run seed and thoroughly re-cleaned graded seed as between other raw and finished products.

The difference in quality is far greater than the difference in price of thoroughly cleaned, bright color, plump, high in purity and germination, and uniform in quality.

VICTORY OATS

Excels Others in Yield on Light Soil

Tests show Victory Oats to be way ahead of all others in yield on light soils, the quality is good, and as productiveness is the most important point with most growers, we highly recommend this variety. Victory is a head oat; the straw is of medium height and is particularly firm and elastic, making it resistant to lodging. Write for Price.

Swedish Red—A comparatively new tree oat from Sweden having a soft hull and fine soft straw which is ideal for hay. This is the oat grown so extensively in Northern California and along the Southern Oregon Coast. Sow in fall or winter. Red oats always bring a good price in the market. Write for Prices.

STIMUGERM LEGUME INOCULATION

Cut Down Your Fertilizer Bills
Get Your Nitrogen from the Air

Nitrogen is the most expensive ingredient in the fertilizers you buy, although it is plentiful in the air. When legume crops are inoculated with STIMUGERM this nitrogen is stored in nodules on the roots.

Increases the yield and improves the quality of the crop on which it is used.

It adds to the nitrogen supply in your soil—nitrogen is the most expensive ingredient in the fertilizers you buy.

Its use gives quicker growth and earlier maturity.
It increases the permanent value of your farm.

ORDER BY NUMBER

No. 1. For Red, Mammoth, Alsike, Crimson and White Clovers.

No. 2. For Alfalfa, Sweet and Bur Clovers.

Price Nos. 1 and 2— $\frac{1}{2}$ bu. size 35c; 1 bu. size 65c;
 $\frac{1}{2}$ bu. size \$1.40.

No. 3. For Vetch, Canada Field Peas, Garden Peas and Sweet Peas.

No. 8. For Garden Beans and Navy Beans.

Price Nos. 3, 7, 8 and 9— $\frac{1}{2}$ bu. size 35c; 1 bu. size 65c; 5 bu. size \$1.40.

RAPE

Dwarf Essex for Sowing—This is by far the best variety of Rape for forage. It is very valuable not only for green feeding purposes, but is of importance to the fruit grower as a cover-crop, and it affords excellent pasturage for hogs and sheep late in the season. The plant of Dwarf Essex resembles at first the Ruta Baga, but the tops become very large and leafy. Lb. 25c, postpaid. For larger quantities, write for price.

Will sow Timothy, Clover, Wheat, Oats, Rye, Buckwheat, Hungarian, Red Top, Millet and all other grains and seeds perfectly even, and any desired amount to the acre, and from 40 to 60 acres a day. Price \$2.25.

THE HORN SEED SOWER

Will sow 40 to 60 acres per day of alfalfa, clover, timothy, millet, etc. Spread seed evenly from 30 to 40 feet. Price, postpaid, \$1.00.

FRUIT TREE DEPARTMENT

OUR SHIPPING SEASON for the above is from November 1 to April 1. Some seasons May 1, although it is too late for best results. We advise late fall or early spring planting while stock is dormant.

SUMMER VARIETIES

EARLY HARVEST

Medium size; bright straw color; tender and fine; good for table and cooking. July.

GRAVENSTEIN

Large, beautifully dashed with deep red and orange; tender and crisp, with a highly aromatic flavor; tree very vigorous. August.

RED ASTRACHAN

Large, deep crimson, flesh white, moderately juicy, with an agreeable rich acid flavor; very productive. August.

YELLOW TRANSPARENT

Medium size, roundish, slightly conical; skin pale yellow; flesh tender, juicy, sub-acid; good; bears at an early age. July.

AUTUMN VARIETIES

DUCHESS OF OLDENBURG

Large, yellow streaked with red; tree vigorous and very productive; juicy, with rich sub-acid flavor. September.

WINTER VARIETIES

ARKANSAS BLACK

Medium, round; yellow where not covered with a beautiful dark maroon, approaching black; flesh firm, fine grained, juicy; a long keeper. December to April.

BALDWIN

Large, rounded; deep, bright red; very productive; crisp, fine flavor; one of the best and most popular winter apples. November to February.

BEN DAVIS

Medium to large; yellowish, overspread with red; flesh white, tender, juicy; pleasant sub-acid; thrifty, upright grower. October to May.

GRIMES GOLDEN

Very popular. Rich golden yellow; flesh tender, juicy and rich. Tree hardy and vigorous, bearing young. November to December.

JONATHAN

Tree vigorous, long lived and an early bearer. Fruit beautiful red and oblong; fine quality. Valuable as a pollinator with Spitzenberg and Newtown. October to January.

KING

Large and handsome, striped red and yellow; tree vigorous and productive. November to December. Good mountainous apple.

CRAB APPLES

Nice stocky trees, each 50c

For preserving, jellies and ornament. All are unequalled for cider or vinegar. The trees are noted for their hardiness and vigor and usually bear the second season after planting.

HYSLOP

Large, deep crimson; tree hardy, fine for the West. November, January.

RED SIBERIAN

Yellow with scarlet cheek. Bears young and abundantly. September.

TRANSCENDENT

Very large, pleasant flavor and good for cider; yellow striped red. Very productive. Adapted to Montana. September.

WHITNEY

Tree thrifty, upright grower. Fruits large, striped; flesh firm and juicy. Very good. August.

APPLES

WINTER VARIETIES

DELICIOUS

Fruit large, nearly covered with brilliant dark red, flesh fine grained, crisp and melting, juicy with a delightful aroma; of very highest quality. A splendid keeper and shipper. A regular annual bearer. November.

LADY APPLE

A dainty, small flat apple; red cheek. Good Christmas fruit. Tree upright and vigorous.

MAMMOTH BLACK TWIG

Very large; bright red, pleasant sub-acid; fine late keeper; fine, vigorous tree. November to January.

MCINTOSH RED

A seedling of the Fameuse; bright red, flesh white, very tender and delicious. Long lived and very productive. Adapted to Montana. November.

NORTHERN SPY

Large, round, greenish yellow, stripes of purplish red; flesh white, juicy, brisk sub-acid. Requires good soil. December.

ORTLEY, OR WHITE BELLEFLOWER

White fleshed, fine grained conical fruit of superior flavor; one of the best. December to April.

ROME BEAUTY

Large, yellow, shaded with bright red; juicy and sub-acid; fine market sort; good bearer. November to February.

SPITZENBERG

Large, oblong; yellowish ground with broken stripes of bright red; flesh yellowish, juicy, delicious rich flavor. November to March.

STAYMAN WINESAP

A seedling of the Winesap. Yellow striped with red. Flesh firm, crisp, juicy and very tender and rich, sub-acid. A drought resister; a profitable market variety. January, May.

WAGENER

Good size; deep red in the sun; flesh firm and fine grained; good keeper; sub-acid; excellent filler; requires thinning. October to December.

WINTER BANANA

Fancy market fruit; pale yellow with pink blush. Has a delightful aroma and suggestive banana flavor. Not a good shipper. November.

YELLOW NEWTOWN PIPPIN

Large; skin smooth, golden yellow; flesh firm, crisp, juicy; one of the standard varieties for export. December to May.

APRICOTS

	Each	Per 10	100
4 to 5 feet	\$0.75	\$6.50	\$50.00
3 to 4 feet50	4.50	40.00

BLENHEIM

Deep orange, sometimes blushed; tender, rich and juicy. Tree vigorous. Good for Pacific Coast. Last of June.

LEWIS

The new Lewis Apricot is the largest, strongest growing, best yielding, best flavored apricot we have ever seen, and is perfectly hardy. Grown extensively, in the "Goodnoe Hills" district. July, August.

MOORPARK

Very large, yellowish green, brownish red on the sunny side; flesh bright orange; fine for canning and drying; freestone. July, August.

ROYAL

Above medium size; sweet, rich, juicy; good dryer and canner. July.

TILTON

Large; rich color, high flavor; very productive; similar to Royal; later. July.

SPECIAL—THREE 50c TREES FOR \$1.10—YOUR SELECTION

clustered blossoms, gives them ornamental value even in the lawn.

The trees are naturally hardy, succeeding best on sandy or gravelly loam, well drained. Avoid low or wet ground.

Sweet varieties grow more rapidly and make larger pyramidal trees. Set trees 18 to 20 feet apart. The Sour varieties are dwarf and bushy, bear earlier, and are more largely planted. Set trees 15 to 18 feet apart.

SWEET CHERRIES

Two-year-old 75c

BING

Originated in Oregon from seed of Black Republican; fruit large, dark brown or black; very fine; late; good shipping variety. July.

BLACK REPUBLICAN (Lewelling)

Seedling, raised by Seth Lewelling, of Oregon; large size, black, sweet, with purplish flesh; late and a good shipper. June.

BLACK TARTARIAN

Largest size. Flesh purple. Crisp, tender and juicy. Late May.

LAMBERT

Fruit of largest size and of fine quality; color deep, rich red; flesh firm and of fine flavor; a fine market variety; ripens two weeks later than Royal Ann. Mid-July.

ROYAL ANN

(Napoleon Bigarreau.)—A magnificent cherry of the largest size; pale yellow, becoming amber in the shade; richly dotted and spotted with deep red, and with a bright red cheek; flesh very firm, juicy and sweet; tree a rapid grower and immense bearer. July 1.

SOUR CHERRIES

EARLY RICHMOND (Kentish)

Medium, dark red, melting, juicy, sprightly, rich acid, best. A dependable cropper. June.

ENGLISH MORELLO

Fair size, blackish red, rich acid, juicy, good. Aug.

LARGE MONTMORENCY

Large, red, productive, ten days later than Early Richmond. Late June.

LATE DUKE

Large, light red. July.

MAY DUKE

Large, red, juicy, rich; its acidity pleasantly tempered to the advantage of sensitive teeth. June.

MAJOR FRANCIS (Ox Heart)

Similar to the May Duke, though a little more spicy in flavor. Ripens earlier than May Duke.

SPECIAL—THREE 50c TREES FOR \$1.10—YOUR SELECTION

CHERRIES

A Fruit That Makes Profits for Growers

A good cherry orchard is one of the most profitable ventures a farmer can undertake. With but little care, the trees are very thrifty and prolific, bearing large crops annually.

The compact shapeliness of Cherry trees, their glossy foliage, and spring glory of

clustered blossoms, gives them ornamental value even in the lawn.

The trees are naturally hardy, succeeding best on sandy or gravelly loam, well drained. Avoid low or wet ground.

Sweet varieties grow more rapidly and make larger pyramidal trees. Set trees 18 to 20 feet apart. The Sour varieties are dwarf and bushy, bear earlier, and are more largely planted. Set trees 15 to 18 feet apart.

	Each Per 10	Per 100

PRUNES

	Each	Per 10	100
3 to 4 feet	\$0.40	\$3.00	\$20.00
4 to 6 feet	.50	4.00	30.00

Italian (Fallenberg)—Medium, oval tapering at both ends; dark purple; flesh greenish yellow; separates freely from the stone; best for drying. Most popular.

Improved Petite—Medium size, egg-shaped; violet purple; sweet, rich and sugary; very productive; good fresh and for drying.

Silver—Very large.

Hungarian—Very large, dark red.

Giant—The largest, dark crimson.

New Standard—(Burbank Production)—The trees are enormous and never failing bearers, and good, healthy growers. Well grown fruits measure four and a half inches around one way by nearly six inches the long way. Skin purple, with a heavy blue bloom; flesh amber or honey yellow, fine grained, juicy, yet firmer than most other drying prunes, very sweet and a perfect freestone.

PLUMS

	Each	Per 10
4 to 5 feet	\$0.50	\$4.50
3 to 4 feet	.40	3.50

ABUNDANCE

Fruit large and beautiful; bright cherry; flesh light yellow; juicy, tender, sweet; productive; freestone. June.

BURBANK

Medium; globular; cherry red, with lilac bloom; flesh yellow; bears very young. Late June.

DAMSON—SHROPSHIRE

Medium size, dark purple; very firm; flesh greenish, juicy and rich. Vigorous. Late September.

GREEN GAGE

Small round; flesh pale green, melting and juicy; Freestone. Mid-July.

PEACH

Very large; skin brownish red, slightly coarse grained, but juicy; freestone; very popular. July.

PRINLEW

A valuable new variety, produced by H. A. Lewis. A heavy and sure cropper. Plums of large size; skin yellow, overspread with bright red when fully ripe; a handsome looking plum and the rich, golden flesh is firm, but juicy; fine grained and most delicious of all, either raw or cooked. It's good as a peach. Stands handling and shipping well. Ripe in August. If you only have room for one plum, plant a Prinlew.

SATSUMA (Blood Plum)

Quite popular, large, dark red from skin to pit, which is small, firm and juicy; tree productive. Early July.

PEACHES

	Each	Per 10
First Grade, 4 to 6 feet	\$0.50	\$4.00
First Grade, 3 to 4 feet	.40	3.00

Write for special price if larger quantities are wanted.

CHAMPION

Large, cream white, slightly blushed. Tree hardy; should be in every orchard. July. Freestone.

EARLY ALEXANDER

One of the largest and best of the extra early varieties. Almost freestone. July.

EARLY CHARLOTTE

Hardy, medium early, excellent flavor; originated in Oregon. Freestone.

EARLY CRAWFORD

Very large, yellow, with red cheek; flesh sweet and excellent; our most popular peach for table and canning; freestone. August.

EARLY ELBERTA

Ripens about a week earlier than Elberta; otherwise the same or a trifle better.

ELBERTA

Very large, bright yellow, red cheek; flesh yellow; juicy, sweet; regular bearer; fruit very showy and perfect; freestone. Late July.

J. H. HALE

A valuable table, shipping and drying peach. Smooth skin, almost fuzzless. Very firm. Ships almost like an apple. Yellow freestone; flesh tender, excellent quality. Larger than the Elberta and ripening about the same period.

LATE CRAWFORD

Very large, roundish; yellow, with dark red cheeks; flesh deep yellow, juicy and melting; flavor rich and excellent; very popular; valuable for canning and drying; freestone.

HALE'S EARLY

Early, free; extra quality; hardy; prolific.

HEATH'S CLING

One of the best of the clingings. Very large; creamy white, with slight red; flesh white. September.

MAYFLOWER

Beautiful red all over; extremely early; tree hardy and healthy. Should be in every home and commercial orchard. Last of June. Freestone.

MUIR

Large, pale yellow; very firm and sweet; best for drying; freestone. August.

SALWAY

Creamy yellow, red cheek; flesh deep yellow, red at the pit; rich and sweet; a standard late peach, growing more and more in favor with orchardists; freestone. Late September.

TUSCAN CLING

Very large; yellow, blushed red. Vigorous and strong grower. July and August.

SPECIAL—THREE 50c TREES

PEARS

Delicious for Eating and Canning

The Pear tree will grow on almost any good soil, but thrives best in a rather heavy clay or loam.

	Each	Per 10
4 to 5 feet	\$0.50	\$6.00
3 to 4 feet	.40	3.00
2-year-old	.75	6.50

SUMMER AND AUTMUN VARIETIES

BARTLETT

Large; skin thin, clear, lemon yellow, with soft blush on the sunny side; flesh white, buttery, very juicy and highly flavored; the best summer pear in existence. August, September.

BEURRE BOSC

Large, beautiful, russety; highly flavored; fine for shipping. September.

BEURRE CLAIRGEAU

Large, yellow, shaded with orange and crimson; covered with russet dots; flesh yellowish, buttery, juicy. September.

BEURRE D'ANJOU

Large, handsome, fine flavor; tree vigorous; heavy bearer; keeps till Christmas. September.

COMICE

A splendid commercial variety, being of fine size; good appearance; ships well. October.

FALL BUTTER

A favorite fall pear; yellow, sweet and juicy. September.

SECKEL

Rich and highly flavored; its highly concentrated, spicy, honey flavor is unequalled; skin brownish green, russet brown cheek; flesh whitish, buttery and melting. September. October.

WINTER VARIETIES

P. BARRY

Fine keeper. Very large; juicy, fine grained, yellow. December, March.

WINTER BARTLETT

This fine pear originated in Eugene, Oregon. Fruit large, closely resembling the famous Bartlett in shape and appearance, but ripening considerably later; flavor almost identical with the Bartlett; is undoubtedly one of the few pears of recent introduction of real merit.

WINTER NELIS

Medium; skin yellowish green, dotted with gray russet; flesh yellowish white; fine grained, of a rich saccharine, aromatic flavor.

QUINCES

Fine for Sauce.

The Quince crop is usually reliable, and in good market demand. The fruits are quite fragrant, and the trees and bloom highly ornamental.

First Grade, 4 to 6 feet, each 75c

CHAMPION

Large, yellow; flesh cooks very tender; flavor is most delicious; more productive than the Orange. October.

PINEAPPLE

Flavor is suggestive of the pineapple; the fruit resembles the Orange quince; making superior jelly; can be eaten raw and has a most exquisite and delicious flavor, not equaled by any other quince. September.

FOR \$1.10—YOUR SELECTION

NECTARINES

The Nectarine has a smooth skin like the plum. It is like the peach in other ways and requires the same culture. Its pungent, sprightly flavor is reminiscent of both, but with an added deliciousness all its own.

Selected Trees 75c Each

BOSTON

Large, deep yellow, bright flush; flesh yellow; very rich and luscious. Best for Oregon. August 1.

EARLY VIOLET

Medium; skin pale, shaded violet; flesh white; good. July.

NUT TREES

GRAFTED WALNUTS

We offer a splendid strain of Franquettes, the best variety for this section, grafted on four-year California Black Walnut—sturdy, thrifty trees with big fibrous roots. The best to plant. Comes to bearing much younger than seedling walnut.

These are too large to be sent by parcel post.

Size	Each	Dozen	lots	Hundred	lots
8 to 10 feet	\$1.60		\$1.50		\$1.40
6 to 8 feet		1.40		1.30	1.20
4 to 6 feet		1.20		1.10	1.00

FILBERTS

Plant more of them

Barcelona—Magnificent large nut from Spain, first quality; can be grown as low standard tree or bush. 2 to 3 feet. Each 75c; 10, \$5.00

Du Chilly—The largest Filbert on Pacific Coast. Nuts are broad, 1 inch by $\frac{3}{4}$ of an inch; full fleshed and sweet; best grown as low standard. Special prices on large orders. Du Chilly is a good pollinator for Barcelona. 2 to 3 feet. Each 75c; 10, \$5.00

ALMOND (Nut Bearing)

	Each	Per 10
3 to 5 feet	\$0.75	\$6.00

I. X. L.

A vigorous grower and sure cropper, producing nuts of large size and handsome appearance; shell thin; most popular commercial.

BUTTERNUT

A beautifully formed tree bearing a rough coated nut of most attractive flavor, well known to the middle West. Succeeds fairly well in the Pacific States. Price, each \$1.50

CHESTNUT

	Each	Per 10
3 to 5 feet	\$0.75	\$6.00

American Sweet—Makes a handsome shade tree; full medium size, sweet and well flavored.

Spanish—A valuable species both for ornamental use and fruit. It forms a handsome lawn tree and produces much larger fruit than the average American variety.

GRAPE

The grape is the easiest of all fruits to grow. The plants take little room, they thrive despite neglect and every year they produce their wealth of beautiful, health-giving fruit. With its roots in any old nook you can lead it away in any direction to provide a grateful shade for the pump, or for a restful seat, a border for a walk or climbing on the wall or house—East, West, North or South, on hill or in valley, on poor soil or rich, the grape grows, thrives, bears; it never disappoints. Plant a few vines or a large vineyard—make your own grape juice—jams, marmalades, jelly; and have plenty to eat fresh from your own vines.

One-year-old, each 20c, postpaid
CAMPBELL'S EARLY

Berries large, nearly round, black, with light purple bloom; flesh rather firm but tender; quality rich, sweet, slightly vinous; a strong and vigorous grower. August.

CONCORD

Large, black grape; bunches compact; berries round, sweet and pleasant. August.

DELAWARE

One of the finest of our native grapes; grows freely and is perfectly hardy; ripens early; berries small, light red. August.

NIAGARA

Bunch medium; berry large, roundish, uniform; skin thin but tough; pale yellow; flesh tender and sweet; vine vigorous and productive; one of the best white grapes. September.

WORDEN

Bunch very large and compact; berry large, black; an improved Concord. Late August.

BLACKBERRIES

Lawton—Fruit large, very productive, well and favorably known; Oregon's most popular kind.

Evergreen—An Oregon introduction; beautiful lacinated foliage, which it retains all winter; berries long, black, sweet, rich and delicious; ripens from July to November.

Himalaya Giant—An exceedingly strong, rampant grower of a trailing nature; everbearing; an enormous yielder. The berries are large, juicy, coreless, sweet and firm, with a delicious aromatic flavor.

	Each	Per 10	100
Price		\$0.20	\$1.50

PEAT Makes Poor Soil Good and Good Soil Better. Price per Bale \$2.25

We will have no Strawberry Plants to offer.

DEWBERRY

Lucretia—Fruit ripens between the raspberry and blackberry. Berries large, handsome, sweet and luscious; trailing vines. **STRONG PLANTS**. Each 25¢; per doz. \$2.50; 100, \$12.50; 1000, price on request.

CURRANTS

Each 20¢; 10, \$1.75; 100, \$12.50

Perfection—New; largest and most prolific currant; bright red, rich flavor, mild sub-acid; no currant can approach in yield or quality this wonderful new currant.

Cherry—Very large, deep red, fine for preserving; valuable market variety.

Fay's Prolific—Bright red, very sweet, stems longer than Cherry and fruit hangs on better than most varieties. To be planted with Cherry.

GOOSEBERRIES

Each 20¢; 10, \$1.75; 100, \$12.50

OREGON CHAMPION

Berries very large, pale green color; very sweet and fine for table use and pies; bush strong, not very thorny; very prolific bearer; most popular sort we have.

LOGANBERRY

Transplants (2 year, extra strong)—Prices, each 25¢; doz. \$2.25, postpaid. Not prepaid, each 20¢; doz. \$2.00; 100, \$15.00.

RED RASPBERRIES

Lloyd George—The largest red raspberry grown. This variety was recently introduced into the U. S. from England, by the New York Fruit Testing Association. It is a heavy yielder. The fruit is of the highest quality and is borne in immense clusters.

Prices prepaid—each 30¢, 5 for \$1.25, 10 for \$2.00, 25 for \$4.00, 50 for \$7.00, 100 for \$12.00.

Chief—A new product from Minnesota achieved after 14 years experimenting, with the purpose of replacing the old King by a superior type of Latham breeding. Chief will not rival Latham, but supplements it by ripening 10 days earlier and so holding that wonderful type for picking an extra long season. In fact, Chief fills that deplorable gap for fresh table fruits between Strawberries and the other Raspberries. Bright red, "no crumbling," ships well, tastes delicious, and pays its way with extraordinary crops.

Prices prepaid—Each 30¢, 5 for \$1.25, 10 for \$2.00; 25 for \$4.00, 50 for \$7.00, 100 for \$12.00.

St. Regis (Ranere)—Known as the Everbearing Raspberry because of its long season. Fruit commences to ripen with the earliest and continuing on young canes until October, many quarts often being picked after the first snow falls. Berries bright crimson, large size, rich, sugary with full raspberry flavor; flesh firm and meaty. Each 15¢; per 10, \$1.25, postpaid

Cuthbert ("Queen of the Market")—A remarkably strong, hardy variety; standing the northern winter and southern summers equal to any. Very large, conical berries, so firm they can be shipped hundreds of miles by rail in good condition; flavor is sweet, rich and luscious. The leading market variety for main crop.

Marlboro—Very large and earlier than Cuthbert; beautiful, bright scarlet; good quality; hardy and productive.

Special low prices by the thousand. Write.

1 year	\$.15	\$.75	\$3.00

Black Raspberries

Cumberland—A healthy, vigorous grower, throwing up stout, stocky, well branched canes that produce immense crops. Fruit very profitable; large, firm, quality about same as Gregg, keeps and ships as well as any of the blacks. Mid-season.

Gregg—Of good size, fine quality, very productive and hardy. Takes same position among black caps as Cuthbert among the red sorts.

Plum Farmer—Large, black, hardy and productive. One of the very best. Each Per 10 100
2 years \$0.25 \$2.25 \$20.00
1 year20 1.50 12.50

PEAT Makes Poor Soil Good and Good Soil Better.

Price per Bale \$2.25

YOUNGBERRY

Youngberry—Actual Size

Said to be a cross between the Loganberry and the Dewberry. An exceptionally fine flavored, very productive berry. Bears early and commands the highest market prices. The fruit colors well and is exceptionally sweet and large. Color, jet black. Ten plants of this variety will make a row eighty feet long, which will produce an astonishing amount of the finest berries you ever saw. They will be a delight to you and your friends.

They are very strong growers and should be trellised. A very simple trellis, consisting of two wires (the lower one 2 1/2 feet from the ground and the upper wire about 4 feet) is all that is required. Plant eight feet apart in rows

seven feet across. About 800 plants per acre.

Prices—Each, 15¢; 10, \$1.00; 25, \$2.00; 50, \$3.50; 100, \$6.00.

A NEW RASPBERRY—POTOMAC

This is what Mr. H. C. Compton has to say about the Potomac Raspberry:

"This is the best purple raspberry yet developed and ideally adapted to northwest soil. Tip plants planted in spring 1932 showed no winter damage and bore an enormous crop of berries this year on year-old plants with laterals 3 feet long and the new canes August 1st higher than a man can reach. These plants were pronounced by a representative of the U. S. Dept. of Agriculture as fine as has been in the best adapted soils in the east."

The fresh fruit is slightly tart; they are best in pies, jams, jellies and for canning, requiring sugar to bring out the real flavor. A very firm fruit. Fruit similar in size and shape to black-caps, purple in color. Each 30¢, 5 for \$1.25, 10 for \$2.00; 25 for \$4.00, prepaid.

MULBERRIES

NEW AMERICAN

Equal to Downing in all respects, and a much hardier tree. Vigorous grower, very productive; the best variety for fruit; ripe from middle June to Sept.

6 to 7 ft., each \$1.50

RUSSIAN

Very hardy, vigorous grower; valuable for feeding silk worms, for hedges, fences and waste food supply in poultry yards. Fruit of small size, varies in color from white to black.

6 to 8 ft., each \$1.00

CULTURE OF SMALL FRUITS

Bramble fruits like blackberries, raspberries, dewberries, etc., should have all old wood (older than the previous season's growth) cut out close to the ground each spring and the past season's growth should be trimmed back to 3 or 4 feet in height. All of the old canes should be removed and should be burned.

Mulching of currants and gooseberries will give good results.

We will have no Strawberry Plants to offer.

ORNAMENTAL CLIMBING VINES

That which is ugly may be transformed into beauty with vines

AKEBIA QUINATA

A perfectly hardy, fast growing Japan vine, with magnificent foliage never attacked by insects; producing chocolate purple flowers in large clusters, possessing a most delicious perfume; unsurpassed for covering trellises and verandas.

2 year—60c each; \$5.00 per 10

AMPHELOPSIS

Veitchi (Boston Ivy)—The most popular and desirable climbing plant for covering brick, stone or cement walls, etc. Clings to the smoothest surface. Foliage rich olive green during the summer, bright crimson and scarlet in the fall. Strong plants, 50c to 60c; extra strong, 75c to \$1.00.

Quinquefolia (Virginia Creeper, or American Ivy)—One of the best and quickest growing varieties for covering trellises, arbors, etc. Its large deep green foliage assumes brilliant shades of yellow, crimson and scarlet in the fall. Strong plants, 50c to 60c; extra strong, 75c to \$1.00.

BOSTON IVY

BIGNONIA (Trumpet Vine)

Radicans—For covering unsightly places, stumps, rockwork, or wherever a showy-flowering vine is desired, this will be found very useful. The dark red flowers, with orange throat, are large, attractive, and borne profusely; very hardy. Each \$1.00

CINNAMON VINES are the most desirable, easiest grown climbers in the world. They are from China—the land of wonders. Their abundant blossoms perfume the air for a long distance. No words can describe their delicious fragrance. Perfectly hardy—thriving in all soils, in sun or shade, wet or dry. No insects, blight or disease of any kind ever troubles them, no winter harms. Once planted they will grow a lifetime. Each 25c; five for \$1.00, postpaid

CLEMATIS (Large-Flowering)

No other climbing plant enjoys the widespread popularity as the beautiful large-flowering varieties of Clematis. They do well in a fertile light loamy soil which is well drained. They climb with ease and will grow more than ten feet in height.

Jackmanni—Standard purple.

Gypsy Queen—New purple.

Mme. Edw. Andre—Red.

75c each, postpaid

Ville De Lyon—Red.

Baron Veillard—Pink.

Clematis paniculata—A rapid and vigorous grower; it produces sheets of medium sized, pure white flowers of the most pleasing fragrance; well adapted for covering trellises or fences.

Choice plants, 50c; extra fine, 75c

HONEYSUCKLE

A beautiful climber, rapid grower and very desirable. Flowers very fragrant.

Your choice of the following, 60c to 75c each; extra strong, \$1.00.

Halleana—Very popular; almost evergreen; flowers white, passing to yellow.

IVY EVERGREEN

Common English—Thick, leathery evergreen leaves. Strong grower. Good roots. Each 25c; large, 50c.

JASMINES

Pink—Favorite climber for sheltered positions; pink flowers. Each 75c

Officinale—Pure white fragrant flowers. A splendid climber for a sheltered position. Each 75c

Wistarias

The strongest growing of all hardy vines, easily reaching the roof of a two-story building in a few years if given a chance to climb. (See cut.) Flowers appear with the first leaves late in the spring.

Sinesis—Purple or white; strong vines.

Each \$1.50 to \$2.00

W. Multijuga—Similar to Wistaria Sinesis except in color of flowers which are dark violet blue, borne in very long racemes. Each \$2.00

SPECIAL COLORADO SPRUCE

A beautiful specimen for a lawn.

We need the room and as long as we have them they are yours. Too large to be sent by parcel post, but should be sent by express or freight. Order now before stock is sold.

\$2.50 Each

F. O. B. Portland

SHRUBS, Etc.

ABELIA

A Chinese shrub of rather recent introduction that is highly satisfactory here and rapidly becoming very popular. A graceful, low growing evergreen with dark, glossy, rather delicate leaves and handsome clusters of light pink flowers that turn to rose pink. In bloom from June to late fall; select, 75c to \$1.00.

Grandiflora—Small glossy leaves, tubular shaped flowers blush pink, late summer blooming. Each \$1.00

ALTHEA (Rose of Sharon)

Late summer blooming shrub that continues on up into the fall when color is scarce, bearing flowers that closely resemble the Hollyhocks in color and size. Colors pink, white or red. Each \$1.00.

ARAUCARIA

Imbricata (Monkey Puzzle)—A fine tree of regular pyramidal form; leaves bright green, overlapping each other; 8 to 10 in. Each \$1.00

AUCUBA (JAPANESE LAUREL)

Japonica—Variegated shrub, yellow spotted leaves, red berries after a certain age. \$1.50

Japonica, Green—Leaves glossy green, bears fruit which stays on all winter at age of two years. Each \$1.00

AZALEA

A. Mollis—Low growing shrub that in the early spring is covered with gorgeous flowers before the leaves appear. Each \$2.00.

BARBERRY

Thunbergii—A beautiful Japan variety of dwarf habit. Small foliage, changing to beautiful red in autumn. Bright scarlet berries all winter. Each 60c, 75c and \$1.00.

BUDDLEIA (Butterfly Bush)

Magnifica—Lovely long spikes of lilac-colored flowers. Summer and fall. Attracts butterflies. Small plant, 50c; large, 75c.

BOXWOOD (Buxus)

Pyramidal—Cone-shaped plant of great beauty, 2 to 2½ ft. Each \$4.00; 2½ to 3½ ft. \$5.00.

Globe—Globe-shaped. Each \$2.00 to \$4.00.

For boxwoods for hedges and borders, write for prices on quantity desired.

CAMELLIA

Small tree, waxy leaves, beautiful waxy flowers, resembling a small rose. Assorted colors only.

1½ ft., each \$1.50

COTONEASTER

Very beautiful, practically evergreen, fine cut leaves, showy red berries stay on all winter. Bush, trailing and tall varieties.

C. Horizontalis (Trailing)—Low growing with long horizontal branches. Each \$1.00 to \$1.50

C. Microphylla—Trailing form. Each \$1.50

C. Franchetti—Large size, gracefully drooping, masses of red berries in fall. Each \$1.50

C. Simonsii—Upright growing, bright leaves, pinkish flowers, red berries all winter. Fine for massing. Each 75c to \$2.00

DAPHNE (ODORA)

Japanese shrub with waxy light green foliage, pink and white flowers in early spring of wonderful fragrance. Well rooted out of 5 in. pots. No color guarantee.

Each \$1.00 to \$2.00

HOLLY (ILEX)

English (Aquifolia)—Prickly dark green foliage, grows moderately fast, covered during winter months with bright red berries.

Berry-bearing trees, each \$1.00 up

LAURISTINUS

Dark green leaves, flowers white, tinted with pink, blooming late winter and early spring. Each 75c to \$2

LAUREL (ENGLISH LAUREL)

Lauro-Cerasus—Small tree-shrub; large, handsome, shining foliage all year. Fine for hedges and specimen plants. Each 75c to \$2.00. (For hedge plant size write for prices on quantity desired.)

RONICERA

Nitida (Evergreen Bush Honeysuckle)—Slender branches, bright glossy foliage. Excellent for massing or tub plant. Each \$1.00

OREGON GRAPE

Mahonia Aquifolia—Official flower for the state of Oregon. Each 75c to \$2.00

PORTUGAL LAUREL

Beautiful slow growing laurel, dark green glossy leaves, small, very compact. 18 to 24 in., each \$2.00; 24 to 30 in., each \$3.00.

PRIVIT (Ligustrum Ovalifolium)

Golden Privit—Beautiful variegated shrub to plant among evergreens, giving a wonderful effect.

2 ft., each \$1.00 to \$1.50

California Privit—Our best plant for hedges. Plant in double row 2 ft. apart, 6 in. between plants. Price, see Hedge Plants.

PYRACANTHA

Evergreen Thorn—Tall growing, long narrow green leaves, small, white flowers, followed by orange berries all winter. We have orange-scarlet and orange-yellow berried plants.

Pyracantha angustifolia—China. 6 to 10 ft. Growth spreading; somewhat spiny; leaves long and narrow; berries very abundant, orange yellow, developing their color late and holding it throughout the winter. Ea. \$1

Pyracantha Lalandii “Burning Bush.”—8 ft. An evergreen shrub of spreading habit; foliage a rich dark glossy green; clusters of white flowers in the spring are followed by a wealth of orange-colored berries, which remain on the plant all winter.

Each \$1.00

QUINCE

Japonica (Japan Flowering)—Blossoms vary from the richest scarlet to the most delicate blush color; the fruit is deliciously fragrant, but not edible. 2 to 3 feet. Each \$1.00.

SNOWBALL

Common—Flowers globular, pure white, in May. 3 to 4 feet. Each 75c.

Japanese—Flowers pure white, delicate large globular heads in May. 2 to 3 feet, \$1.00.

SPIRAEAS

Each 75c

Spiraea Thunbergii—Charming spiraea with graceful form and abundant blooms.

Billard's (S. Billardi)—Flowers red in dense spikes, blooms most of summer.

Van Houtte's Bridal Wreaths (S. Van Houetti)—Very graceful; flowers white in round clusters. May.

Crimson—Anthony Waterer (S. Bumalda)—A most desirable variety, having deep red flowers.

WEIGELIA

Candida—Flowers white, bush tall. 75c.

Rosea—Flowers light pink, shrub compact. 75c.

Eva Rathke—Flowers red, one of the best. Slightly dwarf. 75c.

Variegated—Leaves become silver white. 75c.

HEDGE PLANTS

Barberry—Japanese. 18-24 inches. \$20.00 per 100.

Box—Dwarf. 8 to 12 inches. \$16.00 per 100.

Box—Dwarf, 6 to 8 inches. \$14.00 per 100.

Cypress—Lawson. 18 to 24 inches. \$60.00 per 100.

Laurel—English. 18 to 24 inches. \$30.00 per 100.

Laurel—English. 12 inches. \$15.00 per 100.

LIGUSTRUM (Evergreen Privets)

The most widely used hedge plants in the southwest are the Ligustrum or Privets, and included among them are tall and low growing varieties, hardy and rather tender sorts, large and small leaved forms, all of which can be trimmed to the size hedge desired.

Ligustrum ovalifolium. “California Privet.” 3 to 8 ft. Esteemed for hedge plants. A strong growing shrub, with bright green, medium sized leaves; forms a compact hedge if pruned occasionally; easy to grow, extremely hardy and partially deciduous.

2-year—30 to 36 inches.....\$7.00 per 100

2-year—24 to 30 inches.....6.00 per 100

1-year—16 to 24 inches.....5.00 per 100

English (L. Vulgaris). An old time garden type of informal habit. Gray-green bark and foliage with white flowers and shining black berries. Price as above.

YEW (Taxus)

Taxus baccata. “English Yew.”—25 to 50 ft. The well known ancient Yew of England. Slow growing but attains considerable size in time. Very dark green foliage, and can be trimmed to any desired shape.

2 ft., each \$1.00

Yew—Washingtoni—15 ft. A wide spreading Yew, branches drooping at the tips. Dull green foliage. Each \$1.00

BUTZER'S DAHLIAS-Selected Varieties

In describing the types of dahlias listed we are using the new classifications of the American Dahlia Society. The letters following the name denote type or class to which variety belongs. (C), Cactus, (SC), Semi-Cactus, (FD), Formal Decorative, (ID), Informal Decorative.

Achievement (S. C.)—Gold with bronze shading. In depth as well as diameter this flower is one of the largest grown easily reaching a size of from 9 to 12 inches across. **Each \$1.00**

Alice Whittier (S. C.)—One of the finest and largest of the newer prize-winners of a beautiful clear sulphur yellow. **Each 25c**

Aiko (S. C.)—Large, deep, fine glowing carmine to Nopal red. Strong grower and extra fine in every way. **Each \$1.00**

Amarillo Grande (F. D.)—Flowers are of a beautiful light yellow and are produced freely. **Each 25c**

Ambassador (C.)—The color is a beautiful soft yellow at the center, with salmon, amber, and pink shadings, gradually deepening towards the tips. The blending of these colors captivates all. The flowers are of the largest size. **Each 50c**

American Triumph (C.)—The brightest shade of Oriental red, without a trace of any other color, that has no tendency to fade. **Each 50c**

Amun Ra or The Sun God (D.)—The mammoth blooms are of gorgeous shades of copper and orange, shading to gold and amber, and deepening, in the large full center, to a rich dark, reddish bronze. **Each 25c**

Amy Martin Garden (I. D.)—Very large bright tyrian rose with lighter reverse. Wavy petals. Splendid variety. **Each \$1.00**

Andrea Erickson (I. D.)—A pure white exhibition dahlia of huge size and beautiful formation, petals being pointed and slightly twisted at tips, which gives the flower a fluffy appearance. Blooms early and very freely. **Each \$1.00**

Aztec Glory (I. D.)—A splendid exhibition variety of pure golden yellow with flowers of unusual form, making a very deep and shaggy flower. A low grower, yet it has excellent stems and vigorous foliage. **Each 50c**

Bagdad (I. D.)—An immense flower of flaming scarlet red borne on long stems high above the plant. An ideal grower and a prolific bloomer. Highly recommended for those who want rich, bright color, either for exhibition or in the garden. **Each 75c**

Ballet Girl (C.)—An extra large deep flower; a mass of narrow incurved petals of pure orange, white with orange base and other variations of these colors on the same bush. Free flowering. Very attractive. **Each 25c**

Barbara Redfern (I. D.)—A mammoth flower of gold overlaid with blends of copper and old rose. Blooms are held erect on fine stems. **Each 25c**

Barclaws (C.)—An immense ruby red, tipped a decided tan shade, produced on excellent stems. **Each 25c**

Bob Parker (F. D.)—A fine flower on a perfect stem of splendid length. The color is bright rose pink, with gold base, and shafts of gold appear on the surface of the petals. **Each 50c**

Carmencita (I. D.)—A very large yellow, beautifully striped with red, and of unusually, graceful formation. **Each 25c**

Champagne (F. D.)—This giant decorative, aside from being one of the largest dahlias grown, is very aptly described by its introducer as golden champagne with chamois shadings. **Each 25c**

Champeog (F. D.)—A new Oregon dahlia of wonderful beauty, so very unusual in its colorings that it is without a competitor. Color is waxy canary yellow at the center shading to bright peach red towards the outer edges of the petals, forming a perfect sunburst, the two shades being blended together as though painted by an artist. Back of petals pale silvery yellow. **Each 75c**

Chas. G. Reed (F. D.)—Color is a purple red—a lively shade not far from crimson. This variety is unusually large and is held upright on a perfect stem. **Each 75c**

Chemar's Eureka (F. D.)—A very beautiful white dahlia touched with a faint tinge of lavender on edges of petals. The flowers are produced freely on long stiff stems. **Each 50c**

Chemar's Masterpiece (C.)—A huge incurved cactus of orchid pink. Stems are good and blooms are of fine form. **Each 50c**

Cigarette (S. C.)—In color it is creamy white, heavily edged with pomegranate red, but it varies greatly, no two flowers being exactly alike. **Each 25c**

City of Trenton (F. D.)—The front of the petals are a rich glowing tangerine orange while the reverse is a crushed strawberry red. The gracefully curled petals give a two-toned effect. **Each 35c**

Cream of the Garden (I. D.)—Cream blending to orchid. Very pretty. **Each 50c**

Commodore, The, (I. D.)—An immense clear sulphur yellow carried on good stems. Dwarf grower. **Each 75c**

Conquistador (S. C.)—A very large bloom of soft creamy yellow shading to pink at base of petals. Bushes are tall and vigorous and stems are long and strong. A large exhibition dahlia with unusual keeping qualities. **Each 50c**

Cora Butterworth (F. D.)—An immense bloom of a silvery or primrose yellow without a trace of any other color. High centered flower with waxy petals. Blooms carried on long perfect stems high above the foliage which is insect resisting. Fine for exhibition. **Each 50c**

Daddy Butler (S. C.)—An American Beauty Rose shade, with the reverse of the twisted and rolled petals of a lighter tint forming a pretty color variation. **Each 25c**

Donna California (I. D.)—A blending of deep rose suffused with lavender, that will attain 12-inch size. Even petals loosely arranged gives one the impression of a huge pin wheel. Stems stiff. **Each 50c**

Dorothy Stone (I. D.)—A huge decorative of a true deep shade of pink, brighter and richer than Kathleen Norris and the substance is heavier. Very full center, petals thick and evenly placed, a profuse bloomer. **Each 50c**

Eagle Rock Fantasy (I. D.)—Exquisitely beautiful, of enormous size and depth, and marvelous in form and color. The color is a clear mallow pink with the petals tastefully notched at the tips adding grace and charm to the mammoth blooms. **Each 75c**

Eagle Rock Gem (C.)—An immense flower of the Ambassador type. In color it is maize yellow, shaded orient pink, and is considered to be the finest shaped, strong stemmed, Cactus Dahlia yet produced. **Each 50c**

Earl Williams (I. D.)—An exceptionally attractive fancy or variegated variety, the flowers are of largest size, of splendid formation of a brilliant crimson-scarlet color, each petal tipped with white; an early and free bloomer that continues in good shape to the end of the season. **Each 25c**

Edna Ferber (S. C.)—An immense dahlia with an exceptionally fine, stiff stem. Color a glistening coral shading to old gold at base of petals. **Each 35c**

Elite Glory (F. D.)—One of the greatest dahlias ever originated and a most spectacular exhibition variety that creates a sensation wherever exhibited. The color is a radiant bright red and its effect of brilliancy cannot be surpassed. **Each 50c**

Frank Miller (F. D.)—Large picric yellow on long straight stems. Very fine. **Each 50c**

Fort Monmouth (I. D.)—One of the giants of the dahlia world. The predominating color is a rich crimson maroon, with shading of bluish violet at tips of petals. **Each 50c**

Frau O. Bracht (Str. C.)—This was the sensation of the New York show, its distinctive form and clean cut beauty gave it its place of honor. Color is a clear pale primrose. **Each 50c**

Glory of Monmouth (F. D.)—A large beautiful flower of Eosine pink, shading to strawberry pink at center of petals. Base of petals a light orange; a new combination in dahlias. **Each 25c**

Grace Curling (I. D.)—A glorious dahlia of great size, imposing and beautiful in form and color. The latter is pure white at base and to half the petals, then changing to lilac-pink and rose. **Each 50c**

Harry Strutt (C.)—A clear bright red incurved cactus of fine form held on perfect stems. **Each 25c**

Ida Perkins (F. D.)—This wonderful white won the Garden and Home Builder Achievement Medal at Boston and we consider it to be the best white introduced to date. **Each 25c**

Imperial Pink (I. D.)—A magnificent rich, bright, true pink, with shades of primrose at the center of the flower and then a dark, rose pink center. Stems are perfect. **Each \$1.00**

DAHLIAS—Continued

Inkyo (S. C.)—A nearly black hybrid cactus that produces an abundance of very dark red incurved blooms. Easy to have stems three feet long on this dahlia. **Each 25c**

Insulinde (I. D.)—Color a beautiful golden ochre, with salmon-red suffusion which deepens towards the center. **Each 35c**

Irene Anderson (S. C.)—Huge blooms of rosy, purplish cerise, heavily tipped with white. Fine stems. Very showy. **Each 75c**

Ivory (F. D.)—Beautiful large blooms of creamy white with pale yellow at heart of flower. Free bloomer. **Each 75c**

James Kirby (I. D.)—A magnificent, rich, deep crimson, shading to ruby at center. The best red cutter-flower variety we have ever seen. Plants are strong healthy growers, immune to insects, and blooms are held erect on exceptionally long, wiry stems. Flowers have fine keeping qualities, are freely produced, and do not sun burn. **Each \$1.50**

Jane Cowl (I. D.)—A glistening bronzy buff and old gold blending to a deeper shade toward center of flower, reverse of petals a pale flesh color, giving the flower as a whole, a warm glow. A stem of unusual strength holds the giant blooms erect over a plant of ideal growth. **Each 35c**

Jean Trimbee (S. C.)—Flowers are simply immense in size, many over 12 inches, and a beautiful rich petunia violet in color. It has a strong vigorous habit and the large attractive flowers are very freely produced on the best of stems. **Each 75c**

Jersey's Beacon (F. D.)—The blooms are simply immense. In color it is a Chinese-scarlet, with a paler reverse, giving it a two-toned effect. **Each 25c**

Jersey's Beauty (F. D.)—Not only the finest, true pink, decorative variety yet introduced, but we are tempted to say the best all-round dahlia for any purpose yet introduced. **Each 25c**

Jersey's Glory (F. D.)—The flowers are large and of good form, well placed on the stem. The color is best described as a sparkling orange intermingled with yellow. **Each 35c**

Jersey's Ideal (I. D.)—The color of this beautiful variety is best described as lavender pink, although sometimes, it is nearer lavender. **Each 25c**

Jersey's Jewel (F. D.)—A beautiful mallow-pink. Very large, long petaled flowers, on fine stems. **Each 25c**

Jersey's Masterpiece (I. D.)—A bold and upstanding exhibition decorative of strawberry pink suffused gold at base of petals. **Each 50c**

Jim Moore (I. D.)—Color is a clear primrose yellow, shading to gold, with tints and flushes of salmon. Stems are strong and hold the big blooms perfectly erect. **Each 35c**

Josephine G. (S. C.)—The color is very pleasing true rose pink of a bright shade, some petals tipped yellow, and one of the most charming. **Each 50c**

Judge Marean (F. D.)—A large flower of glowing salmon-pink, iridescent-orange, yellow, and pure gold all blended together most beautifully, held erect on fine stems. **Each 25c**

Kathleen Norris (I. D.)—Color a true rose pink, later deepening to mallow pink, but paler in the young central petals. A bloom of gigantic proportions, petals broad and overlapping, with twisted ends, full, tight center, and held erect on straight, stiff stems, above a sturdy plant. **Each 50c**

Katherine Cole (F. D.)—In color it is a beautiful light pink and cream. The tips of the petals are pink shading to cream with a pink center. **Each 50c**

Kemp's Violet Wonder (I. D.)—The predominating color is a rich naphthaline violet, with an underlying tone of royal purple, with bluish lavender reverse. Flowers are of massive proportions, attaining to a diameter of 10 inches and over. **Each 50c**

Kemp's White Wonder (I. D.)—A magnificent pure white of immense size. Stems are strong and plants bloom freely. **Each \$2.00**

King Midas (I. D.)—One of the best pure golden yellow dahlias grown. It has a full, high center to the end of the season. Stems are erect and plant growth sturdy. **Each 50c**

Marion Broomall (S. C.)—A lovely two-toned flower of dark lavender pink on the outer petals with a center of purest white, and a dahlia that speaks to you all the way across the show room or garden. Stems are extra fine and plants are strong robust growers. **Each 50c**

Marmion (I. D.)—This flower is of such enormous size and great depth and looks so massive among the surrounding dahlias as to dwarf them all. It is a pure golden yellow with a bronze suffusion carried well above the foliage on long strong stems. **Each 35c**

Maryland's Glory (F. D.)—A large deep American Beauty red. Splendid exhibition variety of immense size. **Each 75c**

Maryland's Jubilee (F. D.)—A glorious rich rose red. Very fine and highly recommended. **Each 75c**

Mrs. Alfred B. Seal (I. D.)—An unusual coloring, glowing old rose without a trace of any other color. The flowers are huge, and of great depth, and substance. **Each 50c**

Mrs. Eleanor Martin (I. D.)—Very large flowers, different from all others, a beautiful mulberry with golden suffusion. **Each 35c**

Monmouth Champion (F. D.)—A giant flower of brilliant glistening orange flame that has won many a prize for keen competition. A truly great dahlia that has made good everywhere. **Each 50c**

My Maryland (I. D.)—A graceful hybrid-cactus of rich bright pink, with each petal tipped with ivory both at the center and on the outside of the flower. **Each 50c**

Nature's Masterpiece (I. D.)—A blending of old rose, cinnamon, and metallic bronze and suffused with mulberry. A rich combination and an odd flower. **Each 25c**

New Glory (S. C.)—Maroon tipped white. This is a very striking fancy dahlia with the petals always tipped. **Each 50c**

Nopal (S. C.)—A large nopal red hybrid cactus. This is one of those rare reds that delight the grower who is tired of growing flowers that sunfade. Artistic form, perfect center, and canelike stems are among its charms. **Each 25c**

Oriental Beauty (S. C.)—A clear brilliant rose pink, a tone deeper than Delice. Just a suggestion of a lighter tint at the tips accentuates the beautiful incurved form. Blooms 7 to 8 inches. **Each 50c**

Pride of San Francisco (F. D.)—Large blooms of a brilliant golden salmon pink held erect on stout stiff stems. **Each 35c**

Prince of Persia (I. D.)—Immense blooms, frequently 12 inches across, of the deepest, richest, glowing crimson, with an even darker iridescent sheen, giving the flower the appearance of velvet. **Each \$1.00**

Robert E. Lee (I. D.)—A fine rich red that does not fade. Blooms are of good size and are held erect above strong growing plants. **Each 50c**

Robert Treat (F. D.)—The immense bloom is a clear American Beauty rose color, of great substance, and is held erect on fine stems. One of the very best. **Each 35c**

Rookwood (I. D.)—A pure bright cerise rose, without the faintest touch of magenta. The flowers are immense with good depth, and are held aloft on splendid straight stems. **Each 50c**

Runa (F. D.)—A charming new orchid pink. For the abundance of its large blooms and lovely color few dahlias surpass Runa. Its long stems and unusual keeping qualities make it an especially desirable cut flower. **Each 35c**

Sagamore (F. D.)—A rich golden yellow. A noble all purpose variety and particularly valuable to the cut flower trade due to its wonderful keeping qualities. **Each 25c**

Salbach's White (F. D.)—A superb white decorative of perfect form. Flowers are of medium size, full and deep, and of wonderful substance. **Each 25c**

Satan (S. C.)—One of the largest dahlias grown, and a consistent prizewinner at the shows. Color, a bright flaming red with a slight touch of gold at center. Horn-like petals which are perfectly rolled and incurved give unique form to the giant blooms. Highly recommended for exhibition. **Each \$1.50**

DAHLIAS—Continued

Shahrazad (I. D.)—A magnificent, large deep rose pink, on best of stem. Each 75c

Silverado (S. C.)—Immense blooms of white gradually shading toward the center to delicate silvery lavender. Each 25c

Siskiyou (S. C.)—A truly sensational dahlia that grows to immense size without any effort whatsoever. Always attracts attention due to its unique petal formation and beautiful coloring. The stems are stiff as rods, and the flower is a very attractive pink, with a suggestion of mauve. Each 35c

Sonny Boy (I. D.)—A huge exhibition flower of salmon bronze. Blooms are simply immense and can easily be grown to 12 inches across. Plants are prolific bloomers and stems are perfect. Very fine and highly recommended. Each \$2.00

Thomas A. Edison (F. D.)—This gorgeous rich royal purple decorative selected and named by permission of the famous electrical wizard. Each 50c

Tommy Atkins (I. D.)—A dazzling red of great charm and grace, which glistens in the sunlight as though dusted with gold, and never bleaches. Each 25c

Treasure Island (F. D.)—Flowers are simply immense in size being 10 inches across and over and very deep, and one of the brightest Autumn shade dahlias we have seen. Color is a bright apricot with gold and rose shadings. Each 35c

Trentonian (F. D.)—A giant decorative of outstanding merit of a distinct and appealing color. A wonderful shading of old gold, amber, and coppery bronze, with a center of reddish bronze, forming a flower of marvelous brilliancy. Each 25c

Uncle Tom (F. D.)—If you want the nearest to black of any dahlia that grows, you should have this one. Color a dark velvety garnet heavily overcast with black, and as rich as the finest velvet in texture. Each 25c

Valentino (F. D.)—The color is true salmon pink shading to cream at center. Flower has good size and attractive form and is held proudly erect on a long, strong stem. Each 35c

Waldheim Sunshine (I. D.)—A true deep yellow giant yet graceful hybrid decorative dahlia, with a rich golden suffusion around the full high center. Each 35c

Watchung Wonder (I. D.)—A spectacular, rich, royal red with a touch of gold at the tips of petals. Blooms are enormous and have unusual keeping qualities. Each 50c

World, The (F. D.)—A mammoth flower of unusually rich coloring, being a deep, rosy magenta overlaid garnet with silver shadings on edges of petals. A rich and beautiful combination of colors. Each 50c

POMPOM DAHLIAS

Very small compact flowers, like miniature snowballs averaging about 1½ inches in diameter.

ALL POMPOMS 25c EACH

We grow a great many varieties of pompoms but do not have room to list them all so are offering only a few which are a selection of the very best.

Bossy—Beautiful lavender with dark center.

Cora May—Salmon, pink, cream and yellow. Fine.

Gertrude—Rich, bright crimson.

Haak's Glow—Lovely old rose.

Helen Lambert—Clear golden yellow.

Joe Fette—Beautiful snow white.

Little David—Small, perfect blooms, of deepest orange.

Little Edith—Light yellow tipped carmine.

Myra—Yellow tipped raspberry red.

Peggy Ann—Yellow, edged brownish red.

Rosa Wilmouth—Clear, bright, rose pink.

Sunny Daybreak—Apricot, edged red.

OUR BIG VALUE COLLECTION
10 Choice Dahlias, Worth \$5 or more,
sent postpaid for \$1.25

DAHLIA COLLECTION No. 6—Since it is impossible for us to gauge the amount of sales upon any variety in advance, we often have a surplus of dahlias in very good sorts. In this collection we offer a selection of bulbs which are untagged, but are chosen with regard to color, and no two alike, and for those who are not particular to have the names, they will give fine satisfaction. These bulbs are all of large flowering, double varieties, and no other selection than our own can be permitted. Price per box of 10 good strong bulbs, in 10 varieties, \$1.25, postpaid.

GLADIOLUS

A Selected List of Choice Named Varieties

The following is a selected list representing all types and colors. The hybridists have succeeded in producing a thing of great beauty in the modern Gladiolus, combining length of spike with beautiful symmetry and size of the individual blooms.

Aida (Pfitzer)—Very early, large dark blue. Extra fine. Each 10c, doz. \$1.00.

Albatros (Pfitzer)—A very tall spike and large flowers of the purest white. Each 10c, doz. \$1.00.

Apricot Glow (Palmer)—Fine soft apricot, large blooms and many open. Each 5c, doz. 50c.

Belinde (Pfitzer)—Very beautiful large creamy yellow. Very tall and early. Each 6c, doz. 60c.

Betty Nuthall (Salbach)—Very tall coral with orange throat. Magnificent flower. Extra good for cutting. Each 7c, doz. 70c.

Blue Jay (Groff)—Lobelia blue spotted white, very odd and beautiful. Each 5c, doz. 50c.

Break O' Day (Glad Bill)—Delicate shade of pink, tall plant and very early. A good florist variety. Each 5c, doz. 50c.

Byron L. Smith (Kunderd)—One of the very best; most refined lavender pink on white ground; extra fine as a cut flower. Each 5c, doz. 50c.

Catherine Coleman (Coleman)—Geranium pink, extra tall, good cut flower. Each 8c, doz. 80c.

Capt. Boynton (Boynton)—Very tall, extra large light lavender bloom. Each 5c, doz. 50c.

Commander Koehl (Pfitzer)—One of Pfitzer's best. Very large dark scarlet. Many times a prize winner in this color class. Each 10c, doz. \$1.00.

Coryphee (Pfitzer)—The most beautiful light rose pink glad in existence. Many blooms open and a great favorite with all florists. Each 10c, doz. \$1.00.

Dr. F. E. Bennett (Diener)—Deep peach red, one of the most popular glads in cultivation. Each 5c, doz. 50c.

Dr. Moody (Kinyon)—Very beautiful shade of lavender. Early, with many blooms open at one time. Each 7c, doz. 70c.

Estandard (Lemoine)—Cream white, dark red blotch, very attractive. Each 5c, doz. 50c.

Evelyn Kirtland (Austin)—A wonderfully graceful flower of bright coral pink; a general favorite. Each 5c, doz. 50c.

Fern Kyle (Kunderd)—Fine large pale cream, large heavy ruffled blooms. Each 5c, doz. 50c.

Giant Nymph (Coleman)—Unusually large light pink. Extra good cut flower. Each 5c, doz. 50c.

Glendale (Davis)—Tall graceful purple, many times a prize winner. Each 5c, doz. 50c.

Gloriana (Betscher)—Rich salmon pink with creamy throat, many blooms open, extra fine. Each 6c, doz. 60c.

Golden Dream (Groff)—One of the best deep clear yellow, very tall, with five or six blooms open. Each 5c, doz. 50c.

Helen Wills (Salbach)—Ivory white, many open, one spike a bouquet. Each 6c, doz. 60c.

Hinemoa (Doney)—Smoky rose with yellow throat, a prize winning novelty. Each 15c, doz. \$1.50.

Joerg's White (Joerg)—Very large, a really worth while white. Each 10c, doz. \$1.00.

Los Angeles (Houdyshel)—Beautiful shade of shrimp pink. Very early. Each 5c, doz. 50c.

BUTZER'S "ROSE CITY"

Mixture of Large Flowered

GLADIOLUS

All Extra Selected Large Bulbs

No Second Size

We have assembled an assortment of distinct choice named varieties into a carefully distributed mixture. This collection is entirely our own, in which we take a reasonable pride.

By MAIL, 40c per doz.; \$2.50 per 100.

By EXPRESS, \$2.00 per 100; \$15.00 per 1000.

250 at the 1000 rate.

Loyalty (Austin)—A pure deep yellow with darker throat. A good one. Each 8c, doz. 80c.

Marmora (Errey)—A truly remarkable glad. Large flower of lavender overlaid silver grey with petunia blotch. Many open. Each 10c, doz. \$1.00.

Mme. Mounet Sully (Lemoine)—Ivory white with carmine blotch. Very large flower and plant with many blooms open at a time. Each 8c, doz. 80c.

Mary Pickford (Kunderd)—A wonderful flower and spike of delicate creamy white, with sulphur yellow throat blotch. Each 5c, doz. 50c.

Minuet (Coleman)—Very large clear lavender. One of the best of this color. Each 8c, doz. 80c.

Mother Machree (Stevens)—Unusual tall lavender orange overcast with grey. Each 10c, doz. \$1.00.

Mrs. Leon Douglas (Diener)—Begonia rose striped with scarlet. Magnificent spikes of mammoth flowers. Each 5c, doz. 50c.

Mrs. Von Konyneburg (Pfitzer)—Good light blue, extra tall spike. Each 8c, doz. 80c.

Mr. W. H. Phipps (Diener)—Iridescent pink to rose salmon, many flowers open. Often referred to as the wonder glad. Each 5c, doz. 50c.

Nancy Hanks (Salbach)—Peach red to orange pink, good grower, stands heat well. Each 5c, doz. 50c.

Our Selection (Ball)—Deep salmon tinged purple lavender blotched throat with many open. Each 10c, doz. \$1.00.

Picardy (Palmer)—The newest sensation. A Canadian variety of great merit. A soft shade of buff pink. Each 25c, doz. \$2.50.

Pfitzer's Triumph (Pfitzer)—Very large salmon orange. Attracts attention wherever shown. This is a most attractive flower. Each 8c, doz. 80c.

Primrose Princess (Salbach)—Extra large primrose yellow, many open. Each 6c, doz. 60c.

Prince of Wales (Alkemade)—A very attractive salmon pink and extra early. Each 5c, doz. 50c.

Purple Glory (Kunderd)—A gigantic bloom of deep maroon red, well spaced on tall spike. A wonderful exhibition variety. Each 5c, doz. 50c.

Scarlano (Kunderd)—A very brilliant orange red, very heavily ruffled. Each 5c, doz. 50c.

Senorita (Salbach)—A clear wide open orange, lower petals a bright orange yellow penciled with scarlet. A real novelty. Each 8c, doz. 80c.

Sunnymede (Fisher)—Light orange with red throat markings. The best in this color and a real favorite. Each 5c, doz. 50c.

Troubadour (Pfitzer)—Striking deep violet, many open blooms on tall spike. Each 10c, doz. \$1.00.

Veilchenblau (Pfitzer)—The best in the violet blues, tall spike and a great favorite. Each 10c, doz. \$1.00.

White Butterfly (Kunderd)—The best and most dainty pure white Prim. Each 5c, doz. 50c.

BUTZER'S Dollar Assortment of Gladiolus

80 ASSORTED BULBS FOR \$1

These are Medium or Flowering size bulbs of the finest named varieties only. Each assortment put up separately by hand containing from 1 to 5 bulbs each of 20 different varieties, 80 bulbs in all, but none labeled. Not a cheap mixture, but a collection of the best, priced so that you can afford to plant them liberally, and still have something really choice. All will bloom splendidly for anyone, and will make extra large bulbs for next year. We guarantee them to please you. If not, return them next fall and your money will be cheerfully refunded. We send cultural directions with each order.

OUT OF SIGHT MOLE TRAP

THE TRAP THAT HOLDS
CAN'T PULL OUT
CAN'T TWIST OUT
CAN'T GNAW FREE

The Best Mole Trap Made
\$1.25, Postpaid

Cinch Gopher Trap

Fits the hole, a sure killer, and the most satisfactory trap. Weight, 1 pound. Price, each, 75c postpaid

The MOLE PROBLEM

can easily be controlled by the use of the latest trapping device. The

ACME MOLE TRAP

It is superior in all respects. SMALL, weighs less than a pound. SURE, to catch, hold and kill. EASILY SET, women can set it. RUST PROOF, pins of brass and entire trap cadmium plated.

\$2.00, postpaid

The Acme Mole Trap is highly effective for trapping other small burrowers or animals using the burrows of the mole. Ground squirrels, rats and weasels have been successfully trapped with the Acme. A study of the habits of the animals to be caught, and a little ingenuity in the setting of the trap, are essential for best results.

The Star Pocket Gopher Trap is the most efficient gopher trap made, combining all the best features of former devices.

The traps are of all-steel construction with rust-proof finish, and are most simple, and easily set.

By setting these traps in pairs, one facing either way, and as far back as possible in the gopher tunnels, success is assured. Each 35c, 2 for 60c, postpaid

WOOD-LARK SQUIRREL AND GOPHER POISON

Ready for Instant Use—Never Fails

Is guaranteed the most reliable and destructive agent yet devised for the extermination of squirrels, sage rats, prairie dogs, pocket gopher, field mice and crows. Every kernel is warranted to kill. We will cheerfully refund the purchase price in every case in which it fails to satisfy. Should be used early in the Spring, when green food is scarce. Place a few kernels near the burrowing place of the animals. Care should be used in placing it so as not to destroy song birds. Price: 1-lb cans, each 50c. Cannot be mailed.

Naphthalene

For Use in Treating Soil for Insect Pests

Used by truck gardeners, bulb growers and for field crops to drive away grubs, wire worms, slugs, centipedes, aphids, etc. Safest, most powerful insect repellent that can be used in quantities at low price. In granulated form, with strong odor like moth balls. Has been used in Europe for years. Drives off caterpillars, stupefies insects. Use it mixed in the soil according to directions. Send for full information.

Prices: 1-lb. can 25c; 5 lbs. 75c; 10 lbs. \$1.25; 25 lbs. \$2.25; 50 lbs. \$4.00; 100 lbs. \$7.50; F. O. B. Portland.

HAMMOND'S GRAPE DUST

To prevent mildew on roses, grapes and gooseberries. 1-lb. pkg. 35c; 5-lb. pkg. \$1.00, postpaid \$1.15

Butzer's Non-Kinkable

A brand of hose, manufactured especially for greenhouse use. The inner tube is made of the best quality rubber and is very strong; the jacket of canvas or duck is mixed in such a way with the outer cover that it is extremely pliable and will not kink or crack.

Comes in reels of 500 feet, order exact number of feet you require. We can cut in any length.

Price, ½-in., 10c per ft.; ¾-in., 12c per ft. Couplings free in 10-ft. lengths and over.

No. 19 LAWN SPRINKLER

Non-corrosive; won't clog; with clean-out brass plug. Equal distribution of water over a large area. Base 8 inches. Can be pulled about the lawn without tipping.

Price 75c each

Royal MISTYFIER

THE PERFECT LAWN SPRINKLER

KING OF THEM ALL

- cannot clog
- cannot rust
- cannot wear out
- cannot get out of fix

Here comes the kind of rain that delights the home-owner—soft—steady—the kind that soaks without washing. Misty, dripping moisture without violence. The fine, aerated moisture of the Mistyfier cannot damage the most delicate blooms—cannot wash out the finest seeds or roots.

Performs dependably under all pressures. The higher the pressure the greater the sprinkled area, so the range can be controlled at the hydrant.

Every Mistyfier is a lifetime sprinkler. No moving parts to wear—no bearings to stick—no arms to break—no pinholes to clog.

Clean-cut in appearance—compact—cast of special aluminum alloy. Cannot get out of order.

NOTE THESE ROYAL FEATURES

1. Unconditionally guaranteed.
2. Rustproof aluminum alloy.
3. No moving parts.
4. No pinpoint nozzle.
5. Cleans itself of sand and dirt.
6. Aerates the water.
7. Fine penetrating mist.

THE VILLAGE BLACKSMITH

REVOLVING TWIN SPRINKLER SET

2 on 1 LINE OF HOSE

Spreads Water in Drops and Spray Evenly. Covering Approximately 40x20 Feet of Lawn.

Popularly Priced

2 in a Set \$2.00

"FLARING ROSE" SPRINKLER

Its small perforations emit a fan-like sheet of tiny jets that are just like gentle rain.

When turned towards beds of plants or flowers, it does not cover the adjoining house or walk but goes right to the place desired.

Its fan-like shape makes it especially easy to handle. It is unexcelled for sprinkling small, grassy places.

HOSE MENDERS

Leaks and breaks in the garden or greenhouse hose can be easily remedied with the hose menders pictured. Perfection hose mender, 10c each; \$1.00 per doz., postpaid. Please state size of your hose.

Perfection

The dust cloud from a Model B Duster covers every surface of the thing that is to be dusted—top, sides, underside and all—hunts every crack and crevice—nothing escapes being treated—it does the job completely. Price \$1.00.

PLANET Jr. GARDEN TOOLS

Space will permit our describing only a few Planet Jr. Tools, but we will send to all who ask for it a fully illustrated catalogue of Planet Jr. Garden Implements.

No. 25 PLANET JR.

Combined Hill and Drill Seeder and Double Wheel Hoe, Cultivator and Plow. Valuable for gardeners who have enough acreage for a double wheel hoe. Combines in a most practical way the No. 4 Drill and No. 12 Double and Single Wheel Hoe. Holds $2\frac{1}{2}$ quarts of seed. Weight packed, 61 pounds. Price \$21.00.

No. 17 PLANET JR.

Single Wheel Hoe, with 1 pair hoes, 3 cultivator teeth and 1 plow. Price \$7.75.

Plows for
D. W. Hoes

No. 11 PLANET JR.

Double Wheel Hoe, with 2 pairs hoes, 2 pairs cultivator teeth, 2 pairs rakes, 1 pair plows and 1 pair leaf lifters. Price \$13.50.

No. 16 PLANET JR.

Single Wheel Hoe with 1 pair hoes, 3 cultivator teeth, 2 rakes, 1 plow and 1 leaf guard. Price \$8.75.

No. 119 PLANET JR. GARDEN PLOW
AND CULTIVATOR

This new member of the "Planet Jr." family will appeal to all those who prefer a high wheel tool for their garden work. Where the soil has not been so thoroughly and carefully prepared the high wheel undoubtedly makes an easy running tool.

The wheel is 24 in. in diameter with a rim $1\frac{1}{2}$ in. wide, insuring easy running in the lightest soil.

The equipment is so complete that it will meet all the needs of the ordinary garden, where the adjustments and refinements of the higher priced Wheel Hoes are not required. Price \$4.00.

DISC HOES

Adjustable, cuts and turns the soil, throws to or from the rows. Price, pair \$3.50.

No. 4 PLANET JR.

Combined Hill and Drill Seeder, Wheel Hoe, Cultivator and Plow. This tool combines in a single convenient implement, a capital hill-dropping seeder, a continuous row seeder, single wheel hoe cultivator and garden plow. Holds $2\frac{1}{2}$ quarts of seed. Weight 50 pounds. Price complete, \$18.00. As seeder only, \$14.00.

CULTIVATING ATTACHMENTS FOR PLANET JR. TOOLS

Hoes. C and D1 for cast frame wheel hoes. C11 and D11 for steel frames. Made in four widths. Cutting 4 $\frac{1}{2}$ -inch, per pair, \$1.20; 6-inch, per pair, \$1.30; 7-inch, per pair, \$1.60; 9-inch, per pair, \$1.75.

Peat Land Hoes. Like the C & D Hoes, but with extra wide high shields to prevent dirt from falling back and covering the plants. 6-inch cut only, per pair, \$2.60.

Double Mouldboard Plow. It can be set to furrow wide or narrow, or to hill much or little. Width at widest, 14 inches; narrowest, 10 inches. Each, \$2.40. With connecting piece for double wheel hoes and No. 25, 85c extra.

Plows for Double Wheel Hoes. M4 and N4 for cast frames, M5 and N5 for steel frames. Per pair, \$1.40.

D. Mould Board Plow Three-Prong Cultivator Teeth Plow for S. Wheel Hoe

Cultivator Teeth. No. 1395. Fit combined seeders and double and single wheel hoes. Each 40c.

Plows for Single Wheel Hoes. R3 for cast frames, R6 for steel frames. Each \$1.35.

Three-Prong Cultivator Teeth. For fine, deep work. Per pair, \$1.75.

Onion Harvester. 8-inch size for onions and onion sets. These make splendid weeder. Each, \$1.60.

Rakes. Made in 3 sizes. Three-tooth, per pair, \$1.30; five-tooth, per pair, \$1.70; seven-tooth, per pair, \$2.40.

Note—All attachments on this page will fit Planet Jr. Single and Double Wheel Hoes and Combined Seeders and Wheel Hoes, excepting Nos. 19, 31, 33, 60, 65 and 66.

No. 12 PLANET JR.

Double Wheel Hoe, with 1 pair hoes, 2 pairs cultivator teeth, 1 pair plows and 1 pair leaf lifters. Price \$10.50

Space will permit our describing only a few Planet Jr. Tools, but we will send to all who ask for it a fully illustrated catalogue of Planet Jr. Garden Implements.

AUTO-SPRAY No. 26-BG

There are many reasons why a glass tank on a continuous atomizer is advantageous. It can be easily cleaned when a different type of solution is to be sprayed. The operator can always tell how much liquid is in the sprayer. The jar on this sprayer has a standard Mason fruit jar thread. Additional jars are easily obtainable. Capacity one quart. Price \$1.25

AUTO-SPRAY No. 26 A and B

Auto-Spray No. 26-A, 1 quart all tin.....\$.85
Auto-Spray No. 26-B, 1 quart tin pump, brass tank 1.40

No. 22-A

A general purpose sprayer for farm, stable or garden uses. Handles fly-oils, bug poisons and disinfectants. Has large powerful pump. Lock seamed can. Made of heavy tin. Tank 4x4½-in. Length over all, 21 inches. Holds one quart.
No. 22, price each postpaid 60c
Gem, pint size 50c

Brown's Twin Blast is one of the best single action atomizers on the market. It is equipped with twin spray jets which diffuse a large volume of fine misty spray. This sprayer has our new feature—the glass tank which enables the operator to know exactly how much liquid is in the container and because it is more easily cleaned, makes possible the spraying of different solutions. Capacity, 1 quart.

Brown's Twin Blast, tin cylinder, glass container, 80c

No. 4 CUB
GLASS JAR
SPRAYER
25c, postpaid

Smith CUB Sprayer is a little bear. For household use, for spraying insecticides, for moths, flies, mosquitoes, roaches and other vermin. Glass jar unscrews from pump for easily filling and cleaning.

Pump Chamber—Heavy tin. Glass Jar—Unscrews from pump for cleaning and filling. 25c, postpaid

AUTO-SPRAY No. 5

The Auto-Spray No. 5 is a double acting high pressure sprayer than can be used with any pail or bucket. It is generally acknowledged to be the most powerful pump of its type manufactured. Generates a pressure of over 200 pounds with remarkable ease. Price \$4.25.

AUTO-SPRAY No. 9

The Auto-Spray No. 9 is a durable, well-built machine. This sprayer, due to its ease of operation, is one of the most popular large compressed air sprayers on the market. Corrugated tank is constructed of heavy sheet brass or strong copper bearing galvanized steel sheet. Pump cylinder is one-piece seamless brass tube. The features of this sprayer are the corrugated tank, screw lock, drain dry, non-clog spray nozzle. This sprayer can be used for spraying trees, shrubs, gardens, chicken houses, etc. Capacity—four gallons.

Auto-Spray No. 9-C, Copper Tank, priced at\$10.00
Auto-Spray No. 9-A, Galvanized Tank, priced at 6.50

AUTO-SPRAY No. 50

We highly recommend the Auto-Spray No. 50 to our patrons. It is extremely desirable for use in spraying agricultural insecticides, disinfectants and where the spraying is not extensive, and is especially adapted for use by women or persons physically unable to carry a great weight. Tank is constructed of heavy sheet brass or strong copper bearing galvanized sheet steel. Pump cylinder is of one-piece seamless brass tubing. This sprayer has the screw lock and drain-dry features found in the Auto-Spray No. 9. Capacity, 2½ gallons.

Auto-Spray No. 50-C, Copper Tank, priced at\$8.00
Auto-Spray No. 50-A, Galvanized Tank, priced at 5.50

AUTO-SPRAY No. 7

With Lever Bucket Handle Pump

The lever handle and large air chamber make this the most powerful bucket pump and the easiest one to operate. All working parts are solid brass with brass ball valves and patent agitator. Fitted with graduating nozzle to throw a fine or coarse spray or a solid stream. Weight, 8 lbs. Price \$7.00.

ADCO

ARTIFICIAL MANURE

(Patented in the United States and Abroad)

ADCO is a powder which, when mixed with almost any non-woody vegetable waste and kept moist, gradually converts the mass into real manure fully equal to the farmyard product in fertilizing power, but free from foul odor, flies, weed-seeds, etc. The process is perfectly simple and not at all laborious.

GARDENERS can now have plenty of manure at low cost and little trouble.

FARMERS, by utilizing straw, corn stalks, etc., can secure their manure without the expense and labor of maintaining livestock.

PRICE F. O. B. PORTLAND

ADCO, in 150-lb. bags, each \$11.00

(Enough for a heap 10 ft. x 10 ft. x 6 ft.,
making about three tons of manure)

ADCO, in 25-lb. bags, each \$2.35

(Enough for 12 wheelbarrow loads of garden
waste, making one-half ton of manure)PEAT MOSS
NATURE SOIL IMPROVER

It is a fine material for storing dahlias roots, tubers and bulbs and packing them for shipment. It is economical to use. One bale will spread three hundred square feet, one inch deep.

A few of the many purposes for which it is used:

Fertilizer Carrier
Mulching
Cold Frames
Lawns
Improving Soils
Propagating
Cuttings

Landscape Work
Benches (Greenhouse)
Golf Courses
Packing
Storing Bulbs
Potting
Layering
Seed Beds

PEAT MOSS—Saves Moisture

Mixed into heavy clay, Peat Moss keeps the soil porous so that moisture can circulate freely during the hot spells when clay bakes hard. In sandy soils, Peat Moss captures and retains the moisture which would otherwise too quickly run away. As a thin mulch over any planted surface, it keeps down weeds, attracts moisture from above, and protects under-moisture from evaporation.

Imported—A splendid fine grained type for preserving moisture. Spread thinly on the lawn or on the surface of pot plants. Bale \$2.25.

ADCO
Weed-Killer

At last! A Weed-killer FOR LAWNS!

—a powder that eradicates weeds and at the same time stimulates the grass to richer growth. Magic, you say? Nothing of the sort. ADCO WEED-KILLER is a sound scientific product, developed through years of experiment, and it will do more for your lawn in one hour than a month's hard labor at digging out weeds.

ADCO WEED-KILLER FOR LAWNS is sold in 2-lb. cans and 25-lb. bags. One pound is enough for 100 square feet; a 2-lb. sample can postpaid for 60 cents, or still better, a 25-lb. bag for \$3.75, f. o. b. Portland.

ATLACIDE
NON-POISONOUS
WEED KILLER

3½-lb. DUSTER	\$1.50 Each
	(kills 350 square feet of weeds)
Bulk sizes for refilling duster or for making solution	
50-lb. Drum	\$ 7.00

(kills 5,000 square feet of weeds)

100-lb. Drum \$14.00

(kills 10,000 square feet of weeds)

The Atlacide is especially adapted for killing weeds in paths, driveways, tennis courts, brick walks, gutters, in fence corners, along stone walls, etc. It kills all weeds and grasses including Johnson Grass, Wild Morning Glory, Quack Grass, Canada Thistle, Poison Ivy, etc.

and Fungus Diseases Without Making the
Treatment Conspicuous

Dusting with "leaf-green" Pomo-Green is the protective method used by experts! Best for your garden, too. Pomo-Green is the celebrated Massey Dust made more toxic and colored green.

Roses—Black Spot, Mildew or Chewing Insects are bound to appear. Pomo-Green prevents and controls these insects and diseases quickly and effectively.

POMO-GREEN (The Green Massey Dust)—Highly recommended for the control of black-spot, mildew, and other fungous diseases on Roses, Snapdragons, Carnations, Sweet Peas, Phlox and Lilacs. Does not discolor the foliage. Dust once a week during the growing season. Lb. 50c; 5-lb. carton, \$2.

POMO-GREEN with NICOTINE (The Leaf-Green All-in-One Dust)—A combination material which controls all fungous diseases and kills both eating insects and aphis. Requires no supplementary material for complete disease and insect pest control on all flowering plants. Leaf-green in color and never unsightly on plants. Both dusting and spraying directions on cans. Lb. 75c; 5 lbs. \$3.00.

PARIS GREEN

Directions for use: Four to six ounces to fifty gallons of water. Or two teaspoonfuls to one gallon of water. For cut worms and grasshoppers add one tablespoonful of Paris Green to ten pounds of bran and spread about the base of the plants. It is always well to add $\frac{1}{4}$ lb. Paris Green to each barrel of Bordeaux when spraying tomatoes. Write for price. Cannot be sent by mail.

beetles, potato bugs, green flies, slugs, etc. 1-lb. package, 25c; 5-lb. package, 75c, postpaid for 90c.

MAGGOTBATE

You Can Control Root Maggot

Easily applied, inexpensive, not harmful to plant life; but a valuable fertilizer and stimulant in powder form. Absolutely protects cabbage, radishes, turnips, onions, etc.

Price 1-lb. carton, 25c; 25-lb. bag, \$2.25; postage extra.

NIAGARA KOLOFORM

This exclusive Niagara summer sulphur spray is used for summer applications on peaches and late applications on apples. 7½-lb. bag 65c.

"EVER GREEN"

Non-Poisonous Insecticide

Sure Death to Plant Insects—Harmless to Man, Birds and Animals

A sure killer of most plant insects—and yet offers no poison whatever to human beings, livestock or birds—it is positively not a poison. The active principle is Pyrethrum, or insect flowers, which has this valuable property of being deadly to nearly all insects. Especially recommended for killing Cut Worms, Cabbage Worms, Green Flies, White Flies, Thrips, Leaf Hoppers, Currant Worms, Aphis, Rose Chafer, Rose Slugs, Pear Slugs, Mealy Bugs, Mites, Red Spiders, Japanese Beetles, Leaf Tiers, Potato Beetles, Squash

Beetles (Stink Bugs), Aster Beetles, Bean Beetles, Cucumber Beetles, Ants, Plant Lice, Melon Bugs.

PRICES NOT POSTPAID

1 oz. bottle 35c; 6 oz. bottle \$1.00; 16 oz. bottle \$2.00; 32 oz. bottle \$3.50; 1 gal. bottle \$11.50.

ARSENATE OF CALCIUM

(Stomach Poison) Cannot be Mailed

For making bait to control strawberry weevil and other pests. 1 lb. 25c; 4-lb. pkg. 55c.

ARSENATE OF LEAD

Cannot be Mailed

A stomach poison spray for control of leaf eating insects such as caterpillars, beetles, slugs and for the apple and pear worm. May be applied either as a liquid spray or a dust. $\frac{1}{2}$ lb. 20c; 1 lb. 30c; 4-lb. 65c

1 oz., 6 gals spray...\$0.35 2 lb., 150-500 gals...\$3.25
5 oz., 25-100 gals....1.00 5 lb.5.85
1 lb., 80-240 gals... 2.25 10 lb. 800-2500 gals. 9.85

BLUE STONE

(Sulphate of Copper)

Applied in time it will prevent mildew and all fungus diseases. Also prevents smut on barley and wheat, by soaking seed to be planted in a solution of 1 lb. to 6 gallons of water for ten or fifteen minutes. May be sent by parcel post. Write for price.

DRY LIME SULFUR

Controls all scale and fungus diseases for which Lime-Sulphur Solution is recommended. More convenient to handle and saves freight on water. Put up in air-tight packages, which should be used when opened. For Winter Spray use 10 to 14 pounds to fifty gallons of water. For summer, in combination with Arsenate of Lead, use 2 to 3 pounds to fifty gallons of water.

Price: 1 lb. 30c; 5 lbs. \$1.25; 10 lbs. \$2.00; 25 lbs. \$3.75; 100 lbs. \$12.50. Postage extra.

FORMALDEHYDE

Treat Your Seed With Formaldehyde

A preventive for smut in grain—scab and fungus diseases or potatoes.

Formaldehyde is a clear chemical, resembling water, but has a peculiar odor. It is sold by the pound (pint). One pound is sufficient to treat 40 to 50 bushels of oats.

Prices: Pints, 60c; quarts, \$1.00; express or freight at purchaser's expense; cannot be mailed.

FUNGI-BORDO (Bordeaux Mixture)

In powdered form, mixes perfectly with cold water. For peach, tomato and potato blight all fungus diseases. 1 lb. 30c; 4-lb. pkg. 60c, f. o. b. Portland.

GRAPE AND ROSE DUST

Prevent mildew and black spot. This ideal dusting fungicide is easy and safe to use. Green in color—not unsightly. Colloidal sulphur base, combined with other fungicides.

1-lb. pkg. 35c; 5-lb. pkg. \$1.25, postpaid

SULPHUR

For Dry Dusting of Trees, Vines, Etc., Bleaching Fruit, Etc.

It has been proven and so recommended by the University of California that if you sulphur your grape vines and orchards six times they will not be affected by mildew or red spiders and rush. Write for quantity price.

WHALE OIL SOAP (Fish Oil)

This is not only an excellent insecticide for killing plant lice and fungus growth, but should be mixed with most all liquid sprays as it causes the spray to adhere much better to the leaves. 1 lb. 25c. Write for quantity price.

FERTILIZER SPREADER AND SEEDER

No. 505—Junior Spreader and Seeder for the medium size lawn. A highly efficient machine at a low price. Will handle any of the commercial fertilizers, sheep manure, lime, bone meal, ashes, etc., and grass seed. Has a wide range of adjustment, and an easy action spiral agitator which absolutely prevents clogging and insures an even uniform distribution.

Feed is adjustable by a wire rod on the handle, so that a light, medium or heavy application can be made, or shut off entirely when crossing walks, etc.

Heavy galvanized steel hopper 16x9½ in. at top, 8 in. deep, and holds 25 pounds of commercial fertilizer. Steel disc wheels and wooden handle. Weight 9 pounds. Price, \$3.25.

FERTILIZER SPREADER AND SEEDER

No. 500—Fertilizer Spreader and Lawn Seeder for all kinds of commercial fertilizer, sheep manure, lime, ashes, etc., and for grass and clover seed.

An important feature is the spiral agitator, which prevents clogging and insures a uniform even application to the lawn. Works with surprising ease, either push or pull, and has a wide range of adjustment. Quick adjustment is made by the wire rod on the handle, any desired feed is obtained and can be shut off entirely when crossing walks. Hopper is of heavy galvanized steel, with wood ends and hard wood handle. Size at top 12x21 in., 10 in. deep. Capacity 2½ pecks. 12-in. steel wheels. All attractively painted. Weight 25 pounds. Price, \$6.50.

STIM-U-PLANT

PLANT STIMULANT TABLET

A highly concentrated odorless fertilizer for the vegetable and flower garden, shrubs and house plants. The analysis is guaranteed 11 per cent nitrogen, 12 per cent phosphoric acid, 15 per cent potash, an ample amount of each plant food to insure a quick and strong growth of all plants.

30-tablet pkg. 25c; 100-tablet pkg. 75c; 1000-tablet pkg. \$3.50, postpaid.

SHEEP MANURE

Nature's Perfect Plant Food

A pure, natural, nutritious, pulverized manure that is immediate and lasting in effect. In preparing a flower or vegetable bed, use it liberally and incorporate well with the soil. It is also very valuable as a liquid manure and can be used at all times with safety. Contains no weed seeds, 50-lb. bag, 50c, f. o. b. Portland.

A New Treatment for Poultry Worms

One dose entirely effective against round worms given in mash. No fasting before or laxative after treatment. It is odorless and tasteless. No effect on feed consumption. Does not interfere with egg production.

Instant Louse Killer Guaranteed

Kills lice on poultry, horses, cattle; sheep ticks; bugs on cucumber, squash and melon vines; cabbage worms; slugs on rose bushes, etc. Sold in sifting-top cans. Look for the word "Instant" before buying

1-lb. packages, 30c; 2½-lb. packages, 60c.

DR. HESS POULTRY TABLETS

Formerly DR. HESS ROUP TABLETS

For Roup, Diphtheria, Chicken Pox and all catarrhal diseases. It has these distinctive features—it is anti-septic, slightly astringent, non-irritating and healing. 100-15 grain Tablets, 50c, postpaid. Guaranteed.

DR. HESS CHICK TABLETS

Formerly DR. HESS WHITE

DIARRHEA REMEDY FOR CHICKS

And all poultry affected with white diarrhea. Can be mixed with feed or put in drinking water. Pkg. 50c, postpaid. Guaranteed.

PAN-A-MIN

Pan-A-Min has been known to poultry raisers for more than 30 years as Dr. Hess Poultry Pan-a-cea.

It is now a greatly improved product. Pan-A-Min is of high value to moulting hens, in egg production, in reducing chick mortality, in bone and feather growth and in maintaining health.

It does not take the place of feed and no feed can take the place of Pan-A-Min.

1½-lb. pkg. 30c; 3 lbs. 50c; 7 lbs. 85c; 15 lbs. \$1.75; 25 lbs. \$2.50, postpaid. Guaranteed.

Wormoids

Large round worm infestation in poultry is a common condition. Many flocks are badly affected —yet the poultryman is not aware of it. The most common symptoms are general emaciation, wasting away or going light. If your flock is not in good health, it is a mighty good plan to look for intestinal worms.

GETS THE EGGS WHEN EGGS ARE SCARCE. KEEPS HENS HEALTHY.

This famous tonic GETS THE EGGS no matter how cold or wet the weather. Easily given in the feed, and beneficial to all poultry. Instead of feeding loafing hens all winter, you can now get big egg yields when eggs are scarce and high priced. Starts pullets laying early. Helps hens through the moult and starts them laying regularly. It must satisfy you, or we will refund your money.

ONE APPLICATION Does the Work

T. S. F. kills both old and young lice, including the lice that hatch from the eggs present at time of treatment. Easily given by pinch method, dip or dusting. Specially processed. Adheres to the plumage. Non-Irritating. One application lasts an entire season. Packed in special shaker-top cans with Government's directions for using.

35c Size (enough for 50 birds): Twice the 35c Size, 60c; Five times the 60c Size (Economy Size), \$2.50.

AVICOL Stops Chicks Dying

The Wonder Remedy for WHITE DIARRHEA or Cholera in chicks, and Black-Head in Turkeys Does work in 48 hours

White Diarrhea kills half of nearly every hatch of chicks. The strange thing is that so many people think this loss can't be stopped. But it can be stopped, without extra work, without troublesome dosing, and at almost no cost. For years, thousands have saved their sick chicks and raised nearly every chick in every hatch, by keeping Avicol in the drinking water.

Avicol is a bowel antiseptic. It makes chickens healthy and keeps them healthy. Costs less than a cent a day for an ordinary flock. Guaranteed. Price 50c; Large Size (Almost 3 times as much) \$1.

Group-Over

(Formerly Called Roup-Over)

For Colds in Poultry

Use this famous remedy at the very first symptom of colds in your flock. It clears the air passages and brings relief with magic quickness. Easily used, both for individual treatment and in the drinking water for flock prevention.

Leading poultry raisers everywhere now use Group-Over, the over-night remedy. It's so easy! So sure! There's no other remedy like it—nothing "just as good." Have a bottle ready to use when you need it. Price 50c; Large Size (3 times the 50c size), \$1.00.

If your flock is not in good health, it is a mighty good plan to look for intestinal worms.

SEED SHORTAGES

The drouth and unfavorable growing conditions in some of the seed growing sections has resulted in a very short supply of many items. It is almost certain there will not be enough cucumber and sweet corn seed for 1935 plantings, some varieties of onion, turnip, tomato, pepper, and squash are scarce, and there is none too much beet. We suggest that you order as early as possible.
